تحرير في التاريخ ١٢ مى سنه ١٨٧٤ ع

NOTICE is hereby given, under Section 6, Act, XI of 1859, that the undermentioned estates in the district of Jessore will be put up to public and unreserved sale at the Collector's office of that district on the 10th day of June 1874, for arrears of revenue and other demands which by the Regulations and Acts in force are directed to be realized in the same manner as arrears of revenue due on the 28th day of March 1874.

Class I.—Permanently-settled Estates.

No. 4585.—Chuck Kathalia in Soonderbuns, recorded proprietor Soodha Sindhoo Bundopadhya, sudder jumma Rs. 669 14-8, will be sold for arrears of Government revenue, Rs. 599-2-10.

No. 5041.—Dehee Kurora, Pergunnah Rajpore; recorded proprietors, Anundlal Chowdhry and others; sudder jumma of the entire estate, Rs. 934-7-6. The estate will be sold for arrears of Government revenue amounting to Rs. 5-9-6½, after deducting the 2nd, 3rd, 4th, 5th, and 6th shares of the proprietors, Ramnarain Chowdhury and others, Mathoora Nath Acharjee and others, Mathoora Nath Acharjee and Birmoroop Gossain; sudder jumma Rs. 194-10-10, Rs. 166-2-0, Rs. 57-9-10½, Rs. 9-7-7 and Rs. 167-14-8, respectively.

Class II.—Temporarily-settled Estate.

No. 58.—Abadkari right of Pergunnah Chandkhally in Soondurbuns, recorded proprietor Wooma Natn Chowdhury, farming lease to 1294 B.S., sudder jumma Rs. 1,404-15-0, will be sold for arrears of Government revenue, Rs. 944-15-0.

JESSORE COLLECTORATE, the 1st May 1874. A. SMITH, *Collector.*

Notice

Is hereby given that the land specified in the schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner, Nowgong, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Nowgong.

SCHEDULE.

A lot of waste land, consisting of about 697 acres, situated in mouzah Teliachapori, in the district of Nowgong, and bounded as follows:—

North.—By a line from pillar O on the east to pillar P on the west, touching the Deejoo Nuddee, distance 301½ yards. From pillar P to pillar Q on the north-west, distance 83½ yards. From pillar Q to pillar R on the west, distance 174 yards. From pillar R to pillar S on the north-west, distance 181½ yards. From pillar S to pillar T on the south-west, distance 128½ yards. From pillar T to pillar U on the north-west, distance 492½ yards. From pillar U to pillar V on the north-west, distance 393½ yards. From pillar V to pillar A on the north-west, distance 175 yards.

South.—From pillar D to pillar E on the east, distance 204½ yards. From pillar E to pillar F on the south-east, distance 38 yards. From pillar F to pillar G on the south-east, distance 104½ yard. From pillar G to pillar H on the east, distance 1040½ yards.

West.—From pillar A to pillar B on the south, distance 682 yards. From pillar B to pillar C on the south, distance 128½ yards. From pillar C to pillar D on the south, distance 660 yards.

East.—From pillar H on the south-west to pillar I on the north-east, distance 225½ yards. From pillar I to pillar J on the north-west, distance 128 yards. From pillar J to pillar K on the north, distance 60½ yards. From pillar K to pillar L on the north-east, distance 219 yards. From pillar L to pillar M on the north, distance 159 yards. From pillar M to pillar N on the south-west, distance 212 yards. From pillar N to pillar O on the north-east, distance 159 yards.

The pillars are marked A to V in the map filed in the office of the Deputy Commissioner, Nowgong.

NOWOONG, the 21st April 1874. J. F. SHERER, *Dy. Commr.*

Notice

Is hereby given that the land specified in the schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner, Nowgong, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner, Nowgong

SCHEDULE.

A lot of waste land, consisting of about 168 acres, situated in mouzah Nizori Khat Hatirgaon, in the district of Nowgong, and bounded as follows :—

North.—A line from pillar A, on the south of the Nizori Khat road, to pillar B, on the west, distance 154 yards; from pillar B to pillar C, on the west, distance 231 yards; from pillar C to pillar D, on the west, distance 231 yards.

South.—A line from pillar H, on the west, to pillar I, due east, distance 220 yards.

West.—A line from pillar D, on the north, to pillar E, on the south, distance 258½ yards; from pillar E to pillar F, on the south, distance 396 yards; from pillar F to pillar G, on the south-east, distance 110 yards; from pillar G to pillar H, on the south-east, distance 1,222 yards.

East.—A line from pillar I, on the south, to pillar A, on the north, distance 1,702½ yards.

NOWGONG, the 17th April 1874. J. F. SHERER, *Dy. Commr.*

NOTE.—The pillars are marked A to I on the plan of the land filed in the office of the Deputy Commissioner.

Notice

Is hereby given that the land specified in the Schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Sibsagar, will be sold by public auction at the said Deputy Commissioner's Office at 11 o'clock on the 3rd day of August 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Sibsagar.

SCHEDULE.

A lot of waste land, consisting of 700 acres, situated in Mouzah Kataneegaon, in the district of Sibsagar, and bounded as follows :—

South.—By a portion of the Dhodur Allee Road, between Hattighur and Noa Allee Road, distance 122 chains, 91 links.

South and East.—By the Noa Allee Road, distance, 105 chains, 19 links from the Dhodur Allee Road.

West and North.—From junction of Hattighur Road with the Dhodur Allee to a point distant 76 chains, 58 links, thence by a straight line through the forest, 21 chains, 20 links in length; then, following the south-west boundary of Mr. Begg's pottah land, distance, 51 chains, 80 links; next, the south-east boundary of the said pottah land, distance, 47 chains, 73 links; next, the north-east boundary of the said pottah land, distance, 51 chains, 17 links; and from the last point, continuing through forest to a point on Noa Allee, 105 chains and 19 links from the Dhodur Allee Road.

SIBSAGAR, the 4th April 1874. W. H. J. LANCE, *Deputy Commissioner.*

Notice

Is hereby given that the land specified in the Schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause. For the conditions of sale, see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of 1,087 acres 1 rood 20 perches, situated in Pergunnah Berkhola, Mouzah Abong, in the district of Cachar, and bounded as follows :—

East.—The Abong river from pillar No. 1, at confluence of the Abong and Cacharee Cherra with the Dooloo river, to pillar No. 2, on the banks of the Abong and at the foot of the Casce Teelah to the north; thence, to pillar No. 3, on the top of the same teelah, and No. 4 pillar at the northern foot.

North.—From pillar No. 4, as above, to pillar No. 5 on the banks of the Mewah Cherra.

West.—From pillar No. 5 along pillars Nos. 6, 7, 8, 9, and 10, at the edge of the jungle on high teelahs to the west, and along No. 11 on the banks of the Cacharee Cherra.

South.—The Cacharee Cherra, between pillars No. 11 and No. 1.

The pillars are numbered from 1 to 11 on the map filed in the office of the Deputy Commissioner of Cachar.

SILCHAR, the 27th April 1874. O. G. R. MCWILLIAM, *Offg. Deputy Commissioner.*

Commissioners for making Improvements in the Port of Calcutta.

NOTICE.

UNDER SECTION 69 OF ACT V (B.C.) OF 1870.

THE following Packages, landed at the Jetties from the undermentioned Ships, have been removed to the Commissioners' Import Warehouse, where they remain at the risk and expense of the owners. If not cleared within two months from the date stated against each item, they will be sold under Section 72 of the said Act.

Notice.

MESSRS. MACKENZIE, LYALL AND COMPANY will sell by auction at the Exchange Hall at 1 P.M. on Monday, the 8th June—

S K No. 770, one case Musical Boxes, *ex* "Meinam,"

taken over by the Collector of Customs under the provisions of Section 27, Act VI of 1863.

Great Eastern Hotel, Wine and General Purveying Company, "Limited."

PROCEEDINGS of the Twenty-fourth Half-yearly Ordinary General Meeting of Shareholders of the Great Eastern Hotel, Wine and General Purveying Company, (Limited,) held at the Registered Office of the Company, Nos. 1, 2, & 3, Old Court-House Street, Calcutta, on Saturday, the 30th May 1874, at 3 P. M.

PRESENT:

Mr. J. J. Bradley.
" W. A. Chambers.
" Nundo Gopal Chunder.
" A. Cumming.
" G. D'Souza.
" J. A. Gregory.
" Stuart Hogg, C. S.
" Fred. Jennings.
" W. A. Jones.
" G. H. Kiernander.
" J. S. Livermore.
Mr. P. C. Mittra.
" A. G. Roussac.
" C. T. Wallis.
" A. H. Wallis.
" J. F. Watkins, by his Attorney.
" Algernon Watkins.
" James Wilson, Jr.
" J. H. Williamson.
" G. Williamson and David Wilson, by
" their Attorney.
" J. H. Williamson.

The Secretary having read the notice convening the meeting, the following Resolutions were put:—

1st.—Proposed by Mr. Fred. Jennings,
Seconded by Mr. J. S. Livermore—
"That J. H. Williamson take the Chair." *Carried.*

2nd.—Proposed by the Chairman—
Seconded by Mr. Fred. Jennings.
"That the Directors' Report for the year ended 28th February last be received and adopted."
Carried, with one dissentient.

3rd.—Proposed by Mr. J. S. Livermore.
Seconded by Mr. G. H. Kiernander.
"That the account for the year ended 28th February last, as printed and circulated (with the Directors' Report) among the Shareholders be passed as correct."
Carried, with two dissentients.

4th.—Proposed by Mr. Peary Chand Mittra,
Seconded by Mr. J. A. Chambers—
"That the election of Mr. Fredk. Jennings as a Director (in the place of Mr. J. B. Knight, proceeded to England) be confirmed.
Carried unanimously.

5th.—Proposed by Mr. A. G. Roussac,
Seconded by Mr. Chas. T. Wallis—
"That a final dividend of four per cent., or Rs. 10 per share, aggregating six per cent. for the year, be declared, and payable on and after the 1st of July next."
Carried, with one dissentient.

6th.—Proposed by Mr. A. H. Wallis,
Seconded by Mr. G. Kiernander—
"That Messrs. Ogbourne and Nicholls be re-elected Auditors for the current year."
Carried unanimously.

7th.—Proposed by Mr. A. G. Roussac,
Seconded by Mr. J. A. Chambers—
"That the retiring Directors, Messrs. Livermore, Peary Chand Mittra and Fred. Jennings, be re-elected Directors for the current year. Mr. J. H. Williamson, as Mr. David Wilson's representative, retaining his seat as a Director."

Amendment.
Proposed by Mr. J. J. Bradley,
Seconded by Mr. C. T. Wallis—
"That the following gentlemen be re-elected Directors for the current year, viz.—
Mr. F. Jennings,
" J. S. Livermore, and
" James Wilson, Sr."

These gentlemen were voted for separately, and upon a show of hands, the Chairman declared the election of Mr. F. Jennings and Mr. J. S. Livermore to be *carried unanimously*, and of Mr. James Wilson *not carried.*

8th.—Proposed by Mr. J. A. Gregory,
Seconded by Mr. N. G. Chunder—
"That Mr. Peary Chand Mittra be re-elected a Director."
Upon a show of hands, the Chairman declared the election *duly carried.*
With a vote of thanks to the Chair, the proceedings terminated.

CALCUTTA, the 30th May 1874. (219—1) J. H. WILLIAMSON, *Chairman.*

Notice.

A SPECIAL MEETING of the Justices of the Peace for the Town of Calcutta will be held at the Town Hall on Thursday, the 11th June 1874, at the close of the Ordinary Meeting to be held on that day.

BUSINESS TO BE BROUGHT FORWARD:

(1.) To consider applications for Jute Warehouse Licenses.
(2.) To consider Estimate for conservancy arrangements at Salt Water Lake, as prepared by Finance and Conservancy Committees.

ROBERT TURNBULL,
CALCUTTA, the 2nd June 1874. (218—1) *Secy. to the Justices of the Peace.*

BENGAL FAMINE.

EIGHTEENTH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL, FROM THE 15TH TO 28TH MAY 1874.

THE Lieutenant-Governor, Sir Richard Temple, writes from Monghyr on the 25th May, the following remarks to be included in this narrative:—

"During the fortnight I have been staying on the banks of the Ganges, "in the midst of the distressed districts, and holding frequent conferences with "the principal officers."

"The main points under consideration during the period—

"1*st*.—The number of persons receiving or likely to require assistance "from Government in some shape or other;

"2*nd*.—The completion of the transport of the Government grain, "and the available resources in respect of carriage;

"3*rd*.—The consumption of Government grain, and the amount "remaining in store;

"4*th*.—The system of labour and payment on the relief works, and "the progress of charitable relief;

"5*th*.—The prospects of the season;

"6*th*.—The general working of the relief system."

"The first point, then, relates to the number of persons receiving or likely "to require assistance from Government. Writing on the 11th May, just a fort-"night ago, I stated the number to be two millions as nearly as could be made

"out. A week later, writing with corrected information in several respects, "I have (in a separate Minute) stated the number as 2,224,000. During the "several subsequent days the number is known to have been increasing every- "where. I now estimate the total at upwards of two millions and a half, which "number may be expected to increase day by day for some little time to come. "It might, however, increase considerably before reaching the maximum "number of our estimates—three and a half millions of souls. The persons "counted as receiving assistance from Government are relief laborers, recipients "of charitable or gratuitous relief, purchasers of grain from the Government "stores, and cultivators obtaining from Government advances of food-grain."

"The numerical increase will probably not be in the heading of relief "laborers, they may ultimately amount to one million and a half, but there are "many reasons for thinking that all or nearly all of those who would naturally "resort to labor for relief have already been attracted to the works, large and "small, which are now well within reach of every village. The number of those "on charitable relief will increase no doubt, and may soon exceed a quarter of "a million, and may further increase. But unless some new circumstances should "develop themselves during the rainy season, we may hope that this category "will not swell to such a degree as to considerably affect the totals. It is "rather under the head of purchasers of grain from Government stores that "the increase is to be expected. In my last narrative (11th May) I described "the tracts and the places where the sale of Government grain is going on. "The measure has not been since extended anywhere save in the sub-divisions "of Durbhunga and Seetamurhee, and on the north frontier of Chumparun. "At Durbhunga the native grain merchants distinctly stated that a compara- "tively small stock of rice remained in East Tirhoot; that little or none was "immediately coming; that they could not undertake to import anything at "present, but that they would buy wholesale from the Government depôts, retail "among the people. In other places the petty dealers have stated that as there is "hardly any more grain to be sold, their occupation is temporarily passing "away, and, therefore, they ask to be allowed to purchase grain from the "Government depôts, so that they may thus get a little stock-in-trade whereby "they may make a living. Inasmuch as these persons are ordinarily the sole "retailers of food to large sections of the people, the importance of imme- "diately supplying them with Government grain is manifest. In many "other places an examination by our own officers of the weekly markets has "shewn such a depletion of stocks as to leave hardly enough for the current "supply. In all such cases everywhere the district officers have received the "strictest orders to act on the sale rules; and, as I believe, they are so acting, "to the great comfort and encouragement of the people. Wherever "the depôts have been opened the public have immediately resorted to "them either as purchasers direct, or as dealers to retail to others. At "some points near the northern frontier our officers have been half "afraid to open the depôts lest there should be a run of Nepalese purchasers on "the stores. I have directed however that the depôts must be opened there, "even though numbers from Nepaul should flock to buy. Notwithstanding "this, however, there is still a considerable field open for private trade and "enterprise nearly as large as that indicated in my last narrative."

"The heading of 'cultivators receiving advances of food-grain' has not "largely developed itself as yet; the number hardly exceeds* 60,000. But many "experienced persons warn us that distress has crept up to the middle section "of the ryot or cultivator class; the lower section is already on the relief "works; the middle section will be content with advances of grain, to be repaid "hereafter."

"The second point is the completion of the transport of the Government "grain and the available resources in respect of carriage. Out of the "346,911 tons to be transported north of the Ganges only about 6,000 tons "now remain. The transport by rail, once a matter of some anxiety, is now "concluded. Besides their ordinary traffic the East Indian Railway carried

* *Note.*—This number of 60,000 represents heads of families; the number of persons supported by advances given out during the last fortnight must be about 300,000

"320,000 tons of Government grain within the space of six months, and the "Eastern Bengal 66,000 tons within the space of five months. In both cases "the work has been finished within the time proposed."

"Of the various lines and routes of inland transport the only one where "anything remains to be done is that of Eastern Tirhoot. Out of 154,000 tons "to be carried away from the north bank of the Ganges for East Tirhoot "135,000 tons have been carried, out of which 77,000 tons have been stored "in the depôts and granaries, the remainder being on its way. Of the "quantity which is thus on its way, some part is within easy distance "of the depôts, while some part has still some distance to traverse. Thus, "while other lines are fortunately closed, the East Tirhoot line is in the "extreme tension of activity, so that the grain may be all stored before "the setting in of the rains. It was unfortunate that on this the most critically "important of all the lines there was the largest defection of the locally hired "carriage. Despite the efforts and services of the many contractors on this line "(all European gentlemen, indigo planters, and landholders of position and influ-"ence), it has been found impossible to produce or to retain anything like the "number of carts necessary for the timely performance of the service which we "required. When these several contracts were undertaken it was understood "that 27,000 carts in all would be brought into the field, and it was certain that "nothing short of this large force would properly suffice. But no more than "20,500 really appeared at the middle of February, and after a time there was "a falling off below even that number: at the end of April there were not more "than 16,500. At the present time, the end of May, the number does not "exceed 14,000. Thus the transport department was actually short of its "supplement by 6,500 carts at the beginning, that is, the middle of February; "about 10,500 carts at the end of April; and by 14,000 carts at the end of May. "These facts are mentioned not at all by way of disparaging the merits and "the exertions of the various contractors. Their difficulties were indeed of "that ordinary kind, namely, the difficulty of keeping the carts in employ "in the midst of much competition with other private employments, the rough-"ness and heaviness of the cross-country roads; sickness among the cattle from "fatigue in the hottest time of year: scantiness of fodder and of water. But "these ordinary difficulties which befall all our contracts, more or less, did "really beset these particular contracts with more than ordinary severity."

"But it is evident that had we relied on these contracts alone, a large "portion (from one-third to one-half) of the grain allotments for the most "distressed part of the whole drought stricken country must have remained "un-carried on the north bank of the Ganges. It is unnecessary to describe "the fatal consequences that might, indeed, perhaps must, have ensued. In "fact, however, we were very far from relying on the local contracts alone; we "were permitted by the Government of India to arrange strong reserves, consist-"ing, *firstly*, of the Railway from the Ganges to Durbhunga; *secondly*, of the means "of transport provided in the North-Western Provinces. The Government of "India itself undertook the emergent construction of the railway; the obtaining "of the carriage from the North-Western Provinces was left to the Government "of Bengal. The railway has carried, or will carry, about 40,000 tons of grain, "not indeed up to the depôts, but for a considerable distance towards the "depôts, thereby saving so much of carting. The reserve carriage from the "North-Western Provinces, now actually serving in the field, consists of—

"Carts (3 to 4 bullocks each)	3,350
"Pack-bullocks	2,900
"Pack-ponies and mules	7,500
"Camels	1,400

"Besides these, we have recently hired for supplementary service in East "Tirhoot—

	Carts.
"From West Tirhoot, on completion of contracts there ...	2,000
"From the Sarun district	850

"Lastly, we have arranged with the Monghyr contractor to carry 12,000 "tons to East Tirhoot."

"By these various means all the deficiencies above explained are made up "for, and there is a good hope that this vitally important operation will be "concluded in due time. It may be well to bear these circumstances in mind, "when statements are sometimes made which, if true, would tendto prove that "the organisation of so large a reserve of Government carriage was unnecessary. "It has been seen, however, that it was absolutely necessary—the necessity having "been proved by the event. Instantly on being landed on the north bank of the "Ganges, every cart with its bullock, every pack-bullock, mule, pony, camel, "has been marched off on urgent service. The reserve carriage has been all "brought into action immediately on its appearance on the field."

"That portion of the reserve which consists of camels and ponies collected "in Northern India from great distances may not unnaturally have attracted "some notice, and may perhaps appear at first sight to involve unnecessary "labor and trouble. But reflection on the nature of the case will show the "expediency, almost the necessity, of so arranging, that with so large a number "of animals in service, the whole should not be of one kind. Otherwise an "epidemic might have simultaneously prostrated most of the animals on any "line of transit: and there have been apprehensions especially of such disease "breaking out among the bullocks. At one period such fear much prevailed, "and had the symptoms become at all aggravated, we were quite prepared to "bring into the field ponies and camels to a number double that which we "actually have produced."

"When the main transport work is over, these ponies and mules will be "most useful during the rains in distributing supplies among the villages, "when all the bullocks of the country are required for agriculture. With this "view, I have further ordered all the pack-ponies, which are abundant in the "Purneah district, to be enrolled and retained for service, if needed."

"The rates of payment arranged with the various contractors were certainly "much higher than those of ordinary times; and from this an inference seems "to have been drawn that undue liberality was shown by the local authorities "in framing the contracts. Such augmentation of rates was, however, to be "expected under the stress of an intense demand when the prices of the agri- "cultural staples were double, or even treble, the average of ordinary years. In "most districts the rates have proved sufficient to ensure success, and doubtless "must have yielded profit to the contractors. But, then, the contractors were "planters and landholders, who had to exert all their landed influence, all the "good-will of their connection, to carry out this work. And such forces could "not be enlisted in the Government service without allowing liberal rates. Those "contractors who have made profits are just those who have done their work well "within the time, thereby rendering valuable aid to the Government and to the "people. In one main line, however, East Tirhoot, the most important of all, "even these rates have proved insufficient, and hardly more than half the "required work was effected under their operation. So far from the high "rates being too high here, the only question could be as to whether they "were high enough."

"In Tirhoot especially the local officers tried for several weeks to work at "lower rates and failed to obtain more than a small part of the carriage required. "In some districts, where the quantity to be carried was less and absorbed "only the spare disposable carriage of the locality, lower rates have been adopted "with success. In other districts, again, where the amount exceeded the power "of such spare carriage, and the agricultural and private carriage came to be "indented upon, the lower rates, which at the outset sufficed, became ineffec- "tual, and higher rates had to be offered. In instance after instance have "our officers held out to the last against raising the rates, but have been "obliged to yield in order to save the business from failure."

"In one only of the several contracts in North-East Tirhoot we found it "desirable to allow some special compensation for the bullocks proved to have "died, and the carts proved to have been broken to pieces, on the service. "this, too, may be thought at first sight by some to be an unnecessary conces- "sion. But it was allowed at a critical time, when some thousands of bullocks "had died from a disease since allayed, when there had been heavy damages on

" a rugged line of country, and when the cartmen were deserting with their carts to " an extent which threatened the breaking up of the transport. It was also limited " to the particular contract which had suffered, and it was offered on the condition " that the carts with bullocks should within a specified date return to the " service. The measure immediately stopped the tendency to desert, and had " some success in recovering the carts: out of 3,500 carts which had been lost " about 1,000 returned. The result shows that the measure was most desirable, " and that the terms were not too liberal."

" With the approval of the Government of India, I have arranged that " the river steamers and barges coming from England, together with those " constructed in Calcutta, and with 800 canoes from Oude, and 4,000 Ganges " boats retained locally for service, shall be divided into appropriate detach- " ments and stationed at the mouths of each of the main affluents of the " Ganges—to be a reserve of water-carriage for inland navigation, and to carry " succour to distressed localities, if necessary, during the rainy season."

" The third point is the consumption of Government grain, and the amount " remaining in store. Up to the end of April not more than 20,000 tons of " grain were issued from the Government granaries. As these issues are made " from a large number of granaries scattered in remote places, it is hard to " speedily obtain a correct return, and I am not yet able to state precisely the " amounts issued during the first fortnight of May. I calculate, however, that " they can hardly exceed 30,000 tons. Thus we may consider that by the " middle of May only 50,000 tons can have been issued out of 390,000 tons " provided and allotted, leaving full 340,000 tons in store for consumption " after the middle of May. It is evident, then, that the supplies are adequate " for a consumption greater even than that which has been estimated. But " though the consumption was (for reasons explained in my last narrative) much " less at first, it will probably become much greater from and after the middle " of May. From a statement just received, I learn that in East Tirhoot alone " (that is, the two sub-divisions of Durbhunga and Mudhoobunnee,) the sales of " Government grain to the public are now amounting to 700 tons a day. " In all the distressed districts the persons on relief works and on charitable " relief (about two millions in all) would, at the rate of three-quarters of a seer " per head per diem, be consuming nearly 1,400 tons a day, and I have reiterated " the strictest orders that to all of these the Government grain is to be sup- " plied. I will not at this moment attempt a complete estimate on a subject " which the experience of the next few days will elucidate. But there are " several considerations already patent to show that large as our stores may be, " the demands upon them will be large also."

" The fourth point relates to the system of labor on the relief works, and " the progress of charitable relief."

" During the fortnight under review, piece-work (or the contract whereby " a man is paid at a fixed rate upon the quantity of work he does) or task- " work, whereby a man is obliged to do a certain amount of work in order to " obtain his daily wages, have been enforced throughout the relief works, in " all districts with but few exceptions, which occur in East Tirhoot, where the " laborers are still on daily wages without the exaction of a specified amount " of work. Out of the total of 1,450,000 persons on the works, not more than " 180,000 are on daily wages, the remainder being on piece-work or task-work."

" That this system fully affords relief to all who are willing to work, " and is so far entirely effective and successful, is admitted probably by every " one competent to judge. The only doubt which would seem to be felt by " some is whether this system is not too liberal, whether its bounty is not " abused by some, and whether the general result does not tend towards " demoralization, that is, towards rendering the laboring classes disinclined to " labor in future. As we are duly anxious to avoid any such result, I will " endeavour briefly to explain the position of the case."

" It is unquestionable that the daily wage system, as it prevailed for some " short time in many of the relief-works, especially in North-East Tirhoot, did

" directly conduce to demoralization. But this was at the moment unavoidable. " A famine panic suddenly set in; crowds in tens of thousands day after day " came trooping to the works; they congregated and clung to particular works, " and refused to obey the orders to separate off into gangs on small works, " where order could be introduced. As they all were in severe straits for food, " it was at the out-set necessary to feed these unmanageable multitudes and to " get what work could be got from them, which proved very little, and the effect " was for the moment demoralizing. This was in the last week of March. " Orders were, however, immediately given for systematically distributing " them among better regulated works, and a beginning was soon made. About " a fortnight afterwards, that is, early in April, an attempt was made to impose " a piece-work system on the whole of them. Thus, no time was lost in " counteracting whatever demoralization may have begun. My narrative of " the 30th April showed that, on receiving the orders regarding piece-work, " the people left the works under some misapprehension, and remained absent " for several days, suffering severe privations. Afterwards, on the promulgation " of revised terms of piece-work, they returned to work, many of them in " a low and reduced physical condition. They have subsequently accepted " piece-work, which virtually compels them to labor. If, then, these poor people " fancied for a time that they could live in idleness on State bounty they " were soon undeceived. Indeed, many of them must, during their week " of absence, have learnt a hard lesson. The penalty, though self-inflicted, " through their own misunderstanding, must none the less have corrected any " demoralization which might have begun to spring up. I therefore fail to " see how the people of North-East Tirhoot can have been ultimately demor- " alized by the daily-wage system which a brief time prevailed."

" Since the preparation of the last narrative another instance has occu " in the Dinagepore district. Some large gangs of laborers left the works w ien " the terms of their employment were rendered more stringent. On inquiry " it was found that they had been saving some part of their daily wages, which " savings were hoarded against the rainy season when the works woul be " closed. It is probable that with these hoarded sums they will ultimately " purchase rice from the Government stores. In this case, however, some " demoralization might have ensued had it not been promptly stopped. The " men had been but a short time on the works when they were discharged."

" There are, as already shown, some considerable numbers still on daily " wages, which however is being constantly reduced. Most of them are very " poor people for whom it is difficult to provide in any better way. And the " wages allowed them—1½ anna a day for a man in Behar, 2 to 2½ annas in " eastern districts—are the lowest possible in such a year as this; enough indeed " to support life in ordinary years; but now, with the great rise in prices, enough " to afford only a meagre and jejune subsistence. Thus no motive is allowed " to exist to induce people to do light work on a closely restricted allowance " when they might earn a comfortable modicum of food by working harder."

" Similarly with the task-work system the wages are kept low; hardly " higher than the daily wages above described; and inasmuch as a day's " work is exacted, the result is that these people are working for what is a " stinted subsistence relatively to the high prices of the day. No process " of demoralization can therefore have developed itself with them."

" For the piece-work the rates now allowed do undoubtedly appear more " liberal for the skilled and the industrious, especially in Eastern Tirhoot, " where the last rate is from 5 to 6 annas per 100 cubic feet of " earthwork. But they were framed in order to suit those large numbers " who, originally of a poor physique, had been recently lowered in condition. " The pressure, so to speak, had to be regulated according to the weakest part " of the beam. Under these rates the people do earn subsistence by giving " a day's work, which they could not be made to give under any other plan. " As their strength and condition become established, and their practice " improves, they can perhaps earn more than a bare subsistence. Being

"anxious that the State charity should be administered with as much thrift "as is safely possible, I have authorized a reduction of the rates to 5 annas "per 100 cubic feet, and in some cases to 4½ annas, wherever the relief authorities "think that this can be properly attempted. It is hoped that with firmness "and patience the reduction may be effected in many places. With this "very large class of labourers again there is nothing to bring about demoral-"ization."

"But under any of these piece-work rates—indeed under any rate that "would be suitable for the weakly and the unskilled—the strong and the "skilled will make more than a subsistence. Numbers of persons and families "are making more than such subsistence. Some instances are narrated of the "profits of individuals from piece-work labor, which may be exaggerated. But "there are many authenticated instances of labourers, with the help of their "wives and children, earning amounts daily either in kind or in cash, which "prove a diligence and an energy which would hardly be believed were it not "thus demonstrated. The surplus earnings over and above subsistence are "all saved up against that dreaded interval of time between the closing "of the works (ere the commencement of the rains) and the gathering of the "next crop. Such remarkable and praiseworthy conduct is not, I fear, "evinced by more than a small number out of the whole."

"Others manage to earn by piece-work, in a very few hours, enough for "daily food, and then spend the rest of the day in working up their parched "fields in the hope of showers. With some families, again, all the members "used to work; presently the man learns how to earn single-handed enough "for himself and his family. Then he naturally leaves his wife and child-"ren at home with their domestic duties, and he labours alone on the "works. Such classes of instances and others that might be produced "are creditable to the people, though probably they do not comprise more "than a large minority out of the total. Still, according to the best inform-"ation, it appears that in very many cases, under the liberal piece-work rules, "a family does earn from four to five seers a day, on which quantity they can "live and save a little besides. It is for this reason that I have authorized "the trial of a slightly reduced rate, wherever it is deemed safe by the officers "on the spot."

"I have considered whether the hardest working persons could not be "kept in gangs by themselves on a less liberal rate of piece-work; but all our "officers deprecate this—because it is the presence of these persons, and the "example of their benefit from diligence, that encourage all the inferior "workers to exert themselves."

"Now, in all these cases which I have described, there is no sign of "demoralization—indeed the tendency is in the opposite direction; and the "nature of the contract tends to stimulate industry. The instances of high "earnings which most excite remark, and at first sight seem to portend "demoralization, are nevertheless the very cases which indicate a salutary "moral process, inasmuch as the persons have been awakened and spurred into "a state of diligence and forethought which they had perhaps never evinced "before: and all the other cases of the same kind, though of less degree, "afford evidence of the same healthy moral influences."

"Again, whatever the relief labourers save in grain or in cash in the "months of April and May, is so much to the good as regards expenditure of "Government grain in the months of June, July, and August. For those who "save at the present time will not come on our hands hereafter when the works "will be closed. Had they not saved in this manner, they would either come "on gratuitous relief, or they would obtain advances. But they will do neither "of these things if they succeed in saving now. The savings then only "constitute a slight forestalling of Government assistance; and this in a "manner calculated to have a beneficial effect morally upon the people, and to "cultivate in them some of those qualities in which they are probably deficient."

"Having thus examined briefly each class of cases, I cannot find that any "seeds of demoralization are being sown amongst the laboring classes by the "relief labour system. And wherever anything like incipient demoralization "shewed itself, corrective measures have been adopted. I admit, however, that "the utmost vigilance is necessary to prevent demoralizing influences being "generated. And all those who, as private employers of labour, are justly "interested in the matter, may rely on such preventive watchfulness being "maintained by all our officers."

"As regards the progress of charitable relief, I believe it may be said "that there has been a careful inspection by Government officials village by "village of all the distressed tracts, in order to search out all persons deserving "of this relief, and every such person has been furnished with a certificate "entitling him or her to subsistence. If consideration be given to the extent of "country, 350 miles in length with a mean breadth of 70 miles, comprising pro- "bably 27,750 villages containing 2,096,843 houses, then the nature of the "operation, so comprehensive in its proportions, so minute in its details, can "be appreciated. It is now understood by all concerned that this portion of "the general relief, as it is purely and absolutely charity, will be defrayed from "the moneys subscribed by the benevolent public in England, in India, and "in other countries, supplemented by an equal amount from the Government of "India; also, that the relief thus afforded by public charity may be dispensed "with a degree of tenderness and generosity which would hardly be justifiable "in the dispensation of State aid. Such liberality will be shewn—

"*Firstly*—By extending assistance largely to classes who, though sorely "straitened, yet cannot work; such as Brahmins, and other high-caste people, "some classes of Mahomedan widows and friendless persons, petty manu- "facturers, and artisans of fabrics, for which the demand is temporarily "stopped.

"*Secondly*.—By allowing to persons on this kind of relief various little "comforts and accessories.

"I have earnestly impressed on all our officers what I understand to "be the wishes and intentions of the benevolent subscribers in these respects.

"The fifth point relates to the prospects of the season. From Bhagulpore "eastwards the prospect is good, good showers having fallen from time to time. "But from Bhagulpore westwards, comprising the greater part of Behar, and "especially Tirhoot, the prospect, up to the 24th of May, was unsatisfactory, and "was causing anxiety to the people, little or no rain having fallen during the "month. This uneasiness aggravated the prevailing distress by inducing those "who posessed grain to hold it—in consequence, the food-supply was becoming "deficient in the markets, even of localities previously believed to be safe "from distress. An undefined dread of some misfortune to the next crops, to "be expected in September, is perceptibly influencing and contracting the "internal distribution of food-grains throughout the distressed districts, and "is thereby intensifying the pressure on the State relief operations. This "indirect manifestation of the popular feeling has led us again to consider the "adequacy or otherwise of our preparations. And careful calculations shew "that these preparations are adequate, even to the contingency of a partial "failure of the September harvest, in addition to the contingencies previously "provided for. The maximum number to receive assistance being assumed "at 3½ millions of souls.

"At the present moment of writing, however, timely rain-storms are "descending in various parts of Behar, though I have not yet heard of their "falling in all or the most distressed localities. Wherever they fall, instantly "the drooping hearts of the people revive, and countless ploughs are pushed "on into the furrows.

'The sixth point relates to the general working of the relief system. I "believe that this system, as now developed in its several ramifications—its relief "labour, its charitable relief, its advances to cultivators, its sales to the public— "is calculated to meet, does actually meet, all the existing distress, and will "continue to meet the distress as it assumes modified shapes, together with the

"changes of season in all the districts known to be distressed. This general "statement, too, is safely made notwithstanding the occasional accession of dis- "tress as in parts of Cooch Behar, of Manbhoom, of Burdwan. The absolutely "comprehensive character of the system for all the distressed classes being "beyond question, the only question that could be entertained is whether it "does not comprehend some classes or some persons not really distressed. Now, "it is almost certain that those who receive charitable relief and those who "obtain advances, do really need assistance, as each individual case must have "been investigated; also that those who buy from the Government stores "really need the purchases they make, especially as sale is never authorized "in any locality until the European officer has found on inquiry that "food-supply is deficient. The same certainty cannot be declared as "regards the relief works, where it is possible that amongst such large "numbers some persons not really distressed might gain admission. But such "cases are comparatively few, I believe, and so far as I know, every "officer employed believes that nearly all the persons on these works need the "relief more and more each week as the season advances. Most of those who "had any of the slender resources wherewith the poorest classes in all years "have to support themselves through the slack months of early summer, "exhausted these resources before they came on the works, though some of "them still had or have a little, very little, store treasured up against "extremity. If the relief works did not exist, the great majority would have "literally nothing to eat; some might have enough for a very few days. "None could get any bread-winning employment until the rains begin, and "during the interval, between the middle of May and the beginning of the rains, "it is difficult to understand how any of them could preserve themselves from serable emaciation, or how the majority could escape death. A restrospect "of these operations shows that the people were at the outset remarkably slow "to avail themselves of the relief works; that in many tracts severe distress "first became known, not at all by the people using their opportunities of com- "plaining, but by the investigations of our own officers; that in the less "distressed districts, and in the less afflicted parts of the distressed districts, "the people do not resort to the relief works; and that all the localities where "they have largely resorted to the works have been those localities where a "widespread destruction of the crops has occurred."

In addition to the above remarks recorded by Sir Richard Temple, the following specific information, with regard to the various matters noticed in former reports, is added :—

Weather and rainfall.

The latest returns show a general want of rain except in Bhagulpore, Rungpore, Dacca, Sylhet, and the districts of the Chittagong division. In Furreedpore a good fall has been recorded, but it is said to have been partial. Since the date of the returns received by post, telegrams have come in reporting copious rain in the north of Chumparun, and a fall of $\frac{9}{10}$ths of an inch at Mozufferpore, 1·12 fell at Maldah, 1·20 at Moorshedabad, and $\frac{1}{2}$ an inch at Hooghly. Rain is now urgently wanted in all districts where it has not fallen; though, except in districts where much early rice is sown, it may be delayed for some days longer without materially injuring the prospects of the coming crops. The continued drought has, however, caused the water-supply to run short in several districts; and if it were not for the large number of relief labourers available for deepening tanks, considerable suffering would have been felt in many districts from the want of water, and large numbers of cattle would have perished.

State of the crops.

2. At this time of the year the prospects of the crops vary almost from day to day, according to the rainfall, throughout the greater part of Bengal and Behar, while in the eastern districts the state of the rivers must enter as an element into the calculation. From almost every district the latest returns tell the same tale that rain is urgently wanted; and in some districts, as in Rungpore, while the rainfall has secured the crops for the present in the north and east of the district, those

in the west and south, where no rain has fallen, are said to have suffered much and to be in a critical condition.

In Furreedpore, where rain has not fallen, the late rice is said to be likely to suffer from the rapid rise of the river, as it is not sufficiently vigorous to keep its head above the floods as they rise.

The crops of kaon and boro rice have been harvested, except in Behar, where they are being cut, and are said to have been very good in Dinagepore, Maldah, and Rajshahye.

Seed-grain.

3. Extended inquiry shows that generally the supply of seed-grain, except in certain peculiarly situated tracts and in a few villages, will be sufficient, and but little aid will be wanted from Government except in the way of loans to those that cannot afford to pay high prices. Of the small Government supply reported as ordered in the last Narrative, 68,911 maunds has been delivered in Calcutta, besides 20,000 maunds which has been received up-country. From all accounts it is believed that this quantity will be found amply sufficient to meet all requirements.

Prices.

4. Prices show a tendency to rise generally, though, on the whole, pretty steady. Throughout the Burdwan Division there has been a slight rise in all districts except Beerbhoom. In the Presidency Division, grain is decidedly dearer in Calcutta and in Jessore, though in the latter district the last weekly returns show symptoms of a fall. In the Rajshahye Division, there has been a rise of prices in Rajshahye, Rungpore, and Bogra; they have fallen somewhat in Dinagepore. In Maldah and Pubna a rise in the middle of the fortnight has been followed by a fall to former level at its end. In Julpigoree there has been a sudden rise from 11 seers to 8, which has caused a good deal of distress. Prices remain steady in Mymensingh and Backergunge, and have risen considerably in Dacca, Sylhet, the Chittagong Hill Tracts, and Hill Tipperah. In Noakhally they are lower; and in Furreedpore common rice remains stationary, while other grains are somewhat higher. Throughout Behar prices have only risen in the Sonthal Pergunnahs, and they have fallen somewhat in Patna (except in the case of barley and gram, which have risen from 19 to 18 seers), Sarun, Chumparun, and Monghyr. In the other districts there is but little change. In Chota Nagpore, prices have risen in Manbhoom and Hazareebagh, while they have fallen somewhat in Lohardugga. In Orissa, there is no change in Cuttack, but the market has an upward tendency in Balasore. Prices are falling at Pooree.

Supply of grain.

5. With the exception of the districts mentioned in last narrative as being dependent chiefly on Government grain, no deficiency of supplies has been reported; and except in Mozufferpore, where the supply has been generally more scanty throughout the previous fortnight, the markets have been generally well supplied. We can now confidently say that Government grain is to be had in abundance wherever the supplies furnished by private trade are deficient, and orders have been given to sell in all cases where a deficiency exists.

Private trade.

6. The amount of private grain carried into Behar by railway, for the fortnight ending the 16th instant, shows a considerable decrease as compared with the previous return. The figures are as follow:—

	For the fortnight ending 2nd May 1874.	For fortnight ending 16th May 1874.
	Tons.	Tons.
From North-Western Provinces and Punjab	14,488	18,125
From Calcutta and Lower Bengal	20,660	2,870

Now that there is but very little more Government grain to be carried, it may confidently be expected that this trade will increase considerably should prices be sufficient to give a profit to importers.

The usual note will be found in Appendix A. The total quantity exported from the 1st October to the middle of May was 212,763 tons; and the imports to the same date were 355,024 tons.

Export of food-grains by Sea.

7. There is a general complaint of the want of rain in this division, and the continued drought has aggravated the distress and increased the numbers on relief works; but since the fortnightly reports were received, abundant rain has been reported from Chumparun, and nearly an inch has fallen in Mozufferpore. In parts of Seetamurhee and in the south of Durbhunga, where rain had fallen, a considerable breadth of land has been sown; but in the greater part of these sub-divisions, and nearly the whole of Mudhoobunnee, no sowings had been practicable. Wherever land could be sown, seed has been procurable by those who had money to pay for it, and the general impression seems to be that, except in Ramnuggur, where the Taroos, relying upon Government aid, have recklessly consumed their seed-grain, and in a few villages scattered throughout the country, sufficient seed will be forthcoming, though its price will be high. In Sarun the lands are said to have been prepared for sowings when the rain falls, though but little has been sown as yet.

Patna Division.—State of country.

8. The condition of the people remains unchanged; the numbers on relief works have increased, except in Sarun, where there has been a slight decrease, which must be expected

Conditi ople.

to con till rain falls and field labour can be again begun. But everywhere the pe re said to be in good condition, and to have little anxiety for the future gh, with the exception of private stores held for the most part for the ' tion of the owners, there is said to be no rice in the smaller South Tirhoot, except what has been imported by Government; oth are not procurable in any quantity, except in the large towns of Dur and Rowsera, and in Mahomedpore and Warrisnuggur among the small

e Head-Quarters Sub-division of Tirhoot (Mozufferpore) sales of Government grain have been found to be necessary owing to the deficiency of supplies in the markets; but, jud from the experience of other parts of the country, it is not likely that private trade will leave so accessible and rich a tract of country unprovided, especially as the Gunduk will from this time forward be navigable without difficulty by cargo boats. Imports are already coming up to Chumparun. An outbreak of cholera has been reported in the last weather reports, but the locality is not specified.

North Ti

10. In the west of Ramnuggur the people are entirely dependent upon Government grain, but throughout the rest of the district private trade, though not sufficiently active to render sales of Government grain altogether unnecessary, is doing a good deal, and its activity is increasing. The health of the people is good; and though small-pox is prevalent, it is said to be somewhat less so than it usually is at this time of the year.

Chumparun.

11. In Sarun trade is as usual very active, and supplies plentiful, though, as was to be expected in a district where the population is over 700 to the square mile, there are very large numbers who can only maintain themselves with difficulty in ordinary seasons, and who would therefore, in the present year, starve in the midst of plenty, if it were not for the aid given by Government works.

Sarun.

12. From South Behar the reports continue satisfactory. Rain was much wanted, and the numbers on relief works had somewhat increased; but on the whole there is little distress in this part of the country, and no scarcity.

South Behar

13. In this division distress has been reported from the southern part of the Sonthal Pergunnahs, where none was before anticipated, but the arrangements made to meet it were prompt and apparently adequate. Throughout the rest of the

MOZUFFERPORE,
The 21st May 1874.

NOBIN KRISHNA BANERJEE,
for Offg. Collector.

No. 479, dated Durbhunga, the 18th May 1874.

From—C. T. METCALFE, Esq., Additional Commissioner of the Patna Division,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

Naraya and Seetamurhee returns not received. The narrative report of the Court of Wards was also received too late for embodiment with the general report, and is forwarded in original.

I HAVE the honor to submit my narrative report on scarcity and relief for the three sub-divisions of Seetamurhee, Mudhoobunnee, and Durbhunga, for the fortnight ending Saturday, the 16th May 1874.

A.—STATE OF THE COUNTRY.

1. The greater part of the area of the three sub-divisions still presents a bare uncultivated surface; but in places where the rainfall, reported in my narrative of the 4th of May, was sufficient, there are signs of young crops. I find cotton plants, janera, sugarcane, and rice, have all been sown in the lands about Putrahee, and south about Nirputnuggur. The rainfall in the southern parts of Durbhunga was greater than in the north, and the cultivators have been able to do more than northwards in ploughing and sowing. In the Gangdar circle $2\frac{3}{16}$ths fell.* Wherever I have come across irrigated patches in the more sandy soils, I have been much struck with the vigorous plants of Indian-corn and rice, showing as it does what a change might be effected in the agriculture of these distressed tracts by a system of canals. Although quite alive to these advantages, the population seem incapable of any exertion in their own behalf to secure the benefits of irrigation. Running to the north-east of Putrahee, there is a mountain stream which meanders through a score of villages. There are also the remains of an old bund and a cut channel to divert the water to the higher lands. By the merest chance a ryot let fall an observation, that if the bund were repaired, what crops they might have? This led to the discovery of the channel and to the old head-works which the circle officer is now repairing. There was no use to take the initiative among the ryots, and therefore the people of many villages were quite prepared to forego their crops. No one would even take the trouble to tell the relief officer, distant three miles, of the benefit that might arise from this work.

* And makai and murowa have been widely sown in the Seetamurhee sub-division.

SUPPLY OF AVAILABLE GRAIN.

2. Prices generally have not varied to any great extent within the fortnight. The following is the current price-list:—

NAME OF PLACE.	Wheat.	Barley.	Rice.	Millet.	Indian-corn.	Gram.	REMARKS.
Seetamurhee	...	...	...	...	...	...	Not received.
Mudhoobunnee	9	...	8	...	11	11	
Lowkaha	11	12	11	12	13	12	
Undramut	15	...	12	16	...	...	
Modopore	9½	15	11	15	13	12	
Durbhunga	9½	...	7½ to 9	13	...	...	
Rosera	11	...	10	15	...	...	
Bahera	9½ to 10	...	12 to 13½	13	...	...	Government rice.
Singhia	9	...	12 to 13½	11½	...	...	Government rice.

3. In Durbhunga and Rosera there is still a fair show of grain in the shops. In the Warisnuggur and Mahomedpore circles the bazars are fairly supplied with rubbee, due to local trade. In every other locality there is a great demand for Government rice, as no rice, except fine table rice, is procurable.

4. *State of District Grain Stores.*—Private stores and the existence of grain are still everywhere spoken of. I still hear of great losses of grain by fire, both *rice* and *dhan*. Some maunds of seed of the latter, which were offered at Putrahee in exchange for rice, showed signs of having been buried. In Allapore there is still plenty of grain. I ascertained that this pergunnah virtually supplies the whole of the Chupra district with rice, and although the rice-lands of Chumparun are nearer to Sarun, yet the whole trade is from Allapore to Chupra.

5. *Seed.*—This question is working its own solution: as rain falls and the cultivators get to work, we find out where there is a want of seed. It is reported from the Hathee circle, where there has been an ample rainfall, that no want of seed was anywhere apparent. I extract from Mr. Aikman's report: "After the late rain people became more urgent in their applications for seed-grain, but the only place from which I hear of lands left unsown is Hasunpur, the superintendent of which reports that the small cultivators with one or two ploughs have entirely consumed their stock of seed-grain. After reporting his action to supply seed, Mr. Aikman reports that the cultivators have no difficulty in procuring paddy when they are advanced the necessary money."

6. *Public Health and Condition of the People.*—The public health is everywhere good, as most human ailments spring from the stomach. Short commons appear to have had a good effect. I hear neither of cholera or fever; from an epidemic of either I fear the mortality would be very great, acting on a weakened system. The condition of those on charitable relief has everywhere improved, except in the cases of that very numerous class, both of men and women, who will not fatten. I find some of the most pitiable looking objects among those who have now for weeks received food such as they never before, in the course of their lives, regularly received.

7. As the relief officers get their circles better organised, they are enabled to transfer to other circles persons on charitable relief who have emigrated from their villages. These transfers disclose what precarious lives many of the poorer classes must lead in the best of times. The class to which I specially refer are generally old women, with a grandchild or two. Their worldly possessions are a dilapidated hut, and their ordinary existence depends on chilling grass for some neighbour's cow.

8. This class first come on to the hands of the relief officers, and the pinch for food is now gradually working upwards amongst the agricultural classes with small means. I do not mean to infer that they are starving, but that many persons who have hitherto existed on their own means are now glad to receive charitable relief. Their numbers may be expected to increase for the next two months till the patches of Indian-corn ripen. In the Bundhur circle it was found that persons had too indiscriminately been brought on to the charitable relief. These lists are now being revised.

B.—Relief Works.

9. I am unable to submit in a complete form the statement required by Government circular No. 144—T.F. of the 5th of May, as the superintendents have not submitted the information. The data received have been condensed into the annexed form, the abstract of which is—

Name of Sub-divisions.	Daily average of laborers on relief works.	Public works.		Circle Officers.	
		Task-work.	Daily-wages.	Task-work.	Daily-wages.
1. Seetamurhee* ...	Return not received.				...
Poopree	26,737	...	1,678	24,059	...
2. Mudhoobunnee ...	274,811	49,268	46,526	88,824	90,193
3. Narya	72,082	...	26,291	...	45,791
4. Durbhunga	179,985	Returns do not give the data.			
Court of Wards ...	49,061	...	...	...	...
Total of returns received ...	602,676	49,268	74,495	112,883	135,984

* In Poopree the proportions are—

Task-work	24,059
Hazeree	1,678
Total ...	26,737

10. For Durbhunga the numbers on piece-work and daily-wages have not been accurately given. In all the circles of the head-quarters sub-division piece-work is in force, except in a few tanks in the Mahomedpore circle. In the Hattee circle there are the greatest number of laborers on daily-wages, and here piece-work is being introduced; but, as I ventured to point out in my last narrative, the difficulty of breaking up a mob by any argument short of a general order can only be appreciated by those to whose lot it falls to try the experiment in the burning sun with a west wind blowing.

11. The question as to whether Tirhootia Brahmins would work on the tanks or not has been solved through the exertions of Pundit Ajadhyapershad, relief superintendent of Putrahee. This officer really deserves great credit for the way in which he has broken through a long-established caste prejudice in this district. Himself a Brahmin, he collected a number of other Brahmins, and handling the spade himself, practically demonstrated that at any rate he had no fear of losing his caste. I was present on two or three occasions when the Pundit took the initiative; and it was interesting to watch the better class of Brahmins in the village who, both in words and in manner, evinced their dislike to the whole proceeding, precept, the example, of one of their own caste with the prospects of bettering their condition, gained the day,—first one, then another, took up the same spade and turned the soil, the spell was broken, and the number on the works are daily increasing. The last return shows 221 of this caste, of whom 42 are women. To prevent all sensational stories based upon this circumstance, I should state that these persons, both men and women, are of the very poorest class. I hope to see this innovation spread to other villages and other circles. For how to utilize this numerous class of poorer Brahmins in times of scarcity, has been one of the difficult problems connected with the famine. With the exception of these Brahmins and a few elderly and weakly persons, the whole labor in the Naraya sub-division has been organised on piece-work system. There is now a difficulty of getting able-bodied persons on daily wages unless at very high rates.

12. The rates in the Poopree circle are lower by one anna than elsewhere; and even at the rate of 5 annas per 100 cubic feet the laborers are fast making money. There are 120 tanks on task-work system, and three roads and a tank on the daily-wages system.

C.—Transport of Food.

13. Grain is being steadily poured into the country from all points. The northern golahs have received the greater allotments up to date. Durbhunga will shortly receive its quota.

D.—Storage of Grain.

14. The following statement shows the amount stored out of the allotment for the three sub-divisions:—

Name of golahs.	Amount allotted on assumption of 12½ lakhs.	Amount stored.

Bundhar	2,500	incomplete return.
Total ...	72,027	

17. With reference to the numbers on charitable relief in Durbhunga, I give the following extract from Mr. Macdonell's report :—

"You will perceive the steady increase in the numbers on charitable relief, the numbers in the Hyaghat circle being most conspicuous. It was to satisfy myself that those numbers really represented persons deserving of relief that I rode through the circle, as mentioned in an early portion of this report. I found, as I have stated, that in the Ughara group, the lists included persons capable of working. But generally speaking there was but little fault to find with the selection made. As things now are, perhaps if the Superintendent could visit every village, he might reduce the numbers by about 7 per cent, but not further. I fear much that when the time comes when village relief works are not possible, those numbers will swell still more. You will be struck with the difference, the proportion of laborers to those on charitable relief, in the Mahomedpore and Hyaghat circles. It is explicable on the fact that the distress was never allowed to deepen into famine in Mahomedpore, while in Hyaghat it got ahead of us, and the people too became demoralized by attendance on the Durbhunga Behara road and unwilling to do piece-work. It is a healthy sign that the number in village works in Hyaghat has almost doubled within the fortnight, while those on the Department Public Works works in the division have risen from 59,509 to 85,889."

G.—Financial Results of the Fortnight ending 16th May 1874.

C. T. Metcalfe,
Additional Commissioner.

No. 2373F., dated Sarun, the 21st May 1874.

Memorandum by—J. S. DRUMMOND, Esq., Offg. Magistrate and Collector.

FORWARDED to the Secretary to the Government of Bengal, in the Statistical Department, Calcutta, for information, with reference to his Circular No. 80 of the 17th November 1873.

Narrative of Scarcity and Relief in the Sarun District for the fortnight ending 16th May 1874.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supply in the Bazar.—Private trade has been more active than ever, and while there has again been a large increase in importations in the Sewan Sub-division, there have also been heavier imports at Revilgunge. The interval carriage of grain was temporarily obstructed by the measures taken to procure carts for Tirhoot, in compliance with an urgent demand of Government, but it is hoped that now that no more carts are required for Tirhoot, the bazars will again everywhere be adequately supplied.

2. In the Sudder Sub-division during the fortnight, the private importations were at Revilgunge 96,300 maunds, of which 18,000 maunds were rice, 11,800 wheat and barley, 10,700 maize, and the rest other grains; at Dooreegunge 4,903 maunds; and at Moharajgunge 1,299 maunds; while the imports from Chumparun were 405 maunds. The exports of grain to Tirhoot and Chumparun amounted to 12,711 and 3,895 maunds respectively.

3. The following is Mr. Wright's account for the Sewan Sub-division :—

"I am glad to be again able to report that the amount of private importations of grain into this sub-division is still increasing. During the fortnight under report, the private importations at Dârawlee, Gathani, Sewan, and Sirwan, as far as could be ascertained, amounted to 63,937 maunds of grain. This amount was made up as follows :—

	Mds.
Rice	15,165
Peas	14,245
Barley	10,130
Wheat	7,816
Grain	5,203
Indian corn	3,570
Barley and peas (mixed)	3,530
Paddy	1,452
Rohur	1,211
Urid	944

and 671 maunds of other food-grains in small quantities. Owing to this large increase in the importations, the bazars continue to be well supplied."

Mr. Rattray says in his report that "the supply of grain in the markets is fully kept up by importations, and so far no signs appear of the supplies falling short of the demand."

Mr. Hodgkinson makes the following report with regard to the Hutwah private trade, and gives further details of the system on which he is arranging for the distribution and sale of the Raj grain :—

"Importation into the Hutwah estate from Gathani and the south is going on to a small extent; but private trade has received a most serious check from the impressment of carts to go to Tirhoot. The panic was so great that the cartmen took the wheels off their carts and buried them (in one case, I know, in an indigo factory for security); and it was with difficulty that carts could be obtained to go to Revilgunge to bring in the Raj grain owing to their fear of being impressed on the way and made to pay for their release.

"In my last Narrative, I set down the terms on which I proposed to sell the Raj grain to the mahajuns and well-to-do ryots in the north-west Tuppas. On my recent visit to Bhorey, I found that the ryots generally had still about a month's supply of food in their houses from the spring harvest; and although rice is hardly to be brought at all in these tuppas, the mahajuns, &c., do not care to invest in the Raj grain except on a small scale at present, as they would have no sale for it, while the stock lasts. They admit, however, that they will probably be glad to avail themselves of the terms offered before the end of June.

"The following rules for making advances of grain to ryots were issued by me last week. I have designedly postponed making these advances until now, because the ryots have generally had a sufficient supply of food to last them more than a month; and while it is of the utmost importance that existing supplies should be husbanded, too early advances would only encourage the naturally great improvidence of the people.

RULES.

(1) "Grain advances on the annexed scale may be made to cultivators who have no sufficient means to buy grain for their support during the agricultural season.

Ryots cultivating—

1 Beegha and under, not more than .. .. .. 1 Maund.
Between 1 beegha and 4 beeghas, not more than .. 1 Bag.
Over 4 beeghas, not more than .. .. .. 2 Bags.

(2) "The price of the grain will be recoverable, at the rate of Rs. 4 a maund for rice, and of Rs. 3 a maund for other grain, in two equal instalments—one due on the 1st October 1874, the other due on the 1st January 1875.

(3) "To save trouble, whole bags should be generally allotted.

(4) "The Officer allotting the grain will be supplied with cheque books in the following form as soon as possible:—

Raj Hutwah.

No. 1.	May.	No.	May.
Advance of Mouzah,		Advance of Mouzah,	
Bag ...		Bag rice ...	

(Sd.)
Relief Officer.

Received.

Maunds ..
Price, Rs. ..

(Sd.)
Ryot.

The cheque will be given to the cultivator who is to receive the advance, and the counter part kept. The Officer issuing the cheque will only fill in half the form. The entries of maunds and price in the right hand corner of the cheque, will be filled in by the writer or mohurir issuing the grain. The recipient will sign a receipt on the cheque at the time of taking delivery of the grain.

(5) "The writer or mohurir issuing the grain will keep a register in the following form. This register should be written up daily, and passed by the Relief Officer in charge of the store. The corresponding number in the register should be endorsed on the cheques, and the cheques strung together to serve as vouchers."

Register *Sreepore Golah.*

No.	Date.	No. and date of Cheque.	Name of Recipient.	Residence of Recipient.	Bags.	Grain.	Weight.	Price.	Total daily.		Total advance up to date.		Remarks
									Weight.	Price.	Weight.	Price.	

"It is calculated that the amount of grain which will be advanced to ryots under these rules should, with the supplies they now have, suffice to support them till the 15th or 20th July. By that time the autumn sowings should be over; and in most cases they will be able to obtain advances of money from their mahajuns on the security of their crop, in the same way as they do every year. Objection may be taken to the rates fixed for the grain; but I consider that if other rates were fixed more favorable to the consumer, the private traders would justly consider that they had been unfairly dealt with. Government originally fixed ten seers for the rupee as the rate at which stores were to be opened; and to encourage importation as much as possible, I told traders that they would not be under-sold by me, as long as their rates did not go beyond that limit. I may add that ten seers of the rice imported by me is for food equivalent to at least 12 or 13 seers of the Government rice which has been sent up. If the ryot cannot pay for the advance received by him on the fixed date,

it will be easy to extend the time; or in extreme cases, remit part of the amount. But looking to the probable high price of grain next year, and consequent large money return for land produce, I do not anticipate that with good crops, there will be any difficulty in realising the full price.

"The Raj grain will under the arrangements now made, be disposed of in the following ways:—

(1) By sales to the public principally through *Buniahs*.

(2) By sales to mahajuns and well-to-do ryots at Rs. 4 for rice—Rs. 2-8 at once, and Re. 1-8 in January 1875.

(3) By advances to ordinary ryots subject to the recovery of the price at Rs. 4 for rice, and Rs. 3 for other grain (where practicable) in two equal instalments—one due on 1st October 1874, and the other on 1st January 1875.

(4) By gratuitous distribution to the incapable poor—

(1)—in cooked food at centres;

(2)—in a monthly allowance of 20 seers uncooked grain to those who object to cooked food.

"Arrangements will presently be made to pay the laborers on relief works directly in kind where it may be found necessary, but it is not likely that there will be any necessity for this step for at least two months; and in the meantime the giving out of advances will, with the other modes of distribution, take up all the time of the available staff. As long as there are sufficient Buniahs, who sell grain, whether purchased from our stores or obtained elsewhere, near the relief works, direct payment to the laborers may well be postponed."

5. I am glad to see that Mr. Hodgkinson is arranging for grain advances to ryots unable to obtain assistance from their mahajans, but the terms fixed for repayment seems somewhat short, especially for those tracts where the crops have failed more or less for several years in succession. Where, too, as in such parts the ryots must be already heavily indebted, it is perhaps to be feared that two great advantages may be taken by the mahajuns of their necessities in a season like the present, if they be left entirely dependent on the mahajuns as proposed after the 15th or 20th of July. I trust Mr. Hodgkinson may see his way, in the case of really distressed and involved ryots, to granting advances sufficient for their support for the whole of the period till the following harvest. The prices at which the grain is to be sold or advanced have my approval, and I also approve, under the circumstances, of the postponement of grain payments to the laborers on the relief works.

6. *Kind and price of grain selling at the different marts.*—The kind and price of grain selling at the principal marts and at the thanas and out-posts, are given in the annexed statement. Prices are highest in the Bussuntpore, Musrukh, and Pursa thanas.

7. *Stock of food in the hands of the people.*—There is nothing fresh to report under this head.

8. *Rainfall.*—There has been no rain during the fortnight, and rivers, tanks, and wells are in many parts either dry or fast drying up. Mr. Hudson indeed apprehending great mortality among the cattle if measures were not taken to supply the want of water, applied for permission to authorize the putwarees and village headmen to dig in each village "baolees" (small tanks) for water for the cattle. This proposal was sanctioned on the understanding that the orders should be confined to villages in tracts where there was known to be want of water for cattle, and on the condition that the "baolees" were only to be dug at the cost of Government, on the refusal of the zemindars from whom, the putwaree was desired to notify, that the Government reserved to itself the right of recovering the cost. On these conditions Mr. Hudson has authorized putwarees to dig "balees" in old tanks, each in his own village, to the extent of Rs. 100 to be recovered from Government. The Executive Engineer and the circle officers have also been authorized to undertake such works as relief works, wherever urgently necessary for the saving of the lives of the cattle.

9. *State of the crops.*—Except where rain fell and in the low-lying tracts where moisture was retained, there have been no sowings for the Bhadoi and Aghanee crops, but the lands have either been prepared, or are under preparation, for such sowings to commence on the fall of rain. The cheena, with such irrigation as can be afforded, keeps up in a way, but with these scorching west winds, the outturn will nowhere be good and in many parts of the country, be next to nothing. Indigo prospects, too, are nearly everywhere bad, and independently of the serious loss that will be entailed on those interested, this unfavorable prospect is an additional calamity in a year like the present, for the reason that this field of labor will be closed to the thousands of coolies employed by the different factories in an ordinary year.

10. The following is the report of the Sub-Divisional Officer of Sewan:—

"There are scarcely any crops in the ground now. Cheena, which is being reaped in places, is giving a pretty fair return. Early Indian corn, which is sown only in small quantities, and rice on the low lands, are progressing as well as can be expected in this dry scorching weather. The rain of the 27th ultimo, did these crops some good, but they are greatly in need of rain again. Indigo is a very poor crop, and unless we have rain soon, the little that remains of it, will come to nothing."

Mr. D. N. Reid of Suddowah writes as follows:—

"Native agriculturists have sown a good deal of their paddy and kodo fields; more rain is wanted for the young indigo crop, which is dying fast."

11. And Mr. Hodgkinson writes thus:—

"The lands for autumn sowings of makai, murrowah, &c., have been prepared very early and unusually well this year. The cheena on irrigated lands is a fair crop. High winds are doing much harm to the mangoes."

12. *Condition of the people*.—There has been no material change in the physical condition of the people during the past fortnight; but distress is believed to be increasing, and must of course extend as the critical period between the exhaustion of the rubbee stocks and the gathering of the next harvest approaches, when only, if at all, can it be expected that the range of famine prices will be reached—the presence of the Government stocks having effectually prevented the creation of an artificial famine. That the physical condition of the people has remained good is—it cannot be too often repeated—solely due to the action of Government in importing food and starting relief works on a liberal scale. As one planter (Mr. Francis Murray of Burboga) writes: "If you asked me to stop the works out here for a few days, and then came out to look at them, the day they were re-started you would see skeletons enough." As the general poverty of the people of this district seems scarcely to be realized, and the necessity for relief on the scale given is apparently doubted by some, the following extract of a letter from an independent observer, and one whose humane exertions in the cause of the people throughout the present troublous times cannot be too warmly praised (I refer to Mr. Donald Reid of Suddowah), may here be quoted:—

"As is already well known, the paddy crop scarcely gave more than a 2-16ths out-turn. This failure paralysed the whole district. The maize crop had proved an average one certainly, but the unpecunious ryot had to sell most of it at the beginning of the season to pay his rent and settle old accounts with his mahajun. He parted with it at 10 katcha *passeries*, equivalent to 36 pucca seers for the rupee, and a month or two afterwards, bought the same grain back at 18 pucca seers to the rupee, with money obtained from relief works, factories, opium advances, &c. The produce of the rubbee crops, had to be sold also to settle rent accounts. The little money realised from the opium probably went the same way. So when the Sarun ryots *great* stand by, the paddy crop failed, matters would have gone very hard with him indeed, if Government had not adopted the benevolent and active measures it has undertaken. The masses of the people in Sarun, even at their very best, are a poor, and sorry lot, always in difficulties; *always* in debt to their mahajans. High prices mean famine to them—poor creatures. When they can just pull along with grain selling at low rates, I mean at 30 and 36 seers to the rupee, is it possible that they would have existed long with grain selling at a little above famine rates, even at this early part of the season."

13. Mr. Hudson writes from the Musrukh Sub-division as follows:—

"The proportion of bad cases of emaciation which I have seen is not large; but I have seen quite sufficient (as on the tank at Aujanee near Chetun Pursa, for instance) to afford clear proof that, but for the relief works, we should have had to report numerous cases of starvation.

"The people appear to be in much the same condition as during the past fortnight; but the new action of Government in respect to the distribution of the grain, has caused a great stir amongst them. For the past week they have assembled by hundreds daily at this place, bringing up petitions for advances some singly, some in knots of two or three, and others in companies of 20 to 50 from the same village. At present it is very difficult to deal with them, as they have the greatest antipathy to union, and all want to obtain assistance piece meal, if not singly, at any rate by "tolahs" and "puttees." But I am gradually getting them to fall into the Government plan, and to adopt a uniform procedure. To show the pressure of work here caused by this new grain movement, I may observe that there are now some 14 independent Mookhteears established here, earning and living by writing the applications, copies of jummabundees, and other documents necessary to be filed by the applicants. I must also bring to notice that the putwarees hold aloof from this business to a man; and that the ryots complain generally that the mahks are against them, and that the putwarees will lend no assistance to the proceeding unless forced to do so"

14. The following is Mr. Wright's account of the Sewan Sub-division:—

"The condition of the people is still satisfactory. The cultivators are generally busy in preparing their lands for the Bhadoi crop, and the poorer classes find ample employment and means of support on our relief works.

"The Sub-Deputy Collector Baboo Rajkisore Narayan, when writing of the people in thana Darawlee, says, the condition of the people is all right up to date (16th May); no one has been found so reduced in means as to starve from want. Laborers get employment at relief works as well as in irrigating indigo fields. Sugar-cane and millet are irrigated by the ryots themselves."

"Of the people in Barawlee," he writes: "The condition of the people has not as yet changed for the worse. No one is seen starving. Besides having employment at relief

works, the laborers succeed in getting private field work too. Those unable to work receive gratuitous relief at the relief centres, especially at Manjha."

The following is from Mr. Rattray's report under this head :—

"From the reports of the relief Superintendent and from my own observations, I find that the condition of the people, and the state of the country, is much the same to what it was last month Ample work is being found for the poorer classes on the public roads and tanks; and no deaths from starvation have been reported from any of the relief circles.

"The relief Superintendent Syed Amir Ahmed, who has just returned from an inspection of the relief circles in thana Darawlee, informs me that the people in that part of the Sub-division are not in distress, owing to the favorable outturn of the rubbee crop. The poorer classes are pinched for food, but the relief works in hand are ample, and no want is felt."

15. Mr. Hodgkinson makes the following report of the Hutwah Sub-division :—

"Distress among the people is increasing, but with the exception of professional beggars and persons incapable of work from disease, hardly any bad cases have come to notice notwithstanding the inquiries made. The physical condition of the people generally is hardly worse than in ordinary years. Small-pox is, however, committing great ravages. In the selected statistical area, containing by the Census 22,665 people, of which Hutwah is the centre, there were in April, 86 deaths, of which 57 were from small pox alone. The mortality from all cases is equivalent to 46 per thousand; and the mortality from small-pox alone to about 30. As I have no reason to think that this locality is suffering more than other parts of the Sub-division (I believe the disease is even more prevalent towards Bhorey and Kuttaya), the total mortality from this disease in the Sub-division, of 3,50,000 souls, was probably between 800 and 900 in the month of April alone."

16. *Known cases of misery and starvation.*—There have been no such cases reported.

17. *Grain thefts or Robberies.*—There have been 4 cases of grain thefts during the fortnight.

18. *Condition of any special tracts.*—My chief anxiety is still with regard to the Bussuntpore thana, though Masrukh also is badly situated; and from Pursa, too, the Moonsiff there reports that serious distress is likely to issue before long. But, with the exception indeed of the Dighwara and Darawlee thanas, it may be said that there is no part of the district where serious distress may not be apprehended in the future.

B.—Relief Works.

19. *Progress of relief works.*—The annexed statements show the relief works in progress, and the number employed thereon. The average number daily employed during the fortnight has been 168,822, and the number on the last day was 174,360. The numbers have decreased owing to agricultural operations having drawn off many of the laborers, but in consequence of the injudicious manner in which the Assistant Engineer, Mr. Lennox, exacted piece-work on his portion of the Sewan and Bussuntpore road, in contravention of the orders of Government and the directions of the Executive Engineer, almost the whole of the laborers, 10,000 in number, deserted the works. Mr. Lennox had exacted 150 cubic feet as the outturn of piece-work instead of 100 feet as directed by the Executive Engineer, and had apparently disregarded the distinct order of Government that no one was to be driven off the works, and the consequence was that the coolies all left in a body. Luckily, Captain May and the Superintending Engineer, Mr. Pothecary, were soon after on the spot, and I am informed that the people now that they know that piece-work will not be enforced, are gradually returning to the works. I consider that Mr. Lennox primarily, and indirectly Mr. Wright in charge of the Sub-division have incurred very serious responsibility in this matter. Mr. Lennox's action was probably due to an excess of departmental zeal, and it is not advisable that there should now be any change in the departmental administration; so beyond very seriously warning Mr. Lennox of the consequences of any subsequent neglect of orders, I do not recommend that any further notice of the matter should be taken, and I trust that he will now understand distinctly that in these critical times, there are other things to be considered besides the outturn of work. The Sub-divisional Officer has also been instructed to see for the future that no change of system is introduced by Mr. Lennox on his own responsibility, except in strict conformity with the policy of Government, which is to induce resort to piece-work by higher rates, leaving it optional with the laborers, to remain on mere subsistence or daily wages, if they prefer it. The wages of Brahmins and Rajpoots doing no work have been reduced to one anna, and none but the beldars working with kodallies who get 1½ anna, and the mates keeping the registers who get 2 annas, will, for the future, be allowed to gain more than one anna on the daily wages system. With reference to the orders of Government for the general introduction of task-work or piece-work, it should be explained that as on nearly all the tanks the cowree system, which is equivalent to piece-work, is either in force or being introduced, as the cowree system is inapplicable to road-work, and as it is not possible to introduce piece-work on old roads from the impracticability of distinguishing new from old side-cuttings, the possibility of the further enforcement of piece-work is practically confined to the case of the new road now being made between Sewan and Bussuntpore. As, moreover, it is understood

that the Superintending Engineer was of opinion that the outturn and quality of work in this district compared favorably with other districts, and as the working season is now approaching its close, it does not seem advisable to introduce any further change of system. The people are all employed on the roads in gangs, village by village under their headmen, and it might perhaps be tried whether more work could be got out of them by paying the headmen of exceptionally industrious gangs, something extra; but any pressure for work calculated to drive the people away, is much to be deprecated.

20. With reference to the small number of people employed on the Hutwah works, as compared with the numbers on the relief works in other parts of the district, Mr. Hodgkinson attributes this result to the difference of system prevailing on the works in his sub-division and in the rest of the district, and infers that the system adopted outside his sub-division is unduly lax and attracts persons not really requiring relief. But while this inference ignores all such considerations as difference of rents, laxity or severity in collections, comparative density of population, and lastly disproportions in the numbers of the different classes, composing such population (there are three times the number of laboring classes living in the rest of the Sewan sub-division that reside on the Hutwah estate)—as a matter of fact there is no such great disparity in the numbers on the Hutwah relief works, when compared with those employed in the rest of the Sewan sub-division, the numbers in the last-named tract at the close of the fortnight ending on the 2nd May, being just one per cent. in excess of those employed in the Hutwah sub-division. That the rates paid for labor have not been unduly favorable, may be inferred from the circumstance that on the daily wage system being first introduced on the roads, the Noonneahs employed on them struck work. That the works do not attract people unnecessarily is shown by the fact that though relief works have been provided all over the district and one and the same system prevailed, yet in parts where the rubbee crops have been good, as for instance in the Darawlee and Dighwara thanas, the numbers coming on the works have been few. This effectually disposes of the argument that relief works in any year would attract crowds, as if so attractive, clearly the attraction would be general. Again, if attractive, the people might have been expected to rush to them at the outset, whereas the increase in the numbers has been gradual—clearly proving that it was only as the continued pressure of high prices began to tell upon larger numbers of the population, that the people were driven to the works in constantly increasing numbers. It is strange that in a country where pride of birth and distinctions of rank so extensively prevail, there should be any one to believe that people of all classes would accept the degradation of even appearing to labor on the public roads unless driven there by necessity.

21. *State Emigration to British Burmah.*—There are 29 emigrants at the depôt here awaiting transmission to Calcutta.

C.—Transport of Food.

22. Under this head, Mr. Hodgkinson reports thus, regarding the Hutwah grain supplies—

"The transport of food has been seriously checked by the panic among the cartmen above referred to Mr. Berill of Umbicapore Factory has been deputed to Chuprah to do his best to work off the large accumulation of grain at Revilgunge.

"The grain stored up to date is :—

		Md.	S.	Ch.			
Raj grain		88,151	10	12			
Returned by Collector		13,006	0	0			
Grain stored by Collector at Gopalgunge ...		19,904	0	0			
Total ...		.....			121,061	10	12
At Revilgunge and on transit ...		27,329	1	4			
					27,329	1	4
Grand Total ...		....			148,390	12	0

"The return of sales and advances stands—

By sale to laborers	.....				
By sale to public	3,081	28	8		
By Raj Charitable Relief	508	16	8		
Total ...	3,590	4	0		

D.—Storage of Government Grain.

23. There having been some change in the distribution of the grain, as well as an excess over the allotment to be provided for, a revised statement of the storage places, and distribution of the grain, is appended. The statement also shews the receipts and expenditure up to date. The transport of grain from Singhai Ghât has also been impeded by the panic referred to by Mr. Hodgkinson, but it is trusted that all the grain will now soon be carted away.

24. The appointment of Buniahs on the relief works is in progress, and it is hoped that the Government grain will be generally available on all the works during the present fortnight.

E.—Advances to Private Parties and their results.

25. There were no advances made during the fortnight for purchase of grain for sale or for support of ryots, either in the shape of money or grain advances. But Rs. 1,290 have been advanced for purchase of seed-grain and plough cattle, while an account of the quantity of grain advanced to ryots, &c., is shewn in a separate statement under Government order No. 83TF, dated 30th April 1874. For land improvement, Rs. 13,491 have been advanced during this period, making up the total on this account to Rs. 1,03,633; and Rs. 55 have been paid for support of one's self and family.

26. On the subject of the prices of Government grain Mr. Rattray writes in one of his diaries as follows:—

"People have asked me if they would be allowed to purchase grain from Government for sale to the local traders with a view of making a profit on the transaction, as Government rice is selling at 16 seers and the market price is 12 seers for the rupee. It is much to be feared that the difference in price will defeat the object of Government, and that grain advances will be taken for speculation in the market, although doing good indirectly so far that it will bring about a fall in the price of grain."

At an interview with Mr. Rattray, he also informed me that the Sewan Buniahs said that if the Government rice was to be advanced to ryots in large quantities at 16 seers for the rupee, private trade would be seriously checked. With reference to the large quantities of grain likely to be advanced in this way, I certainly am of opinion that there is risk of private trade being injuriously affected by the maintenance of the present cheap rates, and I would, therefore, recommend that while the rate of 16 seers is maintained for the laborers on the relief works, it be raised to 13 seers for grain advanced to zemindars and ryots.

F.—Charitable Relief.

27. The number receiving charitable relief, as far as known, is given in the annexed statement.

The appointment of group Superintendents and the definition of the limits of relief circles is in progress, both for charitable relief purposes and also with a view to the immediate distribution of grain advances to the ryots, regarding whom putwarees' returns are under preparation.

28. Under this head Mr. Hodgkinson gives the following figures for the Hutwah Sub-division:—

"The numbers receiving charitable relief, as far as known, is shewn below: Cotton spinning relief is being extended—

		Daily average.
1.	Hutwah	24
2.	Sreepore	124
3.	Bhorey	33
4.	Chomookha	49
5.	Sonowbala	8
6.	Muniarah	11
7.	Jugdispore	32
8.	Chukiah	17
9.	Gopalgunge	4
10.	Dhobowl	7
	Total ...	309

G.—The Financial Result of the Fortnight.

29. The financial results of relief operations are given below:—

	Rs. A. P.	Rs. A. P.
Total expenditure as previously shewn	.....	15,66,361 15 9½
1. Expenditure incurred by the Executive Engineer of Arun, for district relief works, *vide* statement of labor, from 3rd to 16th May 1874	1,63,594 3 2	

	Rs. A. P.	Rs. A. P.
2. Expenditure incurred by the Executive Engineer of Sarun, for protective works in the town of Chuprah, from 3rd to 16th May 1874	.....	1,922 3 3
3. Expenditure incurred by the Executive Engineer, Lower Gunduck Division, for relief works on the Sarun embankment, for the fortnight ending 14th May 1874	.....	1,612 13 0

CHUPRAH MANAGER'S OFFICE,
The 19*th May* 1874.

(Countersigned,)
J. S. DRUMMOND,
Offg. Magistrate and Collector.

SYUD MAHOMED FUZL,
Manager.

No. 1530F, dated 18th May 1874.

From—H. KEAN, Esq., Collector of Chumparun,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly Narrative of Scarcity and Relief for this district for the fortnight ending the 16th May 1874.

A.—STATE OF THE COUNTRY.

In the Motihari Sub-division (No. 1) no change requiring notice has taken place in the state of the bazars since the last report, except that Government rice is now plentiful, and that maize and wheat have disappeared as articles of sale. Mr. Oldham gives the following account of hissub-division :—"Many petty zemindars, village farmers, and mahajuns, still hold considerable stocks untouched, meant not only for their own consumption, but to be advanced to cultivators as soon as the tangible security of a growing crop is to be seen.

"The ryots, too, have larger stores than would be supposed. A recent fire disclosed that a man who was working on the northern relief works at subsistence rates, had 20 maunds of grain in his house. It is obvious everywhere that the chief object they all have now in view is to maintain a sufficient reserve to enable them to carry on their cultivation at the proper season, and that they are making every effort to accomplish this aim. No rain fell during the fortnight. The state of the crops remains unchanged—that is, what little millet has been irrigated has been saved, the remainder has been lost."

The good done by the shower of rain which was reported in the last Narrative to have fallen in the north-east of the sub-division, was very slight.

As regards the condition of the people, Mr. Oldham writes: "No change is observable except a general excitement consequent on the opening of the Government stores, and that the people are now everywhere clamorous for advances. I have been the best part of the last week in the heart of the sub-division, and through many of the worst off villages, and I have seen no further cases of misery or want. The old woman described in my last narrative as having been brought to Ramgurwa Hospital in the last stage of emaciation, died there after lingering over a week. The Hospital Assistant says that this was a starvation death. The subject was exceedingly old. No similar cases have occurred, nor has any other inmate been received in such a hopeless state. There is a total absence of people in this condition in all the several villages without exception; all cases of this sort are to be seen at the relief centres only" There are at present only two poor-houses in this sub-division; and as Adapore, which is eighteen miles from the nearest, is in a somewhat isolated situation, Mr. Oldham has commenced making one more at that place, though he does not assert that it is actually required at present. Notwithstanding the large area and population of this sub-division, there are only 109 poor-house and hospital inmates, which, as Mr. Oldham observes, is a "good sign."

Another favourable symptom which Mr. Oldham noticed is the number of marriages which are taking place everywhere, a circumstance which contrasts very forcibly with the total absence of such ceremonies during the chief marriage months in Orissa, when that country was visited by famine in 1866-67. This account of the condition of the people in this sub-division is very encouraging.

In the Dacca Sub-division (No. 2) the accounts are also good. The sale of Government grain was commenced during the fortnight, and the result has been that prices are easier The Government grain had been sold at from 10 to 11¼ seers per rupee. Private parties, Mr. Kilby finds, have lately made arrangements to import grain *viâ* Revelgunge and Sahebgunge, and he does not anticipate that these rates will deter them from continuing to do so. Considerable quantities had already been imported. Best rice was selling at Pattahi (his head quarter) at 10 seers, whereas it had previously been selling at 7¼ and 8. Indian-corn, Mr. Kilby reports, has fallen from 13¼ to 14 seers, which seems to indicate that there is still a large reserve of this important grain in the hands of the people. Small-pox is reported from this sub-division, but is not abnormally prevalent. This disease shows itself always at this season of the year, and will continue till the rains set in. The Civil Surgeon has himself visited this sub-division, and assures me that the disease is not so prevalent as in some former years. It is prevalent more or less throughout the district. The want of water is beginning to be felt in Mr. Kilby's sub-division, and steps have been taken to excavate more tanks.

From the Gobindgunge Sub-division (No. 3), Mr Weekes reports as follows:—"There is a great scarcity of rice, and it is very dear; but other grains (maize, gram, and wheat,) are still easily procurable at from 13 to 14 seers." Up to this time, according to Mr. Weekes, it seems that food-grains have been largely imported into the district by the Gunduk, and now that the Government importations have been almost concluded, traders are beginning to convey grain *viâ* Hajeepore. This should be encouraged as much as possible. As regards the condition of the people, Mr. Weekes considers that the "state of the cultivators is worse, and he thinks that they will soon need relief, "having now nearly come to the end of their resources" He is engaged in carrying out the recent orders regarding advances.

The numbers on the relief works are certainly increasing, and in some places rapidly, and many of the better class of cultivators are beginning, it is said, to be attracted to them.

Mr. Samuells reports from the Bettiah sub-division (No. 4) that, owing to sales of Government grain having commenced in accordance with the recent orders (No. 48—T.F.), the market is abundantly supplied Grain is being sold at the Government golahs, and through the local trade, at 12 seers per rupee for cleaned rice, and other grains in proportion. At each large golah a salaried bunneah is employed, and in addition the public is being supplied through local traders licensed to retail Government grain. The same arrangements are made on all the roads under the supervision of the Public Works Department. Mr. Samuells is only waiting for tokens to pay in grain even on large works.

There had been no rain, and the want of it is beginning to be much felt. The following are the prices at which food-grains have been procurable in the five sub-divisions :—

No. 1, *Motiharee Sub-division.*

	Seers.
Rice cheapest clean	10
Wheat (coarse)	11½
Oats	25
Barley	15
Gram	13
Cheena	13
Urid	12
Moong	13
Arhur	17

These were the rates at Segowlee (the head-quarters of the sub-division).

No. 2, *Dacca Sub-division.*

Rice	8½ to 9½
Maize	13½
Barley	13½
Wheat	10
Gram	13½
Peas	12½
Arhur	14
Cheena	13
Kodo	20½
Mussoor	13½
Urid	13½

This was at Pattahi (head-quarter).

No. 3, *Gobindgunge Sub-division.*

Rice (best)	9½
,, (coarse)	9 to 14
Wheat	11 to 12
Maize	13 to 10
Gram	13 to 10
Arhur	14 to 10

This was at Kessuria (large mart).

No. 4, *Bettiah Sub-division*

Rice (best)	9½
,, (coarse)	13
Maize	14½
Barley	15½
Wheat	12½
Gram	13½
Arhur	12

These were the prices at Bettiah ; at Lowria (further north), coarse rice has been selling at 11½, and maize 14.

No. 5, *Ramnuggur Sub-division.*

At Shikarpore and neighbouring bazars.

Rice	8 to 9
Maize	12 to 14
Urid	11½
Barley	18
Gram	12

At Ramnuggur, and westward to Bugaha, Government rice only is obtainable; other grains rather higher than the above rates except gram, which is to be obtained in small quantities at 13 seers.

It will thus be seen that the average rate of coarse rice has been 10½, and of maize 13½ the latter grain not being procurable at Segowlee, though readily obtainable still in the other sub-divisions.

From the Ramnuggur Sub-division (No. 5) Mr. Howe reports as follows regarding the state of the country under his charge :—"During the last fortnight distress has continued to increase, especially in the east. There has been no rain, and the supplies in the bazars are very small indeed. But for the general sale of Government rice, food would in most parts be hardly obtainable. In the east rice is still procurable, though at very high rates, and Government rice even there is generally becoming the food of the people."

At Shikarpore and in the bazars around the following prices have obtained :—

	Seers.
Rice	8 to 9
Maize	12 to 14
Urid	11½
Barley	18
Grâm	12

At Ramnuggur, and westward to Bugaha, only Government rice is obtainable, and other grains are sold at slightly higher rates than the above, except gram, which is obtainable (in small quantities) at 13 seers.

All classes, more or less, are suffering from distress ; but the class which feels it worst are the petty cultivators, who cannot or will not work on our roads. Colonel Boulderson, writing with regard to the eastern circle, says :—"Altogether the condition of the families of the poorer class of cultivators has certainly changed for the worse during the last fortnight. Not only are their home supplies run out, but they have no longer the means of raising loans for purchasing grain, nor can they get money except by working on our relief works" This description, Mr. Howe states, applies generally to the condition of all 'assamees' in his sub-division, and accounts for the steady increase in the numbers now attending the works. "Necessity," he says, "has everywhere driven even that most conservative of castes, the Tharoos, to our works. This I have before noticed at Hurnatar and Bugaha, and during the past week there has been a large increase on the newly-opened road which runs from Shikarpore to Taree, a part of the country inhabited principally by Tharoos. This change for the worse is the natural and necessary result of the long continued distress. Indeed the month of May and the time immediately preceding the rains will probably be the hardest time for the cultivators. When the rain falls field work will give employment to many, while the prospect of a good crop will enable them to obtain credit with their mahajuns. A steady increase in the numbers requiring direct help must be expected for some time." This estimate of the condition of the people is, I think, very correct, and applies more or less to the whole district. An increase in the daily number of persons seeking work is quite to be expected at this time, and this will go on till the rains fall and give the mahajun class some assurance of a return for their money. There have been no crimes deserving special notice, nor any grain-thefts. Fires continue, but Mr. Howe thinks they have been slightly less frequent.

Seed-grain.—The orders lately received on this important subject have been circulated to all relief officers, and I have requested the British Resident at the Nepal Court to move the Durbar to issue orders in the country opposite to this district similar to those issued for Botwal (opposite the Goruckpore district,) and circulated with the Government orders above alluded to. I have not received definite replies from all the relief officers, but having just returned from Ramnugur (where the need is most pressing), I have learnt Mr. Howe's views on the subject, and have approved of the steps he intends to take.

I give Mr. Howe's opinion in his own words :—

"The question as to the supply of seed-grain, and whether there is sufficient in the country to supply all wants, is one of the most urgent importance at present. I have made very careful inquiries, and am convinced that there is not a sufficient supply, and that the next crop, on which everything depends, will prove a comparative failure unless the ryots are in some way or other assisted. The experience of previous famines, indeed, shows that there has never been a deficiency of seed-grain after a year of famine, and that, as a rule, this question may be left alone with safety ; but there are many points in the present famine on which experience will probably fail, because the circumstances of the present differ so entirely from those of previous famines.

"Indeed there appears a reason why, in a famine like that of Orissa, seed-grain should at the end of the famine be found in plenty, *and this reason does not exist in the present calamity.* In the Orissa famine the end came very suddenly, and thousands who had lived from hand to mouth in hopes of receiving help from Government, and therefore had kept their seed-grain to the last, were suddenly swept off. Help had, however, by this time come, and the survivors had therefore no inducement to consume their seed-grain. In the present case, however, though famine has been kept in check, yet in spite of every effort the privations and sufferings of the people have been most severe, and have tested their powers to the utmost. There seems to be a point when a starving man having seed-grain will become reckless and consume it. In previous famines before this point could generally be reached a collapse took place, after which help came, and hence there was seed-grain left for the survivors.

"But in the present famine though a general break-down is now fortunately an impossibility, the point when half-starved people become reckless has, I fear, already been reached; and this recklessness has inevitably been increased by the very fact that some relief has been given. The people will not believe that Government does not intend to supply them with seed-grain. I have frequently been told, while talking over this matter with the people, that Government, having made such large advances of food-grain, would, for its own sake, provide the only means by which they can ever hope to recover the debt. I have assured the people that in this matter they must help themselves, but have always been met with the reply that they had no seed, and that Government would in the end be sure to help them.

"As the aghanie crop was almost an entire failure, and a large part of the bhadoi was lost, I do not think there can be much seed-grain, as the people have a strong prejudice against keeping or using the seed saved in previous years. That certain well-to-do zemindars and mahajuns have seed, I admit; but I doubt if it will be available, except at almost prohibitive rates. It must be remembered also that large quantities of seed-grain have been destroyed by fire, and therefore that speculators will have a better excuse for raising prices. The measure I propose is this:—There is ample seed-grain just across the Nepal frontier. I have persuaded two planters to accept advances under Section 4 (B), Circular 80, and to sell seed-grain at various parts of the sub-division, where, from careful inquiries I have made, it will be most required. This plan, I feel confident, will be successful, as the fact of there being private competition will compel the holders of seed-grain to sell at fair rates. At first, feeling that some action was absolutely necessary, and not being aware that these gentlemen were willing to accept advances for this purpose, I proposed to purchase direct; but having lately visited Bugaha and the frontier, and found the present scheme feasible, I would far prefer to adopt it, as it would not directly interfere with private trade."

Mr. Howe is now engaged in carrying out this scheme, which, I think, will amply provide for the wants of his sub-division. In the Bettiah sub-division Mr. Gibbon has long since received an advance of Rs. 50,000 from Government under the Section quoted by Mr. Howe, and has already purchased a large quantity of seed-grain from outside the district: and, as Mr. Samuells observes, if Government competes with him, both in the collection and distribution of seed-grain, he will have very little chance of making a successful venture." As far as I can judge, it will not be necessary for Government to interfere.

Mr. Kilby reports on this head as follows:—"I have made very careful inquiries on this subject; many of the cultivating classes declare that they will have much difficulty in obtaining seed, as in very many instances their fields produced nothing, and many more produced a very small and inferior grain. The cultivators (the lower classes) naturally try to make things look as black as possible. If I ask them if they can procure seed if I supply them with money, the reply has so far always been in the affirmative. I find that even in favourable years seed is chiefly preserved by the mahajuns and headmen of the village, from whom the petty cultivators usually purchase just before the time for sowing comes round. These people (and I do not think from interested motives) give me the impression that there will be no difficulty about seed-grain. On the Nepal frontier and down the central portion of this sub-division (where the rice was a complete failure), there may be a little difficulty; but I believe that if we do not interfere grain in sufficient quantities will find its way over the border from Nepal."

I am not prepared to say that Mr. Kilby's anticipations are too sanguine; further inquiries are being made, and the action to be taken must depend thereon.

B.—Relief Works.

The subjoined statement shows the relief works in progress, and the number of labourers employed thereon. The average number daily employed during the fortnight has been 132,655, and the number on the last day was 141,301:—

	Men.	Women.	Children.	Total.	Daily Average.
Sub-Division No. 1, Motiharée ...	124,117	115,212	38,717	278,046	19,860
Ditto „ 2, Dhaka ...	276,506	138,857	85,235	500,598	35,757
Ditto „ 3, Gobindgunge...	84,395	59,685	30,170	174,250	12,446
Ditto „ 4, Bettiah ...	76,590	99,759	27,881	204,230	14,587
Ditto „ 5, Ramnuggur	146,538	163,600	53,592	363,730	25,987
Upper Gunduk Embankment, about	.....	.... .	.....	.. ...	18,000
Lower ditto ditto	81,782	843	1,988	84,613	6,018

There has thus been an increase of 455,773 over the previous fortnight, the total daily average number of people employed being now 132,655. In the Motiharee sub-division, owing to the completion of the work on the northern section of the road from Motiharee to Kutkenwa, work has been opened at two large tanks,—one at Sripore, the other at Kutkenwa. Each of these works can probably employ 2,000 persons daily till the end of June. Recourse has been had to these works, not from failure of works on the road, but because Mr. Oldham is anxious to reserve surface work for the rains. Of the reserve works, Mr. Oldham has opened work on one new road during the fortnight. Mr. Oldham calculates that about 10 per cent. of the entire population of his sub-division is on the work; of these 8 per cent. belong purely to the labouring classes. A large number, he says, still

show great independence, and 80 or 90 per cent. of the total number are fit for strict task-work. The style of the work done has greatly improved; the punctuality of the attendance being a marked contrast to the former state of things. Mr Oldham's system is everywhere the same, viz. 1,000 feet in tanks and 1,500 in fair weather roads are exacted for each mixed gang of 50 persons; and as soon as the allotted portion is completed, the gang is paid and discharged. When not completed, the mates and the spade-men are mulcted, ast hey are responsible that the earth is lifted away. The coolies are paid almost everywhere in grain for six days in the week, and in cash on Sundays, when grain payments are not paid. Retail traders are engaged to supply grain on the works. Grain payments are made as follows:—

All labourers are divided into three classes:—

(1) Men, (able-bodied or weak).
(2) Women and grown lads.
(3) Children over six years.

The first class get 18 chittacks of cleaned rice; the second 12 chittacks; and the third 6 chittacks.'

The numbers in each are made up every morning and sent to the gola, whence the rice required is brought by a body of coolies detached for the purpose. It is distributed to the mates of each gang of 50, and by them to the coolies by means of "choongas" of bamboo, holding measures of the three different degrees required. Mr. Oldham found no difficulty in introducing this system: it has, in fact, been in force for about a month and half.

In the Dhaka sub-division (No. 2,) wages have in some places been paid in grain, and grain has been supplied to all the works, and has been purchased freely. The total daily average has increased this fortnight in this sub-division, as below:—

	1st week.	*2nd week.*
Under Public Works Department	30,732	34,768
„ Circle Officers	2,925	3,488
Total ..	33,657	38,256

In the Gobindgunge sub-division Mr. Weekes has found it necessary to open out a number of new relief works, as the numbers were increasing. These new works have been chiefly tanks, which are supervised by a 'panchayet' of the village, consisting of three or four of the most respectable residents, assisted by the putwaries, jeth ryots, &c. The grain required for the workmen is made over to this 'panchayet,' who are provided with the necessary measures to hold 15, 12, and 9 chittacks. Ten tanks have been started on this plan. The condition of the people on the works, Mr. Weekes reports, is good. Very few at all emaciated persons are now to be seen. This is satisfactory, as in former reports they were said to be very thin. They appreciate being paid in kind, as they get full value without the interposition of any bunniah, lalla, or mate.

Mr. Weekes has had lists completed village by village of the labourers employed on every relief work. In the Bettiah sub-division a somewhat similar system has been introduced by Mr. Samuells. He says:—"A great start has been made in the way of village relief works, payment in kind rendering them much more manageable if worked through local agency. The following is the plan I have pursued with great success, 20 tanks having been started during the last week, and with really good results. The particular tank being selected, the number of villages for which it is to supply labour is fixed in proportion to the size of the tank: it may be one village or a dozen. Each village brings its own gang under its own officers, generally the 'putwary' and 'jeth ryot' or two. The whole work is under the joint management of one of the putwaries, with whom are associated a 'jeth ryot' and a local 'bunniah.'"

The rates are one "pucca" seer for men, ¾ for women, and ½ for children. Copper measures are used, and one man can measure out grain to 100 coolies in 20 minutes. The 'bunniah' is the only salaried person on the work. Three or four tanks can be started in this way in a morning's ride. The bunniah's account is kept at the gola. The putwary's return is sent to the clerk of works, "who is always on the move, and a check is thus provided."

It is very satisfactory to find local agency so successfully employed, as it has in some places been found impracticable. The plan should be adopted to the utmost. Task-work has been introduced on the works supervised by the Public Works Department, but a want of overseers is much felt. Good work is being exacted, however, on the daily-wage system, by enforcing early attendance and close supervision.

In the Ramnuggur sub-division (No. 5) Mr. Howe reports that the orders recently received regarding payments in kind will be introduced at once. In the meantime the system described in para. 3 (*a*) of Circular No. 48—T.F. is in force, *i.e.*, there are bunniahs on all the works, who sell both to the laborers and to the public.

Task-work has not been introduced; "the people," Mr. Howe says, "do not understand it," and he fears to introduce a change, as the laborers depend on the daily wages they receive to a large extent. When payments are made in kind it will be easier to extend the task-work system.

C.—Transport of Grain.

It has been found that, in consequence of some error in the accounts of the first despatches, one *lakh* of *maunds* still remains to be carted. The transport officer has been requested to forward this, and enquiries are being made as to the discrepancy between the accounts of despatch and receipt.

D.—Storage of Grain.

The following amounts have been stored according to latest accounts:—

Allotment.			Rs.
1,54,980,	No. 1 ..	Motiharee sub-division ..	1,55,508
2,10,000,	„ 2 ..	Dhaka	1,09,098
1,34,300,	„ 3 ..	Gobindgunge	1,09,472
1,11,000,	„ 4 ..	Bettiah	in full.
2,50,000,	„ 5 ..	Ramnuggur	2,11,732
1,50,000,	„ 6 ..	Upper Gunduk Embankment..	1,50,000
14,000,	..	Lower ditto ditto ..	9,010

The sales of Government grain are shown below:—

Motiharee Sub-division.

Total	...	To public	...	12,731 3 6
		Advances	...	21,755 9 0
		Charity	...	2,716 2 4

Sales to the public have not been opened at the two frontier golahs, Adapore and Kutkenwa, for fear of a sudden drain on the stores into Nepal, which there would be no means of preventing. Sales will be deferred here till later, when the distribution of grain throughout the country will have lessened the demand. But at all the other golahs in this sub-division (Motiharee) the sale of Government grain is going on briskly. Stock-taking will be completed by the end of the month.

In the Dhaka and Gobindgunge sub-division the grain is being weighed and marked as it arrives. In Bettiah stock-taking has been completed.

E.—Advances to Private Persons.

The following sums have been expended under this head during the fortnight:—

	Rs.
I.—For storage	5,000
II.—For assistance to ryots	5,201
III.—For land improvement	22,516

The total amount expended up to date under these heads has been—

I	1,37,000
II	1,52,430
III	55,165

With regard to advances of grain to ryots, Mr. Howe reports that such advances in estates belonging to the Rajah of Ramnuggur have now been placed on a very satisfactory footing. The Rajah has, on his own security, consented to advance Government grain to his ryots in two instalments; the first commenced in February last, and amounted to nearly 8,000 maunds. Subsequently, when distress had again commenced to be felt, the Rajah of his own accord volunteered a further advance of 8,000 maunds. This Mr. Howe thinks will enable the ryots to tide over the worst part of the year.

This last advance is now being made rapidly, and at the same time Mr. Howe is making detailed enquiries as to the condition of the ryots, so that, should anything further have to be done, the necessary information will have been collected. The Rajah has had lists of all the villages prepared in which assistance is required, and the provision he has made is very liberal. The Assamees receive advances in accordance with these lists, and through and on the responsibility of the Raja, and Mr. Howe thinks that the plan may be safely continued. A certain number of advances have also been made to substantial sub-proprietors, britdars, jageerdars,' &c. These are being rapidly completed. In the estates belonging to the Rajah of Bettiah a plan of action was sanctioned by the Commissioner, by which detailed enquiries were made by tehsildars, assisted by a responsible officer on Mr. Gibbon's post. This plan very much resembles the rules laid down in paragraph 8 of Circular No. 48—T.F. In this way several villages have been provided for; Mr. Gibbon, however, declines to sanction advances to the better classes of ryots coming under classes II and III of the Circular in question, until they show that they need assistance by disposing of their moveable property. Mr. Howe is treating these ryots, therefore, under Rules 8, 9, 10, and 11 of the Circular.

F.—Charitable Relief.

The following figures show the daily average of persons relieved under this head during the fortnight:—

Circle No. 1	750
„ „ 2	1,460
„ „ 3	2,150
„ „ 4	2,989
„ „ 5	2,000

The numbers in the Dhaka sub-division have greatly increased, but Mr. Kilby has tested the lists, he says, very carefully, and is sure the relief is not being given improperly.

G.—Financial Result of the Fortnight.

Total expenditure from the district and subordinate treasuries, as shown in the last narrative, full details of which were therein given, Rs. 18,30,248-13-8.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 25th May 1874.

READ—

The narratives of the districts of the Bhagulpore Division for the fortnight ending 16th May 1874.

Bhagulpore.—The report was not submitted by the Collector till the 21st, owing, as he explains, to delays on the part of the sub-divisional officers of Soopole and Muddehpoora and of Mr. Kirkwood to submit reports. Such of Mr. Kirkwood's returns as were submitted seem to have been exceedingly inaccurate. These officers must in future recollect how important it is that punctual and correct returns should be submitted by them. The Collector reports that the condition of the people has certainly improved during the fortnight, owing to the rain that has fallen to the north of the Ganges; the fall appears to have been general, though lighter in some places than in others. The number of laborers on the relief works is 22,647 against 24,690, and on Durbhunga works 11,328 against 11,722. The sale of grain to laborers seems to have been generally introduced throughout Soopool; though in other parts of the district, except an insignificant quantity of grain sold in Muddehpoora, no sales to laborers appear to have been made. No advances of grain have been made to ryots, and the whole quantity expended up to date is 39,357, against 18,000 reported last fortnight. The Collector remarks that these returns are undoubtedly inaccurate; every endeavour should be made to ensure next fortnight's statements being perfectly correct. The average number in receipt of charitable relief seems to have been about 1,418 persons, but these returns again are confessedly inaccurate.

Monghyr.—The fortnightly narrative for this district has been submitted by the Joint-Magistrate as the Collector has been unfortunately laid up from the results of over-exertion in the sun before he had recovered from the effects of a fall from his horse. Things continue much the same as before, but rain is much wanted, none having fallen during the fortnight. The result is that in

one pergunnah, Chukai, pressure is reported to be increasing. Also in Begoo Serai, owing to the cessation in the demand for labor for cultivating the soil, increased relief works have become necessary, and three works are being opened. Three deaths, at first reported as starvation deaths, have occurred in the hospital of this sub-division from diarrhœa, possibly brought on by previous privation, but these deaths can scarcely be called deaths from starvation no more can that of a woman who died after having received food in the Gurparah relief centre for a month. Prices appear to be steady and show no great scarcity of grain anywhere.

Private trade is said to have almost ceased. The arrangements for charitable relief are now complete and the group system satisfactorily organized. The total number of persons relieved at poor-houses was 2,001 against 1,725 recorded last fortnight; no details are given as to the numbers relieved in their own villages. The average number of laborers on relief works was 5,842 against 6,495 reported in last narrative. The expenditure of grain during the fortnight has been as follows :—

By sale to laborers	... ...	... 431
„ public	... ...	... 1,678
„ in charitable relief	... ...	... 1,081

The system of paying laborers in grain should be more extensively introduced. The total consumption up to date has been 13,772 maunds.

Purneah.—Private trade still continues active in this district and the prospects of the coming crop are said to be exceedingly good. The numbers on relief works under the Department Public Works have decreased from 20,280 to 18,810, but the numbers on light labors, including those employed on roads under circle officers and village tanks, appears to have increased from 18,869 to 25,312, of whom 1,424 were employed in spinning and weaving. The arrangements made in this district for employing the able-bodied on heavy road-work, while the weaker men and women and children are employed on light labor in these villages, appear to be excellent, and it is satisfactory to know that the labor exacted from the latter class is not merely nominal. The returns of the sales of Government grain have been made in much fuller detail than heretofore. From the return now submitted it appears that 54,613 maunds, not 28,604 as stated in last report, was the quantity actually disposed of up to the 2nd May. And during the present fortnight 60,601 maunds have been expended, making a total of 1,15,214 maunds; and up to date, out of this quantity 44,659 maunds have been given as advances to ryots. The number of persons receiving purely charitable relief during the fortnight has been 5,656 against 1,395, the number shown in last return. The group system has been fully organized everywhere where it appeared to be necessary.

Sonthal Pergunnahs.—Distress seems to be increasing especially to the south of the district, but relief measures are still said to be adequate, and want of water has caused a good deal of suffering both to the people and to cattle. The returns of laborers on relief works are only now for the first time complete, so that it is impossible to compare them with the results of previous fortnights. The total number of laborers on relief works are 23,330, of whom only 4,717 are employed under Public Works officers. The quantity of grain disposed of up to the 10th May was 6,652 maunds, of which all but 67 maunds were sold to laborers.

No. 3355—S.R.

COPY of this Resolution and of the District Narratives forwarded to the Commissioner of the Bhaugulpore Division and to the District Officer in that division. Also to the Commissioners of Patna and Rajshahye Divisions, to the Additional Commissioner, Durbhanga, and to the Relief Commissioner, Rajshahye.

Narrative of Scarcity and Relief of the District of Monghyr for the Fortnight ending 16th May 1874.

A.—State of the Country.

The event we have most to deplore in the fortnight under review is the loss of the services of our energetic Collector, who up to that date had been the life and soul of all relief operations. A serious fall from his horse, and a long ride in the sun before he had recovered from the effects of the fall, have completely laid him by, and at the last moment, with the fortnightly report almost due, I have had to relieve him of the current duties of his office.

It is impossible to predicate anything generally as to the state of the whole district, as the accounts received from places at no great distance from one other differ entirely on the subject of the increasing or decreasing pressure of famine. I must therefore come down to detail; and as the neighbourhood of Bukhtiarpore is the part concerning which there is certainly most cause for anxiety, I commence with it, as reported on by Mr. Manson. Here the general distress is increasing, and crowds are coming on to the works at only subsistence rates. Mr. Manson has not heard of any actual deaths from starvation, though he has constantly come across women and children very emaciated, and these persons show much less disinclination to eat at the poor-houses than they did a short time ago. Mr. Manson estimated the yeild of moong crop now on the ground at a six to eight-anna crop; the first sowing of karianti dhan, and the second sowings after the rain of the 27th, depend so entirely on the cessation of the present scorching hot weather and the early coming in of the rains, that it would be premature to form any opinion of the probable outturn. As the moong and karianti dhan together only cover an area of about one-tenth of the lands in the Bukhtiarpore circle, the crop, however good, would only afford a temporary amount of relief. Private trade is reported as almost extinct. Rice cannot be obtained in the circle from anywhere but the Government stores. This arises doubtless from the fear entertained by the petty traders that if they imported they would have little demand for rice—firstly, because Government rice is supplied at cheaper rate than they can afford to sell at; and secondly, because the inhabitants of these parts will not buy rice when they can get their ordinary food, the cheap heavy rubbee grains, at a less price than rice.

Mr. Campbell reports on the Jamooee Sub-division that private trade is active, but the new rubbee is very extensively hoarded by zemindars and ryots, pending some signal indication of the probable prospects of the approaching rainy season. It may be said that people await with hushed and bated breath. Its seasonable fall is this year so much a matter of life and death that they superstitiously shrink from even discussing it. Without it we shall have a terrible famine, and no mistake; with it we shall have no famine, and our preparations against it stigmatised as a terrible mistake. In pergunnah Chuckai the pressure is increasing, so that Mr. Foley, of Simultolah Factory, recommends the commencement of the sale and distribution of Government rice. On the other hand, Mr. Wight has travelled through the whole of Chundun Bhuka, grouping its villages for relief purposes, and reports that "there is no distress whatever, save in the cases of a few miserable beggars, not amounting to a dozen, who are equally badly off every year. In addition to this being the present state of things, I may add that there is no prospect whatever of distress, *i.e.*, assuming that the rain falls in its proper course." This really cheering state of things—for it is cheering to find even one small pergunnah comparatively safe—is accounted for by Mr. Wight by the ripening of a very fine mohwa crop, the trees in the plains having yielded well and early, and now the hill mohwa trees, "still rich in fruit," and likely to go on yielding for another two or three weeks Mr. Wight also reports that whilst he was organizing the group system before the mohwa crop had been secured and the pergunnah rendered safe, the Rajahs who own the pergunnah did nothing; but now that there is no prospect of relief being required, the Rajahs' omlahs are very energetic, spurning help from Government, and assuring him that the Rajahs will take every care of their own ryots. This might be worth remembering, when eminent services rendered during the famine are being rewarded.

From Begoo Serai Sub-division Mr. Wilkins reports that all the crops are now gathered, and that a large number of people are thrown out of work. Two relief works are already started, and a third is in contemplation. Three deaths have occurred in the Begoo Serai Relief Hospital from diarrhœa, probably brought on by eating a full supply of good wholesome food after several months of unwholesome and insufficient food. One woman has died, probably from the after consequences of starvation, in Gurparah relief centre, where she had been a month, and was thought to be rallying. She has left behind her a little child, which is being kindly taken care of by Mr. Hooley at his factory. The case of starvation reported by Mr. Money in the last fortnightly narrative turns out to be one of death of fever, perhaps precipitated by insufficient food. It is very common for the natives to say, when a thin old man dies, that he died of hunger, when it is really death from old age and decay. Mr. Wight had one such case reported to him, and went and saw the body. But seeing it was the body of a very old man, he asked to see his widow, and he describes her

as so fat that the flesh on her arms hung over her ornaments. This very old man before his death, trusting, I suppose, to his emaciated appearance, must have been to some relief centre, and *actually died possessed of an unused ticket for six seers of rice.*

In the sub-division the bazars continue to be well stocked. From Khurrukpore Mr Scott, Assistant Manager under the Raj Durbhunga, reports that "there is as yet no fear of real distress in any portion of the estate under my charge. In some villages janera is being reaped, and cheena has been cut some days past. At head-quarters there is not a symptom of distress amongst the able-bodied. The enormous amount of work wanted by the Railway Company and the Government, and private transport, and the digging out of Dhobey's tank, makes it impossible for any man who can pull an oar, drive a cart, carry a rice bag, wield a kodalie, or even carry earth, from being in want.

B.—Relief Works.

The earth-work of the road from Bukhtiarpore to Cheynpore is finished, and the Overseer is re-turning, dressing, and filling up subsidences; a tank is being excavated at Bhotea, and the continuation of the road from Bukhtiarpore to Chicknee Ghât is marked out and ready to be commenced on the moment there is a demand for work. Tank-digging at Putlam, Simree, Russulpore and Guspore, is going on under the management of the zemindars of those places, well overlooked by Mr. Manson and his staff. The payment of the laborers in kind is being gradually introduced. Light labor in the form of spinning and weaving cotton has been started, but the applications for such employment are not numerous. Baboo Bookhun Sing, zemindar of Suroujah, has been excavating a tank in front of his house, and thereby employing about 150 men; and Mr. H. Christian, of Chumparun, is also digging a tank at his factory.

Four tanks are being excavated at Jamooee, giving employment to about 600 men, women, and children. These excavations are by task-work, and the laborers employed are reported as doing a good day's work, earning good wages, and to be in good condition. It is hoped that all these four tanks will be finished by the rains.

Two relief works have been opened during the fortnight under review within the sub-division of Begoo Serai: one a tank at Dowlutpore, under the supervision of Mr. MacDonald; and the other at Nunighoul, under the management of Mr. Crowdy. Here the coolies are paid in Government grain through a paid salesman, Messrs. MacDonald and Crowdy kindly supplying their own factory grain till the Government grain arrives. A road to Gurparah and a tank there will be started during the ensuing fortnight. Around Khoranpore Factory Mr. Cooke reports that the excellent rubbee crop has kept the people in good condition, and no relief work will be wanted there.

From Luckee Serai Mr. Currie does not mention any relief works, but from a passage in his report it would appear that whatever there are, are under the Department Public Works, and I cannot find amongst any of the papers made over to me any account of what is doing. Mr. Currie, however, has been most successful in introducing the light labor system of cotton-spinning. Numbers of poor women, willing to work, but having nothing to do, flock to him and receive cotton, which they return as thread, which is paid for in kind at a little above the bazar rates. The weavers also, men accustomed to a sedentary life, who would not earn as much as a Moosahur child in tank-work, at excavation, or road-making, are coming in to Mr. Currie, and weaving the thread spun by the poor women. Mr. Currie considers this as one of the best systems of relief, as it is really task-work, but light. It neither demoralizes them into paupers, nor mere beasts of burden, but enables them to earn their living at their own trade and in their own houses.

	Men.	Women.	Children.	
Khurruckpore Irrigation Work ..	2,136	938	142	daily average attendance.

At the head-quarters we have the deepening and banking up of Dhobey's tank, the levelling in of the Fort ditch, and petty earth-work in the public gardens, giving employment to 205 men, 783 women, and 91 children daily.

C.—Transport of Grain.

All private importation of Bukhtiarpore is reported to have ceased, at most 10 or 15 maunds a day; 52,821 maunds of Government grain have been received at Bukhtiarpore, and 9,000 maunds are being despatched. Jamooee and Begoo Serai appear to have received their allotment of grain and stored it, so that there has been no transport of Government grain.

To Luckee Serai 2,000 maunds of rice were brought up by a private trader. To Monghyr itself private importation has almost ceased; special trains loaded with Government rice continue to pour their contents into our railway station. But the transport is quite equal to the strain put upon it, and it is passed up by thousands and thousands of maunds to Soopool and Tirhoot. The ferry farmer at Rajghaut occasionally breaks down in his arrangements for crossing over this large number of laden carts, but the moment this is brought to the notice of higher authority and a little pressure brought to bear on him he manages to find boats and crews enough.

Government Grain received during the Fortnight.

	Mds.	Srs.	
Luckee Serai	20,387	0	Will be despatched to Purlabpur no sooner the golah there is ready.
Jamoooe	5,112	8	All despatched to Secundra Golah.

D.—Storage of Government Grain.

The third golah at Bukhtiarpore is finished and filled; the fourth and last is being constructed, and will be finished in about four days.

The first golah at Chumparun is up, and the roof being thatched. Grain is being sent there, and of this 4,150 maunds are being stored in Mr. Christian's Factory till the machan is ready. At Survela the work is going on languidly, although all the materials are collected. Mr. Manson hopes to be able to get down there soon and rouse up the energies of the golahdar.

Of the 49,000 maunds for the Bukhtiarpore golahs, some 45,000 have already been received; of this only 1,500 maunds are still in the open air. Extra assistance is required for sorting and counting bags at Bukhtiarpore. The bags being marked in English, some little knowledge of that language will be necessary in the men to be employed.

All the old stock at Jamooce, except 54 bags, have been pushed on to Sekundra. The grain at Potsanda is being pushed on to Chuckai and Mohesree, as it matters very little to have an empty golah at a railway station, that can always be filled within a few hours. All the Jamoooe golahs are good substantial buildings, with thick mud walls and tiled roofs impervious to rain, and little liable to injury by fire.

Begoo Serai seems to have received its full complement of grain, and stored it, and not as yet broached it except for charitable felief; so that there is nothing to be reported from there.

The Luckee Serai grain golah was almost emptied, when we were expecting another 125,000 maunds. In fact, the stock was reduced to 300 maunds. It has now about 5,000, and the only sale from it has been 150 maunds, sold to the Department Public Works for sale to the laborers on the Luckee Serai and Sekundra Road.

The large extra golah built at Sondhi when the extra grain was expected, is standing empty. The grain taken over from the temporary custody of the zemindars was damaged by white ants.

The golah at Girna Parsanda is just finished, and the rice which had been deposited temporarily in a Rajpoot's house is now stored.

The Sekundra golah has been greatly enlarged. Large quantities of grain have been received there from Jamooce, and a new golah is nearly completed.

Choarah was also enlarged to hold a further 10,000 maunds, and when nearly finished, another golah was projected at Pertabpore in its stead. The materials for the latter were all ready, when it was settled that this extra lakh of maunds was not to be sent, and the work was stopped, and the building so far as finished used as a relief centre.

E.—Advances to Private Parties.

	Rs.
To Municipalities	5,000
„ Trustworthy residents for purchase of grain ...	76,450
„ Zemindars for land improvement	44,740
Tuccavee advances	56,983
Total ...	1,83,173

Applications for advances of all kinds continue to pour in. Mr. Wilkins has the advantage in his sub-division of having a large number of planters, who know all about the circumstances of the ryots and petty zemindars. These gentlemen kindly undertake the investigation into the *bonâfides* of the applications, and a great work is going on in the sub-division in consequence. I anticipate that every decent ryot in the sub-division may have it in his power to fully plough and sow as much land as he ever cultivated in his life, and that yet the loss to Government by bad debts will be extremely small.

Mr. Manson also has advanced Rs. 3,625 in cash and 14 maunds of grain to zemindars for various works, thus stimulating to a great extent the employment of labor totally during the lull in agricultural labor which occurs between the harvesting of the rubbee and the preparation of the land for the bhadooe.

F.—Charitable Relief.

The feature of the fortnight has been the completion of the group system under Mr. Manson and Mr. Currie. Mr. Manson's arrangements were almost finished when the last report went in. Since then he has been able to break up his poor-houses and send the

helpless poor to their homes with tickets which procure for them the necessary supplies from the headman of the village: this is a very desirable consummation.

Mr. Currie and his subordinates were pushing on the grouping system with great alacrity; they have visited a very large number of villages, and may now be considered to have down the name and residence of everybody likely to starve and the person responsible for the prevention of his starving. All their arrangements were suddenly plunged into confusion by the withdrawal of Messrs. Baillie and Wight from the work to the more severely stricken district of Tirhoot, but I hope that by the end of the next fortnight I shall be able to report that the fresh distribution of jurisdiction caused by the departure of their two coadjutors has been arranged.

The following information is in accordance with Government letter No. 1250 :—

Committees.—Monghyr, Jamooee, and Begoo Serai.

Sub-Committees.—Luckee Serai, Sheikpoorah, and Bukhtiarpore.

(8.) Bukhtiarpore to Bhootea.—1,972 men, 494 women and 610 children employed.
(9.) Bulkur to Rosrah.—460 637men, women, and 276 children employed.

No. 456—S.R., dated Bhagulpore, the 21st May 1874.

From—V. Taylor, Esq., Collector of Bhagulpore,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I have the honor to submit herewith my thirteenth fortnightly narrative for this district. The delay in its submission has been caused by non-receipt of reports from either of the northern sub-divisional officers or from Mr. Kirkwood, and up to date the reports from Mr. Kirkwood and Muddehpoora have not been received, and my report is necessarily incomplete, as regards figures especially.

A.—State of the Country.

2. The Soopool officer reports that "the bazar supplies are about the same as reported in the last narrative. The sale from the various golahs of our Government rice has nearly shut the private supplies of rice out of the market, as the holders still refuse to part with it at anything approaching the Government rates; all other grains are procurable in sufficient quantity, though at very high prices." At Soopool the nominal price of rice is 9½ seers per rupee, and it varies from this to 11 seers over the sub-division; murwah and gram are obtainable from 12 to 14 seers

3. Towards Simrahi it is said "that food-grains are already scarce, and the timely opening of the golahs has been highly beneficial to the people; but at Bhulooa and Pertabgunge there is always a supply of rice and other grains. There is at present a tendency of prices gradually falling, as the mahajuns who hold stocks are willing to get rid of them, owing to the opening of the Government golahs." The prices quoted are, common rice 9 to 11, gram 10 to 11, wheat 11 to 14, murwah 12 to 13, and kurti 12 to 13 seers per rupee. The Deputy Collector adds—"A large quantity of wheat which was reserved by people as a store has been sent to market, which is an evident consequence of the opening of our golahs" There is said to be still a supply of about 500 maunds of private imported rice at Pertabgunge and some more is on its way, and there are about 4,000 maunds held in store by private dealers at Bhulooa bazar.

4. The head-quarters price-current shows a slight rise in the prices of rice and gram during the fortnight, rates quoted being now—

	Srs.	Ch.
Rice (common)	10	1
Wheat	13	14
Gram	15	12
Indian-corn....	15	2

5. The Banka officer reports—"During the fortnight the supply of food-grains in the principal marts is somewhat decreased, and the rate of wheat has been dearer, varying from half to one and a half seers, but the rate for rice has been unaltered for a long time."

6. As regards the general condition of the people I can safely say it has improved, and I believe will continue to improve. There has not been any rain during the fortnight south of the Ganges, but the Soopool gauge measured ·06 on the 11th, on which day there was a smart storm, accompanied with hail, in portions of the Ekar circle. Slight damage to moong and mangoes was caused by the hail; beneficial rain fell on the same day to the north of Sonebursa and west of Muddehpoora, in the Kamp circle, and also in many parts in the Naradeegur circle, generally light, but in places heavy. Of course any rain at this season must be of great value.

7. The Soopool officer writes—"I have no change to report on the general condition of the people; work is provided on all sides at very remunerative rates, and the labouring classes are taking full advantage of it; for the incapable, ample provision is made in the house-to-house relief." Notwithstanding this, the numbers on the works have decidedly fallen off. This, Mr. Smith says, is partly owing to the heavy rain at the close of last month having taken some of the laborers off to cultivation, and partly, but principally, to the change of system from that of a mixed task and daily labour to that of piece-work. But he adds—"I don't think, however, that this has deterred those really in want of work from availing themselves of this assistance offered them, for the rates are still sufficient to provide amply for a man willing to do a fair day's work, and to allow of his putting by something for another day."

8. A different opinion is expressed by Deputy Collector Ram Sunkur Sein, who remarks—"Wherever a relief work is opened there is a rush of laborers, and I fear we are drawing off the agricultural laborers who are employed by the cultivators during the sowing and

weeding seasons, but these cultivators do not seem yet disposed to employ laborers for fear of feeding them." I do not agree with this opinion, because the present weather is not only very seasonable and healthy, but it is *not* the season when laborers are employed in weeding, and the ploughing has, as a rule, been completed all over the north of the district. I think there is a tendency on the part of many to make out that the weather is not seasonable, and the present year will be as bad as the last, if we have no rain immediately. Prophecies and forebodings and rumours are all afloat as to the gloominess of future prospects, but, notwithstanding the great care with which every possible fear or ground for fear is seized upon and brought forward, it is admitted that the crops, low-land rice, murwah, and moong, are really prospering, the latter is almost ripe and promises well, the bhadoe plants are said to be about a foot high in many places, and even paddy has been sown in a few low fields. What is known as the "Nuchhuttur Rohin" commenced on the 16th, and lasts about a fortnight, during which time large quantities of paddy will be sown in dry fields, which will germinate as soon as rain falls. The general health of the people is remarkably good, and I have never known it better during the past five years. All our plans and projects for the relief of the distressed are well in hand, and, I may confidently say, well ahead of the distress itself.

9. Baboo Hurbullub Narain Singh, of Sonebursa, who sends me punctually a weekly report, and whose property chiefly lies in the Kamp circle of the Muddehpoora sub-division, makes the following remark, which, coming from the man it does, I think is of some weight as showing that the Kamp circle, or the greater part of it anyhow, is not so very badly off; he writes—"As regards the state of the ryots, it appears that they are not reduced to a bad condition, for not even two are to be seen out of every hundred who are emaciated for not getting food; those who are infant and old are in a helpless state on account of their old age and infancy, and those who are leprosied are also helpless; besides these, others look fat and strong In the village I find that the amusements among men are the same as before, for instance, in the night the people are heard hither and thither to be singing and making themselves merry, and in other places there are feasts on account of marriages, and from these it appears that these men are not surely in a distressed condition. On looking at them no one would consider them to be in distress, though on being asked they would say they were greatly so." There is no doubt there is some truth in this, and my own fear is, that the difficulties all officers have to contend with are the way in which every endeavour is made on all sides by the people generally to make capital of the distress which undoubtedly exists in some places and impose on us in every way they can. Mr. Smith instances cases of people refused assistance in the house-to-house relief as not being in any way fit subjects for such relief, certainly not gratuitously, appearing again before him in the oldest and filthiest rags, clamorous for food.—they were detected luckily, known to be far from starving, and turned away again.

10. There is but very little crime, what there is is very petty.

11. There have been no cases of starvation reported or heard of during the fortnight, and assistance is being so freely given, and rice in sufficient quantities available, that it is scarcely possible any such should occur.

B.—Relief Works.

12. I annex a statement showing what has been done on this head during the fortnight, as also the one showing the number of persons employed on the Durbhunga Court of Wards' estate, in pergunnah Naradeegur. It will be seen that there is a decrease in both statements, and notably so as regards the numbers employed on some of the Court of Wards' tanks on the last day,—as piece-work has not to my knowledge been introduced on these works, the decrease is more fairly attributable to the rain and the consequent employment of laborers elsewhere.

13. It is too late now to think of starting any new tanks, and many of those marked out and planned will never be undertaken, our light-labor-gangs have been usefully and largely employed in cleaning out old existing tanks, but I regret from want of information, even to the present time, I am unable to give the details of the numbers employed. Arrangements are being made under my orders for employment during the rains for those who will remain on our hands, and the work can well be done now the grouping system is introduced; I mean looking after the sanitary condition of each village, a thorough clearing and up-rooting of all rank jungle, and the filling up of all holes and other receptacles for filth, and I have no doubt much good can be done in this way.

14. The only information I have of persons employed on private works is from Baboo Harbullub, who has a total number of 5,556 laborers on various works. Deputy Collector Ram Sunker Sen only remarks "there are private tanks undertaken by zemindars and well-to-do men in villages, but no returns are available from them; in general they employ only able-bodied men in order to finish the works early and at a less cost." Mr. Kirkwood, in his last fortnightly, which, being received too late for any use to me, was given to the Commissioner in time for his, fortnightly, remarked that many of the zemindars in Soopool were employing many laborers, and have been working exceedingly well.

C.—Transport of Grain.

15. The imports and exports at the Bhagulpore railway-station alone of all the stations in this district show any trade, the imports for the past fortnight were 16,595 maunds

against exports of 13,495 maunds. The particulars of this show the usual trade at this season of the year, whereas the imports are clearly the result of the rates at which grain can be brought to a distressed district, with the exception of wheat and paddy. 6,542 maunds of rice have been imported from Howrah and Chandernagore, and 1,263 maunds of paddy from Chandernagore; 49 maunds were local, and 4,249 wheat and 4,492 gram were brought down from the far up-country stations. The exports were 7,964 maunds of oats for Howrah and Chandernagore, and 3,614 maunds of wheat for Chandernagore, 1,212 gram for Howrah, and the rest rice, wheat, and gram "up" for other distressed districts.

16. I am afraid the remarks made in my last fortnightly, paragraph 16, were premature, as the carriage has not been set at liberty. A number of carts from this district have gone to Messrs. Thomas and Company, contractors at Monghyr, and Mr. Hennessy has taken a fresh contract for Tirhoot. Mr. Smith is using all available carriage for his groups and the few golahs that still have their allotment to be made up.

D.—Storage of Government Grain.

17. The statement annexed will show how the matter stands, and I regret that, notwithstanding clear orders and ample time to Mr. Kirkwood, I have not been able to fill up all the columns as completely as I could have wished.

E.—Advances to Private Parties.

18. The only action taken under this head has been the sanctioning by the Commissioner of Rs. 15,000 to three applicants, and Rs. 2,000 to six applicants by me for helping ryots, and Rs. 125 for land improvement; but a special condition has been attached, that the advances are to be given in *grain* only, and I have not as yet received intimation that the applicants have taken advantage of the sanction, but though it is possible many may, some, I dare say, will not. No applications have been lately received, which looks as if the class of persons who generally apply prefer money to grain.

F.—Charitable Relief.

19. The chief event of the fortnight has been the forming of groups in the Soopool and Muddehpoora sub-division, over each of which a Superintendent will be placed. The Naradeegur circle has been divided into 11 groups, to be known by the following names:—

Dugmurrah, consisting of	13	villages.
Bysa „	16	„
Bhuptiahi „	14	„
Shurreah „	8	„
Roswar „	7	„
Nowabakur „	9	„

Gummarea	„ ...	...	...	...	18 „
Burdaha	„ ...	...	...	...	23 „
				Total	76 „

20. It has been found impossible to secure unpaid agency to look after these, but the men selected, will, I trust, do well. Mr. Smith promises to have 2,000 maunds of grain stored at each group, and all means for its disposal ready by the end of May; and I dare say by the end of the month all this will be in a very forward state. Moodies have been appointed already in many places, and are availing themselves largely of Government grain to dispose of irrespective of the groups.

21. The sale of the Government grain, though not so extensive I as apprehended it would be, and not nearly up to the maximum limit allowed to be sold from each golah daily, is working most beneficially, and, as far as I can ascertain, no private trade is being interfered with. I can state positively private trade does not exist in the north of the district. Buying and selling or exchanging is carried on in hauts and in the villages themselves, and where grain is not forthcoming, Government is providing it The sales are in a great measure preventing distress which would otherwise exist, and the gratuitous distribution of rice to those really entitled to it, must, in the way this work is being carried on, prevent anything approaching to starvation. We have a large quantity of grain in the district, and my decided opinion is that the amount is more than ample, provided we have our rains at the proper season, and in sufficient quantity. I myself believe prices have reached their highest, and the general tendency will be a fall rather than a rise. We have not reached, and I believe we shall not reach, the prices of 1866, and we are probably erring on the right side, and giving in cases where we ought to sell; but still it is satisfactory to think, and to be able to record the opinion, that the measures taken in this district are well in advance of the distress requiring to be met.

22. The Muddehpoora officer, in his report this moment received, remarks—"The bazars are well supplied, as baniahs buy Government grain and retail it," and also the Muddehpoora and Putherghat road is getting on fast. The laborers are being paid in grain; the weak are allowed to work, the strong being sent to the road to Shahpore under the Department Public Works. Tanks have been started as light-labour-works at Baijnathpore, Rampore, Rohwa, and Julsema, payments being made in grain; only private tanks are being made in several villages. In the Bhowanipore circle tanks, as light-labour-works, have been started at Bunchola, Bhutunda, Bhellowa, and Rampore, payment being made in grain only, *which the coolies prefer to cash payments.*

23. Two poor-houses are now in working order at Kamp and Bhowanipore. The necessary houses have been built, and proper officers appointed for the management of them;

but no further information as to the numbers at them is given, nor is any mention made as to the numbers availing themselves of spinning relief.

24. In the whole of Muddehpoora, where the house-to-house visitation has been, so it is said, well gone into, only 700 in all—men, women, and children—have been granted tickets for gratuitous relief; and the numbers fed at the various centres mentioned in the last fortnightly, are 745 men, 640 women, and 1,121 children, or a daily total average of 179 persons.

25. The total daily average of persons fed at the Pertabgunge, Nathpore, Bhulloea, Buttaneah, and Kuldah centres, is 416 persons,—men, women, and children not distinguished, as directed they should be.

26. Deputy Collector Ram Sunker Sen remarks he has made no great progress as yet in the house-to-house relief, which is unintelligible, as all other officers have done very well in this work.

27. Mr. Dennys, now Superintendent of Naradeegur circle, submits a statement showing that during the week he has issued tickets for the relief of 418 men, 792 women, and 742 children; and Mr. Smith remarks that 608 persons have been fed during the fortnight. Mr. Fanshawe has issued tickets to 2,109 persons, and Mr. Wilcox, of the Ekar circle, to 4,902 persons, but no details have been given.

28. As regards the disposal of Government grain, whether by sale or payment to laborers, or gratuitous relief, I have filled up the statement to the best of my ability with the imperfect data still furnished me, notwithstanding distinct and repeated orders to the officers immediately responsible for its correct and punctual submission.

29. I have again explained to Mr. Kirkwood the necessity of punctuality in the submission of his returns, without which it is impossible for me to submit to Government fully detailed information as to the numbers relieved. I have delayed this report in the hopes of receiving something from him, but cannot delay it longer.

I have only received a few general figures from Mr. Kirkwood, but not the statement properly filled up, consequently the estimated grain expenditure is omitted, but 60,000 to 70,000 mds. ought very easily, unless accounts are exaggerated, to be disposed of in a fortnight. The actual quantity sold and issued *undoubtedly* exceeds the quantity shown in this statement.

V. Taylor, *Collector.*

V. Taylor, *Collector.*

No. 1806F., dated Purneah, the 20th May 1874.

From—W. KEMBLE, Esq., Magistrate and Collector of Purneah,

To—The Secretary to the Government of Bengal, Dept. of Scarcity and Relief.

I HAVE the honor to forward herewith my Fortnightly Narrative for the period ending 16th May 1874.

A.—STATE OF THE COUNTRY.

THE sale of Government grain has had a different effect in different parts of the district In the sudder station the cloth merchants are selling as freely as ever, although our moodies are selling at our golahs and in the hâts.

They tell me that they are still making a good profit. Prices have come from 10 seers 8 chittacks a rupee to 11 seers for coarse rice.

Up at Kissengunge, however, where sales were pushed on to prevent exportation from Julpigoree and where it was expected that prices in the bazar would have fallen, rice, which was selling at 12 seers, is now selling at 8 seers; importation from Julpigoree has quite ceased. Further west in Bahadoorgunge, however, prices have continued steady, and smuggling from the morung seems to have been carried to much the same extent as before.

Mr. Craven and the Relief Officer Baboo Rojoneenath Chatterjea, both of whom I last week met and consulted at Assuraghur, tell me that in their opinion the merchants are holding back their grain in the hope of Government stores being exhausted, and that the utmost vigilance is required to prevent them from buying up large stores of grain through third parties in small quantities. Mr. Craven with my sanction reduced the price of rice from 12 and 15 to 10 and 12 seers.

In Arrareah, where the Government rice has been sold at the same price, private trade has not suffered. I meet in the Purneah Bazar as many pack-ponies as ever carrying private rice to the Arrareah hâts.

Mr. Rattray says that private importation are rapidly ceasing, making way for Government rice. His impressions are formed from what he sees in the neighbourhood of golahs, and it is satisfactory to find that Government and private trade can go on side by side in this sub-division.

All the hâts in the south continue to be well supplied. Mr. Mulock, who has lately returned from the south, reports that he found the people well and contented, bartering their cold weather crops, wheat, &c., which is not the staple food of the people here, for rice.

The country is now looking very fresh and green; Kanni is ripening and moong looking well. The area sown in Bhadoi is very large, and the crop is looking well.

One or two reports have come in of people having died from starvation; each case was inquired into, and it was found that death was due to some specific cause.

In the hospitals and poor-houses there have been deaths as noted in the margin. These must be expected. The special tracts which I have not here touched upon are the Dengrah and Kusbah Amour Circles, which are regularly divided into village groups under Superintendents. A statement shewing the number of grain thefts is annexed. They number only 13, but want is, I find, often alleged as a reason for crime.

Sudder	...	...	1
Arrareah	...	...	1
Dengrah	...	...	1

The comparative statement of crime shews that petty thefts have increased enormously.

DISTRICT PURNEAH.

Statement of Dacoities, Robberies, and Thefts for the month of April 1874, *and the corresponding years of the years* 1872 *and* 1873 *as called for by Government letter No.* 4081, *dated* 20*th December* 1873.

W. Kemble,
Magistrate and Collector.

B.—Relief Works.

Mr. Cordner's progress report is annexed. It shews that he has on his works a daily average of 18,810 persons.

He has lately been over his roads making over to the Relief Officers all the old and weak men, and all the women and children who impeded work and did nothing for their pay. Petty relief works on which these people find employment are now open everywhere. My difficulty has been to keep able-bodied men off these second class works. Numerous difficulties arose: it was said that without strong men to dig no work could be done; that the Department Public Works works were not sufficiently near to every man's home; and that the local Superintendents did not care to supervise the making of a tank on which old men and women only being employed, could never be finished so as to benefit their village and neighbourhood.

Mr. Gouldsbury, in Kusbah Amour, has found that by paying the women higher wages they will use a hoe, and with the boys and old men can do all the digging necessary to clear a tank. All Circle Officers have been ordered to send all the able-bodied men to the Department Public Works roads, as Mr. Cordner reports that unless this is done no one will come to him. One cause for the preference given to Relief Officers' work, namely, direct payment in grain, has now been removed, as the system has been extended to all our works.

There is a Department Public Works work open within 6 or 7 miles of nearly every village to which every able-bodied man must go now if he wants works.

The objection that the village people will not take the same interest in a work done by incapable old men as they would in one done by strong Beldoes is very true, but as it would be impossible even with the aid of the villagers to properly supervise and control so many scattered gangs of able-bodied men more ready to shirk work than to do it, I think it more advisable to employ them where they will have to do a fair day's work for a fair day's pay.

The villagers and Relief Officers will now give more attention to women and boys, and from what I have seen can get, if they like, a tolerably fair quantity of work done by them. At all events they will not be paid for doing nothing.

It has also been found that the imposition of a light daily task works well. 8 women dig and carry 100 cubic feet of earth a day. This is not much; but it is better than absolute idleness.

Return C. for the District shews 13,263 persons as the average number of persons employed on Relief Officers' roads and tanks. Some of these are however first class works, and the return was prepared before the orders quoted above had become fully known, and it does not include many petty works on light labor ticket system.

PURNEAH DISTRICT.

Progress Report of Famine Relief Works for the week ending Saturday, 9th May 1874.

Names of roads.	Progress in marking out relief works.	Progress in opening works.	Number of laborers thereon.				Supply of food thereat.		Condition of the laborers and general features of the country.	Mode of payment.	Rate of wages.	Arrangement for tools.	Disbursement during the week.
			Class I.	Class IIA.	Class IIB.	Total.	Amount of Government grain sold to laborers.	Proceeds of sale.					
							Mds. Sr.	Rs. A. P.					Rs. A. P.
No. 1, Purneah to Koony.	Whole line of road from Purneah to Kealgamma has been laid out.	3 working parties	4,063 or 88 per cent.	Nil	554 or 12 per cent.	4,617	391 9	803 4 0	Beyond what has been already stated in the last report, nothing fresh can be added, the late rain has been very beneficial to the crops, which are looking quite fresh and green. Now a fresh impetus has also been given to sowing and ploughing; the laborers on the roads and neighbouring tanks seem healthy, cheerful, and contented; a small quantity of "cheena" (millet) has been harvested between Sirsee and Dhurara, a large amount having withered and dried up for want of moisture. The cownee and moong (dal) are rapidly advancing and will be probably cut within the month. It is reported that the villages round about Sirsee and Dhurara are in some distress from the scarcity of grain, though facts will not warrant the acceptance of such a statement, as the reported starving people will not accept work of any kind. The matter might be further investigated.	All payments are made to the laborers by sub-cashiers, the number of whom depends on its length. A sub-cashier generally pays two or three parties if they are not too far apart. He is himself situated between two parties on either side; as he is allowed two cash jemadars, he sends them out to each of the parties every day. These cash jemadars receive pay orders from the sircars and the money is given to the duffadars of the various gangs for distribution to his men. He then brings back the pay orders signed by the duffadars, thereby making their receipts and bonds then over to the sub-cashier, who makes the necessary entries in his cash book, a copy of which is sent in weekly to Executive Engineer for recoupment accompanied by the vouchers.	The contract rates are as follows for class No. I:— Ordinary earth-work in banks up to 5 feet in height at 3 annas per 100 c. ft. Ditto in banks above 5 feet, 3¼ annas. Earth-work in hard ground banks up to 5 feet, 4 annas per 100 c. ft. Ditto in banks above 5 feet, 4¼ annas. In exceptionally hard ground rates up to 6 annas may be granted at the discretion of the Executive Engineer. The task work rates for Class II, Division A, are as follows: Annas. Men ... ... 2 Women ... ... 1½ Children ... ... 1 In order to earn the above rates, each man must excavate 50 c. ft. in ordinary ground for banks up to 5 ft. and 45 c. ft. in banks above that height. In hard soil, a man must do 40 c. ft. in banks up to 5 feet, and 35 c. ft. in banks above that height. Except in the case of beldars, women, who work with their husbands at contract rates in Class I, it is very difficult to lay down a task, as in most cases they refuse to carry earth; we have therefore but few women in Class IIA. In laying down each man's task, I have been guided by the fact that a non-professional laborer after he has been at work for some time can earn from 2 annas to 3 annas per day at our present contract rates by working really hard.	Every effort has been made to induce the laborers to bring their own tools, but it is to be regretted that this has not been attended with any very great success, and especially since we began to issue large quantities of Government tools to each of the works. When the works were first started, but very few Government tools were issued and most of the laborers who came to our work brought their own. It was feared, however, that villagers were beginning to think that it was no use applying for work unless they brought kodals, so that after a consultation with the Magistrate tools were issued to each work, and now, as a rule, the laborers work with Government tools. This remark only applies to the unprofessional laborers, as they and others, as a rule, have their own tools and bring them to the work.	783 14 0
No. 2, Nathpore, Kalagunge, and Etwaree	65 miles marked out and levelled and surveyed, estimate in progress, and additional length of 15 miles east of Kalagunge to Dinagpore frontier has been laid out.	10 working parties.	41,723 or 98 per cent.	200 or ·06 per cent	484 or 13 per cent.	42,407	927 36	2,797 9 3	The weather has been very cloudy and threatening towards the end of the week, but no rain has fallen. The cownee crop looks favorable wherever it exists, but the area under cultivation is small. Contract work is in force generally throughout the line. The people on the road are looking well, most of them return to their villages at the close of the day, but some few, who come from a great distance, are grateful for the huts provided.				4,905 10 0
No. 3, old Ganges and Darjeeling road.	40 miles of old Ganges and Darjeeling Road laid out and estimate submitted.	..	Nil	Nil	Nil	.....	.....	.....	This work has now nearly been brought to a close, and the laborers distributed to the other roads east and west.	.....		.....	.....

Names of roads.	Progress in marking out relief works.	Progress in opening works.	Number of laborers thereon.				Supply of food thereat.		Condition of the laborers and general features of the country.	Mode of payment.	Rate of wages.	Arrangement for tools.	Disbursement during the week.
			Class I.	Class II A.	Class II B.	Total.	Amount of Government grain sold to laborers.	Proceeds of sale.					
							Mds. Sr.	Rs. A. P.					Rs. A. P.
No. 4, Kissengunge to Nekmurd.	Whole line laid out, estimate submitted for sanction.	2 parties working.	5,490 or 99·7 per cent.	16 or ·2 per cent.	.....	5,515	98 5	261 10 9	A good deal of distress exists along the line of this road and is amply provided for by local relief works opened by civil officers. These works are more popular than those opened by this department, and are in consequence much resorted to.	.....	It may be observed that the rate per 100 c. ft. for task work is in excess of that for contract, but then it must be remembered that a man can never earn more than 2 annas as long as he elects to do task work, and he can at any time join the contract gangs where by real hard work he may get up to 3 annas a day. All able bodied men must now join either the contract or task work gangs and subsistence allowance will only be granted to such as are really unable to do earth-work. They will be chiefly employed in breaking clods, dressing slopes and surfaces of roads; the pay for this class, viz., Class IIB. is— A. P. Men ... ... 1 6 Women ... ... 1 0 Children 0 6	.....	761 0 0
No. 5, Dengrah Ghat to Toorkeli.	All marked out and levelled.	4 parties working.	10,511 or 69 per cent.	.....	4,690 or 31 per cent.	15,201	536 0	1,403 0 0	The numbers of people on this road are decreasing in consequence, partly of the preference given by many to local relief works, which have been opened out by the civil officers, and partly to the plentiful fall of rain which has diverted thier attention to their fields and agricultural operations. The people look strong and healthy. Arrangements are in progress by the civil officers to extend the local relief works, in order to provide for those on subsistence allowance, so that shortly there will be none of the latter class on our works. The crop along the line of road are abundant and look very promising; plenty of rain has fallen in this neighbourhood and has done much good.	.....	.....	.....	2,037 13 6
No. 6, Dengrah Ghat to Bhopia.	Ditto ...	4 parties.	5,518 or 96·5 per cent.	288 or 5·3 per cent.	18 or ·02 per cent.	5,804	Rice 0 30 Indian-corn. 426 38	2 8 0 1,138 9 0	Rain has fallen abundantly and been productive of much good to the crops and cattle also; condition of laborers generally satisfactory.	.....	.....	.....	1,421 7 3
No. 7, Buhrampore and Tarapore.	All marked out and levelled.	4 parties working.	12,723 or 56 per cent.	1,422 or 6 per cent.	8,613 or 38 per cent.	22,758	1,226 0	3,266 10 8	This distress in this part of the district does not yet seem to be abating. Owing to the want of 2nd class local relief works our roads are burdened with a good number of Class IIB laborers, who make out a small return for the subsistence allowance given them. The crops look well and flourishing. The people are generally good-conditioned and healthy.	.....	.....	.....	3,330 8 0
No. 8, Hurinkhorse and Makhah.	Line laid out, estimate submitted for sanction.	Work can be taken in hand as soon as it is considered advisable to do so.

W. KEMBLE,
Magistrate and Collector.

The 20th May 1874.

W. FERNIE, *Asst. Engr.*,
For Executive Engineer, Purneah District.

The 15th May 1874.

C.—Transport of Grain.

During the fortnight the work of transport from the large central to the smaller golahs has been going on; carts have been mostly used, as they are now available in all the villages, but pack-ponies have also been employed as the nucleus of a reserve. Officers were slow to employ them at first as they are very expensive and carry but small loads compared with carts, and they were naturally anxious to fill their out-golahs quickly The object in having in hand a reserve force for transport purposes is now understood, and I hope that when the special officer deputed by Government arrives, he will find plenty of ponies retained. Chowdries are engaged and now employed in the work of registration, and I propose to have a muster held at all centres and golahs on a day to be fixed hereafter.

Boats are now arriving up the Mahanuddi from Maldah. We have received advice of the despacth of nearly 40,000 maunds, most of which ought to arrive within a few days. The boats are sent up only half laden, and are thus able to get with ease over the shallow places. Lieutenant Gasalee has been exploring the rivers, and has ascertained that from Dengrah we can, in the rains, send rice to most places in Kusbah Amour, Kissengunge, Kalliagunge, and Arrareah thanas.

From below Dengrah, Barsoe and Raneegunge, golahs can be supplied.

D.—Storage of Government Grain.

The minor golahs have nearly been all filled.

In the Sudder Circle Mr. Coles with carts and pack-ponies has sent grain to all his 13 minor golahs, which are all built.

Mr. Thornton has accommodation for 2,000 maunds at each of his minor golahs; he has stored about 1,200 maunds in each, and with 150 pack-ponies and carts the work of filling them is steadily progressing.

Mr. Gouldsbury at Kusbah Amour has, besides his minor golahs, stored over 5,000 maunds in different villages in the store-houses of zemindars and leading men, who have kindly lent accommodation and taken charge of grain. Over this circle the grain has been distributed in most thoroughly.

In Bulrampore the minor golahs are built and nearly all stocked.

In Kudbah only three are ready, but as it will be necessary to draw largely from this circle for our wants in the north, and as this part of the country is well supplied by private trade, I am not pushing the distribution much further.

In Kissengunge, Baboo Rajaninath Chatterjea has stored 7,671 maunds in 10 golahs, and Mr. Bertelsen has filled the five first selected, and is now actually pushing on the filling of the rest to make up 17.

In Arrareah, Mr. Rattray gives no detailed information about the stocking of his golahs, which are, however, ready and partly filled.

E—Advances to Private Parties.

The only advances made in cash are Rs. 7,500 to the Banailee Rajah Nilanund Singh, and Rs. 2,000 to Ranee Chundisuri. Besides the grains advanced by relief officers I have from head-quarters advanced—

	Mds.
To Mr. Macallister for sale to his ryots	2,000
Mr. DeSouza	200
Meer Mahomed Kajim	3,000
Darabati Misrain	50
Surrosuti Misrain	200
Total ...	5,450

F—Charitable Relief.

The mode of working the Department Public Works and the circle officers' relief works has been noted under head A.

The following list will show what petty works each circle has in hand:—

Sudder.—Nothing new.

I did not notice before that Mr. McQween, sub-manager of the Durbhunga estate, was giving much relief by repairing numerous roads in his villages.

Dengrah.—Mr. Thornton is clearing out twelve tanks and repairing one road; he has an average of 672 persons daily employed.

The tanks are at Pulea, Chiranch, Bhotaba, Simlia, Nekra, Hinkali, Bagberiah, Singhea, Miliktollah Chuckla, Murna, Poornagunge, and the road at Sotibhag.

Khusbah Amour.—Mentioned in last narrative.

Khudbah.—But few relief works are open here as there seems to be no demand for labor. I shall visit this centre soon.

Bahadoorgunge.—Works open in addition to those reported in last narrative—

Road Bahadoorgunge to Bibigunge.
Audhasur to Santarhat.
Bahadoorgunge to Suhiya.
Bahadoorgunge to Muzkori and Arrareah.
Bahadoorgunge to Toolsia.
Tank at Batabari.

Kissengunge.—In addition to those reported before—
Road Assuraghur to Sanwar.
Agwai to Sanwar.
Agwai to Nekmurd.

Tanks altogether 19—Kissengunge, Khagra, Sripore, Baropokhur, Dangeepokhur, Sungnath, Baloogorah, Gootee, Dala, Gorgaon, Pokhuria, Singhea, besides 7 in last report.

Arrareah.—Three large roads, viz., the Muzkori, the Rancegunge, and the Matsaria road have been all along been in charge of Mr. Rattray, which he has worked well, and by this means afforded relief to large numbers of persons; he has numerous small village roads opened all over the sub-division which cannot be enumerated.

Village grouping —I have visited Dengrah and Kusbah Amour and found that the groups are all well arranged and in good working order; the Superintendents selected are men of some position and respectability, in many instances the same as were engaged in carrying out the census operations.

These Superintendents are assisted by the head-men of villages who form a sort of punchayet in their groups, and, meeting at hâts and other places once or twice a week, talk over matters and make reports to the Superintendent.

Dengrah has twelve groups; Kusbah Amour seventeen, one established since my last report. At Dengrah none of the Superintendents are salaried, but Mr. Thornton wishes to make each a present by-and-by. Mr. Gouldsbury pays his men Rs. 10 to 12 a month.

The Sudder Circle is large and towards the south and east its boundaries are undefined. Five circles in the more distressed parts are formed and officered, but where distress is not so severe, the Sub-Inspector of Circles and the Assistant Superintendent have divided the country between and effectually distribute relief; here too, as before reported, several European gentlemen render great assistance.

Mr. Perry at Kudbah has appointed the following village Superintendents, but he has not regularly allotted their villages to them as has been done in Kusbah Amour and Dengrah:—

Modee Thakoor of Bhuree.
Tarikulla of Balagunge.
Seikh Lall Sahoo of Belasi.
Chumroo Mundul of Tengrah.

These are salaried. Messrs. Walker and Cruise, indigo planters, and Syed Gholam Riza of Russoolpore will render aid gratuitously. These arrangements are, I think, equal to the necessity of this circle.

Mr. Meklejohn at Bulrampore having failed to get unpaid agency, has been instructed to entertain men of the same stamp as those at Dengrah.

Kissengunge Sub-division has been divided into groups, not fully officered at the date of last report.

The more distressed parts are, however, fully provided for.

Mr. Rattray at Arrareah knows his sub-division so well that I shall not insist of Group Superintendents being appointed here. There is but little distress, as relief has been very freely given.

The annexed table shows the sales and other expenditure of grain during the fortnight. As the relief officers have not sent in the quantity of grain sent to minor golahs, there is a great discrepancy between the figures of the golahdars and the relief officers.

In the estimate for the ensuing fortnight provision has been made for supplying 50,000 maunds of grain to Julpigoree from Dengrah, which will, in turn, be replenished by grain brought in boats from Maldah and from the Kudbah and Saifgunge golahs in South Purneah.

I give an abstract, framed on that given last week, of the number of persons now in receipt of relief by the most recent returns:—

Number of persons receiving cooked food ...	813
Uncooked food	3,266
In poor-houses	141
By village relief	1,436
By spinning and weaving	1,124
On Department Public Works' works	18,810
On minor works	13,263
	39,153
	Mds.
The quantity of grain sold during the fortnight is ...	14,374
Advanced	26,051
Total ...	40,425

This gives at ¾ seer for a ration. A daily average of 173,250 rations issued during the fortnight. This added to 39,153 gives 212,403 as the number of persons daily receiving aid from Government.

Annexed is a memorandum showing what work the native doctors have been doing.

W. KEMBLE, *Magistrate and Collector.*

A Daily Register of persons relieved each month in each Relief Circle for the fortnight ending 16th May.

N.B.—1. This is to be kept by each Superintendent. It should show results from the 25th of one month to the 25th of the following month. One copy should be sent by the Superintendent direct to his immediate superior, another to the Collector, and another to the Commissioner. These last two should be posted so that they will reach the addressees not later than the 1st of the following month.

2. Each Collector is also required to send on the 1st of each month for the whole of his district a Statement of relief in the above form.

NOTE.—The figures marked with asterisks in column 4 against all the circles except Bulrampore show actual stock in hand on the 10th May 1874 as per Golahdar's returns. Those against Bulrampore show actual stock in hand on the 25th April 1874.

The figures marked with asterisks in columns 5 to 9 against all the circles show transactions up to 15th May 1874 as per Relief Superintendent's Returns. No Return has been received from the Bulrampore Circle.

No entry has been made to show how much has been sent to minor golahs. This will partly explain the difference between the figures in column 4 for last fortnight and this fortnight.

W. KEMBLE,
Magistrate and Collector.

No. 263—S.R., dated Doomka, the 20th May 1874.

From—JOHN BOXWELL, ESQ., Officiating Deputy Commissioner, Sonthal Pergunnahs,
To—The Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit a narrative for the fortnight ending 16th May 1874.

A.—STATE OF THE COUNTRY.

1. Grain has not been declared to have failed in any bazar yet, but there is no doubt that it is very scarce; it is brought in very small quantities for sale, and there is no great press of buyers. This simply shows that the failure has been very gradual; less and less is brought for sale at continually, but slowly, rising prices.

In Sahebgunge, Bario, and Burhait, three of the principal markets of Rajmehal, food is procurable at fair rates; but at all these places Government rice is stored, and is sold to laborers. In Rajmehal town rice has gone up to 8 seers, and is with difficulty bought at that rate. Possibly we may have to sell to the public in Rajmehal before long. These places on the railway need give no anxiety. Mr. Stewart describes the present condition of the people as good generally, but says they look "underfed" at Taljhari and Khairasol. From Deoghur, Mr. Wilmot reports increasing difficulty of getting food to buy, but says the people still look fairly well. Both people and cattle are suffering much from want of water.

Disturbing accounts have been coming in thick from the south of the district, from the pergunnahs Kundahit and Pabia, and I am afraid Mahommadabad will prove to be in the same case. Mr. Smith has gone to Jamtara to give whatever relief is necessary.

This part of the district has got less than its share of watching. A stretch of about 60 miles long by from 2 or 3 to 10 miles wide is the extreme south border of the district. It lies beyond the Ramgurh and Ranibahal Hills, and borders on Beerbhoom, Raneegunge, and Manbhoom. It is thinly inhabited in many places, and covered with scrub jungle. Water is very scarce; tanks are old and dirty; and now the people seem to be come pretty near the end of their grain, and generally to be in a bad condition. It is likely enough that our first gratuitous relief will have to be given in these parts, which were by no means the worst off earlier in the year; it was Mr. Dawson's beat till he got too ill for work. The west part, near Jamtara, has been occasionally visited by Mr. Wilmot, from Deoghur, and Mr. Rowland paid the parts about Kundahit two flying visits, but these parts have been neglected to a certain extent, and we shall have to work hard and fast to catch up the time.

Since my last narrative I have been again at Benagarhia. The two children died of dysentry, and all the people I met were looking as well as three weeks before. I have a difficulty in reporting about Benagarhia; Mr. Boerresen is doing excellent work, and by doing it in my district he has laid me under immense obligation. It does not matter that we do not always agree on details, his work is right good. But some of the Sonthals in the neighbourhood complain that they cannot get work, because they won't become Christians. It is not a very easy thing to write about, but it is better to put down the whole case:

Mr. Boerresen told us he wanted Rs. 3,000 a week to give all the people work who came. I did not think Rs. 3,000 a week could be well spent without more help than Mr. Boerresen had, so I said I could not give so much. He has since told me he could not manage more than Rs. 1,000 a week well. However, some Sonthals had to be refused work, and Mr. Boerresen, appointing his own men as sirdars, had them all Christians. If he thinks native Christians more trustworthy than heathens, it is only natural that he should put them in places of trust; I don't agree in his opinion, and should not follow his practice. I simply think that to have work done as Mr Boerresen is doing, it is a good enough thing to carry his partiality to his converts, his preaching during payment, and the other actions which I cannot help thinking drawbacks. A few thin half-starved-looking people occasionally come into Doomka. It is not impossible that some private kitchens will have been opened by next report.

There is a good deal of complaint of scarcity of food from North Hendua, on the Bhagulpore frontier. I am going there immediately. Generally speaking, the worst parts of the district are tolerably well in hand,—Godda, Rajmehal, and Sultanabad; it is the places we had to postpone to these that are giving anxiety now. I append an extract from the price current:—

	Wheat.	Common rice.	Bajra.	Maize.	Gram.
Doomka	11	10	13	13	12
Nonihat	12	10	...	14	12
Nulla	12	12	...	...	12
Pakour	15½	11	16	16½	17
Maheshpore	...	10	16	16	14
Ranibahal	...	12	...	18	11
Rajmahal	14	8	...	...	16
Sahebgunge	14	12	17	15	16
Burhait	...	10	16	...	...
Godda	...	11	...	14	14

The cheapest rice is 12 seers in various places. The cheapest food is 20 seers of barley at Pakour, Rajmehal, and Sahebgunge.

Known Supplies of Grain.

3. Under this head I have nothing to say. Mr. Smith has lately visited houses near Jamtara, and found very many empty of all food.

4. During the fortnight the weather has been excessively hot, with occasional clouds and lightning. No rain to speak of anywhere. On Thursday a man was killed by lighting close to Doomka.

There is nothing to say about the crops; there is nothing on the ground but a little boro dhan in Rajmehal. Mr. Stewart estimates the outturn at 15,000 maunds off of 3,000 beeghas.

B.—Relief Works.

Mr. Stewart sends a list of 12 works, showing a total daily average of 8,250 persons. His works are three roads, one tank, and eight bunds. He expresses himself strongly about the utility of the works, and I have no reason to think he is not right. Mr. Stewart has successfully introduced piece-work everywhere, instead of daily labour; he deserves all the more credit that he did it partly against his will. Mr. Wilmot's Court of Wards' works are progressing well. Mr. Meara has gone to Dari-Moleshwar to lay out my Mallarpur road, and is going on to Sultanabad to inspect and direct the making of the new road there. I am glad to say he has found a good line for the Mallarpur road for the first 15 miles from Doomka, and expects no difficulty. The Beerbhoom end of this road will help our Dari-Moleshwar and Mahommadabad laborers.

Mr. Boerresen, I am glad to say, has introduced piece-work at Benagurhia. His comment is remarkable:—The Sonthals held back first, then a few tried it, and, finding that they could earn much more in a day, the strong workers came in great numbers, Mr. Boerresen is a little put out by this; he thinks the battle should not be to the strong, and he asks for more money, Rs. 1,500 a week, to carry on work. I am writing to him to keep a separate small work for weak people on daily labor.

I append a table of the works in the district with the average daily total of laborers. It is not quite complete, because I have received no returns from Sultanabad, and because my own small Daman works are under Sonthal manjhis, who cannot read or write, and who give no returns, in fact, would not know what an "average" meant.

C.—Transport.

Except in Godda, our distances are so short as to call for no remark.

There are about 10,000 maunds of rice lying at Pirpointee. Mr. Grant has 400 carts plying between Godda and the railway; and as a good deal of the Godda allotment will have to be cut off for the south of the district, there will be little more cart carrying in Godda.

D.—Storage.

The five Godda golahs, Doi, Maran, Simra, Barkap, and Godda, are ready. 40,000 maunds of grain have been already stored in the sub-division. Mr. Grant had made arrangements for storing the whole 60,000 allotted before the rains. He will now have to store very little, if any, more than has already reached Pirpointee. During the past fortnight Mr. Stewart stored over 11,000 maunds in his golahs.

10,000 maunds have been ordered for Jamtara. Golas are being built at Nala, and are ordered at Kundahit. Mr. Smith has gone to Jamtara to conduct relief operations. I have not heard from him since he left this. 6,000 maunds of the district allotment have been sold to Mr. Muston, of Benagurhia, for sale to laborers and the public.

E.—Advances to Private Parties.

No money has been paid out this fortnight.

F.—Charitable Relief.

Except making committees, we are doing nothing.

G.

The financial results are given on a separate sheet. I have to add that the Godda return only came in yesterday, and that neither Godda nor Rajmehal has supplied the last ordered grain-tables.

List showing the Relief Works in the Sonthal Pergunnahs, and the average of laborers on each.

No. 4756—S.R., dated Bhagulpore, the 25th May 1874.

From—G. N. Barlow, Esq., c.s.i., Offg. Commissioner of Bhagulpore,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

I have the honor to submit the fortnightly report for this division due this day.

Condition of the People.

2. There is nothing of special importance under this head to report regarding the tracts in the several districts, which have all along been under treatment as "distressed."

3. The Monghyr district narrative of the 16th instant, seems to show that distress is on the increase at Bucktearpore, yet this can hardly be gathered from the number of persons employed upon the works and the small effect of the free sales of Government grain there. I have directed the attention of the district officer to the matter. Any how, with the bulk of our grain stored, and the grouping system fully completed, as is the case, we ought, with the help of the good superintendent, who is on the spot, to get on there.

4. Regarding the portion of the late Simrahi Sub-division, which was specially under the supervision of Baboo Ram Sunkur Sein, there have been some opinions expressed, and calls for assistance made, which demand further enquiry before they can be accepted. This is a part of the country where, owing to the favorable situation near the Kasi river, distress was never expected to attain the same degree as was looked for in the case of the western part of North Bhagulpore. Upon the facts stated now, however, it is necessary to determine whether the conditions of distress at present estimated are incorrect and exaggerated; and if not, the relief measures are certainly inadequate and must be pushed on. Mr. Kirkwood is proceeding to the spot and will do the needful.

5. From parts of the country other than those recognised as distressed, there has been a certain amount of anxiety occasioned during the past fortnight. The Beegooseraie Sub-division, which comprises the rubbee country of the Monghyr district north of the Ganges, seems to be feeling the pressure. Mr. Wilkins, the assistant in charge, is a very intelligent officer and knows the sub-division well. He has all along stuck out that the rubbee crop was a poor one, and as the rice supply of ordinary years, which comes from Tirhoot, was known to be cut off, the appearance of some distress is not a matter of surprise. The present time is a slack one for the laboring population, and the people are reported to have commenced wandering about in search of labor. To meet their necessity between the present time and the rains, I have authorized the opening of suitable relief works, and Mr. Wilkins has fortunately at his disposal some 25,000 maunds of Government grain, which, originally placed in present position for the purpose of supplying laborers on Government works, I had intended to remove as a part of the allotment to Bucktearpore on the setting in of the rains. This grain had been lately reported attacked with weevils, and I had given orders it should be disposed of; it will no doubt now come in very useful, and with the country there occupied by planters, very much as in Tirhoot, I have no fear for the Begooseraie Sub-division.

6. From the Jamooe Sub-division I hear that distress is beginning to be felt in parts where none was anticipated, and where there are no golahs, grain, nor works. This is merely demi-official information, and no details are to hand. I do not anticipate anything serious, but the matter is receiving attention.

7. The last narrative from the Sonthal Pergunnahs explained how that necessity has arisen for succouring certain tracts in the south of the districts heretofore not considered "distressed." I have sent ten thousand maunds to Moheshpore for Pergunnah Sooltanabad, and the same quantity to Jamtara. Aarangements have been made under which 6,000 maunds will be retailed by Mr. Merston at Banagurrea, the missionery station; and the Deputy Commissioner reports that he shall want a further supply of 5,000 maunds forwarded *viâ* Cynthea. These allotments have been made to protect the south of the district against distress, which threatens, and the grain has been diverted from the Godda and Rajmehal Sub-divisions. The grant, as at first made for the whole pergunnah, was 1,35,000 maunds for these sub-districts

only; but at present, and with the consent of the officers concerned, I have reduced the allowance to 1,01,000, and appropriated the difference to relieve other places. At the same time I have taken advantage of the closing of the field season for settlement operations, to transfer temporarily for famine duty, the services of one Assistant Commissioner, four Sub-Deputies and a few other officers. The assistance of these officers will be available for a few months only and will be most beneficial. The position taken up by the Deputy Commissioner just now, when he announced that scattered distress existed over his large district, which he was unable to investigate, still less to relieve for want of agency, was becoming unsatisfactory, and his demand for help could not long have been resisted.

8. The prospects of the people I consider decidedly good. I concur in the remarks made by the Collector of Bhagulpore that there is as yet no reason for any outcry to the effect that the damage is being done by the present weather, or that appearances indicate a coming bad season. The progress made for the cultivation of the next crop seems fair enough, and in connection with the question of the sufficiency of seed-grain in the hands of the cultivators, I may mention the result of our Soopole experiences. To this sub-division, North Bhagulpore, owing to the outcry raised some time since that there would be deficient cultivation owing to want of seed, an importation of certain amount was made. Now that we are offering the seed at Rs. 4 per maund (that is less than cost price to us) people won't buy, and are finding out that they can get what they want at cheaper rates by taking a little trouble and going to distant markets for it. I have accordingly recommended that the seed should be sent on to Tirhoot.

9. I append a comparative price-list in connection with the unusually high price appearing for Rajmehal. I notice that the rate reported is that for the head-quarters of the sub-division; and having received from the Deputy Magistrate information that the stocks were exhausted and no more grain coming in, and that the residents were suffering inconvenience, I sent down 2,000 maunds of Government grain with permission to sell the same.

Relief Works.

10. The annexed table shows the state of the works. There has been some decrease in the number of laborers employed upon the Department Public Works, which I hope is in part accounted for by people returning to their ordinary work in the fields, but I have little doubt that some of the difference is accounted for by a transfer of people from the Department Public Works to the column "other relief works"; the figures given for this last description are very unreliable, I fear; and the real number is always greatly in excess of what is given. It is only in his last report that Mr. Kirkwood corrects his estimate of light labor employés from 4,000 to 10,000. It is satisfactory to observe that in Bhagulpore and Purneah the adoption of the payment in kind principle upon all works is completed. The same arrangements are ordered to be made in Monghyr and Southal Pergunnahs, but the result is not yet ascertained.

Rajmehal* ...	... 13,806 0 0	.....
Godda ...	... 19,340 0 0	59,520 0 0

13. It has been ruled most justly that all advances made to zemindars or to ryots shall be henceforward made in grain, and orders to this effect have gone out. Columns 1 to 3 of the appended statements should henceforth, therefore, appear blank. Turning to the grain statement, (*vide* my paragraph 15), it seems that in Purneah only has good progress been made in the matter of advancing to ryots in grain. Mr. Kirkwood, however, reports that the group superintendents are now making lists of the ryots who require this kind of assistance in Bhagulpore, and I hope what is needful will soon be done. In Monghyr advances in Jamooee tract seem at present hardly called for. In Bukhtiarpore alone the superintendent has been advancing money: this will be put a stop to, and grain substituted.

District.	Total up to last fortnight.			Advances made during this fortnight up to 16th May 1874.			Total.

Charitable Relief.

14. The relief return which I annex exhibits this highly satisfactory result, viz, that the poor-houses and relief-centres are becoming reduced in number, and their place supplied by the better system of home-relief under the group superintendent, and of house-to-house visitation and the ticket system. That the people withdrawing from the relief-houses are not left uncared for, is sufficiently apparent from the example of the Soopole Sub-division, and the results of household visitation there. Mr. Kirkwood reports 24,000 persons as already registered and receiving regular relief, and the numbers, when completed, are expected

* Return received is incorrect: revised figures have been called for.

to reach 35,000. It is plain, from the reference made in the Monghyr narrative, that equally good arrangements are in operation at Bukhtearpore, although the number of persons relieved by tickets is not given. In Purneah this particular form of relief seems less in favor than in other places.

Disposal of Government Grain.

15. I have not received any of the returns which I require to fill up the table connected with this subject, which I have regularly furnished heretofore with my fortnightly. I give an abstract prepared from the district narratives for Monghyr; the results are small, while for Purneah they are good. From Mr. Kirkwood's narrative many particulars are to be gathered, which shows that the sale arrangements for his district are in good order and very efficient. He states that the sales at the Government golahs are most orderly, and the business may be characterised as a "quiet, steady demand as opposed to the rush of crowds which occurred at first." He attributes much of this result to the action of salse through village bunneahs. Of these there are 96; and taking sales of all kinds to the public and laborers along with gratuitous distribution, the consumption of the week is put at 18,500 maunds or 1,500 short of the amount estimated by Mr. Kirkwood.

Districts.	To public and laborers.	By gratuitous distribution in any shape.	By advance to ryots.	By payment in kind to laborers.	Total.	
			Rs.	Rs.	Rs.	
Monghyr	10,224	3,547	.....	.....	13,771

Sonthal Pergunnahs ...	7,992	.....	.....	.....	7,992	Charitable distribution not yet begun.

16. With regard to the remarks contained in the early part of the Officiating Collector of Monghyr's narrative upon the subject of the extinction of the rice trade at Bucktearpore (North Monghyr), I object to the view which is put forward to the effect that the traders fear that if they imported they would have little demand for rice, because Government rice is supplied at cheaper rates than they can afford to sell at, &c., &c. Mr. Newberry has only just taken charge of the district, and is probably unaware of the early history of matters. If I mistake not, this place (Bucktearpore) is one at which the late Collector sought to maintain supplies through the ordinary trade by advancing money to a bunneah, but the arrangement failed; and it was only after considerable hesitation, and when supplies became short, that Government sales were commenced. If supplies were brought into the market and offered at reasonable rates we should at once withdraw, but I am confident that there is no trade in this part of the country which could be interfered with by us. This view takes with that of the Collector of Bhagulpore, a very experienced officer, who says in his last narrative—"I can state positively, private trade does not exist in the north of the district." It must be remembered that Bucktearpore and North Bhagulpore are adjoining tracts. As regards Purneah, the continuance of private trade and Government sales side by side convinces me that there is not only room, but actual necessity for the latter in this district. I have asked for some further explanation and facts regarding Mr. Rattray's remark given in the last narrative that "private importations are rapidly ceasing, making way for Government grain." The Collector clearly

from his comments, does not accept this view, and I very much doubt if it represents fairly the conditions of the case.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 26th May 1874.

READ—

The District Narratives of the Rajshahye Division for the fortnight ending the 16th May 1874.

1. *Moorshedabad.*—Supplies continue fairly abundant, but in some petty bazars in outlying parts of the district they are reported to be becoming scarce. Prices, however, show but a very slight tendency to rise; the average price of common rice still remains at about 12 seers, which cannot be called a famine rate. Rain has fallen plentifully in some places, but is much wanted

in others, especially in the Jungypore Sub-division, where stocks are reported to be running short. The condition of the people remains much as before, but cholera has appeared in the sudder sub-division, Rampore Haut, Thana Nulhatee, and Mirzapore; neither the relief works nor charitable relief returns show signs of any great distress. The number on relief works has decreased slightly from 4,468 to 4,141. The returns showing the recipients of charitable relief are not complete, but those for the head-quarters and Jungypore show a decrease as follows:—

	Last return.	Present return.
Head-quarters	1,825	1,669
Jungypore	540	310

while Rampore Haut shows a slight increase from 150 to 175.

2. *Rajshahye.*—Supplies continue abundant and prices have fallen. The condition of the people remains as before, except in those places where cholera has broken out. To these latter places doctors and medicines have been sent, and they are said to have worked well and effectually combated the disease. Rain has fallen plentifully in all parts of the district, and the crops promise well. A greater breadth of land than usual has been sown. The returns of laborers on works under the Executive Engineer show a decrease from 1,365 to 1,053 during the last week of the fortnight. The returns of laborers on the Railway are not given, but those from the Sub-Divisional Officers are complete for this fortnight, though, as they were imperfect last fortnight, there are no means of judging whether the numbers have increased or decreased. The return for this fortnight shows a total of 9,949 persons relieved, of whom 3,024 were employed on roads, tanks, and buildings, while 3,451 did light work, such as jute and cotton-spinning, leaving only 2,474 in the receipt of purely gratuitous relief. Distress appears to be greatest in the South Barhind sub-division and the Rambagha circle of the Nattore sub-division; in the Kuruchmarea and Sahebgunge circles there was absolutely no distress. The Collector should make arrangements now for making advances in grain and not in money.

3. *Dinagepore.*—The report from this district is on the whole encouraging, for though the numbers receiving charitable relief have increased from 12,431 to 19,526, the prospects for the future have greatly improved. The yield of the boro dhan is reported to be excellent, and the kaon crop will also furnish an important addition to the food of the people, while the rain that has fallen suffices for the immediate needs of the bhadoi crop, a large breadth of which has been sown. Cholera has appeared in several places, but medical assistance is being given to the people. No advances of grain appear yet to have been made, but the subject has not been lost sight of, and is under the consideration of the Collector. Advances, where necessary, should be given before the rain falls, so that the ryot may be able to support himself when attending to the cultivation of his crops. The returns of laborers on relief works are imperfect, no returns having been received from the Doorgapore and Chooramun circles. The numbers in the other circles are 71,266, making, with the addition of the 943 now working under the Department Public Works, a total of 72,209 for the circles for which returns have been received. Considerable progress seems to have been made in introducing task-work. The numbers in the ten circles from which particulars have been given are—

Piece-work.	Daily wages.
33,456	26,119

The two systems seem to be worked side by side. No details regarding task and piece-work are given from the Kaliagunge and Porsha circles. These should not be omitted again.

4. *Bogra.*—There appears to have been little change in the condition of the people of this district, while, owing to the copious rain that has fallen during the fortnight, the prospects for the future have materially improved. There is a considerable decrease in the numbers on relief works, the returns for the present fortnight showing 32,015 against 36,502, the number given in last

return. The number of women and children as compared with the men is still abnormally large; the numbers respectively being as follows:—

Men.	Women.	Children.
7,374	12,224	12,417

The Collector reports that exertions have been made to get the incapables taken off relief works, but he does not report what measures have been taken for the support of those eliminated. He should state exactly how many persons have been taken off each work, and what has been done with them. Arrangements should be made for getting by far the larger number of the women and children back to their villages with as little delay as possible.

Arrangements are reported to have been made for paying the relief laborers in grain in some places, though on most of the relief works the system of selling grain to laborers seems to have been adopted. The Collector should take care to ascertain whether the outgoings of grain correspond to the expenditure in money.

Now that 2,000 carts besides one hundred pack-bullocks have been secured for transport work, it is to be hoped that the grain will be brought to its destination more rapidly, but with this number of carts more than 20,000 maunds a week should be lifted, especially as the distances over which the greater part of the grain has to be carted are very short.

5. *Maldah.*—Rain has fallen pretty generally throughout the district, and though it is only in the north-west that the rain has been sufficient to allow of the bhadoi sowings being completed, yet there has been generally sufficient to permit the land to be prepared for the reception of the crop. The group system has been introduced, and is reported to be working well in Chanchal. The numbers on relief works have increased from 5,610 to 6,247 persons daily, and those in the receipt of charitable relief from 869 to 6,349; but these latter numbers are said not to be quite accurate. The consumption of Government grain has been 6,414 maunds up to date.

6. *Rungpore.*—The state of this district continues much the same as before; private trade continues active, and large quantities of grain are being brought into the district by private traders. The supply, however, is not yet sufficient to meet the demand, and the sales of Government rice still continue, and it has even been found to be necessary to resume sales in places where they had been discontinued. Prices continue very high. A good many cases of severe distress have been sought out and relieved in Molung and Mahigunge, but in the other divisions no increase in distress is reported. The number on relief works has increased largely, from 44,616 to 54,450, and this increase has taken place though piece-work has been largely substituted for the daily wages system, and though women and children unable to work had been drafted off the roads to their villages. In Molung and Mahigunge the change seems to have been most effectually carried out, and the Relief Officer of the former division seems to have shown good judgment and care in effecting the change of system and the transfer of useless labor. Those removed from the works are now employed in village works and included in the number receiving charitable relief. The numbers in receipt of charitable relief now reported are 20,346 against 13,142, the numbers given in last report. Of these 10,162 are engaged in spinning cotton, weaving, and husking grain. The numbers employed on light work, on village roads and tanks, should be shown separately.

No. 3368—S.R.

COPY of the above Resolution, with copies of District Narratives, forwarded to the Commissioner and Relief Commissioner, Rajshahye, and to the Magistrate-Collectors of the districts in that Division. Also to the Commissioners of the Patna and Bhagulpore Divisions, and the Additional Commissioner, Durbhunga.

Narrative of Scarcity and Relief in the Moorshedabad District for the Fortnight ending Saturday, the 16th May 1874.

A.—STATE OF THE COUNTRY.

1.—*Abundance or scarcity of supply in the Bazar.*

THERE is still a sufficient supply of food-grains reported to be in the bazars and hauts of the head-quarters sub-division. It has, however, been reported that difficulty is experienced in some villages in the Bhuratpore thana which are remote from any haut or gunge. Complaint was once made to the special sub-divisional officer of Kandi that there was not sufficient supply for the day at Saktipur, but this I imagine only happens at long intervals. In the Rampore Haut sub-division the supply is reported to be scarce. In the Jungipore sub-division the supply is sufficient in all the chief marts for daily consumption, except in the petty bazars, where it is becoming more and more scarce. In the Lalbag sub-division at present the supply in the Moorshedabad market is quite sufficient for the daily wants of the population. In thana Bhudrihaut, towards Sagurdinghee, the supply is more restricted, and persons have to go greater distances to procure any grain they may require.

2.—*Kind and price of Grain selling at one or more principal Marts.*

The average price of common rice in the head-quarters sub-division is a little under 12 seers (11$\frac{14}{15}$) per rupee in the principal markets. This is somewhat higher than at date of the last narrative, when it was 12$\frac{3}{8}$ seers per rupee. It is dearest at Berhampore, Latooee, and Hurburpara, where the rate is 11 seers, and cheapest at Teakata, Nowadah, and Jellinghee, where the rates are 14$\frac{1}{2}$ and 13 seers per rupee, respectively. There is not much change in the prices of gram and wheat. The prices of fine and coarse rice selling at the principal marts in the Rampore Haut sub-division are given below :—

	Fine rice.	Coarse rice.
Rampore Haut	11$\frac{1}{2}$	13
Nulhattee	9$\frac{1}{2}$	12
Pulsa	...	11
Khangram	10$\frac{9}{16}$	11$\frac{1}{16}$

In the Jungipore sub-division in the Roghunathgunge bazar the retail price of rice is 11 seers per rupee. At Mirzapore rice sells at 11$\frac{1}{2}$ to 11$\frac{3}{4}$ seer per rupee. At Shumshergunge the latest quotation is 10$\frac{1}{2}$ seers per rupee. Rice is dearest at Sooty, where it sells at 9$\frac{1}{2}$ seers per rupee. It is singular that at Mirzapore, where the failure of crops was most considerable, the price should be lower than at Shurshergunge, where the outturn of all crops was very fair.

The following is the rate at which food-grains are selling in the several marts of the Lalbag sub-division :—

	Best rice	Common rice.	Wheat.	Barley.	Gram.
City ...	9	11$\frac{1}{2}$	14	20	17
Jeagunge ...	10	12	14	21$\frac{1}{2}$	18$\frac{1}{2}$
Bhugwangolah ...	...	12	16	24	18
Lagurdighee ...	...	10	18	...	...

3.—*Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of Zemindars, Traders, Ryots, and others.*

Nothing is accurately known of the amount of grain held in store by zemindars, mahajuns, and others, but it may safely be calculated to be decreasing, as the occasional spells of favorable weather induce them to part with some of their stock on loan to the ryots, and by sale. The sub-divisional officer of Lalbag, however, reports that there is reason to believe that the amount in the hands of the traders at Baluchur is still very large. The ryots in the portion of the Bhudrihaut thana bordering on the Mirzapore thana of Jungipore have but very small stocks, and he thinks that rice will have to be stored there ere long. The ryots of this part appear to have been induced in the earlier part of the present season to sell the greater portion of the produce of the late harvest, and are now commencing to feel want. The shops in the villages are but small, and their stores scanty.

4.—*Rainfall, if any.*

In the head-quarters sub-division there has been rain on the 7th, 11th, 12th, 13th, 14th, and 15th instant, except in the thanas of Jellinghee and Nowada, in both of which the sowings of the *aous* rice are very extensive, and in which it is to be hoped that there may be early falls of rain. In my special report on the subject I have given particulars as to the effect of the rain: it has been of benefit to all the crops in the ground, and has enabled the cultivators to sow a considerable portion of the land which had hitherto remained unsown and to replough the lands intended for the reception of seed for the *amun* crop in the west of the district. The rain was also most opportune for the sugarcane already planted out. In the Rampore Haut sub-division there was a fall of rain on the 11th and 13th instant in Khargram and Rampore Haut, but not in Nulhatti and Pulsa. The sub-divisional officer of Jungipore reports that on the 13th instant 0·12 inch of rain fell, and that it was too scanty to cool the atmosphere and to be of benefit to the crops. There has been a rain-fall of 0·87

in the Lalbag Sub-division; on the evenings of the 12th and 14th instant there were heavy showers of rain, and on the former date the rain was accompanied by hailstones. The sub-divisional officer while out in camp observed that the fiels were saturated with rain-water.

5.—*State of the Crops.*

The fruit crop, indigo, and mulberry are generally doing well. The rain has been too late to benefit the *til* crop very much; the plant is in general extremely stunted, it bears few pods, and a good deal of it will be worthless. The sub-divisional officer of Jungipore reports that the late sowings of *bora dhan* are likely to suffer a little from want of rain. The early sowings of *bhadoi* have germinated, and the seedlings want rain to nourish them. Rain is said to be much wanted in some parts to complete the sowings of this crop. The sub-divisional officer of Rampore Haut reports that the outturn of *bora* paddy will probably be ¼ of an average crop. The late rain has done much good to the sowings of *aous* and *til* and to the sugarcane already planted. The sub-divisional officer of Lalbag reports that the rain has no doubt done a vast deal of good and was much wanted. It has materially helped the *bora* paddy in thana Bhudrihaut, and will be of great advantage to the mulberry and indigo in thana Bhugwangolah. The *aous* paddy has germinated, and the young plants look strong; even the small quantity of rain that has fallen will greatly forward the sowing of the *aous* paddy.

6.—*Condition of the People.*

There is hardly any change in the condition of the people. Mr. Jones, relief officer of Kandi, reports that among the Hindus there appears to be less distress than is reported among the Mahomadans. The latter allow no inquiry to be made to the truth of their statements with reference to "purdah-nishins" The sub-divisional officer of Rampore Haut reports that the poorer people, specially the Sonthals of this sub division, are in difficult circumstances. Relief works and gratuitous relief in the shape of food have been given to the people. The sub-divisional officer of Lalbag reports that as he has been so short a time in charge of this sub-division he is unable to speak with any great confidence, but, so far as his experience goes, there does not seem to be any very great dread of famine anywhere. Distress there would naturally be when the price of coarse rice rises to 10 and 11 seers per rupee and in ordinary years the poorer classes obtain 23 and 24 seers per rupee. The rise in prices of the better kinds of rice is by no means proportionate to that of the common kinds, and the hardship to the more well-to-do classes is therefore much smaller. Within the city Moorshedabad municipal thanas the sub-divisional officer has been assured that there are many instances of want. At present he has been unable to trace these cases, and cannot believe that there is any pressing necessity for charitable relief within the municipality. There are several religious endowments in the city from which persons in actual want are fed. Baluchur and Azimgunge abound in wealthy persons, who would not, I believe, turn away from their doors worthy objects of charity. In all countries, and especially in this, there are many persons who would prefer to live in idleness and to subsist on the charity of others, and who are only too ready to rush in, whether worthy or not, now that the doors of charity are opened. The late sub-divisional officer commenced charitable relief in Bhugwangolah, and the present officer reports that he has continued it on a modified scale, pending further enquiries, as, from what little he has seen, the measure seems to have been a little premature. Toward Sagurdighee the late crop was very poor, and persons appear to require more help, especially those who are unable to help themselves on account of their advanced age or from physical inability. The relief assistant has been directed to proceed to this portion first, and to make lists of such persons after personal inquiry. In the Lalbagh sub-division, as in nearly all other parts of the district, it was necessary to give a certain amount of gratuitous relief, owing to the almost complete stoppage of private charity, which has been referred to in previous narratives.

7.—*Actual facts as to any known cases of misery and starvation.*

Three cases of reported deaths from want of food have been carefully enquired into and found to be entirely false. Exaggerated statements of all kinds are, as might be suspected at such a time, going about, and efforts are being made by many who do not in the least require it to obtain substantial relief. The Bhurtpore relief assistant was at a village enquiring as to the condition of the people, when he received an order to investigate one of the cases of reported starvation; he had therefore to leave this village in a hurry, and told some of the people the reason of his sudden departure. The next day a petition was sent to me direct from this very village, in which it was said that a man had died from starvation, a fact the mention of which to the relief assistant appeared to have been in some way or other forgotten. There can be no doubt but that the story was concocted after the relief assistant's departure, in the hopes that something might be got out of it, as it was seen that so much importance was attached to even a reported case of death by starvation.

The sub-divisional officer of Rampore Haut reports that no cases of misery and starvation have yet come to his knowledge, but that some of the poorest among the people of this sub-division are now eating the fruit of date trees and the leaves and fruit of "pakoor" trees.

8.—*Grain-thefts or Robberies.*

Six cases of petty thefts of rice and boiled rice have been reported in the head-quarters sub-division; there have been four grain-thefts in the Rampore Haut sub-division. A crime statement is annexed.

9.—*Condition of any special tracts.*

Cholera and small-pox are still prevalent in several parts of the sudder sub-division. Cholera is raging in Rampore Haut, Khargram, and in Dhangoree, in thana Nulhatee. As last reported, the eastern and south-western portion of thana Mirzapore is badly off in every respect. On behalf of the Nawab Nazim, there has been given a donation of Rs. 400 for the present for the special benefit of Ramda and Bahadinagan, in this part of the district. The work of re-excavating a tank in each of these villages has been started under the canoongo. Cholera is also prevailing in several villages in Mirzapore. The cause is probably want of good water, excessive heat, and deficient nutrition. Within the town of Jungipore the disease has almost attained the epidemic stage. The water of the Bhagiruthee has become almost undrinkable, as little fresh water comes from the Ganges. There was an extensive fire at Roghoonathgunge opposite Jungipore, in consequence of which many poor families are without a shelter. There have also been fires, causing loss more or less of property in other parts, but they have not been so numerous as during the past month. Cholera and small-pox still prevails in the Lalbagh municipality and Bhugwangolah thana, but the latter not so badly as in the previous fortnight. The sub-divisional officer found small-pox prevailing in several villages round Sagurdighee, and cholera to a small extent. The police and chowkeedars have been directed to prevent persons attacked with small-pox from going about the villages and thus spreading the disease.

B.—Relief Works.

The average number of persons employed on the several relief works is 4,141. The laborers are generally in good condition; food is easily obtained, except in the cases of the Panchgaon to Jeebuntee bridge road and Joroor and Nowadah road, where food is obtainable in small quantities only. Cash payments are made at the rate of 2 annas per diem, and the rates of task-work vary from 2 annas 6 pie to 3 annas per 100 cubic feet. The workmen as a rule bring their own tools. A statement showing the expenditure on relief works during the fortnight is herewith submitted.

C.—Transport of Food.

It appears that 10,458 maunds of food-grains have been exported from the Rampore Haut sub-division, and 4,624 maunds have been imported to this sub-division during the fortnight. From the railway returns at Azimgunge during the past fortnight, it appears that there was an export of 739 maunds of food-grains and an import of 2,187 maunds. The former has been principally kolai and gram, and the latter chiefly rice.

D.—Storage of Government Grain at Relief Works.

Blank.

E.—Advances to Private Parties and their Results.

There were 44 cases pending at the end of the previous fortnight under the Land Improvement Act in the sudder sub-division; 26 fresh applications were received during the present fortnight. Out of the total 70, 46 cases are under investigation; in 5 cases orders for payment have been made; in 3 cases the applicants have refused to take advances; in 5 cases applications have been rejected; and in 11 cases the securities tendered have been found to be insufficient. A sum of Rs. 2,115-10-8 has been advanced to 11 parties during the fortnight under report.

In the Rampore Haut sub-division a sum of Rs. 1,000 has been advanced to 9 parties for digging or re-digging of tanks during the fortnight.

In the Jungipore sub-division a sum of Rs. 200 has been paid to two parties under the Land Improvement Act during the same period.

F.—Charitable Relief.

The statement prescribed by Government, No. 1251—S.R., dated the 5th March last, is annexed, as regards each sub-division separately.

The following is a statement of expenditure incurred from the district relief fund during the fortnight under report:—

	Rs.	As.	P.
Allotment for tanks, &c.	4,342	8	0
On account of relief to burnt-out persons ..	202	8	0
Allotments for general purposes of relief ..	4,640	0	0
Price of rice and jute paid	532	10	6
Contingencies	25	8	0
Total ..	9,743	2	6

At Kandi the cook-house is working well. Mr. Jones is forming a class for the instruction of women who cannot make thread in the manufacture of thread-articles. He hopes also to get some children to learn. He would like to have some of the boys taught basket-making, but has not yet been able to start this. He has personally given relief to the aged, infirm, and afflicted in many villages and made arrangements for their assistance The same has been done by the relief assistant placed under him. Mr. Scongall has also been giving relief in rice and cloth to persons in distress. Rice is daily distributed at Bharatpore and Mangram. Gratuitous relief is being started more systematically than heretofore, at Talibpore, Salar, and Saktipore; all these places are situated in the Bhurtpore thana. The relief assistants recently appointed are all engaged in visiting by degrees the different villages of their jurisdictions, commencing with those reported to be most distressed. General instructions have been issued for their guidance in these enquiries, and they have been supplied with small sums to enable them to relieve urgent cases of distress which may come to their notice. The names of all persons found distressed are recorded, and they are referred to the local sub-committees for further relief. The number of such persons is generally small in most villages. From some villages urgent reports of extreme distress, and, as before stated, in three cases of deaths from starvation have been received, which on local enquiry have turned out to be absolutely groundless, and merely the productions of persons desirous of attracting a greater share of notice to their own localities. Wherever real distress has been found to exist it has been promptly met by the sub-committees, and there is no fear of any case escaping their attention, unless, indeed, through the fault of the sufferers themselves. As prices are, no doubt, pressing severely on the means of livelihood of the poor, we may expect to find the numbers on the hands of the sub-committees increase. A cook-house has been built at Gokun.

The number shown in column 6 of the statement annexed, as regards the Rampore Haut sub-division, is far below the number of persons actually relieved, as information has not been supplied from some of the poor-houses.

In the Jungipore sub-division considerable employment has been provided for men by works, such as tank excavations and road repairs, undertaken either from the relief fund or municipal fund, or by private funds.

The total amount of receipts of the sub-divisional relief fund during the fortnight is Rs. 1,816-13-3, and that of disbursements is Rs. 1,156-0-2, leaving a balance of Rs. 660-13-1 in hand at the end of the fortnight.

During this period 272 persons received wages for jute-spinning amounting to Rs. 60-13, 2 persons received doles of pice amounting to Re. 1, and 3,100 persons received doles of rice weighing 62 maunds.

The sub-divisional officer of Lalbag reports that grain has only been given out at two centres, viz., Bhugwangolah and Sagurdighee. The numbers at these places seeking charity have increased very much. In the period prior to the date of this narrative, Mr. Murray distributed 64 maunds 35 seers to 298 person at the five centres at which rice was stored. During the present fortnight at Bhugwangolah and Sagurdighee alone, the sub-divisional officer has distributed 50 maunds 5 seers to 667 persons. More than two-thirds of this number came for rice at Sagurdighee. He was enabled to help a very much larger number of persons with a smaller amount of grain by giving smaller quantities to each person. His predecessors used to give each person 10 seers of rice for a fortnight's supply, but he only gives 5 seers, as this is sufficient for one meal a day. The sub-divisional officer says, with much truth, that already the people have begun to consider the charity as a matter of right, and relates his experience at Bhugwangolah, where a middle-aged woman, who had come after the time fixed for the delivery of the rice, positively refused to take a handful of grain offered, and went away saying that on the previous occasion she had received 10 seers! He is trying to establish a system of making over jute to the villagers on the responsibility of the chowkeedars. The raw material being purchased at about Rs. 3, and the manufactured article taken back at Rs. 4-8 per maund, while the chowkeedar receives one anna in the rupee for his trouble and responsibility. The remuneration obtained by the chowkeedars will, I fear, be very little, and the rate might well be raised, for I consider that very many of the chowkeedars are as much distressed as any other class of people; their pay is in ordinary years nearly always in arrears, and this year the arrears are naturally much larger, and many who really could pay avail themselves of the cry of scarcity and dearth of provisions. In some of the western thanas the chowkeedars have, it is true, service lands, but in these thanas (Rampore Haut, Nulhattee, and Bhurtpore) there was great failure of the main rice crop. I have found it necessary to give small loans to some of these chowkeedars from relief funds, and shall probably not press very much for repayment, of the whole sum at any rate.

In places also where tanks are being dug by the relief committee in the Bhadrihaut thana (where coarse rice is selling at 10 seers) the sub-divisional officer is advancing an acknowledged dealer rice from the relief store at the rate of 12 seers per rupee (the price at which it was purchased), with the understanding that he resells it to the workmen at the rate

of 11 seers. So as to prevent outsiders from purchasing at this rate, he has stipulated that the rice is only to be sold in exchange for tokens given to the workmen by the overseer who measures up the work.

Work is going on on several tanks in this sub-division and gives employment to many persons.

The total amount of subscriptions collected up to date in this sub-division is Rs. 5,006-11-6, and the total expenditure incurred from the sub-divisional relief fund is Rs. 2,319-13-4.

No. 1009, dated Dinagepore, the 18th May 1874.

From—J. TWEEDIE, Esq., District Relief Officer, Dinagepore,

To—The Offg. Secretary to the Government of Bengal, Statistical Dept.

THE Magistrate of Dinagepore is absent from head-quarters on tour, and has requested me to write the fortnightly district report due this day.

A.—STATE OF THE COUNTRY.

The crops in which our interest is at present centred are chiefly "bora" dhan, kaôn, and the bhadoi rice. The first is now ripe, and is being cut and brought into use. It is a crop grown in bheels, and is therefore limited in area; but in Bhadoorea, Porsha, Lushkerhat, and Churamon, the quantity grown is considerable, and the cutting of the crop should be followed by an appreciable, though temporary, relaxation of the pressure of scarcity. The circle officer of Lushkerhat describes the boro dhan as "very rich." Mr. Lowis in his report No. 13Ct, dated 24th January last, to the address of the Relief Commissioner, Rajshahye Division, estimated the total yield of this crop at 1,00,000 maunds. It is probable that these figures are very near the truth; and if so, they obviously represent no small addition to the food-supply of those parts of the district where boro dhan is sown. Kaôn is a small grain of the millet species, and is grown chiefly in the north and east of the district. I cannot state even the approximate area or yield of this crop, but it is now ripe, and as almost every village in that part of the country in which the crop grows has its patch of kaôn, the crop must be recognised as an important addition to the minor food-staples of the people. These minor food-staples have all along been of considerable assistance to us, and a number of zemindari agents whom I saw at Ranisonkoil assured me that if a man can secure only a quarter of a seer of rice for each member of the family, he can live comfortably for a year of scarcity on that quantity supplemented by his minor food resources. These minor food-staples are kaôn, barley, wheat, kalais of two kinds, the principal being "chenna," moong, vegetables, as potatoes (both "country" and "sweet"), kochoo, leeks and onions, to which add sâg; fruit, as mangoes, plantains, bel, and pomegranates; milk and "dahee" or curd, goor, and oil. Fish are caught in the rivers and carried in pots of water alive to *hâts*, while for the Mussulman we must add eggs, poultry, pigeons, goats, and kids.

Notwithstanding the scanty pasture, the supply of milk in the district is very plentiful. The cattle are in good condition, and, so far as I have heard, there is no cattle disease in the district.

The bhadoi crop is now nearly all sown. There has been no difficulty at all about seed-grain. The breadth sown is at least one-eighth over that usually laid down. The young crop is in several stages of progression; some which I saw when on tour across the Rungpore frontier is a full cubit in height and will be cut next month. If the weather be favorable, the great bulk of the crop will be harvested by the end of July, and our present trials will then be over. The prospects at the present date may be pronounced most favorable.

Preparations are in progress for sowings of the hemmonthee crop. Manure is being laid down on the fields, and in some places a first rough breaking up is being given to the clods. The sowing season will not be over for six weeks yet.

Condition of the People.—The physical condition of the people is good. I have been on tour continuously for the past month, and I think I may safely say that the relief measures taken in this district have prevented any considerable part of the population from falling into a low state of health owing to want of sufficient food. The better to secure this desirable result, it has been determined during the fortnight under report to station additional relief officers at Bochagunge, Beergunge, and Habra, places which have hitherto been under surveillance (so to speak), but which are now regularly administered by circle officers. As regards sickness, cholera has made its appearance at several points, and deaths have occurred from it. The following circle officers give these details:—Bhadoorea, "a few deaths;" Gungarampore, "50 deaths;" Lushkerhat, cholera "raging very fiercely," and "a very large number of deaths." Putnitollah mentions two deaths, and Patiram and Porsha mention cholera having broken out, but do not state to what extent the disease has spread. Native doctors are required at Bhadoorea and Lushkerhat. A man has been ordered to join at the latter place, and the Civil Surgeon will be asked to provide a man for the former.

Supply in Market.—Local trade continues to bring in a fair supply to most of the markets, and the country rice continues to sell at about eight seers of 80 tolahs for the rupee. In Ranisonkoil, Bindoil, Kaliagunge, and Doorgapore the officers report good supplies of rice in the *hâts* at from 7½ to 9 seers the rupee, and dhan at from 12 to 15. Mr. Fasson says: "The supply is enough for all purchasers, and something over at the close of each bazar." At Kaliagunge "the supply is fairly plentiful and private trade apparently brisk," and "there is still much old dhan in the hands of the mahajuns and ryots." At Doorgapore rice sells at 8½ to 9½ seers per rupee; and prices are expected shortly to fall to 10 seers. In the southern parts of the district (Patiram, Putnitollah, Porsha, &c.), which I have not yet been able to visit, the state of affairs is different. Thus in Patiram the local trade has almost died out, and well-to-do men are applying for our *country* rice (as distinguished from *Burmah*) to be sold to them at 10 seer or less for the rupee. Still even in Patiram a small

boat load of rice from Pubna arrived, and the cargo was sold a little over 8½ seers of 80 tolahs to the rupee, and 100 maunds more are to be brought by the same mahajun from the same place.

In Putnitollah "the supply is unequal to the demand in most of the principal markets."

In Porsha "very little grain comes to the *hâts* for sale in comparison with the number of buyers," yet the prices are reported to be 10½ to 11½ seers per rupee.

In the east (Habra) I saw about 50,000 maunds of rice and dhan in the hands of private traders. Large quantities are being exported thence to Rungpore. Government rice is being freely sold to all laborers under all circumstances, and also to the general public, wherever the local supplies and prices seem to render it desirable that Government shall assist in supplementing the stocks. When on tour, I have made, with the permission of the people, house-to-house inspections of grain-stores in some hundreds of homesteads. If my report were not already too long, I could give details of what I saw. I must content myself with remarking that the domestic supplies are considerable, and that the houses in which bhadoi and hemmonthee seed are not to be found are few.

Rainfall.—Rain is reported to have fallen in the following circles during the past fortnight:—At Bhadoorea, Bindoil, Dinagepore, Gungarampore, Habra, Kaliagunge, Putnitollah, Patiram, Porsha, and Tamboolee. More rain is required, but the requirement is not very urgent at present, and, if we have a few good showers during the next fortnight and the "rainy season" brings with it an average rainfall, all will be well.

B.—Relief Works.

These are now approaching completion. When on tour, I caused many tanks to be started near villages, so that work may be provided near the homes of the cultivators. With Major Lindsay's approval and the Relief Commissioner's sanction six annas per hundred cubic feet are to be paid for earthwork on the railway main lines and feeder roads till the end of July. The "piece-work system" is now in force on all works to which it can be applied, payments by the day being made only to persons who have not naturally sufficient physical strength for a hard good day's work. The following* is a synopsis of the number of men, women, and children employed on relief work, exclusive of railway works within this district as far as the returns at my disposal enable me to give them. It is hoped that complete circle returns in the form prescribed by the letter of the Secretary to the Government of Bengal, No. 144—T.F., dated 5th instant, will be received in time for next fortnightly report.

* See Annexure A.

With reference to the circular of Government No. 2853, dated 4th May, I mention that grain is sold by salesmen on the road side to laborers, wherever men are at work in any considerable numbers, and that Mr. Sneyd, the circle officer of Putnitollah, reports that he has introduced the plan of paying six days in rice and one in cash. The result of the experiment will be known hereafter.

C.—Transport of Grain.

As the district "grain officer" is on tour, I have been unable to procure any information from him under this head. I believe, however, that I am correct in saying that transport work has been completed within this district, and endeavours are now being made to assist Bogra.

D.—Storage of Grain.

As the district grain officer is on tour, I have been unable to procure information from him under this head. With reference to the letter of the Government of Bengal, No. 83—T.F., dated 30th April, I give in Annexure B such figures as the grain officer's clerk has been able to furnish. No doubt more precise information will be collected before next fortnightly report is due. Of my own general knowledge, I may report that nearly all, if not absolutely all, our district allotment has been received and has been stored at suitable places all over the district, and that subordinate golahs are hired or erected, and minor supplies of rice sent to these whenever it appears that any place is too distant from a principal golah to allow of its being readily relieved by the stock in the golah.

E.—Advances.

No advances have been made in this district during the fortnight under report, but applications for advances have been received from several zemindars in the south. The applications are now pending before the Magistrate, and it may perhaps be found possible in this district to pull through without granting advances of money. The only considerable difficulty now ahead is the feeding of the people during the month of July, when they can do little or no remunerative labor, and the Magistrate will no doubt consider whether, if advances be indispensible, it will not be the best plan to advance food-grain and to refuse cash.

F.—Charitable Relief.

The figures for the fortnight under report, contrasted with the figures of the previous report, are as follow:—

No.	Name of circle.	No. receiving relief.		Increase.	Decrease.
		Shown in last report.	In this report.		
1	2	3	4	5	6
1	Dinagepore	610	901	291	.....
2	Ranisonkoil	4,473	8,657	4,184	.....
3	Bindoil	1,416	1,706	290	.....
4	Doorgapore	339	598	259	.....
5	Chooramun			Not received.	
6	Kaliagunge	154	466	312	.....
7	Tamboolee	285	550	265	.....
8	Gungarampore ...	1,887	2,082	195	.....
9	Lushkerhat	234	478	244	.....
10	Porsha	238	428	190	.....
11	Putnitollah	798	517	.....	281
12	Patiram	1,127	1,232	105	.....
13	Bhadoorea	870	1,013	143	.....
14	Beergunge	.....	.....	Not received.	
15	Bochagunge	.....	.....		
16	Habra	.....	898	898	.....
	Total ...	12,431	19,526	7,117	281

It will be seen that we have now in round numbers 20,000 people to feed daily by charitable relief. If each person get half a seer, the monthly consumption of rice would be 7,500 maunds, but as many of these as 20,000 are children getting only a quarter of a seer. The present consumption may be set down at about 5,500 maunds per month, value at Rs. 3 a maund, Rs. 16,500. With each half seer one pice is given making on 5,500 maunds Rs. 1,720. This gives in all Rs. 18,220 as the present approximate monthly cost of our charity. The greatest increase during the fortnight is at Ranisonkoil. Mr. Scanlan gives no special explanation. I have asked him to say whether there is any or not. I know that there are many villages within the Ranisonkoil circle which contain may poor people, for I saw them when on tour.

The number receiving charitable relief are not, I think, excessive, and I know that all officers take great pains to prevent imposition. The figures will probably stand at about double their present amount in the month of July, and thereafter it will be seen by what means we can throw these 40,000 or 50,000 people back on their own exertions or on the charity of their friends for support, for it would be one of the worst results of the present scarcity if any permanent system of Government charity and "poor laws" were to spring from it.

When I was recently on tour at Foolbarri (Habra circle), I held a large meeting of zemindars and others, and formed a committee for looking after the poor people of that neighbourhood. Baboo Keddar Nath Mozumder, the moonsif of Chintamun, and Baboo Hurrish Chunder Banerjee, Deputy Collector of Foolbarri, deserve credit for the interest they have taken and the assistance they have given in this matter. Over Rs. 700 were collected for the purposes of the committee.

G.—Financial Results.

The total expenditure up to last fortnight was Rs. 14,12,235-14-11.

Details of the above.	Rs.	A.	P.
For road works	9,33,924	8	8

J. TWEEDIE,
District Relief Officer.

The 18th May 1874.

No. 1073—S.R., dated Dinagepore, the 19th May 1874.

From—J. TWEEDIE, Esq., District Relief Officer, Dinagepore,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

WITH reference to the postscript of my letter No. 1069 of yesterday's date, I have the honor to forward annexure A of the fortnightly report for the past fortnight.

The annexure is furnished in reply to your letter No. 144—T.F., dated 5th current, but, as the returns of circle officers have not been obtained in time for this report, the figures now furnished are not very complete.

It is hoped that accurate figures, in full conformity with the requirements of the letter above cited, will be available for next fortnightly report.

A.

Statement showing the number of persons employed on roads, tanks, embankments, &c., under the different Circle Officers in the Dinagepore District.

No.	Name of circle.	Nature of work.	Number of persons employed.				Remarks.

J. TWEEDIE,

District Relief Officer.

No. 791, dated Beauleah, the 18th May 1874.

From—W. H. D'OYLY, Esq., Collector of Rajshahye,

To—The Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit my narrative for the fortnight ending the 17th instant.

A.—STATE OF THE COUNTRY.

The markets still continue to be well supplied, though the supply at Lallpore, a small hât in Tanore, was insufficient on the 6th instant. The next day Government rice was sent to a neighbouring market, and on the 10th to the Lallpore hât, but not a seer was sold, and the local supply has since been sufficient and prices have fallen, although the quantity imported has been much smaller than usual. There has been more or less rain during the fortnight in all parts of the district, in the Bundaikhara, Bagmara, Nattore, and Boelmarea jurisdictions, more fell than elsewhere. This has saved the *aous* which had germinated, and about which fears were entertained before the rain fell. In the latter part of the fortnight, while I was out in the interior, I observed that the young plants looked particularly green and thriving. Lands not yet sown, are being prepared for *aous* and *amun*. The area under cultivation this year is far greater than that of last year. I have been assured by many natives that there is a great want of seeds, but facts are against this supposition; large tracts have already been sown, and are green with young plants. While I was at Saepara, a place about twenty miles north of Beauleah, on Saturday last, a fire broke out in a neighbouring village—only a few houses were burnt; this fire proved that *dhan seed* is not altogether wanting; one man in particular had a very large basket full of last year's seed, which he carefully removed from his house just before it caught fire. The zemindars generally have not been backward in helping their poorer ryots. Sub-divisional officers and managers of Court of Wards' estates, have been strictly enjoined to watch carefully the sowings, and to help the ryots where it may be necessary to do so. In the north and south Burind and Beauleah Sub-divisions, the price of common rice is from 10 to 10½ seers for the rupee, while in the Nattore Sub-division generally, it is selling at 12 seers per rupee, but at several *hâts* in the Singra thana it is procurable at 13 seers 2 chittacks, for the rupee. The condition of the people is as much the same as before, the laborers on the relief works are in good condition. Cholera has been very prevalent in Tannore and Bagmara,

and in parts of Beaulah and Churghat. Hospital assistants and native doctors have been sent out and have done their work well. One especially in Tannore has restored confidence among the people by his successful treatment of many cases. I believe that before his arrival fear helped the cholera to carry off many victims. In Beauleah it has decreased greatly. As regards crime the District Superintendent writes as follows:—"If absence of increase in crimes against property may be taken as an indication, (as it certainly should be) that the pressure of want on the lower classes is not increasing, such an indication is not wanting now. There have been 13 cases of grain-thefts, almost all of a trivial nature. In one instance the culprits were three Railway Policemen of the Bogra District, who were convicted of stealing from a gola in their charge."

B.—Relief Works.

There has been lately a slight decrease in the number on the works. The rain which fell during the fortnight is the cause of this, many having left work on the roads to till their lands; orders have been issued to sell Government grain at rates lately sanctioned by the Commissioner. The number of persons employed on works under the Executive Engineer, during the first week of the fortnight, was 8,100, giving a daily average of 1,157¼. During the second week 7,376 persons were employed, or on an average daily 1,053½.

C.—Transport of Grain.

See Statements.

D.—Storage of Government Grain.

The following statement shows the amount stored in this district:—

District Golas.

	Mds.	Srs.
Tannore	7,773	29
Gooliahât	4,958	25
Bagmara	4,749	19¼
Lallpore	1,961	4
Manda	7,157	0
Ditto, in transit from Nowgong	2,072	0
Godagaree	5,856	0
Nowgong	701	0
Beauleah	11,669	5¼
Total ...	46,898	3
Add stored in Railway golas as part of our district allotment	40,000	0
Total ...	86,898	3

E.—Advances to private parties.

	Rs.	A.
Advanced up to the date of last narrative	89,532	12
Advanced to zemindars for assisting ryots	19,500	0
For importing food-grain	300	0
Total ...	1,09,332	12

F —Charitable Relief.

Beauleah Sub-division.

The District Relief Officer, Baboo Mohendra Nath Bose, reports that during the fortnight at six relief centres in the Beauleah Sub-division 12,094 persons were fed gratuitously or about 863 daily. The number employed in husking rice, and spinning jute and cotton was 7,511, or about 536 daily.

South Burind Sub-division.

Here the number of women working in jute and cotton-spinning has much increased. Mr. Manisty has been careful to get work where possible. The total number of persons who received relief was 42,966, but of these 34,251 did work, and 8,715 were fed gratuitously. These fortnightly totals are apt to mislead, for they in reality do not represent the actual number of persons relieved. The daily average gives a more correct idea. The daily averages are as follows:—

Persons working at jute and cotton-spinning	2,446
Ditto ditto on roads	94
Ditto ditto on tanks	30
Ditto receiving gratuitous relief	622

North Burind Sub-division.

At ten relief centres the daily average of persons fed gratuitously was 1,293$\frac{1}{7}$ for the first week of the fortnight, and the daily average of persons employed on work for the same period was 291$\frac{1}{7}$. The sub-divisional officer reports that there has been no change in the condition of the people since his last report. The collection of kunkur affords employment to the weakly men, to the women and children of no less than 65 villages. Besides the figures given above there were 502 men employed in repairing the road from Nowgong to Bhundaikhara. *Boro dhan* is plentiful and is being cut. The *kaun* also is a good crop and will be cut in about a fortnight.

Nattore Sub-division.

The sub-divisional officer reports that things have somewhat improved; the repairing of the Bogra and village roads, husking rice, jute and cotton-spinning afford full employment to those in need of it He has submitted figures for the week ending the 12th, as follows:—

Runbagha Circle.

Number of persons employed on roads	2,342
Ditto ditto on tanks	30
Ditto ditto in building a bungalow ...	26
Ditto ditto in twisting jute	87
Ditto receiving gratuitous relief	36

Kasimpore Circle.

Number of persons twisting jute	10
Ditto ditto spinning cotton	3
Ditto ditto husking paddy	13
Fed gratuitously	640

Buraigaon Circle.

Number of persons employed in making strings	27
Ditto ditto thread	33
Ditto ditto cloth	3
Ditto ditto husking rice... ...	2
Ditto receiving gratuitous relief	20

Kuruchmarea circle. No relief required.

Sahebgunge circle. No relief required.

G.—Financial Results.

Beauleah, the 11th May 1874.

J. J. O'FLAHERTY,
Executive Engineer.

No. 444—F, dated Maldah, the 19th May 1874.

From—F. Wyer, Esq., Officating Magistrate-Collector of Maldah,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I have the honor to submit the fortnightly narrative of scarcity and relief for the period ending 16th May. I did not receive the report from the Chanchal sub-division until late yesterday evening, hence the delay in the submission of the report.

A.—State of the Country.

During the past fortnight there has been rain throughout nearly the whole of the district; the only part where rain did not fall was in the Seebgunge circle. In Gazole the rainfall was plentiful, but in the other parts it was not sufficient, more is wanted to complete the bhadoe sowings, and bring on that which has been already sown.

A good deal of the baro dhan has been cut and has turned out well. This crop does not affect the prices of rice in the market to any great extent, since it is mostly kept for home consumption. Bamboo seed is still collected in the Paroea jungles, it is sold, I am told, at five paisa a seer

The mangoe crop, from what I hear, turns out badly, this is owing to hailstorms and strong winds.

In the north-western part of the district the bhadoe sowing has been nearly completed; a very much larger area than usual has been sown in that part. In the other parts of the district a good deal of the land has been sown, and the remainder is being prepared. I think that the seed-supply is sufficient in Nawabgunge; the people are holding back their stocks for higher prices, so that any advances in cash from Government would only increase the prices. There is not the slightest fear of any of the seed-grain being consumed, for it will pay the owners of it better to sell it and buy rice than to eat it.

In Chanchal, Mr. Reily, who, with the sanction of the Commissioner, spent over three thousand rupees in storing a large quantity of seed-grain for the use of his tenants, after selling to his own ryots as much as they wanted, has sold his surplus stock to the public. People came forward very eagerly to buy it, since it was sold at cost price, and much under the market rate; the total quantity sold up to date is 1,766 maunds. During the past fortnight the price of rice has risen, in Rohunpore it has increased from 12 to 8½ seers for the rupee. In the north-western part of the district there was a marked rise in prices, but on selling from Government golahs they reverted to the old rate of 9½ seers.

The supplies in the market, according to the circle officers' reports, have been short of the demand, and are very low. This cannot, I think, be the case to any great extent, for Government rice was sold to the public at Gazole, Seebgunge, Nowabgunge, Maldah and Chanchal, but the whole quantity sold was only 300 maunds. I think that selling Burmah rice does not interfere very, much with private trade, since only those persons who cannot afford to buy the ordinary rice buy the Burmah, and since the supply of the ordinary rice is limited traders can sell it at a fair profit.

The latest prices for paddly and ordinary rice is given in the following table:—

	Numbers of seers of paddy per rupee (80 tolahs)	Number of seers of ordinary rice per rupee (80 tolahs).
English Bazar	...	9
Balia, Nowabgunge	...	8½
Bulbul Chandee	17½	11
Gazole	15	10
Chanchal, Tulseegunge, Samsee, and Abadipore	13 to 17	9½ to 10½
Kaliachak	15	9½
Rohunpore	16½	8½

	Inches.
The quantity of rain which fell at head-quarters on 11th was ...	0·02
Ditto ditto ditto 13th „ ...	0·22
Ditto ditto at Chanchal on the 13th „ ...	0·32

The health of the people has, on the whole, been good; there have been some cases of small-pox, and three cases of cholera were reported among the coolies at Rohunpore. There have been no deaths from starvation.

Two new centres, one at Najeerpore and one at Muthorapore, have been established. Seebgunge has been made a separate circle under Mr. Owens, and relief work was given on two relief roads and a tank.

Condition of Special Tracts.

In Chanchal the numbers of people receiving charitable relief is on the increase, the number being 18,356; probably distress will be more keen when work in the fields is finished. Mr. Reily reports that this sub-division has been divided into three circles, each Inspector having 100 to 110 villages, and that he has sub-divided these circles into groups of from 10 or 12 villages, which he had placed under an overseer, who is in most cases a village mundal. In fact, he has carried out exactly a plan which, on my arrival here, I ordered to be introduced in the tracts which were suffering under severe distress. I send a copy of this circular which I sent round to the circle officers. Mr. Reilly is the only officer who has as yet carried out this system, I am glad, from his experience, it has been found a practical one.

Circular No. 408, *to all Circle Officers.*—The Lieutenant-Governor has ordered that an efficient system of village relief should be organized in those parts of this district where distress may be keenest. In such parts you will have to divide your circle into small groups of villages, and nominate a local superintendent, who will be, as a rule, the zemindari putwaree, or, as he is called in this district, zemindari gomasta, or some village notable. His pay will be on the outside Rs. 15 a month.

You will have to prepare lists of the villages which comprise these groups, and will note who is the headman in each of these villages, and who is the zemindar, and in what village the person who is to act as local superintendent lives. This must be a village situated within the centre of the group.

It will be the duty of the local superintendent:—

(1.) To visit each village within his group at least once a week.

(2.) To prepare lists of people in the villages who from any cause are unable to work, and should be gratuitiously relieved.

(3.) To relieve those persons who are in immediate want of relief.

(4.) To prepare, in consultation with the mundals of the villages, lists of the ryots who wish for grain advances to support themselves and their laborers till the next crop.

(5.) To take charge of Government grain, cotton, and jute, which may be sent to his centre for relief purposes, and to distribute the cotton and jute to persons requiring home relief; this he can do through the village mundals.

(6.) To keep an account showing the quantity of grain, &c. which he has received, quantity expended, the quantity in hand, the quantity of cotton and jute given out, and the quantity of thread and sacking received, with the amount of grain given as wages to the persons preparing the thread, &c. These persons will not be paid in money, but in grain. This account he will submit weekly to the circle superintendent or assistant superintendent.

It will be the duty of the circle superintendent himself, or through his assistant, to visit each centre of these groups at least once a week, and to inspect the persons who have been relieved by the local superintendent; these persons will assemble on the day fixed for the visit, at the centre of the group, and, in case they are fit objects for charitable relief, they will receive tickets for a week's supply of food from the superintendent. The superintendent will then consider the applications for loans of grain, and, in case he is the circle officer, may grant the advance, if he is subordinate to the circle officer he must report the matter to the, circle officer for orders.

The circle officer must himself go round in his circle and introduce this system and ask the gomastas to act. The numbers of the villages in each group will be the number in which the local superintendent is gomasta, and will vary from 5 to 15. The circle officers will find out from the zemindar or his agent who these gomastas are. I have issued orders to the zemindars to afford the local officers all the assistance in their power.

B.—Relief Works.

The number of people who have been employed on relief works has greatly increased, except in Chanchal, where there has been a decrease of 1,317. The decrease in this sub-division is not quite so great as the numbers given above, since some of the returns had not been sent in for that sub-division, but Mr. Reily says that there has been a decrease, owing to the rain on the 13th, in consequence of which a number of the coolies left the relief works to work on their fields. In Gozole circle three roads and one tank, and in Chanchal sub-division the system of paying laborers in grain has been introduced, with the modification that every fourth day is paid in cash; this is necessary, in that the coolies may pay for their salt and other condiments. This system will be extended, I hope, by the end of next fortnight to all relief works in the district, and all the works in Chanchal sub-division are carried out by task or rather piece-work. The following table shows the number of people working on each relief work:—

Name of Sub-division.	Number of Public Works Department laborers.			Number of laborers under Circle Officers.		
	Male.	Female.	Children.	Male.	Female.	Children.
Sudder Sub-Division.						
3 Roads and 3 tanks	1,753	.....	.....	897	1,131	46
Maldah Sub-Division.						
1 Road	.....	.....	.....	487	458	132
Gazole Sub-Division.						
5 Roads and 2 tanks	8,337	1,214	898	5,911	.....	3,515
Seebgunge Sub-Division.						
Roads	3,368	1,675	350	294	65	5
Gomastapore Sub-Division.						
4 Roads and 1 tank	988	407	286	3,738	2,736	1,539
Nawabgunge Sub-Division.						
8 Roads	4,962	1,928	548	9,753	1,389	1,743
Chanchal Sub-Division.						
11 Roads	1,080	854	98	6,243	870	692
16 Tanks	.....	.....	.....	11,825	4,803	553

(*a*.) The number of Public Works Department laborers	On piece-work ...	28,656
	On daily wages ...	
(*b*.) The number of laborers under Circle Officers	On piece-work ...	33,820
	On daily wages ...	
(*c*.) The number of Court of Wards' laborers	On piece-work ...	24,986
	On daily wages ...	
Grand Total...	On piece-work ...	87,462
	On daily wages ...	

Total number of laborers on all Government and Court of Wards' works:—

Men	59,546
Women	17,530
Children	10,386
Total ..	87,462

Note.—Details for piece-work and daily laborers have not been received.

C.—Transport of Food.

The transport service *vid* Hyatpore is closed. The allotment has been carried, being 1,58,914 maunds; of this, 1,20,000 maunds have been sent to Dinagepore, and 38,914 maunds have been stored in local golahs.

A portion of the 1¼ lakhs for Purneah has been sent to Dumroil, from whence it will be forwarded in small boats to Dengraghat.

The total amount received for the district was 1,15,099 maunds, and is stored in the several golahs here; 7,40,408 maunds 8 seers have been sent on to Dinagepore. Mr. Livesay, the transport officer, has despatched on an average each day 1,130 maunds by carts, and 8,664 maunds by boats.

D.—Store of Government Grain.

The following table shows the quantity of grain stored in each golah:—

	Maunds.
English Bazar	25,489
Old town, Maldah	17,029
Gazole	9,995
Chanchal Sub-division	44,201
Nowabgunge	3,750
Jhelim	1,000
Seebgunge	1,500
Gomastapore	1,125
Parbuttypore	1,000
Total ..	1,15,099

Of the rice entered as stored at Gazole, 1,100 maunds are in transit, and of that entered as stored in English Bazar, 7,985 maunds are in boats waiting to be unloaded.

The following table shows the amount distributed to subsidiary golahs:—1,870 maunds have been distributed to nine subsidiary golahs, in quantities varying from 80 to 500 maunds.

The total quantity of rice disposed of up to date was 6,914 maunds. I therefore think that the present allotment of 1½ lakhs will prove quite insufficient.

E.—Advances to Private Parties.

There was only one advance during the fortnight, viz., of Rs. 500 to Ghinoo Sirdar, of Deapurah, for clearing out a tank. 416¼ maunds of rice have been advanced to ryots.

F.—Charitable Relief.

The number of people who have received charitable relief has greatly increased since last report. The total daily average, according to the returns, for the whole district is 6,340. I do not think the figures are accurate, for, on looking over the sudder circle figures, I found that though the dates which the returns covered varied, the daily average was obtained by dividing the total by 14; the true daily average for this circle was 1,103. The average given by the method described is 1,154. I will send correct figures hereafter. However, there cannot be a doubt but the number relieved has largely increased. This is owing to increased distress, and to an improved relief organization. I send the table showing the number relieved, and will send a corrected table hereafter:—

Name of Circle.	Number of people relieved.	Rice distributed.	Cash distributed.
		Mds. Srs. Ch.	Rs. A. P.
Maldah Circle.			
11 Centres	11,297	141 3 0	240 6 10½
Gazole Circle.			
7 Centres	11,970	79 24 12	91 8 8
Chanchal Circle.			
10 Centres	18,356	256 1 8½	6 7 0
Sudder Circle.			
8 Centres	16,166	176 11 12	13 9 9
*Seebgunge Circle.**			
4 Centres	406	5 34 4	4 15 9
Nawabgunge Circle.			
9 Centres	16,250	192 0 11½	184 2 10½
Gomastapore Circle.			
10 Centres	14,325	154 26 12	160 2 7
Total	88,771	1,005 22 10	661 2 1

* For one week only.

The daily average number of people relieved during the fortnight was 6,340, at an expenditure of maunds 1,005-22-10 of rice, and Rs. 661-2-1 cash.

G.—Financial Results of the Fortnight.

	Rs.	A.	P.
Total expenditure from district treasury, as shown in the last fortnightly narrative	2,40,501	5	5

Details of the above total.

No. 13, dated Rungpore, the 18th May, 1874.

Memo by—E. G. GLAZIER, ESQ., Magistrate and Collector of Rungpore.

FORWARDED to the Secretary to the Government of Bengal, Scarcity and Relief Department.

Fortnightly Narrative of Scarcity and Relief of the Rungpore District ending Saturday, the 16th May 1874.

A.—STATE OF THE COUNTRY.

THE state of things has continued much the same, and there is little that calls for notice. The western markets have continued high, while a good supply has been received up the Teesta. My importation returns show a total of 43,000 maunds, in addition to 9,000 brought out from local stores in thanas Dimla and Jaldhaka. Dinagepore has sent us only 6,000 maunds out of the above quantity, 23,000 maunds coming from Serajgunj and the south. Sadullapore and Govindgunge have been well supplied from this source.

In the eastern portion of the latter thana the price is Rs. 3-14 per maund, while in Kamdia, beyond the Kurotoya, in place of 300 to 400 maunds usually brought to market in old days, but three maunds were brought, which sold at Rs. 5 a maund; but here Mr. Damant is selling 200 maunds a day to the laborers on the roads.

In our head-quarter markets the supply has varied, but has been on the whole scanty, and the price on the last market day was Rs. 5-8 to 6 a maund of 90 weight, equal to 7½ seers of 80 weight, per rupee.

In Durwani prices have risen above this rate and reached 6 seers a rupee.

Our sales at Sankamari have, in consequence of the rise in the market, increased again to 300 maunds a day. Public sales have now begun at Chillakhal. The first day 50 maunds were sold, the second 150 maunds, and the sale will, I apprehend, increase to about 300 maunds a day. Arrangements have also been made to commence sales at Durwani to the north-west, and at Alackuri, the relief centre of Mahigunge division. I shall probably find it necessary to sell at one or two places in the Molung division, but I have not yet completed the arrangements. I am giving careful attention to extend our system of sale to all places where the supply shows a deficiency, without interfering with the operation of the regular trade. The pass system is gradually progressing, but it promises to be successful also for the supply of Kumargunge from Chillakhal. Orders for 125 maunds have been already issued on Kalligunge; in all, passes for about 1,000 maunds have been given. Seven hundred maunds of the amount is for the head-quarter markets; the remainder is divided between thanas Molung and Pirgunge. As regards Molung there is this hindrance, that the Relief Officer has engaged 1,800 pack-bullocks to bring up his rice from Kalligunge, and the rate of payment so well suits the paikars that they do not care to trade on their own account. This objection, however, will now cease to a great extent. The supply of rice to be received from the Kalligunge side has now been made up, and the rest of the allotment will be made up from Panialghât, where we have an ample stock of carts, and therefore the services of a number of the pack-bullocks can be dispensed with. In Pirgunge there is greater promise of the trade developing; passes are given day by day.

Market rates are as follow :—

Rainfall has been ·55 during the fortnight; more rain is wanted, especially to the south, where the crops have deteriorated in consequence. Elsewhere the condition continues favorable. Kaor has been harvested in many places, and looks well everywhere, and some aous has been cut in Sundargunge; no new rice has yet come to market; but in Borobari in places the laborers have ceased to purchase Government rice, as they perfer the new millet, which is cheaper. The poorer people also eat wheat and pulse, which they make into flour and dissolve in water, mixing with it a little salt or goor to make it palatable; and also some rice and millet, and vegetables of various kinds.

The Commissioner is with Mr. Damant at Kamdia, in Govindgunge, and efforts are being made to move off the Bograh people who still encumber our works there; most of the roads have been finished, and tank-work is now being carried out. I have been through divisions Kamargunge, Molung, and Pirgunge; I passed along the west of Pirgunge. There is a great amount of land left for the amun rice crop, so that the distress here will continue for sometime; but it is by no means acute, or more than the Relief Officer will be able to keep in hand. There was some fair amount of rice reaped here last year, and a large market is still supplied from local sources. A feeder road is being carried through the thana from Phulbari, and I organised that the laborers should buy the Government rice. Distress continues to be very severe all along the south of Molung. The Relief Officer reports on the pale and baggard appearance of many old men and women when he lately visited, showing plainly that they had suffered from low diet and insufficient nourishment. He provided for them at his annachatras. In the Mahigunge division also there were found 24 families of palki-bearers who were found starving; they had sold their cows for purchase of food, and had nothing left. The Relief Officer also found a family of five persons who had been living for several days on wild vegetables. Relief was afforded in all these cases. In the other divisions there is no increase of distress; operations have been commenced at Durwani, and four relief roads have been opene d. No deaths from starvation have been reported, and every case of distress is relieved as soon as found out. The number of Assistants is being increased, as need for their re-services arises.

B.—Relief Works.

The number now at work on relief roads are as follow—

Govindgunge	25,120
Pirgunge	7,990
Sadullapore	3,681
Molung	10,716
Sundargunge	1,834
Mahigunge	2,310
Kamargunge	527
Borobari	437
Bhowanigunge	496
Executive Engineer's	1,339
Total ...	54,450

About half the number thus employed are women and children. I have not the exact details for these figures. The number will be much reduced when the measures now in progress for sending the women and children into the villages take full effect. The Molung officer has commenced to do so with great success; several roads he has entirely cleared of all but those on piece-work, and has got the mundles to take them to their villages. He reports as follows:—"It is not time to judge of the results of the new system, but it may be gratifying to you to know that on my way to here this morning I saw some earthwork thrown over a village road near Jelalgunge, and on inquiry learnt that it had been done by the recipients of the village relief at the hands of the village mundle. Similarly I heard at Sharadanga that the village road was being repaired under the supervision of the mundle by the boys and women. A third mundle near Moyepore, whom I chanced to come across on the road, told me that he was utilising the labor I had placed at his disposal." I personally directed the Peergunge officer to carry out the same plan; and similarly in Mahigunge division some of the roads have been cleared of the incubus of the hosts of boys. Half of the whole number of laborers are employed in the Govindgunge division where our worst famine tract is situated. I have instructed Mr. Damant to carry out the same system there as far as practicable, and he will devote every care to the subject.

C.—Transport of Food.

The completion of the district allotment was reported last time. The total receipts amount to Rs. 3,27,226, and the excess is thus disposed off—

Rs. 10,000 for Mymensingh.
„ 10,000 for Dinagepore.
„ 7,226 to replace the quantity burned at Mahigunge.

During the fortnight under report 66,344 maunds have been despatched from Kallygunge, and there remain now 10,000 maunds to be sent off by cart and 7,000 by boat, which will be all disposed off within a week, when the 10,000 maunds for Ghoraghat will be forwarded. The daily despatches have amounted to nearly 5,000 maunds. Mr. Blair has now at work 400 carts and 6,000 pack-bullocks; and in other divisions, including our two head-quarter ghats of Panial and Chillakhal, a total of 700 carts and 3,200 pack-bullocks are employed, making in all 1,100 carts and 9,200 pack-bullocks The Govindgunge allotment has been moved on from Kallygunge completely, that for Peergunge up to within 5,000 maunds, and what is left for Molung is being rapidly pushed on from Panialghat. The principal transport work on hand now is to recoup our stocks as sales progress at Sankamaree, Chillakhal, and Durwani. 20,000 maunds have been despatched to Chillakhal from the Kallygunge reserve in excess of the original allotment, and are daily arriving at the former ghat. For Durwani we draw for the present on the railway stocks which are open to us, and shall fall back in case of necessity on the ample reserve at Chillakhal.

F.—Charitable Relief.

(*Prepared by the Relief Officer.*)

The distribution of charitable relief has been actively proceeded with in the way previously reported.

In Molung a new Government relief centre has been opened at Jallalgunge to meet any further requirements in the eastern part of that circle, and another Government relief centre has been opened in the Gopalpore circle to relieve the non-laboring poor in the neighbourhood of Menanager. From Sundergunge it is reported that the relief centres are not doing much except for professional beggars, but that cotton relief is very much sought after, and, notwithstanding all drawbacks, is found practically to be a useful and beneficial form of relief. From Sadullapore the Circle Officer reports that applicants for charitable relief are now diminishing daily. From Govindgunge it is reported by Mr. Damant that "a considerable addition to the numbers requiring gratuitous relief is expected under the measures about to be taken for drafting women and children from the road-works."

A great deal of the expenditure already incurred by the nominal employment of women and children on roads might, it appears, be properly entered under gratuitous relief in order to show correctly what is really being done in this district in the way of charitable relief.

The village works now organised under the village headmen, like cotton spinning, are really charitable relief with employment, and the numbers thus relieved would form an appropriate heading in the statement of progress of charitable relief.

It is found that the village headmen will not give their services gratuitously for the supervision of village work, or for the distribution of food.

It may here be mentioned that the Superintendent of Stationery has sent the Rungpore cash and grain account Forms to Azimgunge, Moorshedabad, instead of to Rungpore *via* Goalundo and Kallygunge. The Forms are still on their way here, and extreme inconvenience has been experienced in every department of relief work owing to the additional labor imposed by the want of printed forms.

E. G. Glazier,
Offg. Magistrate and Collector.

No. 393—S.R., dated Bogra, the 18th May 1874.

From—C. A. Kelly, Esq., Officiating Magistrate-Collector, Bogra,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I have the honor to submit my fortnightly narrative as follows:—

Narrative of Scarcity and Relief of the Bogra District for the Fortnight ending the 16th May 1874.

A.—State of the Country.

Supplies obtainable in the Bazars.—At Bogra common rice was selling on the 16th instant at 10½ seers of 80 tolas per rupee, at Sultangunge at 10½ seers, and at Dupchanchia 11 seers 10 chittacks. By last account—

At Sultangunge	...	500	At Burigunge	...	2,000
„ Dupchanchia	...	5,000	„ Kichak	...	2,000
„ Ailee	...	1,500	„ Bogra	...	500

has been reported as in the hands of traders and petty dealers up to about the 16th May 1874.

3·48 inches of rain fell this fortnight. The prospects of the aous crop are good, provided that more rain falls soon. Jute and sesamum promise well in certain parts, and boro paddy, with a fair average yield, is being cut in Bogra and Khitlal. On the whole, the rain-fall this year has been most propitious, and this of course has made our prospects brighter, specially as a decidedly larger aous crop has been sown than in other years. As regards the condition of the people, I would repeat what I said in my last narrative, I am hopeful that with proper care they will tide well through this season of pressure. No cases of death from starvation reported. The conditions of special tracts has been previously reported upon. Three grain thefts during the fortnight.

B.—Relief Works.

I annex a list of lines of relief roads and works, with the number of laborers on the 14th May 1874 on each:—

	Men.	Women.	Children.
Khetlal and Sonamooki road	289	..	..

Total ..	7,374	12,224	12,417

Orders have gone out to Khetlal, Panchbibi, and Sherpore to sell rice to laborers on relief works in these thanas through moodies. On other works, viz., the Shariakandi and other roads and on the large Maluncha tank, it has been decided that the people will be paid in grain for six days of the week, and for the seventh day in money, under rules framed by Mr. Barton, the district relief officer. Under this method, subsistence allowances will be given to all persons working on the day-system as follows, viz:—

To men	1 seer (of 80 tolahs each.)
To women	12 chittacks.
Boy or girl above 12 years	8 „
Ditto below 12 years	4 „

All persons working on the piece-system will get the value of their work in grain, calculated at 12 seers per rupee for clean rice and 14 seers per rupee for mixed rice. As regards weeding out the incapables, the reports received state that 657 women will very shortly be taken off the Dupchanchia road, in Bogra circle; that in Khetlal this work had been done; that in Adamdighi 75 infirm persons had been taken off; and that in the course of a week all other similar persons were to be weeded out in that circle. The circle officer of Shibgunge reports that the work has been commenced, but does not state how much progress he has made on this head. I shall direct that every exertion be used to complete this work during the remaining fortnight of the month.

C.—Transport of Food.

The reports received show that about 22,000 maunds of rice have been imported from the Pubna, Dacca, and Mymensingh districts by way of the Daokoba and Bengali rivers. By great exertions about 2,000 carts have been procured, and 100 pack-bullocks and ponies are at work. Money has been sent for the second time to Nattore, and a large remuneration has been offered to engage carts to come from that quarter, I have also again addressed the Collector of Rajshahye (our previous efforts with regard to transport were mentioned before). Above 20,000 maunds were brought into Bogra last week from Shohagipara. Our local resources with respect to carts are and have been very scanty and quite inadequate to the bringing in of our increased allotment as rapidly as could be wished, and, whatever efforts may be used, will and must continue to be so until we are helped from without. This fact will, I trust, be borne in mind, as the difficulty is a real and true one. I have written to Mr. Robinson to ask for carts from Dinagepore. We want as many as can be sent from that district or from any other quarters, and as expeditiously as possible.

D.—Storage of Government Grain at Relief Works.

Under the head of places of storage selected I may mention that Elahigunge, in Adamdighi circle, has been chosen as the site for a place of storage instead of Gavabanda, which proved to be too close to Dupchanchia. Amount of food-grain reported as received into the district, including the Ghoraghat allotment, is 2,66,194 maunds.

E.—Advances to Private Parties and their Results.

Rs. 12,350-0-0 have been given in advances to persons to assist their tenantry during the fortnight, and Rs. 500 to a person for rice importation.

F.—Charitable Relief.

I have already reported on our circle arrangements. Mr. Barton has recently joined as district relief officer.

The circle officer of Khetlal has divided his circle into four sub-circles, three of them under an assistant each, keeping the other himself. He also reports that he has weeded out the old, infirm, &c., from the gangs of laborers on roads, and put them under different heads of relief. He had supplied persons in want of grain-seeds with loans.

The circle officer of Adamdighi has received applications for rice-loans from more than one hundred villages, and has disposed of nearly 776 maunds of rice in small loans. He reports as a most encouraging fact that rice is cheaper here now than it was six weeks ago. It is selling in Dupchanchia at 15½ kutcha seers (60 tolahs). This cheap rate he attributes to the rise of the river Nagor, and consequent improved facility for the progress of boats.

The circle officer of Shibgunge has continued giving loans of rice to cultivators.

The circle officer of Shariakandi reports that a heavy fall of rain on the 6th instant had done much good to kaun, til, aous, and jute crops, that kaun has been abundantly cultivated on the pali land this year. He mentions that Rajah Promath Nath Roy had opened another private annachhotra.

The circle officer of Panchbibi has work started on two tanks, and was going to have another started. He has had a number of applications for loans, but has as yet disposed of little rice.

In addition to Mr. Atkinson's relief works, other works have been available on the Dinagepore road. He will be instructed to use rice freely in charitable relief where necessary.

No. 815, dated Pubna, the 19th May 1874.

Memo. by—W. V. G. Tayler, Esq., Magistrate of Pubna.

Submitted to the Secretary to the Government of Bengal, Agricultural Department, for information.

Pubna Sudder Sub-division Fortnightly Narrative ending the 16th May 1874.

A.—State of the Country.

Nothing unusual to record under this head. Supplies of boro and jalee dhan are coming slowly into the market. The late high winds have, to a certain extent, prevented importation. These winds have not been beneficial to the boro and jalee crops not yet out. In some few places the rapid rise of the rivers has done some damage to these crops. A fair outturn, however, will be realized. More rain is much wanted for the aous. Some cases of individual distress have been reported by sub-committees, and adequate arrangements have been made for relief; on the whole, however, the condition of the people is not such as to create serious anxiety at present.

B.—Relief Works.

The numbers employed on the various roads mentioned in last report are 535. No new roads have been opened.

C.—Transport of Food.

None.

D.—Storage of Government Grain.

None.

E.—Advances to Private Individuals.

No advance has been made up to the present; but this has been proposed, and sanction is anxiously awaited.

F.—Charitable Relief.

None as yet; all arrangements have been made.

G.—Financial Results.

The subscriptions by private subscriptions, Rs. 7,388, have been promised up to date, of which 4,288 have been realized.

Expenditure as detailed below—

Sent to the Sujanuggur relief sub-committee for road works				...	500

Eighth Fortnightly Narrative from 1st to 15th May 1874.

A.—State of the Country.

In my last narrative I was able to report an improvement in the position of the people, owing to the cutting of the cheena crop and the opening of the Phoolgore river.

2. During the present fortnight the cheena has been exhausted, and a series of storms has prevented boats from coming up the Phoolgore. Much suffering has resulted. In Jamtail hât there was no rice last market day, and the people only got a half supply by going to a neighbouring hat. Since then a fair amount has arrived. In every quarter there have been complaints of the insufficiency of grain offered for sale. Even in Serajgunge but little could be obtained wholesale.

3. The price of grain has not, however, risen. It sells, according to the police reports, at 12½ seers at Ryegunge, 12 seers at Pangashi, 12½ at Ullapana, 10½ at Taras. I believe that it is not procurable at these rates; and that the fact is that, there being no transactions, the police have not changed their figures. Rs. 3-9 a maund is asked at Serajgunge for rice selling by wholesale. Dhan has risen considerably. It is to be remembered that in this sub-division there are no stocks of rice, private or public, and that we are entirely at the mercy of the import traders.

4. The rainfall has been 4·58 inches. It has done much good to the aous crop. The kaon cuttings have commenced. On the whole, this is a good crop, and will keep a number of persons until the aous comes in; but it is not grown very extensively, and will not come into the market much, if at all. Moreover, many persons who have trusted to the kaon to

tide over the next two months have lost the whole or part of the crop by hail and the sudden rise of the Jamoona. I never knew the river so high at this season; if its water continues to increase, we must expect great destruction of rice on the churs.

5. The indigent or helpless classes in Raigunge and Ullapara thanas, the distressed tract, have been relieved. Persons in a similar position in the other two thanas are commencing to feel the pressure of want severely. The ryots and weavers in many places are also in great distress; in several villages they are known to be living on most insufficient food. They have not, however, as yet been sufficiently pressed to come on the roads for work: this they could only do at greater ultimate loss to themselves.

6. I may notice that some ryots of the Tagore zemindaree, when applying to the manager of that estate for relief, stated that four deaths from starvation had occurred in their village. On investigation it proved that the deaths were due to natural causes, and were so reported at the thana at the time. One was an infant of 20 days' old, whose mother had not recovered the effects of child-birth; another, aged 5, died of cholera; its father has dhan, and altogether repudiates the story of starvation; a third, an old woman of 70, was in tolerable circumstances, and died of dysentery; the last died of malarious fever from which she had been long suffering; she was the wife of one Mamdi Fakeer, who appears to be very poor, so that in this case there might be room for alleging that want was an auxiliary cause of death, though I don't believe that it was.

B.—Relief Works.

The number employed on the roads is still very small. On the Chunderkona road, the only work of any importance, there are 179 laborers, and on the minor village paths 128. Ryots are commencing to come in to the Jute Company to ask for sewing works. The laborers on the Chunderkona road generally work by the task, Rs. 2-4 per 1,000 cubic feet, and only eleven are employed on a daily rate of 2 annas as feeble. On the village tracks we allow 2½ annas a day, as the work cannot be measured. No difficulty is found in feeding such small bodies.

C.—Transport of Food.

During the last week perhaps 100 maunds a day has been imported up the Phooljore. Before that about 1,000 maunds a day had been the estimate. I am sending the rice required for consumption at our relief stations by cart; but I have ordered 2,000 maunds to be sent by boat. I had been disappointed in the execution of a previous order for 1,000 maunds, and have consequently been run rather close, but the tickets presented have always been met. I think that in future I will have to keep a stock of 1,000 maunds at Ullapara and Raigunge, and I mean to send at least 1,000 maunds to Taras. The latter is not at present a relief station, but there are many ticket-holders there, and during the rains it will be difficult either to send them, or for them to come and take it. I will therefore probably open a relief station there about the 1st July, before which time I must have a stock.

D.—Storage of Government Grain at Relief Works.

We have no Government grain.

E.—Advances to Private Parties and their Results.

We have made considerable advances to zemindars. Up to date Rs. 30,503 has been disbursed on this account, Rs. 5,107 sanctioned by the Collectors but not yet paid, and Rs. 43,399 recommended for sanction by me. These have all been for the purpose of assisting ryots with loans. There can be no doubt that the ryots do in fact get the money so advanced, or at least the greater part of it. Every day large bodies of ryots come to me and ask me to request the landlords to inquire into their condition with a view to taking Government money. I almost always do so. If the zemindar approves, the ryots come with him to cutchari, and are far more eager than he is to meet any objection I may make to the title deeds produced on the case for distress made out. When I refuse a loan they show their dissatisfaction rather more plainly than is permitted except in times of famine. If I recommend the loan they continue to come almost daily until your sanction arrives. Once this has been obtained, they fetch the zemindar to take away the money, and are heard of no more. All this shows plainly that they very much want the loans, and really get them from the zemindars.

As to the recovery of money advanced, the greater portion of it is safe, but I would not be surprised if we made some bad debts. A few of those who can make out a good title before me are involved in litigation, in which they may lose their property. The benami system also assists men to get money on land, which cannot in the end be made answerable for their debts.

F.—Charitable Relief.

The number of tickets issued up to date for the relief of persons unable to work on the roads and without any means of subsistence is 4,288. Each ticket commands a bi-monthly supply of 13 seers rice and 3 seers dál. There are two circle superintendents and 6 assistant superintendents empowered to issue such tickets. The inspection of villages in Raigunge has been completed, but I fear that new cases of destitution will continue to occur and to swell our lists. In Ullapara all the villages have not been inspected. I think it certain that if the system of charitable relief were considerably contracted deaths from starvation would become numerous.

G.—Financial Results.

	Rs.	A.	P.
Disbursements to officers in charge of Chandarkona road ...	871	3	0

Total ...	15,295	1	0

P. Nolan,
Assistant Magistrate.

Remarks.—This narrative is again late; the Joint-Magistrate's attention has been again called to the subject, and he has been directed to send them in more punctually in future. It is hoped that these high winds cannot continue much longer, and that supplies will shortly be as plentiful as before. Forwarded to Commissioner.

W. V. G. Tayler.

The 19th May 1874.

* The amount sent was more than that bought.

No. 341Ct., dated Camp Bogra, the 25th May 1874.

From—W. Lee. Robinson, Esq., Relief Commissioner of Rajshahye,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I have the honor to submit my narrative for the fortnight ending 23rd May.

A.—State of the Country.

I have during the fortnight visited all the worst part of the Govindgunge circle in Rungpore, and I have visited the Seebgunge, Panchbibi, Khetlall, and Adumdigee circles in Bogra, besides riding through a very large extent of country in different directions. The result of all I have seen and heard is, that in the places where the soil is all khiar or stiff clay, there has been, is, and will be for some time to come considerable distress; in the worst parts very great distress, but that the relief operations are affording, and can afford, adequate relief everywhere. On the polee soil there is of course much less distress. The different varieties of crop which are grown on that soil are of course of the greatest help to the people, even where there has been little or no rice crop. In all such tracts of country the measure of distress to be met in future depends entirely, I think, on the goodness of the present aous crop, and this is a matter which will be definitely settled, I imagine, during the next fortnight. At present the crop looks very promising to the eye, especially on very low land; but I have heard very many cultivators complain of want of rain, and undoubtedly some of the earliest aous crop has already suffered from want of rain; but if there are one or two good showers in the course of the next fortnight, it may confidently be anticipated that the aous rice crop in the polee country will be above the average, as a very much larger extent than usual has been cultivated for aous this year. In the khiar lands the aous crop is certainly in danger in places where rain has not fallen, but the crop is a later one on these lands, and there is time yet for it to revive, if rain falls plentifully in the next fortnight.

3. The weather during the fortnight has been on the whole tolerably favorable, with the exception that more rain would have been beneficial. The heat has occasionally been very great; but the health of the people generally keeps good, and the relief officers have, I am glad to say, hitherto stood the exposure and knocking about very well.

4. Prices continue to vary in different places, even only a few miles distance apart, and, except in isolated cases, there is generally a sufficient supply in the local markets at the price, though that is often a very high one. The sale of grain to laborers has always had the effect of bringing down prices, and now that the Bogra golas are nearly all stocked sufficiently, payments in grain will become still larger and over a much greater extent of country, and I fully anticipate a further decline in the price of rice in the market.

5. In Rungpore I hear from the Magistrate that prices have risen again, especially in the north part of the district; but I am rather inclined to attribute this myself to a temporary

panic in Cooch Behar, and a desire (not unnatural) among owners of grain to force up prices now before the prospects of a good aous crop are assured, as that is safe to bring a reduction of prices.

6. I have during my tour made many inquiries about seed-grain for the winter crop, and I think that it will be everywhere forthcoming, though in some of the very bad bits, such as Kamdeya (already specially reported on), it will be necessary to make advances to ryots to enable them to buy at some little distance from their own homes. This the cultivators all agree in saying they will be able to do if they get the money, and I confess that for my own part I do not apprehend any great difficulty in the matter of seed-grain.

7. I have not, I regret to say, received any late news either from Maldah or Dinagepore; but I feel quite sure that Mr. Lowis and Mr. Wyer would have let me know had anything very bad occurred. The dawk through Rungpore is not the most regular in the world, and doubtless the Maldah and Dinagepore reports are on their way, though they have not yet reached me.

B.—Relief Works.

8. Mr. Damant has been very successful in his road-making and tank-cleaning operations around Kamdeya, and he has besides maintained a very large number of people from Bogra, who ought to have been provided for in their own district. In the Bogra district the management of relief-works has hitherto certainly not been a success. The district officer has left it all in the hands of the Executive Engineer, who is a stranger to the country and not acquainted with the language: the consequence is that the supervision has been neither sufficient nor effectual, payments have not been made promptly, and there has undoubtedly been a good deal of confusion and waste. This has now been altered by making each circle officer responsible for the supervision of the works and payment of the laborers in his own circle directly under the management of the district officer, a plan which has worked very well elsewhere, and I have no doubt will be equally efficacious here; the women and children too young to do any real work are all being drafted off to their villages, payments in grain are being extended, and matters will, I hope, henceforth be much better managed.

C.—Transport of Grain.

9 This may be said to have nearly come to an end in Dinagepore, and, I hope, in Maldah. In Rungpore also Mr. Blair has finished all despatches by land from Kallygunge (including 15,682 maunds sent to Ghoraghat, Dinagepore), and he has only 8,000 maunds remaining to send in boats up the Teesta. This officer has done his work very well indeed, and deserves credit for it.

10. In Bogra transport, like other matters, has, until lately, been badly managed, but things have gone on much better since efforts have really been made vigorously; and things are going on so satisfactorily now that only about 10,000 maunds of land carriage has to be done from Chandunbaseea, i.e., bank of Brahmapootra, and 20,000 by land carriage from Nowgong.

11. Captain Conolly is out-looking after the latter work, and I have arranged for the supply of carts for him from the adjacent parts of Dinagepore and Bogra. 484 had already gone to him on 22nd, and he himself writes from Nowgong that he can get plenty of carts there. One great difficulty to Bogra was that a very large amount of grain was put down all in a lump instead of gradually; but at the same time it must be admitted that the Bogra transport arrangements were far from perfect, which I much regret, as I am sure that with a little care, attention, and forethought, there need have been no difficulty at all.

E.—Advances.

11. Rungpore is the district which has distinguished itself by the amount of advances made to zemindars, to which I partly attribute the high price of rice; for as long as Bengalees can get money advanced they won't stint their bodies, no matter what the mahajuns may force the price of rice up to. Mr. Barton, on arriving in Bogra, found that considerable laxity prevailed in the work (just begun) of making advances in grain to ryots, which was being done in much too indiscriminate a manner, and would, if allowed to continue, have led to great evils. Mr. Barton at once very properly put a stop to this system, and the work is now being carefully done.

F.—Charitable Relief.

13. This is being carried out satisfactorily everywhere, and in no place have I come across people in need of relief who were not receiving it. The group system is being introduced into the Kamdeya portion of Gobindgunge circle and into Molong and Pirgunge in Rungpore; while in Bogra it is being introduced into part of Panchbibi, Khetlall, Bogra, and part of Adumdigee circle, and it will, I think, certainly prove successful.

G.—Financial Results.

14. These are given by the district officers.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 22nd May 1874.

READ—

The narratives of the districts of the Burdwan Division for the fortnight ending 18th May 1874.

Hooghly.—There is little change in the state of this district. Supplies continue abundant, but prices have slightly risen in the north of the district. Rain is said to be much wanted, and the crops sown, which, however, cover a very small area, are reported to show signs of suffering from drought. The condition of the people remains good. The numbers on relief works, both public and private, were 5,887 against 5,310 in the previous fortnight. There is also a small increase in the numbers receiving charitable relief. The returns for this fortnight show 2,383 person against 1,925, the numbers in previous return.

Bankoora.—There has been heavy rain in the south and east of the district which has done much good, but none has fallen in other parts, where it is urgently wanted. The Collector must continue to keep a careful watch upon the struggle reported to be going on between the mahajuns and the ryots, and when it is really necessary he should give advances freely. The reduction in the number of laborers on relief works, from 3,452 to 2,947, seems to be more apparent than real, as most of those who have left the public are reported to be employed on private works, for which tuccavee advances have been taken. As in all probability the greater number of those works are likely to prove permanently useful to the village communities, it is satisfactory that the numbers employed on them are increasing and their progress towards completion hastened. The Collector should take measures for ascertaining, with some approach to exactness, the numbers actually employed on those works, and the date of the probable completion of each of them. The increase in the numbers receiving charitable relief, from 6,279 to 8,073, is considerable; but it is satisfactory to know that these numbers include many who are doing work for their support. It is to be hoped that the endeavours of the Collector to trace the husbands of the women said to be deserted will be successful.

Beerbhoom.—The continued drought of the last fortnight is said to have altered the condition of this district for the worse, but prices remain fairly stationary. The increase in the number of laborers on relief works, from 4,638 to 7,717, and of those getting charitable relief, from 3,600 to 5,475, shows the progress of distress; but it is satisfactory to know that the agency employed has proved sufficient to cope with the increasing demand upon the energies of the relieving officers.

Burdwan.—In this district there has been a good fall of rain in the Cutwa and Jehanabad sub-divisions, but it is much wanted in other parts of the district. The condition of the people is but little changed, and the numbers on relief works, 8,985 against 8,664, and of those getting charitable relief, 14,169 against 13,765, shows no noteworthy increase in distress. Out of 10,162 persons receiving charitable relief at Government depôts, 8,347 were women and children. The remaining recipients of relief were relieved at the depôts maintained by the Maharajah of Burdwan, for which details of the relative numbers of men, women, and children are not given. The special report promised on the condition of Raneegunge is awaited.

Howrah.—There would be nothing to notice in this report if it were not for the remarks made by the Collector approving the action of the Amba Deputy Magistrate in refraining from interfering with the police when they stopped the exportation of 9,000 bags of dhan from that station. The Lieutenant-Governor is surprised that an officer of Mr. Worgan's experience should have so totally failed to comprehend how pernicious the action of the police was, besides being directly contrary to the distinct orders of Government. The proceedings of the Commissioner in suspending the police officer are fully approved of, and a further report is awaited.

Midnapore.—The state of the people seems to be good, though more rain is wanted. The report of the result of the Collector's inquiries about the state of Gurbettah is awaited.

No. 3270—S.R.

COPY forwarded to the Commissioner of the Burdwan Division for information.

No. 64—S.R., dated the 19th May, 1874.

From—C. T. BUCKLAND, Esq., Commissioner of the Burdwan Division,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit in original the fortnightly narratives from the District Officers for the fortnight ending 18th instant.

2. *Hooghly.*—The report for Hooghly continues to be generally satisfactory. There has been a rise of half a seer in the rupee in the price of rice in the north of the district. Rain is much wanted, and the heat is intense during the day, but the nights are cool.

3. The Collector states that he has made a special report regarding two villages said to be in distress, in thana Balagurh, which he visited, but his report has not yet reached me. If there is anything of importance in it, it will be specially brought to the notice of Government.

4. The comparative return given by the Collector shows that the daily number of persons employed on all classes of relief works during the present fortnight was 5,887, against 5,310 in the previous fortnight.

5. The returns of charitable relief again show an increase on the daily numbers of the previous fortnight.

	Men.	Women.	Children.	Total.
Previous fortnight ...	356	1,092	477	1,925
Current fortnight ...	452	1,290	641	2,383

6. *Bankoora.*—There is no very remarkable change in this district. The price of rice is almost the same as in the previous fortnight. There was heavy rain on the 13th instant in the south and east of the district; but rain is much wanted in the rest of the district, where the heat has been intense.

7. During the current fortnight concessions F. and G. have been extended to this district, but there has not yet been time to give effect to them. In Pergunnah Moheshara the zemindar of Pachete appears to be the chief proprietor, and his alleged poverty, to which the Collector refers, will probably be put forward as a reason for nothing being done by the zemindar. It is to be inferred from the Collector's remarks that the mahajuns can procure and provide seed-grain, and at present there seems to be a sort of struggle between the cupidity of the mahajuns and the impatience of the people, as influenced by the weather to obtain seed-grain.

8. The total daily number of laborers on the road relief works was 2,947, against 3,452 of the previous fortnight. The Collector attributes this reduction of numbers to the continued drought; but it seems to me a very good thing if a number of the laborers have been *shifted* to tanks which are being excavated by private parties, as the sum of Rs. 45,104, which has been taken in advances under Act XXVI of 1871, will require the application of a considerable amount of local labor to complete the works before the end of July.

9. The daily number of the recipients of charitable relief has risen to 8,073 from 6,729 in the previous fortnight. It is to be noticed that the District Committee have held that spinning jute or hemp is a form of work which cannot be objected to by even the highest castes. With regard to the women receiving charitable relief, whose husbands are said to have gone to the tea districts, leaving them with young children, and no means of support, I have demi-officially requested the Collector to endeavour to identify the husbands, and to find out to what tea districts they have gone. It is probable that the husbands will be glad to get their wives and children to join them, when they find that there are no substitutes to be found for their wives in the tea districts; and the owners of the tea plantations will doubtless be glad to receive the women and children in such cases.

10. *Beerbhoom.*—In this district the Collector has forcibly described the state of the country as sensibly altered for the worse by a fortnight's continued drought. The intense heat, owing to the absence of rain, is said to have been almost unendurable. It is creditable to the Collector that, under the circumstances, the relief agency is successfully coping with the growing distress. I have recently submitted to Government an application from the Collector for the extension of concession G. to this district.

11. The average daily number of persons employed on relief works was 7,717, against 4,638 in the previous fortnight; the number had risen to 9,759 on the last day of the fortnight under report. This increase was chiefly on the road No. 18, from Poorundurpore to the River Adjai, and the road No. 22, from Duberajpore to Elambazar.

12. The Appendix Statement 2 shows that the daily number of recipients of charitable relief has again risen from 3,600 in the previous fortnight to 5,475 in the current fortnight, which includes 1,079 weavers and cotton-spinners receiving advances. The Collector notices that the gang of cotton-spinners at the sudder station had been cleared of 65 *wily females, whose theatrical rags and ready tears had proved too much for the Sub-Committees.* There is much truth in the Collector's remark that it is very difficult to confine charity to its proper objects: "Officers specially deputed to enquire, often showing a tendency to tout for claimants, who present themselves only too readily." I must add that the native officers, specially employed and paid by Government as Relief Officers, cannot be thoroughly trusted in this respect, as they naturally seek to add to the importance and gravity of the dutywhich provides them with their temporary appointment or promotion, and it can hardly be expected that every man will be so heroic as to lop off the branch on which he is perched for this occasion.

13. *Burdwan.*—The report from this district shows that there has been nearly three inches of rain in the Cutwa sub-division, ·64 of an inch in Raneegunge, ·36 of an inch in Culna, and 1·90 in Jehanabad. The Bood-bood report is silent on this point, and in the sudder sub-division the rain is said to have been insufficient. During the greater part of the fortnight I was at Burdwan, and though there were several threatenings of rain, only a few drops fell at the sudder station.

14. There appears to be no very material change in the condition of the district during the fortnight. It will be observed that civil litigation goes on as usual, according to the Moonsif of Cutwa. The people in the Ketugram thana are said to be distressed, but they will not work on the roads, nor will they go to the Relief Food Depôt, where a light labor test is exacted. The Collector refers to what he calls a *gobe monche* story about a Sonamookhee weaver living on the earth of ant-hills for some days. The Collector showed me at his office a letter from the Deputy Magistrate of Bood-bood containing a statement to this effect, and as I understood that it was an official letter, I asked for a report. If the story is true, I shall report specially to Government about it. With regard to Raneegunge, a separate report is being prepared, but I concur generally with the Collector's remarks as recorded in the present narrative.

15. The average daily number of persons employed on relief works during the fortnight as shown in Statement No. 1 is 8,985, against 8,664 in the previous fortnight. The small increase requires no special explanation.

16. The total daily number of recipients of charitable relief as shown in statement No. 3 is 14,169, against 13,725 in the previous fortnight. The number of weavers and others receiving advances had increased from 315 to 713 during the fortnight. The increase was chiefly in Jehanabad and Bood-bood. It will be seen that out of the total number receiving charitable relief there are 1,715 males, 4,001 females, 4,346 children, according to the returns given by the Charitable Relief Officers and Sub-Committees. No details are given of the sex and age of the recipients of food relief at the fever food-depôts, or at the institutions maintained by His Highness the Maharajah of Burdwan.

17. Under the heading "Advances to Private Persons" the Collector refers to two statements which have not accompanied his report. They have been called for, and will be forwarded when received.

18. The narratives from Howrah and Midnapore have not arrived yet. They will be forwarded when received.

No. 91, dated Hooghly, the 18th May 1874.

From—F. H. Pellew, Esq., Offg. Collector of Hooghly,

To—The Commissioner of the Burdwan Division.

I have the honor to submit the narrative for the fortnight ending 16th May.

A.—State of the Country.

2. There is no scarcity of grain in the bazar.

Kind and price of Grain selling at certain specified marts.

3. From this it is clear that a rise of half a seer in the price of common rice has occurred in the northern portion of the district. From the police reports also I observe that the price of common rice has risen to 12 seers in thana Huripal.

4. *Information in regard to kind and price of rice in the hands of zemindars and traders.*—Same as in previous report.

5. *Rainfall, if any.*—None at Sudder Station. On the 11th there was a slight shower which extended through Krishtonagore, Chunditollah, Huripal and Dhanyakhali thanas, *i.e.*, all over the western portion of the district. ·8 of an inch fell at Chunditollah, and ·24 at Dhunyakhali further to the west.

6. *State of the Crops.*—In places in Hooghly, Bansberya, Pandooah, Balagurh, Huripal and Chunditollah thanas, sowings of *aous* rice were made after the shower of the 30th April, but there is much chance of the rice withering. Most of the cultivators did not sow. The *teel*, which has survived till now, is doing well. There are not above 100 beegahs of this crop. An equal amount of jala rice is being reaped in Guptiparachur, in the north of the district. A fair mango crop is ripening; pumpkins, &c., are ready; sugarcane wants rain. The above crops cover a very small area. The greater portion of the country is at present fallow.

7. *Condition of the People.*—The sub-divisional officer reports no severe distress in Serampore Sub-division. A few in each village, however, require and receive relief. In all thanas of the district the poorer able-bodied cultivators and laborers are supporting themselves by labor on private works or Government relief works; and the old, infirm, and those who from social position cannot do this, receive assistance from relief sub-committees. In two villages in thana Balagurh a portion of the smaller cultivators were stated to have consumed their seed-grain before resorting to labour. I went to the spot on the 12th, and have reported specially on what I think should be done. The people are somewhat apprehensive of a rise in the price of grain. In Mandara, in thana Dhunykhali, there is much distress amongst fever-stricken people, but it is relieved by the sub-committee there.

8. *Grain-thefts and robberies.*—Two are reported, one in Serampore of 13 annas worth. No clue obtained. The other in Hooghly; a burglar cut a hole in the wall and stole rice, ghee, &c. No clue obtained.

9. *Condition of special Tracts.*—No tracts can be as yet called specially distressed.

10. B.—Relief Works.

Name of road.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	Remarks.
Sudder Sub-division.

Total ...	617					

11. The Collector of Howrah will give the Howrah works separately.

12. In the municipalities the following laborers are daily employed on tanks:—

	Male.	Female.	Total.
Hooghly and Chinsurah	510	212	722
Serampore	Not given.		206
Boidyabatty (town)	....		75
Kotrung „	....		141
Balagurh (union)	....		250
Pandooah „	....		44
Mugrah „	....		47
Total			1,485

13. Under the Irrigation Department Executive Engineer, Northern Drainage and Embankment Division, the following works are in progress:—

Thana.	Name of work.	No. of coolies.	Condition.
Boidyabatty	Kananuddee and Surussutty Canal.	347	Good.
Dhunyakhali, Huripal, and Krishtonagor.	Embankment repairs ..	about 42	„
	Total ..	389	

14. Returns of work on 21 tanks being dug or improved from tuccavee advances have been received. These show a daily average number of 1,532 laborers employed, of whom 507 are local. Besides this, 168 are employed on the excavation of the Ghea nuddee by two zemindars from private means as a relief work.

15. Under the instructions contained in your No. 62—S.R. of the 8th May 1874, I give the following table:—

		Last report.	Present report.
Roads, &c., under chairman of road cess	Sudder sub-division ...	1,020	864
	Serampore sub-division ...	713	617
	Total ...	1,733	1,481
Municipalities, towns, and unions	Hooghly and Chinsurah ...	788	722

Mugrah	0	7,281	0	7,281
Pandooah	0	0	0	0
Total ...	361	7,281	0	7,642
Grand Total ...	361	8,688	0	9,892

17. Of down inward traffic, 327 maunds of other food-grains was set down at Chundernagore from beyond 150 miles, and 126 maunds of other food-grains set down at Pandooah from within 150 miles. There was no up inward or down outward traffic.

D.—Storage of Grain at Government Relief Works.

18. Only petty stores at serais.

E.—Advances to Private Parties.

19. Advances for grain as already reported, Rs. 18,000.

	Rs.
Advances to municipalities	Nil.
Advances under tuccavee Act up to date of last narrative ...	32,036
During the fortnight, Kedar Nath Soor	500
Din Mahomed Mullick	100
Mirza Wahid Ali	400
Ditto	350
Ditto	200
Jagabandhu Roy	1,200
Ditto	300
Prasanna Chunder Mookerjee	200
Total ...	35,286

F.—Charitable Relief.

20. Number of Committees as yet appointed—

District committee	1
Sub-divisional committee	1
Sub-committees	150
Total ...	152

Number of work-houses or centres for distribution of food and charitable relief, seven.*

Number of persons relieved—

Men	452
Women	1,290
Children	641
Total ...	2,383

These figures include the numbers getting relief by light labor—a number which is daily increasing, and for which I hope to submit separate figures in the next report.

G.—Financial Results.

21. The disbursements to Executive Engineer and others during the fortnight were as follows:—

To Executive Engineer	Nil.
To zemindars, road cess committee, &c., for roads ...	2,553
For tuccavee advances	3,250
Total	5,803

22. The local subscriptions to the relief committee realised up to the date of the last

	Rs.	A.	P.
Narrative	6,149	15	0
During the fortnight	346	0	0
Total ...	6,495	15	0

23. No Government contribution was received during the fortnight.

24. The following sums have been received from the central committee:—

	Rs.	A.	P.
Previous to the fortnight	2,000	0	0
During the fortnight	4,000	0	0
Total ...	6,000	0	0

25. The disbursements are as follow:—

Up to date of last narrative	5,243	3	3
In the fortnight	2,374	2	9
Total ...	7,617	6	0

* These are small serais for relief of travellers.

No. 253, dated Bankoora, the 18th May 1874.

From—W. R. Larminie, Esq., Offg. Collector of Bankoora,

To—The Commissioner of the Burdwan Division.

I have the honor to submit my report for the fortnight ending the 18th May.

State of the Country.

2. The grain-market has altered little since my last report. The rates now prevailing are given below. The supply is generally sufficient, but is uncertain in some parts of Moheshra, which is dependent to a great extent on importation. The grain thrown into that part of the district at my request by Baboo Roghoo Nath Ghose, although not very large in quantity, has kept prices down.

Prices in different places.

	Rice, common.	Rice, best.	Grain.	Wheat.	Barley.
	S. Ch.	S. Ch.	S. Ch.	S. Ch.	S.
Bankoora	... 13 0 coarse 14. 0	11 4	14 8	13 4	21
Bishenpore	... 14 0	11 0	13 0	14 8	24
Chatna	... 14 8	14 0	13 0	15 0	20
Onda	... 13 8	11 0	15 0	13 0	22
Gungajulghaty	... 12 8	12 0	14 0	13 0	18
Burjorah	... 14 8	13 8	14 0	15 4	...

3. There was heavy rain on the 13th instant in the south and east of the district. Sowings of aous have commenced, and sugarcane is being planted. Rain is urgently needed in thanas Chatna and Bankoora and in pergunnah Moheshra. The heat has been intense, reaching 107 Fahrenheit in the shade.

4. While then prospects are brighter on one side of the district, they are at least not changed for the better in the other.

5. Mahajuns are beginning to make advances where rain has fallen, but they demand very high rates of interest. In consequence of the prices now prevailing, they prefer to enter into agreements by which the ryots are bound to repay in cash, at the rates now current, the paddy advanced for the coming season. In some instances ryots have offered to pay 50 per cent. interest in kind and were refused.

6. Hundreds have come to me and my subordinates clamouring for advances, but I have hitherto steadily refused to hold out hopes of any such being granted, where I know that grain can be had, and that the only question is one of rates, which must settle itself. In Moheshra local enquiries are now being made, and advances will be chiefly reserved for that pergunnah. The alleged poverty of the zemindar, the Raja of Pachete, and the great number of intermediate tenures in Moheshra, render the granting of advances on proper security a matter of considerable difficulty,—the more so as mahajuns are there few and far between. Still, if rain comes in due course, I have little doubt that our advances can be so made as to meet all really necessary demands, and that with but slight risk of not being repaid.

7. After considerable discussion it was decided by the district committee that spinning jute or hemp was a form of work which could not be objected to by even the highest castes, and was in other respects suited for those whose prejudices prevented their working on the roads.

8. During the last fortnight 105 emigrants to the tea districts, with 70 dependents, have been registered here.

9. There have been no serious grain-thefts or robberies reported.

10. In thana Ondah one man was reported to have died of starvation. Immediate enquiry was made, and it was found that the man was a resident of Manbhoom, and was on his way to visit some friends, when he died from fever, to which he had been subject for some months. There was no want of food in the case.

11. In Kanchanpur, a village in thana Gungajulghaty, the special relief officer found two families in a state of destitution. They had been away from the district for some time, and had returned a few days before. They were relieved at once, and put under the charge of the nearest sub-committee. It is satisfactory to find that our arrangements are sufficient to bring even isolated cases of distress to light.

Relief Works.

12. The continued draught has interfered much with the road-making, and in consequence thereof, we have been obliged to open another road from Mejia to Meliarah. There has been a decrease in the number employed on the Public Works, due in part to the cause mentioned above, but we were able to shift many of the laborers, who would have otherwise been thrown out of employ for some days, to tanks which were being excavated by private parties. Another cause of the diminution in numbers is that the Bankoora municipal works having been nearly finished, a large number, chiefly women, are being

shifted to the Judpur and Taldangra roads. Where rain has fallen cultivation has absorbed some labor, as also the increased activity observable in digging and re-excavating tanks.

13. Besides the number shown in the accompanying table, about 140 cartmen are employed in the collection of metal.

TRANSPORT OF GRAIN.

14. Exportation and importation continue much as before.

ADVANCES TO PRIVATE PARTIES.

15. There have been no fresh applications for tuccavee advances since last report, the season being too far advanced. Rs. 45,104 have actually been paid from the treasury. No advances for the purchase of seed have yet been made, but enquiries are in progress.

CHARITABLE RELIEF.

16. The accompanying table shows an apparent increase of about 1,000 in the number receiving charitable relief, but from the palpably inaccurate returns received from several of the sub-committees, I am inclined to believe that the number shown includes those who are doing some work for their support. I find the greatest difficulty in inducing sub-committees to distinguish in their returns the different natures of relief given. A large number of relief centres have been visited by the District Superintendent of Police, the District Engineer, and myself, during the last fortnight, and we have insisted upon labor of some sort wherever possible. We found a number of women receiving relief, whose husbands had gone to the tea districts, leaving them with young children and no means of support. I have called for a regular return of such cases, which will probably enable us to identify some of the husbands in their present homes, and thus facilitate the emigration of their families. The proportion of cases in which relief has being given gratuitously to persons able to do some work was very small, and, as a rule, the sub-committees were discriminating fairly. The large number of lepers, lame, and blind is very striking.

17. The demand for advances from weavers is increasing, but the returns showing the number made have not yet been received. At head-quarters advances have been made to 30 families.

Statement of Charitable Relief.

(1.) One central committee.
(2.) Eighteen sub-committees.
(3.) Fifteen regular relief circles opened and officered.
(4.) None.
(5.) Twenty-one.
(6.) Statement showing average daily number relieved during the last fortnight:—

		Average.
Pergh, Moheshra...	Mejia	1,016
	Saltora	865
	Kustholia	396

No. 148, dated Soory, the 18th May 1874.

From—R. D. Hime, Esq., Officiating Collector of Beerbhoom,

To—The Commissioner of Revenue, Burdwan Division.

I have the honor to submit my district narrative for the fortnight ending 16th instant.

A.—State of the Country.

The position has been sensibly altered for the worse by a fortnight's continued drought; pauperism and crime have increased; two grain-robberies have occurred; the standing crops of til, indigo, and mulberry, are much injured; and all agricultural operations, except top-dressing with the deposit of the dry tanks, are suspended. The cultivators are being reluctantly forced on the relief works by distress. Cholera and small-pox are ravaging the district. Rice is not procurable in many villages at the ordinary market-rates (*vide* Appendix 1), though still to be had without difficulty in the principal marts, and the water-supplies are running very low. Still, no death from starvation has been brought to light, and the relief agency is successfully coping with the growing distress.

B.—Relief Works.

No new relief works have been commenced during the fortnight, but the completion of the earth-work on the Poorunderpore, Adjai (No. 18), and Mullarpore to Moulessur (No. 19) roads this week renders the immediate opening of others absolutely necessary. I have, in consultation with the Executive Engineer, Mr. Simpson, determined on the metalling of the Bulpore, Surool, and Benchuttra roads, and the construction of a road from Mullarpore railway station to Moheshgram on the Cynthia-Andoe road, which will prove a useful feeder, and meet the proposed road from Doomka to Mullarpore, connecting it with the high road to Moorshedabad. The estimates of these works are separately submitted; meanwhile their immediate commencement has been ordered. The surveys and estimates of several other roads are either ready or under preparation, and I fear many of them will have to be opened before harvest-season, the district being normally poor, and the laboring population, including under this term the small cultivators who till their own fields, large. The number of laborers on district works of all kinds is given in Form C.

C.—Transport of Grain.

Exportation of rice continues,—that of the fortnight ending 9th instant was maunds 8,062½, against maunds 6,554 of the preceding fortnight.

D.—Storage of Grain.

None, the store adverted to in previous reports having been used up.

E.—Advances to Private Parties.

Are shown in Appendix, Table II.

F.—Charitable Relief.

Vide Appendix Statement II. Since last report a relief-house has been opened at Muhamedbazar, in addition to those already existing, which continue on the system previously reported. The Soory gang of cotton-spinners having grown to somewhat bloated dimensions (445), I thought the time to weed it out had arrived; a strict inquiry was accordingly made by my direction, which resulted in the elimination of sixty-five wily females, whose theatrical rags and ready tears had proved too much for our sub-committee; the gang now stands at 380, but will probably increase. To confine charity to its proper objects is a very difficult task,—officers specially deputed to enquire often showing a tendency to tout for claimants, who present themselves only too readily. I have offered to relieve the braziers alluded to in my last report by advancing cotton to their women, but have not yet received their reply. The expenditure up to date is Rs. 12,848.

G.—Financial Results.

Up to date, Rs. 50,965 have been drawn from the treasury on certificates granted under Act XXVI of 1871; Rs. 38,431 have been placed to credit of the Executive Engineer for relief works; Rs. 1,500 have been advanced to Messrs. Farquharson and Company, of Ilambazar; Rs. 2,000 to Mr. Jones, of Gonotia; Rs. 750 to Baboo Kishuri Mohun Roy, of Nagurce, and Rs. 75 to the munduls of Kuliara for the construction of roads chargeable to relief; Rs. 940-6 have been expended on the excavation of the Rajah's tank; and Rs. 4,615-8 placed to credit of the charitable relief fund on account of the Government subscription.

Prices-Current of Food-grains and Salt in the District of Beerbhoom for the week ending Saturday, the 16th May 1874.

APPENDIX TABLE II.

Statement showing the Number of Applications under the Land Improvement Act, XXVI of 1871, *up to* 16*th May* 1874.

		Amount. Rs.
Number of applications registered	682	2,82,523
Ditto ditto disposed of	512	2,14,887
Ditto ditto granted	189	64,115
Ditto ditto refused	323	1,41,672
Ditto ditto pending	170	76,736
Ditto of certificates drawn	135	50,965

APPENDIX, STATEMENT II.

Statement showing the progress of Charitable Relief in the District of Beerbhoom, for the fortnight ending 16*th May* 1874.

Number of committees and sub-committees as yet appointed ...	7
Number of special relief sub-divisions opened and officered ...	15
Number of regular relief circles opened and manned by special officers	11
Number of relief circles opened and manned by planters, zemindars, and other residents	7
Numbered of work-houses on centres for the distribution of food and gratuitous relief	16
Number of women and children (with total) in receipt of gratuitous relief in any shape, through the charitable relief organisation, daily	5,475

REMARKS.—Of the total number receiving relief, 328 are weavers and 751 cotton-spinners (women).

R. D. HIME,
Officiating Collector.

No. 333—F.R., dated Burdwan, the 18th May 1874.

From—E. H. WHINFIELD, Esq, Officiating Collector of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending to-day.

STATE OF THE COUNTRY.

The Cutwa sub-divisional officer says that the supply and price of rice continue about the same; that no less than 2·93 inches of rain have been registered, and that this rain fell in all parts of the sub-division; that teel is doing well, and sugarcane is being planted; that distress is on the increase; that Ketogram is the worst part. During the fortnight a very wild report was received from one of the new circle officers as to the amount of distress in Ketagram, but on the relief officer going to the spot he found it much exaggerated. He started necessary relief arrangements in the north-east of the thana. The moonsiff of Cutwa, who was here last week, stated that the amount of distress in Cutwa is not so great as has been reported; that decrees for rent are paid in all parts of the sub-division without the least delay or apparent difficulty, and that the people are as ready to go to law as ever. I may add that the people of the villages in the east of Ketogram said to be the most distressed are reported to refuse to work on the roads, and to have refused to attend the Cutwa food depôt on account of the light labor test there.

The Bood-bood sub-divisional officer says that the supply of rice in the bazars is abundant, that the price of common rice is 13 seers 9 chittacks, and that of seed-paddy 24 pucca seers, but the supply of the latter small; that the teel, cotton, indigo and vegetables now on the ground are suffering much from drought; that the prisoners in two theft cases pleaded hunger; that there is a want of water in some parts; that cholera has broken out in several villages; that distress prevails in certain villages in the north-west of thana Ausgram visited by the sub-divisional officer. There reached me the other day what I thought rather a *gobe-mouche* story about a Sonamukhy weaver living on the earth of ant-hills for some days. At your desire I have called for all the particulars, which will be submitted on receipt.

The Raneegunge sub-divisional officer says that the supply of rice is plentiful; that imports have about balanced exports; that kalai is being largely imported; that the stocks in hand of all kinds of grain, including seed-grain, are not very short, but are withheld from

the market; that there is a number of lepers, cripples, and other infirm persons requiring relief; that the price of rice has remained almost stationary; that seed-grain (common rice) sells at about 22 seers the rupee; that ·64 inch of rain fell during the fortnight; that a little cultivation of sugarcane is going on; that cholera and small-pox are very prevalent, probably (in the case of cholera at least) owing to want of water; that no deaths from starvation have occurred; that there is a great demand for work on the new roads, and that cultivators as well as coolies apply for work. I have myself just returned from Raneegunge, where I made inquiries about the distress. There still continues to be a most decided difference of opinion amongst the principal residents as to whether there is any distress at all in Raneegunge. The majority, however, think there is distress, but at the same time qualify the statement by the assurance that the distress is nothing like what it was in 1866. It is clear that distress of any very prominent or aggravated kind cannot exist in Raneegunge, or there would not be these differences of opinion about it. The recipients of relief at the Raneegunge thana look wretched creatures, but their wretched condition appears to be owing to disease rather than want. Nearly all of them are cripples, lepers, blind, or aged, and I dare say a similar band might be collected in the best of years. But while I freely admit this, I do not go so far as to say that I think the limited relief arrangements there to be unnecessary. If deaths are to be prevented, it is just this class of people who must be taken in hand first of all, and relieved freely and even at the risk of over-doing the thing, because it is just this class on whom high prices tell first of all. With the stringent regulations now in force for the exclusion of all able-bodied persons from the depôts and the exaction of light labor from all able to do a stroke of work, I do not think that the limited relief arrangements in Raneegunge are open to any reasonable exception. Of course opinions will differ, and will go on differing. People will go up to Raneegunge and take a cursory view of things; and discovering a considerable amount of local opinion in favor of the view that no relief is wanted, come away with very positive views to that effect; but those with whom the responsibility rests of saving life and preventing privation, and who have perhaps better opportunities of knowing the state of the case, consider that there is distress, and that relief is wanted; and even if they give relief somewhat too freely, they may justly claim to be excused for an error on the safe and right side.

The Culna sub-divisional officer says that the supply of rice in the bazars is abundant; that prices vary from Rs. 3-3 to Rs. 2-14 a maund; that the stocks in hand are considerable; that ·36 inch of rain has fallen; that the ground having been thoroughly softened by the rain in the previous fortnight, ploughing and sowing are progressing; that more rain is wanted; that no deaths from starvation or cases of misery have occurred; and that there have been three petty grain-thefts.

The Jehanabad sub-divisional officer says that 1·90 inches of rain has fallen; that the weather is still unsettled; that the supply of grain in the bazars continues to be abundant; that seed-grain is easily procurable at 22 pucca seers the rupee; that the price of rice continues unaltered; that the teel and cotton crops have benefited from the rain; that the condition of the people is fair; that plenty of work is obtainable, that the weavers are the only class which is pinched, that no grain-thefts or cases of death or starvation have occurred; that the only distressed part of the sub-division is the weavers villages in Goghat; that the number of beggars is increasing; and that they come round the sub-divisional officer "shrieking," but steadily refuse to work.

The District Superintendent says of the sudder sub-division that the supply of rice in all the bazars is abundant; that the price of coarse rice varies from 13 to 14 pucca seers the rupee; that large stocks of grain are held; that the rain which fell at the beginning of the fortnight was insufficient and more is wanted; and that no deaths from starvation or cases of misery have come to light, but there have been a few petty thefts of grain in Sahibgunge.

Relief Works.

2. These are shown in the annexed Statement I. The report on those in Raneegunge, promised in the last narrative, is submitted separately.

Transport of Food.

3. The exports during the first two weeks of May were 24,779 maunds against 32,306 imported. The latter chiefly consists of the Government imports to Burrakur for Manbhoom. The large export from this station, noticed in the last narrative, was a mistake. From a reference to the railway traffic authorities it appears that the figures should have been entered under the head of imports. It is worthy of note that there is still a little rice entered as exported from Burrakur during the fortnight under report.

Storage of Grain.

4. No Government grain has been stored in this district.

Advances to Private Persons.

5. The advances under the Land Improvement Act are shown in Statement II, and the applications for advances to buy grain in Statement III.

Charitable Relief.

6. The particulars of charitable relief and the expenditure thereon are shown in Statements IV and V. A separate report is submitted regarding charitable relief arrangements in Raneegunge.

P. S.—The sub-divisional narratives will follow to-morrow.

I.—Statement showing Progress of Works in the Burdwan District for the Fortnight ending 16th May 1874.

Name of Road.	Work done in cubic feet.			Average daily number of laborers.	Rate of wages per Chowah.	Price of Rice.
	Up to 2nd May 1874.	During the fortnight.	Total up to date.			
					Rs. A. P.	
Culna road	2,825,000	.....	2,825,000	.....	0 2 6	Rs. 3-8 per maund.
Assensole to Domohani road	1,065,000	.....	1,065,000	39	0 2 0	Rs. 3-5 ditto.

Burdwan Collectorate,
The 18th May 1874.

E. H. Whinfield,
Officiating Collector.

No. 68—S.R., dated Burdwan, the 20th May 1874.

From—C. T. Buckland, Esq., Commissioner of Burdwan,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

In continuation of my No. 64 of 19th instant, I have the honor to submit in original the district narratives for Howrah and Midnapore for the fortnight ending 18th instant.

2. *Howrah.*—The report regarding the failure of the boro rice crop seems to be exaggerated. Mr. Rees, late Magistrate of Howrah, went out to make a local inquiry about it, but as he was relieved immediately afterwards by Mr. Worgan, no report has been received from him. I will write to him demi-officially for further information.

3. I regret to have to call attention to paragraph 9 of the Magistrate's report, from which it will be seen that the police prevented the removal of 9,000 bags of dhan from Ampta. The Deputy Magistrate appears to have taken no action, and the Magistrate states that he has told him he was quite right. I have written to the Magistrate to desire that the police officer who interfered to prevent the removal of the rice may be suspended and a full explanation submitted. Such an interference with trade in a part of the country where there is no distress, and which is perfectly accessible by water, is intolerable.

4. *Midnapore.*—The Collector of Midnapore has received a report from the native Deputy Magistrate of Gurbetta, that "extreme want is pressing in Gurbetta." The Collector has done well in referring it to Mr. Stevenson, the experienced manager of Messrs. Watson & Co., who can be safely trusted to recommend any measures that are really required. The report is probably exaggerated, and even the Collector observes that it is disappointing.

5. Of the labourers shown as employed as per heading B, 8,278 are employed on the ordinary embankment and canal works of the district. This leaves only 4,233, who can be described as in any way employed on relief works.

6. The daily average number of persons fed at the charitable food depôts is 541. This return includes the fever food depôts. The cooked-food test led to the closure of one of the food depôts in Tumlook.

P.S.—I have since received the following demi-official information from the Collector of Hooghly regarding the alleged failure of the boro rice in Howrah:—

"The area of boro dhan inspected by Rajendronath Mookerjee was only the small tract dependent for its crop on artificial irrigation from the Damoodar. It lies in thana Khanakool, between the thana and the Damoodar river. Its total area may be 2,500 bigghas. On the other side of Khanakool, near the Roopnarain, about 50,000 bigghas are cultivated, and I believe gave a full crop. Similarly in Juggotbullubpore thana about 40 or 50,000 bigghas have given, at all events, a fair crop. The people who cultivate the lands which I sent Rajendronath to inspect, think themselves very lucky to have got any crop at all. I dare say you recollect the history of the matter. When the dam was first made at Selimabad, the boro rice cultivators, who used to depend for their cultivation on a bund made annually lower down the Damoodar, came after some delay to complain, and I got Whitfield to let them have water down the Bachoorda khal. It was rather late, however, in the season, and some of the seedling rice had died, so I believe only about 1,500 bigghas were planted. It suffered again about a month ago and water was again supplied. It may therefore be true that the crop on this limited area is only ¼th of a full crop, but Rajendronath never told me so, and I doubt it. The people paid the price of the second watering with promptitude to the Sub-Deputy. That of the first watering was remitted.

"Rajendronath Mookerjee is out in the district, but in his diaries there is no mention of the boro crop having been a failure He can have seen no other boro rice than this artificially irrigated crop, because he went to Khanakool *viâ* Haripal, and never went to the west of the thana where all the naturally watered boro crop is grown, extending for miles and miles instead of being in little patches, as it is in the east of Khanakool."

No. 98, dated Howrah, the 19th May 1874.

From—J. B. Worgan, Esq., Covenanted Deputy Collector of Howrah,

To—The Commissioner of Burdwan.

I have the honor to submit the fortnightly narrative ending on the 18th May 1874.

2. The yield of the boro dhan within the jurisdiction of thana Khanakool, regarding which somewhat favorable hopes had been entertained, has apparently proved to be less than was looked for, as it appears from the information collected by Sub-Deputy Collector Baboo Rajendro Nath Mookerjee that out of the total area cultivated with boro dhan only one-half thereof yielded any crop, and that crop is estimated to be only about one-sixth of a full crop. This failure is in consequence of the want of timely rain. In Doomjoor about 500 bigghas of land have been cultivated with boro dhan, and the produce has been calculated at 4 maunds per biggha, which is one-half of the general average produce. The crop has now been all reaped and gathered, and there is nothing on the ground.

3. The price of food-grains has remained unchanged for the last two or three weeks.

4. Statement of the total number of persons employed on the roads of this district up to the 15th of May 1874 is herewith submitted. They amount to 323 persons.

5. Twelve applications under Act XXVI of 1871 for digging tanks have been received up to this time, of which six applications have been rejected, and two applications have after inquiry been submitted to the Collector of Hooghly for orders; four applications are still remaining to be disposed of.

6. Rs. 2,000 have been received from the central relief committee for the purpose of relieving the distressed people of the district. Out of this sum Rs. 500 were made over to the District Superintendent of Police on the 22nd of April, with a request to distribute the amount to each thana and outpost for relieving cases of real distress, and Rs. 300 have been remitted to the Deputy Collector, Mohesreekha, for the same purpose.

7. I have received two statements from the District Superintendent of Police showing that up to the 15th of May only Rs. 21-1-6 had been expended out of the 500 sent to him. I have no accounts from the Deputy Collector, but have written to ask for information.

8. Rain is imminently wanted for the sowings, which ought to be progressing now.

9. I may mention that I to-day received a letter from the Deputy Collector of Mohesreekha to say that 9,000 bags of dhan were about to be removed from Ampta for sale, and that the police had prevented their removal. He further said that the people generally regarded this sale as a public calamity, and desired his interference, but that he had not taken any action. In this I have told him he was quite right. At the same time I have asked him to keep me well informed of the effect of the removal of so much food. The police have been also written to.

Extract from the Fortnightly Report of Coolies employed on the District Roads during the Fortnight ending 15th May 1874.

Name of Road.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	Remarks.
Howrah Sub-division.						
Old Benares road ...	50	No food supplied by contractors.	Good ...	Generally 2 annas khorakee given daily per cooly, and at the end of each week they are settled with men at 4 annas per day, women 2 annas 6 pie.	The contractor supplies the tools.	Sufficient coolies.

J. B. WORGAN,

Officiating Covenanted Deputy Collector.

W. H. WELLS, C.E.,

Executive Engineer, Hooghly and Howrah Districts.

No. 86, dated Midnapore, the 18th May 1874.

From—H. L. HARRISON, Esq., Collector of Midnapore,
To—The Commissioner of Revenue, Burdwan Division.

I HAVE the honor to forward the fortnightly report of this district for the period ending 16th May.

2. The supply of rice continues as before, and prices exhibit no serious fluctuations. We have only had one good rainfall, and more rain is certainly needed. The very scanty rainfall has damaged the mulberry, which promised well at one time; but indigo and boro rice, now being reaped, are as good as could be expected. Til is reported as injured in the east of the district, but as being good in the north-east.

3. The only important event during the fortnight is the report of the Deputy Magistrate of Garbeta that extreme want is pressing in Garbeta thana. A road which we held in reserve has just been opened, which he admits will supply all that is needed to the able-bodied; but he considers that from 400 to 700 of the infirm, who cannot work, require charitable relief. This is very disappointing, as Garbeta had, though an unequal, fully an 8-anna average crop, and it had been hoped that relief works would be the outside form of help needed. Before action, the report has been forwarded to Mr. Stevenson of Messrs. Watson, & Co., to whom the pergunnah belongs, and he has been asked to institute independent enquiries. Hence, I am not able to forward it with this, but if you wish it, a copy can be sent as soon as it returns. The ordinary fortnightly report alluding to the subject is submitted; but Contai and Tumlook reports have not been received.

4. The fact is that there are beggars in every year, and this year the beggar class is necessarily much increased in numbers. It is only in degree and not in kind that there is, in most parts of this district, any difference between this and an ordinary year. It is most difficult to secure the saving of life without drawing into the relief net a number of unworthy recipients. The pauperism is aggravated by the unwillingness of the mahajuns to make their usual advances owing to the high prices which prevail Mahajuns as a rule get an advance of grain repaid in *kind* with 50 per cent. interest; but as far as the probabilities go, an advance this year at that rate will, even if repaid, be a direct loss. If a Mahajun advances grain when it is selling at 15 seers for the rupee and gets back 1½ fold when it is at 25 he is an obvious loser. This he is sharp enough to see; hence the tendency is to contract as much as possible their usual advances and sell all their surplus stock, a tendency which will considerably enhance the distress among the agricultural class. I have made arrangements to visit both Garbeta and Chundercona this week.

B.

5. Labor is still being employed abundantly, to which it is chiefly due that distress among the coolie class seems to be successfully averted. The following statement shews the roads and the average daily number of laborers this fortnight as compared with the last:—

	Daily Average.	
	Preceding fortnight.	Present fortnight.
Executive Engineer, Northern Drainage and Embankment Division..	440	626
„ Cossye Division ... skilled	371	363
„ Cossye Division ... unskilled	4,515	5,007
„ Hidgelee „	1,381	2,282
„ Midnapore, Ghatal and Chundrakonah road ...	627	671
Jamboncc estate	278	873
Lodhasoye to Dahijuri	82	581
Dahijuri to Pooreehati	22	22
Lodhasole to Mohapaul	24	16
Bombay Road	16	16
Burdwan Road	292	244
*Dahijuri to Lallghur	277	256
*Beenpore to Ramgur	187	146
*Beempore to Sildah	60	65
*Chandra to Jhargram	105	154
*Keshpore to Narajole	520	104
*Chunderconah to Kourpore	726	284
*Satputi to Ramghur	100	459
Dahijuri to Beenpore	....	94
*Lallgur to Ramghur	Newly opened.	88
*Chuttergunge to Ramjebunpore	Newly opened.	100
*Kherpoy to Beedengunge	Newly opened.	60
Total ...	10,983	12,511

6. The increase in the Jambonee estate is due to the special work of the Executive Engineer having been now regularly set in train. The large decreases and increases in other roads are due to special causes which it would take space to explain in detail.

7. Private works, tanks, and embankments, so far as I have been able to get information concerning them, are giving employment to 4,198 coolies daily.

C. & D.

8. *Nil.*

E.

9. The following statement gives the state of the application for advances for land improvement.

	Applications for Advances					
	Made.		Rejected.		Pending.	
	No.	Amount. Rs.	No.	Amount. Rs.	No.	Amount. Rs.
Midnapore	69	22,424	39	13,363	30	9,061
Gurbetta	10	1,675	1	50	9	1,625
Contai	5	3,500	1	1,500	4	2,000
Tumlook	2	800	...	...	2	800
Total ...	86	28,399	41	14,913	45	13,486

F.

10. The five food depôts have been reduced to four. As soon as the test of cooked food was applied to the two relief depôts in Tumlook, the number of applicants fell off so much that one of them was closed. The number fed at present is as follows:—

Chundercona	77	126	93
Kherpoy	10	13	7
Radhanuggur	60	79	44
Rajnagore		32	
		541	

11. The distribution of thread to the Tantees, to be repaid from the cloth manufactured by them, continues, only the most distressed, who cannot obtain loans from the mahajuns, are given the advance. Up to date upwards of 1,000 have been thus relieved, and the possible number that may require relief is estimated at 3,500 in this district. You have objected to this number as excessive, but apparently only on general and *á priori* grounds.

Besides weaving and road-making, those fed at the relief depôts, who are unfit for hard labor, are employed in basket and mat-making, rice-husking and cooking.

G.

	Rs.	A.	P.
12. Government expenditure during the fortnight ...	649	5	0

Deduct expenditure chiefly in purchase of thread ...	5,193	5	0
Balance in hand ...	11,258	13	3

H. L. Harrison,
Collector.

No. 168—T, dated Camp Govindpore, the 14th May 1874.

From—Colonel E. T. Dalton, C.S.I., Commissioner of Chota Nagpore,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

Since my last half-monthly narrative, dated 27th ultimo, and special report on Manbhoom of the 5th instant, I have been on the move almost daily, and the present narrative, which should have been written on Monday last, has been consequently delayed.

2. On the 7th instant I left Purulia, accompanied by Colonel Rowlatt, and proceeded to Roghoonathpore, the head-quarters of Captain Samuells, who, as relief officer, is attending to the pergunnahs immediately south of the Damoodur.

3. We saw to the condition of the people in and about Roghoonathpore, inspected the arrangements for the storage of rice as it arrives from Burrakur, the distribution of rice to cultivators and others applying for loans, and the doling out of cooked food to infirm paupers, helpless women, and children and beggars.

4. Having completed our inspection of the Roghoonathpore arrangements, we proceeded to Burrakur, where we saw Lieutenant Eliot, transport officer, who had just relieved Captain Hare. Lieutenant Eliot, finding a considerable accumulation of rice, about 20,000 maunds, at Burrakur, and insufficient storage accommodation, wrote or telegraphed to Mr. Toynbee to suspend despatch for a time, and proposed slightly raising the rates of cart-hire which he found considerably lower than those prevailing in the other districts in which he had been employed as transport officer. I agreed to the rates proposed by Lieutenant Eliot, and next day Colonel Rowlatt found no difficulty in making arrangements for as many carts as were required; that is for the employment of 350 carts and sagars capable of carrying about 4,500 maunds a day from Burrakur, which is as much as could conveniently be received and disposed of at the main golah stations of Roghoonathpore and Govindpore. In regard to the supply of the subordinate golas, the arrangements of the circle officers appear quite sufficient.

5. It was settled that whilst I went on to Pachumba or Giridih in the Hazareebagh district, Colonel Rowlatt should visit distressed pergunnahs north and south of the road, and await my arrival at Govindpore. On the forenoon of Sunday I reached Giridih and went on to Pachumba. On the following morning I assisted, at a meeting of the sub-divisional committee present, the gentlemen named in the margin.

Captain Preston, Relief Officer.
Mr. W. N. Campbell, Extra Assistant Commissioner.
" R. P. Davis, District Superintendent of Police.
" C. Parkinson, Executive Engineer, Hazareebagh.
" Templeton.
" G. T. Peppe, Manager of Dhanwar.
Tikait Sidthnath Singh of Kurhurbari.
Parusnath Singh, Rajah of Palgunge.
Khwajah Wahidjan, Proprietor of Gadi Latahi.
Lalla Ruddra Sahae of Jagernathdih.
Moonshi Gouriprosad, Pleader.

6. Mr. Beadon, the Deputy Commissioner, could not carry out his intentions of meeting me at Pachumba in consequence of a domestic affliction, but he sent Mr. Parry Davis, who efficiently represented him.

7. *Hazareebagh.*—The organisation for relief operations in this district has now been completed as follows:—

Hazareebagh Circle.

12 *Sub-Committees.*

1. Ramgurh.	5. Kasmar.	9. Mandoo.
2. Golah.	6. Mahodih.	10. Echak.
3. Tandwa.	7. Piturbar.	11. Hazareebagh.
4. Simiria.	8. Goomiah.	12. Jhoomra.

Burhee.

8 *Sub-Committees and Relief Centres.*

1. Chowparun.	4. Bugodur.	7. Jainagur.
2. Burhee.	5. Doomri.	8. Koderma.
3. Barkutta.	6. Gujhandi.	

Pachumba.

16 *Sub-divisional Committees.*

1. Dhunwar.	7. Mirzagunge.	12. Palgunge.
2. Kesko.	8. Nowdiha.	13. Ledah.
3. Ghorunji.	9. Kutroohundo.	14. Kurgali.
4. Gowan.	10. Pachumba.	15. Dighi.
5. Asko.	11. Serampore.	16. Peshum.
6. Kharakdiah.		

CHATRA.

Details not given.

8. I am submitting separately a letter from Mr. Beadon, together with a map showing all roads now under construction as relief works in his district. The system adopted is piece-work or family contract and daily wages. The difference in the outturn of the piece-work and daily-wages is (as the Assistant Engineer Mr. Pereira informed me) per thousand cubic feet.

	Rs.	As.	P.
Piece-work	1	12	0
Daily wages	3	0	0

The increased cost of the latter is chiefly owing to the number of infirm people admitted to work upon the daily-wage system.

9. The total number of laborers employed on district and relief roads is over 10,000, besides which a large number are employed on wards' estates, on embankments, tanks, and other works, and by municipal committees, who have arranged to provide light labor and full labor as required to all persons seeking it. I have no return of the persons so employed, except from the Dhunwar estate, in regard to which I obtained the following memorandum from the manager :—

Works on the Dhunwar Estate.

	Coolies.
Dhunwar reservoirs	3,500
Dorunda road	1,500
Dhurumpore embankment	1,250
Jhilabad	500
Amwataur	300
Barmassia	50
Total ...	7,100

10. From Mr. Peppe's statements at the committee it would appear that Dhunwar has suffered quite as much as any other portion of Hazareebagh, but owing to the number employed there is no distress. The coolies are paid daily in food, or in pice, or both, and it was found that Mr. Peppe's payment in this manner gave a higher rate of pay than obtained in other places, and no attempt had been made to introduce piece-work. It is found that at the present rate the great Dunwar reservoir, the estimate for which was Rs. 14,000, is more likely to cost Rs. 30,000, which is more than the estate can well afford. I directed Mr. Peppe to introduce piece-work gradually, dividing laborers into light work and full work gangs, and I have reason to suppose that after carrying this out he will find his numbers and the cost of the work sensibly less.

11. I received most satisfactory accounts from the District Superintendent of the general condition of the people throughout the whole district. He informed me that employment had sufficed to preserve the condition of the people in the southern parts of the district, and that distress reported as existing in Gawan and other places had not, on inquiry, been found severe, and relief, wherever wanted, had been supplied. High prices, however, prevailed, and the present good condition of the people was greatly owing to the abundance of the mohwa, which would give them support for some time longer; and I found that applications from many quarters for advances in grain or money were being received. It is fortunate that in most of the pergunnahs which have suffered from scarcity, the bhadoi crops are well attended to. The sowing of the early maruwa had already commenced, and this would be harvested in Jeth The Indian-corn is extensively cultivated, and will be ready by August. They have a dhan crop called sathi, because it is ready for the sickle 60 days after it is sown; and they grow goondli—the later maruwa—kulti, and kodo: sugarcane and chena are cultivated, and they form the only crops now on the ground. The Kharakdiah people have thus an earlier prospect of a harvest than can be looked for in most districts.

12. I remained at Pachumba till the afternoon of Tuesday, the 12th, and during my sojourn there saw all the neighbouring zemindars and some thousands of people. Sunday was market day; people from all the surrounding villages were collected, and there was nothing in their appearance to raise the slightest suspicion of scarcity. The market was well supplied with rice, but it was all imported by rail—some from Chundernagur I was informed, and it was selling high, 11 to 11¼ seers for the rupee.

13. From the reports of the sub-committees read at the meeting, and from conversation I held with zemindars and ryots, I am of opinion that a considerable number of the agricultural classes are desirous of obtaining loans of rice, and that it is desirable to extend to Hazareebagh the loan system as worked in Manbhoom. Mr. Beadon is, I understand, more in favor of the money advance plan; but we find in Manbhoom that landlords are disinclined to take the risk, especially as they are likely to have heavy arrears of rent to

realize, and do not see their way to recovering in addition the sums lent from the Government advance. The Government have allotted 25,000 maunds of rice to Pachumba. With exception to 3,000 or 4,000 maunds last received, it has all been deported to different golas. I will write again on this subject after I have consulted with Mr. Beadon; but in the meantime I would recommend that 1,000 maunds a day be sent to Giridih for Pachumba till the quantity issued reaches 40,000 maunds. If the whole be not required for loans, it will be eagerly taken by the coolies employed on relief works.

14. *Lohardugga.*—Mr. Oliphant's report on the Sudder Sub-division of his district I had the honor of submitting to Government on the 6th instant. There is nothing to add The condition of Chota Nagpore Proper continues satisfactory; there is no distress; prices are steady, and the health of the people much as usual during the hot season.

15. I have not yet received the half-monthly narrative from Palamow, but have before me an interesting letter from Lieutenant Grey, the relief officer in charge of the western relief circle, which comprises the worst* parts of the sub-division, from which I submit some extracts.

* Dated Gurwah, 5th May.

"Jupla and parts of Belounja are worse than round Gurwah and Outari. At Hyder Nagur and Hosenabad there are charitable relief recipients, but they all seem collected in those two places, for I could find none elsewhere. At Hyder Nagur there are 23, and at Hosenabad 102. The former were professional beggars; of the latter, 35 are beggars, and the others are people of some social position; they all work, i.e., make thread, clean cotton, make 'newar' durries, &c; in fact, it is quite a little industrial school, and so much work is turned out that the actual cost of feeding is very little—over one pice per head per diem! In the north-east and east of Belounjah there is no distress. The khurreef crop was from 8 to 10 annas.. In the south-east and western half there is or has been distress; the price of rice is there 10 seers for the rupee."

"I am confident—indeed it is admitted by every one I have questioned—that there is now no fear whatsoever of distress from want of food The real distress was before the rubbee crops were reaped; but since those crops and the mohwa flower crops have come to hand, there has been an ample supply of food for every one. In addition to the rubbee and mohwa, there are—(1) the mohwa fruit and seed; (2) the pyar. This latter is a mine of wealth; the fruit is eaten, and the seeds are kept and dried, and form a masala (spice) called cheronji, which the poor people exchange with the bunyas for rice. This spice is sold by bunyas at 4 and 5 seers the rupee, so we may say that the people from whom they purchase can get a rupee, or 12 or 10 seers 'pukka' of rice for 8 or 10 seers (kacha) of the spice This pyar is now being collected, and I saw little heaps of it, the very first instalment of the crop, in the houses which I visited. Besides the things above mentioned, there are numerous other jungle fruits which the people eat, and when the rains commence the jungle sâgs, &c, will be innumerable."

"I would urge strongly that as soon as the agricultural operations commence we should give payment in kind only, and at half the rates paid by zemindars, otherwise we shall be competing with the zemindars; also this will enable us to get rid of some of the rice we have stored; there are close on 20,000 maunds, and I can't get any to tell me when it is likely to come into use."

16. From the above we may confidently assert that Palamow is now safe. Government orders in No 2816-S.R. of the 1st instant, suggesting payment in rice, have gone out, and I have authorized a reduction of the labor rate, and directed a change from the daily-wages to the family contract system in dealing with laborers. The last abstract statement C received from Palamow gives 13,275 as the number employed; and as the condition of the people is now represented to be so favorable, it is high time to adopt measures for the reduction of such high figures.

17. *Manbhoom.*—With reference to paragraph 5 of your letter No. 2945—S.R. of the 6th instant, I consider I may now confidently state that we are fairly ahead of the distress in Manbhoom, and that the measures already determined on will prove sufficient to maintain us in that position.

18. Returning from Pachumba to Burrakur I met Captain Grant, deputed by His Honor the Lieutenant-Governor to arrange for the acceleration of the transport of rice from Burrakur to the golas in the interior. This he has done, paying a contractor a higher rate than had been previously given. Captain Grant informed me that the Government had decided on continuing to send up 3,000 maunds of rice per diem till the total quantity supplied reaches 2,00,000 maunds. The Government letters announcing this have not yet reached me.

19. I met Colonel Rowlatt at Govindpore according to appointment; he had visited Toondi and Jherria, and was able to report favorably of those two estates. Since entering the sub-division I have seen most of the zemindars, and have had opportunities of noting the condition of the people, and from the form and appearance of the latter it is evident that there has been great improvement within the last fortnight or so. The most depressed people were the small cultivators who object to work, and who saw themselves at the end of their food resources and without seed for their next crops. They are now

eagerly availing themselves of the proffered loans of rice which are given out on their bonds by relief officers in the presence of the zemindars or their agents. We look to the latter to give true representations regarding the status of the ryot, but do not hold them otherwise responsible. It is considered that it will be easier to recover from the ryots without their intervention, besides they would not have accepted the responsibility. The rate at which rice is being distributed is now rapidly increasing at Govindpore, as much as 1,100 maunds have been loaned out in one day, and it is calculated that the next fortnightly report, to be prepared on Monday, will show that not less than 42,000 maunds have been disposed of in loans up to that date.

20. The large numbers, between 5,000 and 6,000, now frequenting the different depôts for the distribution of cooked food is a sure sign of distress, for, as a rule, the people have strong prejudice against this mode of relief. At Roghoonathpore I saw fed 225 women, 104 men, and 186 children; total 515. Amongst the children there were some objects reminding me of 1867, but most of the recipients had been fed for some time, and were recovering condition. I directed that light or suitable employment should be provided for all who were fit for it, and this is to be attended to at all the depôts.

21. There are a great number of cotton and silk weavers in the Roghoonathpore circle; they are provided with the means of carrying on their trade, and the committees arrange for the sale of the pieces. Females of other classes, besides weavers, are provided with cotton to spin, and are paid for their labor when they deliver the thread. I find that spinning is more an employment of respectable females of various castes than I had supposed.

22. All the new road works specified in paragraph 26 of my last narrative have been taken up, except I believe the Jhaldah and Chandil line, which has to be surveyed and aligned; and Colonel Rowlatt is now turning his attention to unclaimed tanks, the clearing and deepening of which will afford more local labor, where it is needed, in places rather remote from road works. All the newly-projected road works or tanks will be taken in hand on the family contract system.

23. Referring again to Colonel Rowlatt's last narrative, I do not find any other point on which it is necessary for me to touch. I proceed to-night on my journey up the Grand Trunk Road, in full confidence that the experienced and energetic district officer who is now in charge of Manbhoom will do all that it is possible to do to mitigate the evils of the present scarcity.

24. I find that cholera has appeared in many villages on and near the Grand Trunk Road. Doctor Wood is now at Bugodur, where, I understand, there is no sickness. I will send him down the road.

25. *Singbhoom.*—Captain Garbett's narrative for the month of April, with information brought up to the 8th instant, is in the hands of Government. From this it appears that exportation from Singbhoom has at last ceased, and the price of rice had risen from 20 seers to 14, afterwards reduced to 16 at Chyebassa itself, and it was expected that it would rise to 14 seers generally in June.

26. In Dhulbhoom there is still sufficient employment for the people where it is required, but in the Kolhan the works undertaken have for the most part been completed. There are still, however, reservoirs in progress, for which Captain Garbett thinks more money will be required, and he has again gone out to examine them. The report is not on the whole so satisfactory as those which preceded it, as it implies that there is still more to be done in this Government estate. The reservoirs were sanctioned on the understanding that the Mankees would provide for one half the cost, or that free labor could be given to that extent. We may perhaps have to raise the Government contribution to two-thirds instead of one-half, and this will, I think, provide for any additional aid required.

27. Captain Garbett will be called on to submit a full report on the reservoirs completed and in progress. The sum expended on relief works in the Kolhan last month is very small, only Rs 300. No sub-committees or depôts for distribution of food have been found necessary as yet, but Captain Garbett says the machinery is ready to be set in motion, should it be required. I have requested him to report specially how the Kolhan cultivators are off for seed-grain.

No. 3235—S.R., dated Calcutta, the 20th May 1874.

From—The Offg. Secretary to the Government of Bengal, Statistical Department,

To—The Commissioner of Chota Nagpore, Camp Hazareebagh.

I AM directed to acknowledge the receipt of your letter* No. 168, dated 14th May, which gives a full account of the condition of your district, especially of the distressed parts of the Manbhoom and Hazareebagh, which you have visited in company with the local officers.

* Printed copies forwarded herewith.

2. *Cooked Food.*—With reference to what is said at paragraphs 3 and 20 regarding the distribution of cooked food from centres, and regarding the dislike people have for this form of relief, I am to express the Lieutenant-Governor's

wish that charitable relief may be given to deserving objects in the shape of uncooked food. In other districts an allowance of grain sufficient for 7, 15, or 30 days is given to the applicants for relief either on their personal appearance at the relief centre, or through the head of their village.

It will certainly be in accordance with the benevolent intentions of the people who have contributed to the famine relief fund, that relief committees and relief officers should in this respect conform to the usages of the women, children, and sickly or infirm people who are being relieved.

3. *Grain Transport in Manbhoom*.—The Lieutenant-Governor is glad to learn that by dint of offering hire somewhat above the ordinary rate, the Transport Officers, acting under your orders, have been able to arrange for carrying into the interior the whole of the Manbhoom grain allotment At the old rate of despatch the grain certainly could not have reached the store-houses before the rains began.

4. *Piece-work on the Puchumba and Dhunwar Works.*—The Lieutenant-Governor approves of the arrangements now made for introducing piece-work on the Dhunwar reservoir. If many of the Puchumba work-people are infirm and weak, the presence of considerable daily labor gangs (paragraph 8 of your letter) cannot be helped. But able-bodied men must be compelled either to do piece-work or to leave the works.

5. *Payment of Relief Laborers in kind.*—The extract you quote from Lieutenant Grey's letter urges that laborers on relief-works be paid in kind. Colonel Rowlatt and Mr. Beadon appear to be paying their laborers wholly in cash. I am to request that whenever Government grain is stored—and it is stored in Palamow, Hazareebagh, and Manbhoom—relief laborers may be paid forthwith in grain, in accordance with the orders conveyed in letter No. 2853, dated 4th May.*

* Six copies forwarded for facility of reference.

6 *Advance of Grain to Ryots in Hazareebagh.*—The Lieutenant-Governor agrees to your proposal that advances of grain be made to ryots in the distressed parts of the Hazareebagh district, subject to all the precautions and security taken in Manbhoom. He has instructed Mr. Toynbee to send 1,000 maunds of Government grain daily to Giridhee for Puchumba until the Hazareebagh supply shall have been brought up to 40,000 maunds in all. Storage-room of adequate description must be provided to keep all this grain secure in the rainy season.

7. *Palamow.*—The account given by Lieutenant Grey of the improved prospects in Palamow is so far satisfactory. But the mhowa flower and other jungle fruits will not carry the people through July and the first half of August. The financial success of the home labor given out to villagers and to women of good position, if it continue as Lieutenant Grey describes it, will be creditable to all concerned.

No. 3236—S.R.

COPY, with copy of Colonel Dalton's letter and ten copies of Government circular No. 2853, dated 4th May, forwarded direct to the Deputy Commissioners of Hazareebagh and Manbhoom, and to the Assistant Commissioner, Palamow, whose attention is specially drawn to paragraphs 4 and 5 of the Government orders.

No. 1041, dated Purulia, the 19th May, 1874.

From—COLONEL E. A. ROWLATT, Deputy Commissioner of Manbhoom,

To—The Junior Secretary to the Government of Bengal, Scarcity and Relief Department.

WITH reference to paragraph 3, Government Circular No. 154—S.R., dated the 16th January last, I have the honor to submit my fortnightly narrative ending the 16th instant.

A.—STATE OF THE COUNTRY.

A decided change for the better has taken place in the general state of the country since the date of my last narrative. This has been entirely brought about by the loaning out of Government rice to the cultivators and others on security. It has restored confidence

in the future amongst the distressed portion of the people, and as a fact, it can be stated with confidence that the rice thus taken on loan by the cultivators is again given out by them to their farm servants or laborers in order to keep them from starving or leaving them; so that not only have the cultivators and their families been preserved from want, but a large number of the laboring classes have also been provided for, who, but for this measure, must have been reduced to the greatest distress. The loaning out of the Government rice has also had the effect of forcing the mahajuns and traders, who had closed their stores, to open them out again. Rice is now being sold again freely to those who have the means of purchasing, and can now be had in the Purulia market at 15 seers per rupee, whilst on the 10th, which was before any Government rice had reached the sudder station, it was selling at 13½ seers per rupee. I intend to make it widely known that as long as the traders sell freely, Government rice will not be sold, but that if they again close their stores, I shall avail myself of the permission given to me by the Government to sell Government rice to all comers. This will, I believe, effectually prevent holders of rice from keeping back their stocks of rice in the hope of prices falling to famine rates. The stocks of rice in the country are still considerable, and quite sufficient I believe, with the quantity now ordered to be sent into this district by the Government, to prevent actual famine. Those who have exhausted their means are fast being supplied with Government rice on loan, whilst those who still possess them, will now be able to supply themselves in the ordinary way; both classes will therefore have their wants amply satisfied without any undue interference having been caused to legitimate trade. This is the result I have all along anticipated, and I am thankful that my hopes have been realized. Had the Government not sent in a timely supply of rice, I believe I am quite right in saying that the price of rice would now have ranged from 8 to 10 seers per rupee; and that deaths from starvation would have occurred all over the distressed part of this district, had not energetic action been taken by the Relief Committees. This as yet has however been happily averted.

From the Govindpore sub-division it is also reported that the loaning out of the Government grain has had a most favorable effect on the prospects of the people; it has there, as elsewhere, checked the consumption of their seed-grain by the poorer class of cultivators, and induced the holders of grain to open out their stores and sell at moderate rates.

From Roghunathpore Captain Samuells reports that "the condition of the people has, if anything, changed for the better, the Government advances of grain having secured the cultivating classes from all distress for the present. Amongst the laboring classes I have generally found the men and women in good condition, but not so the children, the majority of whom seem half starved." Particular orders have been issued that children at all suffering from want of nourishment should be properly attended to by the Relief Committees. He further states, "As a class, the non-cultivating Sonthals appear to me to be the worst off of all. The opening up of minor relief works will do much to relieve them."

It must, however, be noticed that although the general state of the country has decidedly improved, distress has again appeared in places where none was expected. Up to very lately nothing but casual cases of distress were heard of south of pergunnahs Bagda, whilst now it is reported that the poorer class of cultivators are suffering in pergunnah, Seopur, Ambikanagor, Raipore, Bhelaidiha, Simlapal, and even in parts of Manbhoom. The fact is, a large number of the cultivators and all those who subsist on daily wages in this district, are exceedingly poor, and are reduced to a state of distress immediately prices rise at all high. In all the pergunnahs above alluded to the autumn crop of rice was far better than in the north and north-east portion of the district, and rice, until lately, has been tolerably cheap. Exportation, however, has been going on rather largely for some time past from the above pergunnahs to the more disstressed ones, and prices have now risen considerably, and this it is which has caused the distress. Had it not been for this exportation, distress would not, I believe, have extended to those pergunnahs. I pointed out this danger some months ago. To meet this state of affairs, I have ordered 15,000 maunds of Government rice to be sent at once for distribution in these pergunnahs, and this will, I believe, be sufficient to check the distress in like manner as it has done in the other parts of the district. The pressure is not very urgent, and as the loaning out will commence in a few days, I do not apprehend any serious results; should the rain be late, however, distress will be prolonged. In pergunnah Burrabhoom also, where there was about a 12-anna crop gathered in, about 250 villages are now reported to require assistance. Had the pergunnah not been drained of rice to supply other parts worse off, there would have been food quite enough to suffice for the whole of the population. Having had a fair crop the people were induced to pay up their mahajuns on the promise that they would advance again when the time of need came. These mahajuns, however, now refuse to do so, as they find it more profitable to sell at the present high prices. About one-fourth of the people of the distressed villages will have to be assisted, and carts are now on the way up to take down a supply of the Government rice, of which from 5 to 10,000 maunds will, I believe, be sufficient. The people, especially the Bhumij* tribe, who largely inhabit Burrabhoom, appear to have put no restrictions on themselves as long as their stocks lasted, but to have indulged in their usual feasts and dances until the pressure of

* Bengalized Munda Kols.

want came fully upon them. Those who know the pergunnah best, state that up to within the last ten days, they had no idea that, scarcity would affect Burrabhoom this season.

Small-pox, which had broken out, is on the decline; but I am sorry to have to report that cholera is raging in some of the villages between Roghunathpore and Burrakur. Two native doctors are attending to the sick.

The price of rice and pulses, according to the reports of the police, up to the 16th instant, and those of the previous fortnight, are given below:

Names of Bazars.	Coarse Rice.		Fine Rice.		Pulses.		Coarse rice in January last.
	Last report.	Present report.	Last report.	Present report.	Last report.	Present report.	
Raipore	17	16	16	15	14	14	22
Manbazar	15	14½	12	12	13	12	20
Burrabazar	15	14½	12	12	13	13	21
Echagurh	16	15	16	16	13½	12	24
Jhalda	13	13½	12	12	11	12	15
Purulia	14	14	11	10	12	13	16
Govindpore	12	13	11	13	13	11	16
Roghunathpore	12	13	11	11	10	12	15
Nirsah	12	12½	11	12	10	11	.....
Gourandih	13	13	12	12	11	11	.....

From the table it will be seen that prices are rising in all the places where distress is now beginning to appear, and in Raipore, Manbhoom, and Burrahboom, is about 6 seers dearer than it was in January last; at Echagurh, in Patkum, where the crop was a decidedly good one, prices have fallen, and also at the four last places which are situated in the distressed part of the district, which is entirely attributable to the importation and loaning out of the Government rice.

B.—Relief Works.

Work is now going on on 17 lines of road, measuring 340¼ miles. The particulars of 14 lines were given in my last narrative, and I now add those of the last three lines lately taken up:

	Miles.
Purulia and Chass Road	28
Jhalda and Chandil Road, first	12
Manbazar and Kasipore Road	27

The Purulia and Chass Road was rapidly pegged out by Baboo Ram Dayal Chakravarti, the newly appointed Sub-Deputy Collector, and work commenced on the 4th May, 1874, from Purulia to the Guwai River. About half way the works will be under the Sub-Deputy Collector, and from there to Chass under a Head Constable of the Police, Nasiba Sing, who has been made available for this duty from the reserve at Purulia. All able-bodied laborers are employed on the piece-work plan, and only those suffering from debility are paid at daily rates.

The Jhalda and Chandil Road was marked out by Mr. J. Pickard, Road Overseer, who has now had much experience in such matters. The works on this road are being carried on by Sub-Inspector Ram Singh, also deputed from the reserve at Purulia to carry on this work; he will be supervised by Mr. Pickard. The same system is being worked there as on the other roads

The road from Manbazar to Kasipore has been divided into three sections; it has been partly marked out by the Executive Engineer, Babu Khetra Mohun Bose. The first section will be carried on by the Road Overseer stationed at Manbazar; the second, which consists of the portion passing through Bagda pergunnah, has been made over to the Digwar of Bagda, who, with his tahidars acting as mates, will carry on the works as far as his circle extends. This will give employment to those members of the rural police who are just now in very distressed circumstances owing to the almost total failure of their crops. The section from the northern boundary of Bagda pergunnah to Kasipore will be under a Road Overseer, to be stationed at Hura when one is available, but up to this date this part of the line could not be marked out for want of some one to do it. It will soon be completed, and in the meantime the people wanting work in that part of the country are being employed on the Purulia and Bankoora Road between Hura and the Bankoora boundary. The contractor on the lower portion of the Manbazar and Purulia Road has been dismissed, and the works from Manbazar to Kenda, in pergunnah Palma, are now being carried on by the agency of the Palma Digwar on the same plan as arranged for in pergunnah Bagda.

Work has also been commenced on the Purulia and Govindpore Road between Dubra and the Damoodur River, and also from Chelliama to Telkupi on the road leading thence to Nirsha on the Grand Trunk Road.

Up to the present date only one village tank has been taken up as Government minor relief work, but in my next narrative I hope to be able to state that many more have been commenced. The Relief Officers have all been addressed on this very important subject, and urged to take up these works wherever distress is apparent, and the people are unable to procure works elsewhere. These tanks will mostly be excavated on the task-work principle, and it has been arranged that the work be let out in portions to families, and payments made through the head of the family at the rate of 12 pice for every 100 cubic feet of earth dug and removed. These works, when fully started, will, I have no doubt, give employment to all who require it. Sanction to the scheme was only received on the 12th instant.

Arjunjora.	Bagda.
Hura.	Puncha.
Kesargurh.	Chass.
Kenda.	

Under the Sub-Committees minor relief works are being carried on at the places as per margin, and funds have been advanced for two more being commenced immediately at Khatra and Raipore.

The corrected number of laborers employed on the roads at the end of the last fortnight was 10,152; it had increased up to the 9th instant to 12,969, and many more will now find employment, as the arrangements are now completed for working the three new lines. It is reported, however, that where the loaning out of the Government rice has made fair progress, the numbers applying for work on the roads are on the decrease. The returns up to the 16th are still incomplete.

The number of laborers employed on the Púrulia municipal works is 153; on the minor relief work light labor gang, 163; on full work, 340; and on the minor relief works under the Sub-Committees in the interior, about 300; and on the tank taken up by Government as minor relief work, about 50; or grand total, 13,975.

There are three estates in this district under charge of the Court of Wards, but two are so heavily in debt that no funds were available for carrying out relief works. The Katras estate, however, is solvent, and in this estate three reservoirs are being constructed at the expense of the ward, for which a sum of Rs. 1,300 has been sanctioned. These works will prove highly remunerative, but having only lately been commenced no returns have yet been received of the number of persons employed on them. The information called for in the letter of the Officiating Secretary to the Government of Bengal, No. 144T.F., dated the 5th instant, will be supplied in the next narrative.

C.—Transport of Government Grain.

Information having reached me that the despatch of Government grain to Burrakur had been stopped by the Transport Officer, in consequence of the supply of carriage to cart it away fast enough having failed, and a consequent large accumulation of grain having taken place, I left Purulia on the night of the 7th instant in company with the Commissioner, Colonel Dalton, to inquire into this matter. On making inquiries at Roghunathpore, I found that a large number of carts were available, and at once I arranged for 100 being started from there daily to Burrakur. The Relief Officer had, it appeared, been so busily engaged in organizing his Relief Committees, that this most important matter had been somewhat neglected. At Burrakur, in conjunction with Lieutenant Eliot, arrangements were at once made for the supply of 150 carts daily; and proceeding on to Nirsha and Govindpore, I there arranged for 50 carts to be sent daily from each of those places, which number was more likely to be exceeded than otherwise. From Govindpore I paid visits to Tundih and Jheria, and there obtained promises of sufficient carts to convey away all the rice from Govindpore that would be required at those places. These arrangements were all completed in six days, and as there is evidently no deficiency of carts, there would have been no want of the means of moving the rice from Burrakur quick enough, had the officers whose duty it was to attend to this matter only given it a little more attention. The rates settled and approved of by the Commissioner, who was present at Burrakur, which are slightly in advance of what had hitherto been paid, were as follow:—

To Roghunathpore	...	...	8 pice per maund.
„ Inganpore	...	...	4 „ „
„ Nirsha	...	...	3 „ „
„ Govindpore	...	...	7 „ „

With these rates all parties were perfectly satisfied, and I believe they would have secured nearly all the available carriage and quite as many carts as we require. Since making these arrangements, however, the Government have deputed Captain Grant, Deputy Assistant Quarter-Master-General, to arrange for the transport of the Government rice, who has raised the rates from what they had been settled at to—

Roghunathpore	...	...	12 pice per maund.
Inganpore	...	...	6 „ „
Nirsha	...	...	4 „ „
Govindpore	...	...	10 „ „

These rates are, I consider, higher than were necessary, but they will, however, of course secure a still further supply of carts, and prevent, I hope, the possibility of any further difficulty on this account.

It having become apparent that Government grain must be brought in to Purulia for loaning out to the cultivators in the pergunnahs as per margin, I on my return to the station on the 14th instant, immediately made arrangements for carts being sent from this place to Roghunathpore, which I was not able to do for less than 14 pice per maund, the distance being 25¼ miles. At this rate 436 carts have already been procured, and more are daily coming in; the quantity required will be about 20,000 maunds. Government rice is also being carted from Roghunathpore to Bagda, where about 5,000 maunds will be required, and about 10,000 maunds will have to be removed from Roghunathpore to Kenda, Manbazar, and Khatra, in Supur. I do not anticipate any difficulty in procuring sufficient carts for the purpose, and hope to have the operation completed during the next fortnight.

Khaspal | Chaua.
Lugda | Kasipore.
Rekab.

D.—Storage of Government Grain.

Up to the date of report the quantity of grain received at Burrakur has amounted to 82,620 maunds, of which the quantities stated below have been despatched to the following places:—

	Mds.
Roghunathpore	34,864
Inganpore	4,602
Nirsha	14,180
Govindpore	18,042
Pandra	1,000

leaving only 9,932 maunds at Burrakur on the 16th instant, after the despatches of that day had been completed.

At Govindpore the store-house has been completed, and will hold 4,000 maunds, besides which 10,000 maunds more can be stored in other public buildings if necessary. At Roghunathpore the second golah had been finished, so that there is now storage room for upwards of 20,000 maunds there, and minor golahs are now being prepared at all the distributing stations in that circle. At Purulia the police hospital has been converted into a golah, and at Ludhurka the godown of an indigo factory is available, and at Bagda a large building used as the talookdar's cutcherry has been placed at my disposal by its owner. The only chance of grain being damaged by rain will be in transit, but care will be taken to protect it as much as possible.

E.—Advances to Private Persons, and their Results.

Up to the 16th instant inclusive advances have been made as follow:—

		Rs.
1.	Advances to zemindars and others for the purchase of grain without interest	10,000
2.	To traders and others of a safe and respectable character with interest	11,547
3.	To zemindars and talookdars to assist their ryots ...	6,150
4.	To land-holders for land improvements	65,990
5.	To Purulia municipality	4,000

I have very little to add regarding the above advances to what I stated in my last narrative. Under the 3rd heading, the zemindars of Bhelaidiha and Simlapal deserve to be mentioned as having done well in assisting their ryots, and land improvements have also been carried on extensively by them and their tenants in those pergunnahs. During the fortnight I have only succeeded in making tuccavee advances to nine individuals, and as the time for undertaking the excavation of reservoirs and tanks is nearly past, very little more can now be done in that way.

The distribution of Government rice by loan to the cultivators and non-cultivators who could give security, up to the dates and to the extent as stated in the margin, has now amounted altogether to maunds 33,618-21. The manner in which the loaning operations are being conducted was described in my last narrative; it has not gone on so rapidly as I wished in the Roghunathpore circle, and I have therefore added a mohurir to each of the distributing stations, who will assist the distributing officers by writing up the registers, and seeing that the quantity passed by him for each applicant is properly carried out. I therefore hope that better progress will now be made The number of persons who have received loans up to the above dates is 18,497; but as these assist their laborers, and each family may be taken at five persons and two laborers, a great many more

are being relieved than is represented by the mere number of loanees: the total number actually relieved cannot be less than 130,000; and as the loaning operation will now go on at twenty-one instead of thirteen places only, and distribution will be much accelerated, I calculate that not less than 100,000 persons will now be relieved weekly by this means alone.

F.—Charitable Relief.

The number of Sub-Committees, which, at the date of the last narrative, stood at 29, has again been increased by the establishment of eight more at the places noted in the margin, making in all one district, three sub-districts, and thirty-seven Sub-Committees. At these and the District and three Sub-Divisional Committees the number of persons fed on cooked rice amounts to 2,808, whilst those provided with raw, or uncooked, rice number 2,464, or total 5,272 persons, besides which 126 persons have been aided by advances to carry on their trade as silk-weavers, and 53 others by advances of cotton to spin thread, which they are paid for at the current rates, after deducting the value of the cotton. A large number of persons are also being relieved by small donations of rice and money, which are given to those found to be in distress by the Relief Officers when visiting their villages.

Ghonga	Burrabazar.
Dimdeha.	Simlapal.
Guniara.	Bhelaidiha.
Raipore.	Gunadh.

The prejudice against resorting to the depôts and taking cooked food, although cooked and distributed by brahmins, still continues. Opinion, however, seems to vary very much in different places as to whether any loss of caste would result from frequenting a depôt or not. At Sorhari, in Chaurasi, it has been found necessary to build a wall to keep off the rush of persons eager to take cooked food, whilst at Ghonga, in Charra pergunnah, only one person agrees to take relief in that form, though numbers are suffering from want of sufficient food. At the same village an old man, evidently reduced from fasting, even refused to take raw rice, saying his caste would go if he took it; and an old brahmin at another place, after taking a ration of uncooked rice one day, came back the next and said he could not take any more, as his friends and relatives said they would put him out of caste if he accepted our rice. These deep-rooted and ingrained prejudices make it very difficult to deal with those in distress, and is unfortunately not limited to persons of high caste and respectability, but is even indulged in by Domes and Hâris, who, although they do not despise a meal off a dead cow or bullock, in many cases refuse to partake of our nicely-cooked rice, dâl, and salt, on the pretence of its being injurious to their assumed and fictitious claims to caste.

The forms of relief in operation at Roghunathpore are thus described by Captain Samuells, the Relief Officer; the same system is also in force in all the other circles.

1*st.*—*Distribution of cooked food.*—This is prescribed to be the ordinary form of relief at all the poor-houses, and is given daily to all who live within one koss of the poor-house, and who are held to be unfit for work. Some, however, have to be admitted who hardly come under that category; as for instance, mothers or guardians of lean, emaciated children who, being of tender years, are unable to attend the poor-house alone.

2*nd.*—*Distribution of cooked food one day in the week with a 6-day supply of uncooked food.*—This is the form of relief for persons unable to work who live beyond a koss from the poor-house.

3*rd.*—*Distribution of uncooked food.*—This is given to destitute persons of respectable families, and females not used to appearing in public.

4*th.*—*Wages for spinning cotton.*—This form of relief is given to women whose caste feelings and usages preclude them from engaging in out-of-door labor, and who are able to spin. One woman is able to spin a seer of cotton a week, therefore, on being supplied with that quantity of cotton, she receives an advance of 4 annas or four day's supply of food, and on bringing 15 chittacks of thread to the Committee, she receives the balance of her week's wages, namely 3 annas.

5*th.*—*Wages for weaving cloth.*—The cotton that is spun by the women is made over to the weavers who cannot be expected to repay advances; they receive daily wages of 4 pice, and the cloth which they manufacture is the property of the committee.

6*th.*—*Advances to weavers.*—A weaver requiring an advance to carry on his business has to submit to the weavers' committee a sample of the cloth he intends manufacturing, which is valued according to the quality, and an advance made of ¾ths the value of a thân of such cloth is given to him. On delivering the completed thân of cloth to the committee, he receives the remainder of its value.

I visited the Roghunathpore poor-house on the 8th instant; there were then 525 persons receiving cooked food, and I observed that their condition had very much improved to what it was when I inspected it at the end of March last. Most had lost that haggard, wan appearance they formerly had, and were picking up in condition.

At my request the Commissioner has sanctioned a donation of one maund of Government rice being made to each of the chowkeedars in the distressed pergunnahs. These people, from not being able to realize their ordinary dues, are deplorably badly off, and unless assisted in this way cannot properly perform their duties. The same proposition has also been made regarding the ghatwali subordinate officers, but no reply has yet been received. During the last famine, sums of from Rs. 3 to 4 were given to these parties, and as their lands, which are of very small extent, yielded them very little this year, I trust that this proposition will also be granted.

Total expenditure from the district and sub-divisional treasuries as shown in the last narrative, Rs. 95,982-4-5.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 25th May 1874.

Read—

The Manbhoom District Narrative for the fortnight ending 18th May 1874.

The narrative for this district reports a decided improvement in the condition of the people, chiefly caused by the restoration of confidence given by the free distribution of loans to ryots. In the places where these loans have been given prices have generally slightly fallen, but distress is now beginning to be apprehended for parts of the district about which no previous fears existed. Though the crops in these pergunnahs were good, yet the people sold off a good part of their stocks under the stimulus of high prices, and with the usual carelessness of semi-savages, they seem to have wasted a great deal of what remained. Grain is now being moved to the pergunnahs Seepur, Ambikanagur, Raipore, Belaidiha, Simlapal, and parts of Manbhoom and Burrabhoom, and it is confidently hoped that the measures which have proved so successful in the rest of the district will prove no less successful in these pergunnahs. The number of laborers on relief works is increasing, the average number being 13,975 against 10,445, reported in last return, and, as new works are opened, will doubtless continue to increase. The carriage of Government grain is now proceeding rapidly under the stimulus of the high rates introduced by Captain Grant, and out of 82,620 maunds received at Burrakur only 9,932 remained to be distributed. On the 16th instant an outbreak of cholera had to a certain extent impeded the work, but doctors have been sent to the spot and confidence is apparently being restored. The charitable relief operations seem to be successful; 5,451 persons have been relieved, against 5,776 in last return. The cooked food test should not, in the face of the prejudices of the people, be insisted on too severely. The expenditure of the Government grain has been 35,164 maunds up to date, of which 33,618 maunds have been given in loans to ryots. Arrangements should now be made for paying laborers in grain.

No. 3359—S.R.

Copy of Resolution and of the District Narrative forwarded to the Commissioner of the Chota Nagpore Division and to the Deputy Commissioner, Maunbhoom.

No. 182T, dated Camp Hazareebagh, the 18th May 1874.

From—Colonel E. T. Dalton, c. s. i., Commissioner of Chota Nagpore,

To—C. Bernard, Esq., Secretary to the Government of Bengal, Statistical Department, with His Honor the Lieutenant-Governor, Monghyr.

I have the honor to submit copy of Mr. L R. Forbes' half-monthly narrative* for the fortnight ending the 2nd instant.

* No. 355, dated 9th May 1874.

2. Having but recently submitted my own fortnightly narrative, which contained a tolerably full report on Palamow, based on information as late or a little later than that supplied by Mr. Forbes, I have little to add or to comment on. The narrative, so far as it relates to the stock of rice in the country, the condition of the people, and supply of grain in the markets, is all of the same complexion as the intelligence given in my own narrative; but the great influx of labourers to the relief works, which has gone on increasing since the rubbee was harvested and the mowha all housed, demands rather serious consideration. It has risen from 13,610 in April to 17,229—a vast number for the population of Palamow, and is daily increasing.

3. A short time ago the experiment of reducing the labour rates was canvassed by the officers in Palamow, who favoured the notion; but I directed the change should not be made till demand for farm labour commenced. It appears from recent letters that it has commenced; and in a letter received this morning from Mr. Forbes, I am told that they have reduced the daily pay of women and children one pice each. I have just written directing a reduction in the daily pay of all classes employed, and the gradual enforcement of the piece-work system, but still retaining wherever necessary a light labour gang on daily wages. When these orders are carried out, we shall doubtless see a large reduction of cost and improvement in work.

4. We have but a small amount of Government grain in Palamow, and this I am not anxious hurriedly to dispose of for two reasons: *first*, seeing that we have a stock which the traders know we can at any time throw into the market, they will be less inclined to hoard for high prices; *second*, I am to a certain extent pledged to the Palamow merchants not to interfere injuriously with their trade so long as they maintained an ample stock and were not too greedy in their dealings with the ryots. There appears to be no doubt that they have ample stock, and they have not yet shown that they are inclined to be harsh. I propose to make advances of rice to any ryots of Government estates requiring such assistance; but I do not think we can yet afford, or that it would be expedient, at present to pay our coolies in rice.

5. The arrangements made for the relief of the distressed Mahomedan families in Hussonabad are working in the most satisfactory manner. I have noticed this in my last narrative.

6. The expenditure in Palamow has been very high, as relief works were commenced there at an early period. The agricultural classes as well as ordinary labourers gladly availed themselves of this method of subsisting through the months of scarcity, and the officers in the sub-division are now of opinion that they are saving money to subsist on when the agriculturists have to work for themselves.

No. 355, dated Daltongunge, the 9th May 1874.

From—L. R. Forbes, Esq., Officiating Assistant Commissioner, Palamow,

To—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore.

I have the honor to submit herewith my sixth narrative of scarcity and relief in the Palamow sub-district for the fortnight ending Saturday, the 2nd May 1874.

Sixth Narrative of Scarcity and Relief in the Palamow sub-district for the fortnight ending Saturday, the 2nd May 1874, *submitted in accordance with orders contained in Government Circular No.* 80 *of the* 17*th November* 1873.

A.

Abundance or Scarcity of supply in the bazaars.—The Palamow markets continue in the same healthy state reported in my last narrative; there may probably be a slight rise in prices within the next month. This, however, will not arise from any shortness of stock, but will be occasioned by the traders forcing prices up in order to secure good terms for themselves when the time comes for them to give advances in grain to agriculturists.

As regards Belounjah and Japla, Lieutenant Grey has been prosecuting inquiries during the fortnight. He appears to have no fears of grain running short in the markets of Belounjah; but with reference to pergunnah Japla, he writes in his diary of the 24th April:—"It is not so easy to say what may happen in Japla; nearly all the grain in the

market is grown in the pergunnah itself, and the crops have certainly been very small this year. With the Government grain to be stored here, however, I think that all distress will be easily met." On further inquiry, however, he appears to think that there are large stocks of grain in this pergunnah; for in his diary for the week ending the 2nd instant, in writing of Hussenabad, he says:—"I found in the godowns of Dhanu Lall a large quantity of grain. It is impossible for me to say how much, but the natives around me exclaimed, and the word *bahut* was repeated frequently. It is the custom of bunneahs and zemindars to keep a reserve stock of two years' grain, and I think there can be but very little doubt that everywhere there are heaps of grain in the country. Prices are so high because these stocks may have to be encroached upon to some extent; but with such stocks in hand, a failure of crops for one year can hardly cause a famine of grain."

To a certain extent I agree with Mr. Grey in the conclusion he has come to as to there being grain in the country; if there were not, the state of the pergunnah would be far worse than it is. But he forgets that there have been short crops for two successive years; and though zemindars and bunneahs may have a fair amount of grain, I very much doubt whether the ordinary cultivating classes in certain parts of the pergunnah have more than will suffice to carry them through the crisis. The distress everywhere in the sub-district may, I think, be safely said to arise from a famine of labour; for in times like these it is the labouring class, and the very poor among the agricultural and artizan classes—people without credit—who suffer. On the whole, however, I am beginning to think that we shall be able to pull through with safety without having to increase our stock of Government rice in this pergunnah. I shall be able to decide more confidently on this point in my next narrative.

Kind and prices of grain selling at one or more specified and principal marts.—The following table exhibits the kind and prices of grain selling in five of the principal marts. It will be observed that there has been very little change in prices since last fortnight. As long as mowha continues as cheap as it is now, there would be no great cause for anxiety, I think, if rice were selling one or even two seers dearer than it is at present.

Names of Marts.	Quantities per rupee by the seer of 80 tolahs.						
	Wheat.	Barley.	Rice.		Mowha.	Indian corn.	Gram.
			Wholesale.	Retail.			
Daltongunge	12·94	.....	13·	11·75	40·50	15·75	15·75
Garwah	13·	18	12·94	11 56	40·50	17·	15·75
Hussenabad	14·94	.....	12·	10·75	40·	.....	15·
Satherwah	13·50	16·25	12 25	11·75	54·	14·6	14·75
Manka	13·	18·	13·	11 87	54·	15·6	15·75

Information regarding the amount and kind of grain believed to be in stock, &c.—I have already noted Lieutenant Grey's discoveries under this head. Mr. Roberts, Assistant Superintendent, who, during the fortnight under report, was engaged in prosecuting inquiries in that portion of Palamow lying to the east of Daltongunge, and within the jurisdiction of the Lesligunge and Panki outposts, and where, it will be remembered, distress of a severe kind was at one time rumoured to exist, writes as follows:—"From my inquiries from the agriculturists themselves, as well as the zemindars and illaquadars, I have been led to believe that, as a general rule, each family possesses from 3 to 5 maunds* of all kinds of food-grain, and from 2 to 3 maunds of mowha."

* Kutcha maunds of 27 seers bazar weight.

Rainfall.—A few smart showers fell here and there on the 29th ultimo, but none at the head-quarter, though there was a rather severe dust-storm on that day. The weather has been disturbed for a long time, and clouds are constantly hanging about threatening rain, which does not come. The weather is in consequence very close, but cool at night.

State of the Crops.—With the exception of the newly planted sugarcane, there are no crops upon the ground. The mowha flower is still falling from a few trees here and there, and there is now a most promising crop of fruit coming on.

Condition of the people.—From my own observation, and from reports of circle officers, I am glad to be able to give the same cheering account of the people that I did in my last narrative. Thanks to the very abundant mowha crop, the condition of the people generally is far better than I could at one time have ventured to hope for in the month of May. In writing of the tract east of Daltongunge, Mr. Roberts says:—"The general condition of the people at present is nothing distressing;" and again further on he says:—"The people, on account of the failure of bhadoi and kharif, are mainly supporting themselves on the rubbee and the mowha flower, which last, on account of the splendid crop, has been the chief means of preventing extreme distress." Lieutenant Grey too, as I have already said, reports more favourably of Japla, and reduces the really distressed portions of Belounjah to much narrower limits than before.

Actual facts as to any known cases of misery and starvation.—No such cases have been reported during the fortnight.

Grain-thefts and robberies.—Nothing to report under this head.

Condition of any special tract.—There is no tract the condition of which requires special mention. As I reported in my last, work is now available throughout the whole of the distressed tracts; and as far as work is concerned, I should have no fear of the results, even if numbers rose to a very much higher figure than they now are. I am fully prepared to meet a much greater amount of distress than at present exists.

B.—Relief Works.

The relief works now in progress are—

1. Daltongunge road.
2. Chandwa „
3. Behar „
4. Maharajgunge „
5. Garwah „
6. Untari „
7. Manjhiawan „
8. Japla road.
9. Petty irrigation works in Government villages.
10. Baloomath road.
11. Untari and Benares road.
12. Untari and Shahabad „

And the number of labourers on each of the above, according to latest information, is as follows:—

No. 1	.. 480	No. 8	.. 1,573
„ 2	.. 912	„ 9	.. 583
„ 3	.. 2,233	„ 10	.. 3,024
„ 4	.. 1,597	„ 11	.. 568
„ 5	.. 1,264	„ 12	..
„ 6	.. 3,469		
„ 7	.. 1,519	Grand total	.. 17,224

The grand total of last fortnight, as shown in the narrative, was 13,610; there has therefore been an increase during the fortnight under review of 3,614. This is nothing more than I anticipated It was to be expected that in this, the idlest month in the year, the people would flock to the works as soon as their rubbee crops and mowha was housed. There cannot be a doubt, I think, that a large proportion of the labourers could leave the works now and live at home without distress; but the difficult matter to decide is whether they could do so even with pinching till the earlier crops of bhadoi harvest are ready, *i e* whether they possess sufficient food to last from this till then. The reports of all circle officers agree on this one point, that a large proportion of the people now working are not driven to seek it from present want. My own observations and inquiries lead me to accept this as true; but then, again, I feel convinced, from what I know of the people, that the number having sufficient food at home, who have joined the works simply for the sake of the wages, is very few indeed. I believe that the greater portion of them have done so in order to save what little stock of mowha and other grain they may possess for the rains, when field-work on their own account will occupy them, and who, if they stayed at home now and consumed that stock, would find themselves obliged to seek work when they ought to be attending to their fields. I allude to those persons who have joined the relief works during the last month.

Supply of food thereat.—The whole of the relief works are supplied by retail sellers frequenting the different stations. There have been no complaints of short supply.

Condition of the labourers—The condition of the labourers is reported everywhere to be good. Both Lieutenant Grey and Mr. Roberts report them as being in excellent health and spirits, and good condition. More than half of the labourers have been on the works now for upwards of five, and even six months; and their present good condition, therefore, is only what might be expected: and for the rest the splendid mowha crop has worked wonders. The mowha alone, however, would not have sufficed. There cannot be a doubt that the relief works have been the means of saving a very large number of persons from a very great calamity. Had these works not been opened so promptly as they were, I have no hesitation in saying that starvation and suffering must have ensued, and distress of a severe nature would have been more widely spread than it is; for it must be remembered the numbers on relief works by no means represent the sum total of the relief afforded. A very large number of the persons on the works are labourers, who, had it not been for the relief works, would have been entirely dependent on their ordinary employers—a class who are themselves in difficulty, and who would, to a certain extent, have been bound to support them. To this class the relief work has been of incalculable benefit, as it has enabled them to reserve their almost exhausted stocks for the coming agricultural season, when they will be obliged to employ labour and pay in kind.

Mode of payment.—There has been no change in this respect.

Rates of wages.—These continue unaltered.

Arrangement for tools.—Since I last wrote, a consignment of 500 kodalies and 1,000 picks have reached me out of the 4,000 indented for.

C.—Transport of Food.

Approximate amount of private food-supplies.—Importations still continue with vigour, but I have no information as to amount.

Sufficiency or otherwise of the means of transport.—There is no fear of a failure of transport agency.

D.—Storage of Grain at Relief Works.

The following are the places at which grain golahs have been established, and the quantity stored in each, according to latest information:—

Name of Golah.	Date for which figures are given.	Total allotment of Government grain.	Total quantity of grain, exclusive of grain transferred to other districts.	Estimated grain receipts of the ensuing fortnight.	Estimated grain expenditure of ensuing fortnight.

Condition of storage-houses.—Lieutenant Grey has found ample room for the storage of rice in Hussenabad in the godowns of a wealthy mahajun of that place; there is therefore no necessity for going to the expense of erecting a golah there, and the other golahs are in good order.

E.—Advances to Private Parties, and their Results.

The actual results of the advances to native gentlemen for purchase of rice on behalf of Government is exhibited in the statement under heading D. The Deputy Collector has been directed to inquire and report as to the results of the Rs. 3,000 tuccavee advances made to Government farm ryots.

Advances to municipalities.—There are no municipalities in the sub-district.

Advances to private parties for land improvements, &c.—The subjoined statement will show fully the results of the working of the Land Improvement Act.

Progress of work under Act XXVI of 1871 *during the month of April* 1874.

The number of persons in receipt of charitable relief according to latest information is 462. About 80 to 90 of these, respectable Mahomedans of Husainabad, are alone receiving relief in money; the remainder, who consist of persons suffering from infirmities of all kinds, receive relief in food. In Hussenabad only is work being taken in return for relief: in fact this is the only place where persons other than those incapable of doing work are in receipt of relief. Lieutenant Grey writes in the most glowing terms of the working of the relief committee at Hussenabad, and attributes its success to the very great interest taken in the work by the Sub-Inspector of the thana, to whom and Mahamed Abbas, a Mahomedan gentleman of the town, is due the whole of the praise. Lieutenant Grey writes that the amount of work done is astonishing, and that the ladies who commenced with spinning thread are now trying their hands upon carpet-making. Lieutenant Grey, in fact, says that a regular school of industry is springing up, and even now it is so profitable that the actual cost to the relief fund does not exceed 1 pice a head. This is very encouraging. I certainly would recommend that the assistance now being afforded to these ladies be continued until such time as through their own industry they may be able to transform themselves into a self-supporting community. I would add that I have addressed Mr. Charles Davies of Akbarpore, who has held estates in Japla for the last thirty years, to favour me with a short account of the Nawabi families of the place, showing how they came to fall to their present destitute condition. Nawab Ghulam Husain, the founder of the estate, has given a full account of the rise of the family in his "Sarja-ul-mautuqrim," but this is not exactly the information we require.

No. 3347—S.R., dated Calcutta, the 25th May 1874.

From— The Offg. Secretary to the Govt. of Bengal, in the Statistical Department,
To—The Commissioner of Chota Nagpore.

I 'AM directed to acknowledge the receipt of your letter No. 182T, dated 18th May, forwarding Mr. Forbes' Palamow narrative for the fortnight ending on the 2nd May. I am to request that narratives, unless they contain information which should be emergently brought to the Lieutenant-Governor's notice, may, as required by Government orders, be sent to Calcutta.

2. Mr. Forbes' account of the condition of affairs is on the whole satisfactory, although the numbers on relief works have considerably increased. The results of the in-door relief at Hussennabad are very creditable to the local committee, upon which the thannah sub-inspector and Syed Mahomed Abbas are said to be the principal members.

3. With reference to paragraphs 3 and 4 of your letter, I am to say that the Lieutenant-Governor fully approves of your having directed the gradual enforcement of piece-work, and of your having ordered some reduction of daily wages, on the ground that high relief-work wages might keep the farm laborers off the fields.

4. There is one point on which the Lieutenant-Governor does not agree in your view, and that is in regard to paying relief laborers in grain. Since your letter under acknowledgment was written, you will have received the Government orders directing that all relief laborers should be paid and relief advances made in grain, and that cash disbursements should cease as far as possible. The declared policy of the Government from the beginning has been that in districts where Government grain was stored in sufficient quantities, laborers should be paid in grain (directly or indirectly), so as to relieve the pressure on the local food markets. The Lieutenant-Governor relies on you and your officers to carry out this policy as promptly and as fully as you can now that you have sufficient stores of Government grain.

3. With regard to your wish not to interfere injuriously with Palamow merchants, I am to observe that the Lieutenant-Governor considers that as

matters now stand in Palamow, Government grain ought not to be sold to the public, for private traders appear to be maintaining a sufficient supply in the local markets.

No. 3348—S.R.

COPY, with copy of the narrative and the Commissioner's letter, forwarded to the Deputy Commissioner, Lohardugga, and to the Assistant Commissioner of Palamow.

No. 20M.A., dated Calcutta, the 20th May, 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of my No. 16M.A., dated 5th May, 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending 4th May, 1874 I have the honor to submit the Collector's report* for the fortnight ending 16th May, 1874.

* No. 555—S.R., dated 18th May, 1874.

2. I have nothing to add to the Collector's report, and the only remark I have to make on it is that Government has just sanctioned the making of advances to encourage the importation of grain in case this should be found necessary.

No. 555—S.R., dated Kishnaghur, the 18th May, 1874.

From—C. C. STEVENS, Esq., Collector of Nuddea,
To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of scarcity and relief for the fortnight ending Saturday, the 16th May, 1874.

STATE OF THE COUNTRY.

1. The bazars have generally been sufficiently supplied with food-grains to meet the local wants. Rice of common and medium qualities is procurable without difficulty almost everywhere in the district. Exceptions are to be met with in the north of the sudder sub-division, and also in some parts of thanas Jaguli and Tehatta, where it is reported that the local supply is not adequate to the demand. In the first and last named localities the stocks are believed to be particularly scanty. Hitherto supplies have been imported from the Bongong and Meherpore sub-divisions, but it is not impossible that difficulty may be experienced in the rains. I have asked for permission to lend money to encourage imports if such a step may seem necessary. Mahajuns have now freely opened their golahs to the ryots, and considerable quantities of paddy are being advanced by them; opportune falls of rain have encouraged the mahajuns, and they are no longer holding back. Many of the jotedars and well-to-do ryots are still subsisting on paddy which they had stored, and cases are not uncommon in which even such men are selling their surplus dhan. Persons of the better classes, who generally buy rice as they require it, have this year laid up stores in anticipation of famine. This will, I hope, much reduce the strain on the shop-keepers when the time of greatest pressure comes. The rubbee crops have come into the bazars and contributed a little to make the market easy.

2. The adjoined statement shows the kinds and prices of grain selling at some of the principal marts of the district :—

	Common rice.	Medium rice.	Kalai	Moog.	Orhur.	Gram.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Bongong ...	2 8 0	2 12 0	.....	.....	.....	.....
Ranaghat ...	2 10 0	3 8 0	2 4 0	3 4 0	2 8 0	2 12 0
Santipore ...	3 0 0	3 7 0	2 6 0	3 8 0	2 6 0	2 8
Chagda ...	2 13 0	3 6 0	2 4 0	3 0 0	2 3 0	2 8 0
Meherpore ...	2 12 0	3 0 0	.....	.....	.....	.....
Kooshtea ...	3 2 0	3 12 0	2 0 0	2 8 0	2 0 0	2 8 0
Kishnaghur ...	3 2 0	3 8 0	2 2 0	2 12 0	2 0 0	2 10 0

3. The price of rice during the fortnight under notice shows an upward tendency. It is anticipated that the price will now continue to rise. There has been visible rise in the

price in sub-divisions Kooshtea, Meherpore and Sudder, but as regards other sub-divisions the price has been nearly as stationary.

4. No additional information has been received regarding stocks. So far it seems nearly certain that no severe distress will be felt by the inhabitants of any tracts, except those which have all along been recognised as the distressed tracts Accurate information regarding stocks cannot be had, but the steadiness of the market seems to show that there is food enough in the district (if distributed) to feed the inhabitants till the next aous crop is reaped.

5. *State of the crops.*—All the rubbee crops have now been harvested. Boro dhan has also been gathered in certain portions of the district and has yielded a tolerable outturn. The late opportune showers have been of much benefit to the agriculturists. The cultivation of aous dhan (which is reported to be unusually extensive this year) has made satisfactory progress, and the sowings of amun have begun. Indigo and sugarcane have also derived great advantage.

6. Rain has fallen in nearly all parts of the district sufficient for the cultivation and sowing of early rice. More rain is required, and from the present unsettled state of the weather it is to be hoped for.

7. No case of actual misery or starvation has yet been reported here. There has also been no very noticeable increase in grain-thefts and robberies. The total number of grain-thefts reported by the police amounts to four only, two in the sudder sub-division, one at Meherpoor, and the other at Chooadangah.

8. The abkari revenue has not, on the whole, been much affected by the high rise in the price of grain. No remarkable fluctuation in the income has taken place during the fortnight under report in any of the sub-divisions.

9 *Condition of the people.*—The condition of the people here, with the exception of the distressed portions, cannot generally be considered to be bad. Though the rice has reached nearly double the price which it attained last year, the majority of the ryots, living as they do on the paddy lent by the mahajuns, do not feel this increase. Some of the middle-class people, and especially the helpless widows of high caste and of some status in society, have much felt the pressure of distress. The laboring classes who would otherwise have suffered intensely have been provided with sufficient work ; in some portions of the district where distress does not exist, it has even been difficult sometimes to obtain laborers for roads. The weavers are the only laboring class whose condition excites some anxiety. They are being closely watched, and relief will be opened for them as soon as it becomes necessary to help them. At present this necessity has not shown itself. The number of beggars has increased, but to a trifling extent. I am glad to say that private charity is still quite adequate to meet their wants. No persons who can properly be termed famine-stricken are to be seen in the streets. I am assured by every one that the people are generally far better off than they were in 1866 at the same period.

10. *Condition of any special tracts.*—The distressed tracts have been suffering severely from cholera, occasioned, no doubt, by the miserably bad water-supply. The disease has now, however, considerably abated, and the recent rain has provided water for present consumption. In many of the tanks also (both tuccavi and Government) water has been reached and is already available to the villagers Exceedingly little, if any, of the lands cultivated for aous rice will remain unsown for want of seed, but there may be more difficulty as regards the amun rice, since it was that crop which failed in the distressed tracts. The Sub-Committees are gradually extending their relief operations, and are introducing paddy-husking as well as jute spinning, both of which operations are said to be more profitable than cotton-spinning. It has not been necessary to set any of the other Sub-Committees to work. I may as well mention that I am not pressing the house-cess collections much in the distressed tracts.

Relief Works.

11. The construction and repairs of roads are going on except in the case of the kutcha roads of the sudder sub-division, which have been almost entirely stopped ; only a little is being done in one or two places in order to keep women and children employed. The excavation of tanks at Government expense, and of those undertaken by the private persons who have obtained loans from Government, are going on fairly well. The Sub-Deputies and the Overseers are keeping a watch on the tuccavi works, which are, I believe, being honestly and satisfactorily done as a rule I am not now giving any fresh loans, since the season is far advanced, and it is obviously desirable that those works which have been begun shall be completed The number of men employed on Government tanks on Saturday last was 1867, and the total number of laborers employed during the fortnight may be roughly estimated at 7,000.

Transport of Food.

12. The traffic in food-grains, as it appears from sub-divisional reports, has considerably decreased ; some 1,900 maunds of rice have been imported in sub-division Ranaghat, 500 maunds in Bongong, and 400 in Kooshtea. The quantity exported amounts to 2,000 maunds from Kooshtea, 800 maunds from Bongong, and 10,000 maunds from Meherpore. The quantity passing through Meherpore has been exported to the district of Moorshedabad, and that which passed through Ranaghat and Bongong have been exported either to the sudder sub-division or to the other side of the River Hooghly.

CHARITABLE RELIEF.

13. Charitable relief is being extended in thanas Kaligunge, Nakasipara, and Tehatta. The different modes of relief adopted are jute and cotton spinning and paddy-husking. It appears that the Committees are undertaking their duties with some energy, though the members are, as might have been expected, somewhat unequal in this respect. The Debogram Committee has sub-divided its jurisdiction into circles, each of which comprises from 10 to 20 villages. The Muragatcha Committee's sub-divisions are fewer and larger, but I am suggesting that the Debogram plan may be adopted there also. In a short time, when we have to undertake petty village roads and such works, these circles will be of great service. The work has not become sufficiently systematic yet in either division, and I regret therefore that I cannot state the number of persons relieved. I have, however, called for this information, and hope to obtain it in a day or two. I will then, to same time, forward a copy of my communication direct to Government. I have not, I may mention, thought it desirable to place large sums of money in the hands of the Sub-Committees *in the first intance*; for I think it desirable that they should from the first be induced to sift the cases little more than they probably would do if they thought the supply of money was practically unlimited; at the same time funds are not being withheld, and remittances to the Committees will be gradually increased. The Muragatcha Committee has the advantage of having a medical practitioner as secretary; this gentleman (who, I may observe, has been liberal in the other ways,) has been freely dispensing his own medicine, but he has now been supplied out of the Relief Fund with a small stock for gratuitous distribution.

No 3316—S.R., dated Calcutta, the 25th May 1874.

From—J. F. K. HEWITT, ESQ., Offg. Junior Secretary to the Govt. of Bengal,
To—The Commissioner of the Presidency Division.

I AM directed to acknowledge the receipt of your letter No. 20M.A., dated 20th instant, forwarding the fortnightly narrative of the Collector of Nuddea for the period ending the 16th idem. The state of the district continues satisfactory, and in the distressed tracts the recent rainfall seems to have induced the mahajuns to come forward and lend grain to the ryots. The numbers of relief works do not seem to increase, and should the present favorable prospects for the coming crops continue, it may be confidently expected that no very severe distress will be felt in the district.

No. 126, dated Mymensingh, the 15th May 1874.

From—H. J. REYNOLDS, ESQ., Collector of Mymensingh,
To—The Offg. Secy. to the Govt. of Bengal, with the Lieutenant-Governor, Monghyr.

WITH reference to your No. 83, dated the 30th April, and in continuation of this office No. 106 of the 6th instant, I have the honor to submit a statement in the prescribed form up to the 15th May.

2. I have received intelligence of the arrival of the 5,000 maunds of Government rice from Kallygunge, which were allotted to the Dewangunge circle in this district. This grain will be made over to the zemindari omlah of the Patiladaha estate on the following conditions:—

(1) The trustees of the estate will agree to be responsible to Government for the value of the rice at Rs. 3-8 per maund.

(2) The zemindari omlah will engage not to sell the rice at a cheaper rate than 12 seers for the rupee.

(3) They will engage to furnish the Deputy Collector of Jamalpore with weekly statements of all sales that they may effect, so that timely notice may be given in case a further importation is necessary.

3. These arrangements will be completed in a few days, and I have accordingly entered the whole quantity of 5,000 maunds in column 11 of the statement.

4. The importation of this rice had an immediate effect upon prices in the local market. The rice arrived on the 6th May: the price at Dewangunge on that date was 6 pice a seer, which is equal to Rs. 3-12 per maund. On the 7th rice was sold at 5 pice, or Rs. 3-2 per maund.

5. If the weather continues favourable, I do not imagine that any further importation will be necessary. The receipt of this supply has restored confidence: the seasonable rain we have lately had has produced favourable expectations of the outturn of the aous crop, and prices everywhere show a tendency to fall.

6. No relief-works have been opened in the Dewangunge circle, nor is there any prospect that any will be required. No gratuitous relief has been given by Government, and I do not suppose that it will be necessary to give any. The zemindari omlah are quite capable of coping with any individual cases of distress that may occur. All that was wanted was an increased supply of food in the circle, and this has been furnished by the present importation.

Statement showing the Storage and Consumption of Government Grain in the District of Mymensingh on the date nearest the 15th May, for which returns may be available.

1. Name of circle—Dewangunge.
2. Date for which figures are given—15th May 1874.
3. Total allotment of Government grain—5,000 maunds.
4. Total quantity of grain stored, exclusive of grain transferred to other districts—5,000 maunds.

11. Estimated grain expenditure of the ensuing fortnight—5,000 maunds.

MYMENSINGH, H. J. REYNOLDS,
The 15th May 1874. *Collector.*

No. 1539, dated Julpigoree, the 8th May 1874.

From—SIR W. J. HERSCHEL, BART., Commissioner of the Cooch Behar Division,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to acknowledge receipt of your endorsement No. 2767—S.R. of 30th April, on the Lieutenant-Governor's instructions to Major Lindsay in regard to relief works in the south of Julpigoree.

2. In my letter No. 1230 of the 18th ultimo, I brought to the notice of Government the rise of prices in the 4½ tokés of South Boda, and stated generally the measures taken for importing food into them. I proceed now to lay the present state of things before the Government.

A.—STATE OF THE COUNTRY.

3. The supplies of food in the hâts are very low indeed, and the naib of Boda reports that the common people are in great want of food. The rates are as high as 10 seers in the best-off toké, Magoora, the most northern, and 7½ seers in the worst at Mulkadaha, the most southern. The stocks of food in the hands of the people are, I fear, very low too. The jotedars, as a rule, are in the habit of keeping sufficient in hand for their own tenants, and have some resources still; but these are plainly insufficient for the supply of markets on which the people mainly depend.

4. The rainfall, which had been holding back to an extent which has largely affected the local prices, has now been abundant even, it is said, to excess. Considering the sandy character of the soil, the blessing may well be received without question. The crops are reported to have suffered from hail; it cannot have been very serious from what we hear.

5. The physical condition of the people begins to show signs of want of food. At the relief works on the Magoora bund the inspector of relief works reports the appearance of the laborers as robust, but in the southern tokés the inspector of stores has found common people coming to him to beg, whom he relieved at the cost of a rupee. On the Shelgazi bund relief-work the Cooch Behar State overseer reports that the laborers that come in are not in good condition; "repressed by famine" is his exact expression. The naib reports generally that the people are in distress.

6. No cases of misery or of starvation have been heard of. Some cases of want of food in particular houses, reported by the naib or tehsildar, were every one examined by the Deputy Commissioner in person, in the first week of April, but found to be clear exaggeration. The accounts above given are the worst since received, and those are from unrebuked sources (so to call them).

B.—Relief Works.

7. On the occasion of his last visit in the first half of April, the Deputy Commissioner selected three places* for relief works, and impressed the only Department Public Works overseer in the district (the only official of the kind there is in fact) to start them. The great need of overseers was supplied, as far as was possible, by a single man from Cooch Behar, who has been now for a fortnight in charge, having relieved the Department Public Works overseer, whose services could not be spared longer. Rice is sold at the rate of six pice per seer to the laborers. This is $10\frac{2}{3}$ seers per rupee.

* 1. Shelgazi's bund, Mulkadaha.
2. Juggernath tank, Sonahar.
3. Sonahar road and bund.

8. The wages are 3 annas a day for men, 2 annas for women (none of whom however come), $1\frac{1}{2}$ anna for children, of whom a few do come. The number of men on the work has so far been nothing to speak of, but it is steadily increasing.

9. The principal relief-work on which we rely is the Bagdogra feeder, which runs through the centre of the distressed tract from side to side. Another considerable one is getting ready, viz. the Haldibari feeder, running all across Boda from Haldibari (on the Makligunge side) to Pochagur and Magoorah (on the Atwari side). A novice Engineer, Mr. Vivian, is lining it out, and I hope that next week, if work is wanted so far north as this feeder is, employment will be found ready. These two feeders are at an average distance of 11 miles apart.

10. Besides these three, the Deputy Commissioner had already, at the end of March, opened a bund at Magoorah, the northern toké. Here also the numbers are steadily increasing, but show no great pressure. To give an idea of the extent of these works, I reckon them as good for so many mouths.

	Men.	
The Bagdogra feeder in the Julpigoree district, 14 miles ...	28,000	(1 day each).

Mr. Carter's rough estimate—

Shelgazi bund, say	8,000
Juggernath tank	8,000
Kharija Sonahar embanked road	5,000
Magoorah Tangun bund	6,000
The Haldibari feeder, 12 miles	24,000
Total ...	79,000

There is also the railway which skirts Boda at a distance from it of from 5 miles to 1 mile. It is of little or no use as a relief-work at present in Boda, and can scarcely, I think, be made so without demoralising agriculture beyond 3 or 4 miles on either side of it at this season of the year. Later in June or July it may be very useful.

11. These works would, I have no doubt, be sufficient if they were far more scattered. But the experience already gained on the railway and on the district relief-works shows that the great variety of cultivation

going on in Boda—a variety quite exceptional, makes it impossible for the laborers to walk more than two or three miles to the work, and they mostly work only half a day in consequence. I have therefore instructed Mr. Bradbury (the manager of the Chaklajat estates, of which pergunnah Boda is one, and who has gone to Mulkadaha, the worst of the tokés under arrangements which I completed on the 30th of April) to furnish the Deputy Commissioner with a good list of village works showing what headman of each place can undertake the charge, how many men it is good for, and how much rice should be sent to the spot.

12. The inspector of relief-works, an active, young pleader, who has shown some promise in his work so far, is also looking out for openings of the kind, and it will of course be one of the Deputy Commissioner's chief cares in his present tour, on which, under the same arrangements, he is now starting.

13. The Bagdogra feeder (the chief relief-work) has by this time, I hope, been commenced. The work is not at all under my control, but I have urged its being put in hand, and, at the suggestion of the Relief Commissioner of Rajshahye, I have advanced funds to Mr. Carter, who has meanwhile sent his overseer out. I have also arranged with Mr. Carter that rice for sale at 6 pice to the seer shall be stocked on the work, sufficient for the estimated number of men. Enough is stored on the Dabidoba end of the road now to meet all possible calls; there is also ample there and at Mulkadaha and Sonahar now for the three district relief-works. At the Tangan bund the relief inspector reports that local supplies in the hâts are sufficient; the laborers buy there at 10 seers the rupee. A stock is being sent out there, however, sufficient to meet the consumption in future. The stores at Chillahatti are ample to supply the Haldibari feeder during the next fortnight, and are being rapidly replenished.

14. On the whole, I feel that I have not been quite forward enough in the organisation of petty village works. I wish they were ready to start now. As it is, it will be a week before any additions are made. My own inspection of the country in early March led me to think that relief would not be called for before the mouth of June, as the intermediate crops are so good and many. I freely take all the responsibility, if it shall turn out that I over-valued the resources of an exporting district. I trust it will not prove so, though at present I confess that the strain is greater than I anticipated.

C.—Transport.

15. The total amounts ordered are as follow:—

	Mds.
First fleet from Goalundo	14,000
Second „ „	25,000
From Cooch Behar	1,000

The principal obstacle to starting immediate relief has been the stoppage of the first fleet on the Teesta for want of small boats; the demand of the Government agent at the mouth of the Teesta was very great. The difficulties have, however, been overcome, and 5,000 maunds have been delivered in the golahs, whence they are being issued to relief-works and for charitable relief. The rest of the first fleet cargo is now in our hands at the ghât at Mekligunge, whence it is being delivered to Chillahatti much faster than we can consume it, unless we begin wholesale loans or sales, which I do not think advisable as yet.

16. The second fleet has begun to arrive in the Teesta. Abundant provision of boats has been made for its forwarding. A place has been selected at Ghoramara opposite Debigunge, whence a fair cart-road is in existence to Debigunge. Part of the first fleet has been stopped there in order to get the transport machinery along that line into order, and it has delivered some 700 or 800 maunds at Debigunge successfully. The road is to be improved and repaired by the District Superintendent who is ordered out there. The supply of carts, both in the Ghoramara and Mekligunge line, is abundant.

17. Up to date about 15,000 maunds are believed to have left Goalundo (12,000 reported left, and 3,000 more should be off). The first of these boats are daily expected at Ghoramara, as they were at the mouth of the Teesta on the

28th ultimo, and the river is open for such small boats as were expressly employed for the first lot.

18. The present arrangements on the river and on land make it, I think, quite safe to reckon on a continued arrival of 600 maunds a day in the golahs from now till the whole is delivered. If the stocks accumulate at Ghoramara, (to which place the whole of the second fleet are coming) it will be easy to double the carriage. The last 1,000 maunds is now coming across from Cooch Behar.

19. *Storage in Golahs.*—The quantities now stored are as last reported three days ago—

	Mds.
Mulkadaha	700
Sonahar	0 but by this time probably 500 maunds there.
Debigunge	700
Chillahati	4,300 being pushed down.
Magoorah	0 with all urgency to the south and to Magoora.

This is besides expenditure already taken place on relief-works by sales, probably some 100 maunds or so, and on charitable relief, which is probably some 50 maunds.

20. Till some such quantities as these were stored, it would have been obviously unadvisable to begin any considerable relief measures. Our supplies are now however fairly secure, and the Deputy Commissioner and Mr. Bradbury are doing their utmost to recover the start, a small one I think, which the distress has unquestionably got of us.

Charitable Relief.

21. An allotment of rice in store was made for this purpose by the Deputy Commissioner when he last inspected the tokés in the middle of last month. This the tehsildars have been distributing. But so far none but professional beggars have been reported as applying. The Deputy Commissioner himself found no signs of others, though applying the test of gratuitous distribution. The reports of inspector as above noticed show the signs of an extension being needed, and this Mr. Bradbury is now doing in person—organising local committees. I expect his first report in to-day.

Course of Trade.

22. On the first signs of the increase of distress in South Boda, feeling the insufficiency of our arrivals to meet failing supplies, I consulted the Deputy Commissioner about the best means of encouraging trade from the north of the district to the south. I authorised him, if other means failed, to make advances to residents in the south to enable them to come with their own carts to the north. He was able, however, to induce some baparies of Julpigoree bazar to undertake a venture themselves, and this succeeded well enough to lead them to repeat it. The example is now being followed by more regular traders, and if our relief measures are not too ominously extensive in their eyes, I hope to see the trade thus begun take a regular hold on the bazar. The quantities so far sent are only a few score maunds, but the difficulty is great to persuade the rice-owners that our stocks will not feed the whole population. As I mentioned in my previous report (dated 18th ultimo), they are calculated (besides the reserve) to feed one-fifth of the whole population for two months (15th June to 15th August). The population of the whole of Boda is 140,000, area 475 square miles. The area over which distress was thought likely to spread is 250 square miles, containing a population of about 75,000; of this area, not more than 100 square miles is at present in distress. Its population is probably not over 25,000, so that by the end of the present week I hope the Deputy Commissioner will be in a position to issue, if need be, a maund of rice to every house in the place, whether by sales or by loans.

P.S.—A sketch map is herewith enclosed.

ENCLOSURE NO. TO THE 18TH SPECIAL NARRATIVE.

Return of Men, Women, and Children employed on Relief Works in Districts of Rajshahye, Patna, and Bhagulpore Divisions for the Fortnight ending 21st May 1874.

J. E. T. NICOLLS, *Col., R.E.*,
Secy. to the Government of Bengal,
Public Works Department.

APPOINTMENT OF A SPECIAL COMMISSION TO INVESTIGATE THE INFLUENCE OF THE PRESENT FAMINE ON THE PREVALENCE OF DISEASES.

No. 2874—S. R., dated Calcutta, the 4th May 1874.

From—The Offg. Secy. to the Govt. of Bengal in the Statistical Department.
To—Dr. J. M. Coates, Sanitary Commissioner, Bengal.

I am directed to forward copy of a memorandum received from England, indicating the the points on which it will be well to make observations during the present famine in Behar and Northern Bengal. I am to request that you will arrange to visit the worst* famine districts in order to consult with the local medical officers, and to issue distinct instructions to each of the civil medical officers as to what they are to observe, and how they are to record and report their observations.

* Tirhoot. Chumparun. Dinagepore. Rungpore. Maldah. North Bhagulpore.

2. During your tour you should enquire into the sanitary state of the relief-works and of the relief-houses. Any recommendations or suggestions you may have to make should in the first place be communicated verbally, and then forwarded in writing from time to time through the Magistrate-Collector to Government. The Lieutenant-Governor is aware that you have had some previous experience of famine affairs, and that you take much interest in the subject. He hopes, therefore, that you will do the best that the time and season permit, both for regulating the sanitation of relief operations, and for observing the circumstances of the diseases which may follow in the way of famine.

MEMORANDUM.

I. On the summons of the President of the Royal College of Physicians, the following gentlemen met at the College building in Pall Mall on Tuesday, March 24th, *viz.*,—Sir George Burrows, B.T., F.R.S., President of the Royal College of Physicians; Dr. F. J. Mouat, formerly Inspector-General of Prisons in Bengal; Dr. J. Fayrer, C.S.I., Surgeon-Major in Her Majesty's Bengal Army; Dr. J. M. Cunningham, Sanitary Commissioner with the Government of India; and Dr. Murchison, F.R.S., Physician to St. Thomas's Hospital, and formerly of the Bengal Medical Service.

II. A communication was read from the most noble the Marquis of Salisbury, Secretary of State for India in Council, addressed to the President of the Royal College of Physicians, suggesting the propriety of instituting some investigation into the pathology of the fevers and other diseases consequent on famine, and requesting the assistance of the President, in connection with Dr. Cunningham, in drawing up instructions for the guidance of the officers who may be hereafter selected by the Government of India for the conduct of the inquiry.

III. After some discussion it was unanimously agreed—

1*st*.—That the present unhappy calamity in India ought not to be permitted to pass without obtaining a complete and scientific record of the diseases and deaths caused by famine in India, which would be calculated to throw light upon the pathology of many important diseases, and could be referred to for information and guidance on future occasions.

2*nd*.—That it would be desirable to appoint a commission composed of carefully selected officers of the Indian Medical Service, whose sole duty for the time should be to investigate the influence of the present famine on the prevalence of diseases.

3*rd*.—That it would not be expedient to fetter the operations of such a commission with any specific code of instructions, but that their investigation should have special reference to the following points:—

(*a*).—The nature of the fevers prevalent in the populations suffering from the famine, careful records being made of their symptoms (including temperature) from their commencement to their termination, in their varieties as well as in typical cases, of their rate of mortality, of their *post-mortem* appearances, of facts bearing on their contagious or non-contagious character, and of all circumstances tending to show how far any fevers are in their origin due to the famine; whether the ordinary fevers of the locality have been merely increased in prevalence, or any new fevers have appeared.

(*b*).—Whether any increase or modification of type of cholera, dysentery, diarrhœa, or other epidemic diseases, can be traced to the famine.

(*c*).—Whether any maladies, or modifications of any maladies, can be traced to special articles of food, such as new rice (*i.e.*, rice soon after the crop is cut) or of any substances which are not commonly eaten.

(*d*).—Whether the diseases or the modifications of them, which may appear to result from the famine, call for any special dietetic or therapeutic treatment.

No. 1799, dated Calcutta, the 22nd May 1874.

From—A. O. HUME, ESQ., Secretary to the Government of India, Department of Revenue, Agriculture and Commerce,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I AM directed to enclose a copy of a despatch from the Secretary of State, No. 8, dated 10th April 1874, and its enclosure, on the subject of the appointment of a special commission to investigate the influence of the present famine on the prevalence of diseases, together with a copy of a note thereon by the Sanitary Commissioner with the Government of India.

2. A copy of the memorandum prepared by the President of the Royal College of Physicians has been already communicated to the Lieutenant-Governor by His Excellency the Viceroy, and His Excellency is aware that the Sanitary Commissioner of Bengal has been already instructed to visit the worst famine districts, in order to consult with the local medical officers and to issue distinct instructions as to the points to be observed and the method to be adopted in recording observations.

3. Dr. Cunningham, who was present at the meeting at which the desirability of appointing a special commission "to investigate the influence of the present famine on the prevalence of diseases" was discussed, has explained that when the proposal was made "it was supposed in England that wide-spread distress over a large area in Bengal was inevitable, and that, in spite of all the Government could do, the people must suffer more or less from famine and from the diseases consequent on famine." Fortunately such a state of things does not exist, and His Excellency therefore agrees with Dr. Cunningham that there is "practically no opportunity of studying the points suggested," and that, consequently, the appointment of the proposed commission is at present unnecessary. Inasmuch, however, as a condition of things may at any moment arise in which the appointment of the proposed commission would be desirable, His Excellency requests that His Honor the Lieutenant-Governor will take whatever preliminary measures are possible with a view to inquiries being instituted, such as are suggested in the memorandum, in the event of the possibility of conducting such inquiries unfortunately arising.

4. His Excellency approves generally of Dr. Cunningham's suggestions, and would feel obliged to His Honor the Lieutenant-Governor if he would instruct the Sanitary Commissioner of Bengal to place himself in direct communication with Dr. Cunningham on the subject, in order to carry them out and to make whatever further arrangements may be necessary.

Despatch from the Secretary of State for India to the Government of India,—No. 8, dated 16th April 1874.

THE expediency of instituting some inquiry as to the pathology of fevers and other diseases consequent on famines having been suggested to me, I requested the President of the Royal College of Physicians to frame some instructions for the guidance of the gentlemen who might hereafter be entrusted with such an investigation.

2. I now transmit a copy of a memorandum, which has been prepared for this purpose by Sir George Burrows, in conjunction with several physicians of much Indian experience.

3. I concur in the opinion expressed by these gentlemen that the present occasion should be taken of obtaining, as far as may be possible, a complete and scientific record of the diseases and deaths caused by famine, and I have to request that Your Excellency will take steps to give effect to their recommendation by appointing a Commission of two carefully selected officers to undertake the necessary inquiries with special reference to the points indicated in the memorandum.

Endorsement by the Government of India, Home Department,—No. 107, dated 16th May 1874.

Transferred to the Revenue, Agriculture, and Commerce Department, for disposal.

ENCLOSURE No. 2 TO DESPATCH No. 30 OF 1874.

Note by J. M. CUNNINGHAM, ESQ., M. D., *Sanitary Commissioner with the Government of India, dated 20th May* 1874.

WHEN the meeting in question took place at the College of Physicians, and the suggestions contained in the memorandum were drawn up, it was supposed in England that widespread distress over a large area in Bengal was inevitable, and that, in spite of all the Government could do, the people must suffer more or less from famine and from the diseases

consequent on famine. But no such state of things even now exists; there is no scarcity of food anywhere, and there is thus, practically, no opportunity of studying the various points suggested. I think, therefore, that the appointment of such a special commission as that ordered by the Secretary of State could not at present lead to any results At the same time it is very desirable that the course of events should be carefully watched, and that everything should be arranged beforehand; so that, in the event of scarcity or distress arising in any quarter, the effects on health may be studied at once by those who are competent to undertake the inquiry.

The memorandum prepared at the College of Physicians has been already circulated to some extent among medical officers, and the Sanitary Commissioner of Bengal has been deputed to visit the worst famine tracts, and to issue distinct instructions as to what should be observed. For the present, this will suffice; but if scarcity should occur and bring in its train, as it is sure to do, an increase of disease, and particularly disease of any unusual character, then a more special inquiry will be needed, and two selected officers should be appointed for the purpose as directed. I would suggest that, in the event of this contingency arising, Drs. Lewis and Cunningham, who are attached to my office, should undertake the duty. I have perfect confidence in their doing all that is desired to the full satisfaction of the College of Physicians; and their appointment will have this advantage, that, while they can be quite ready to start at a moment's notice, they will be able to continue their other work until they are really wanted, if they should be wanted at all.

I would not call in their assistance merely because disease happened to prevail. Dysentery, diarrhœa, cholera, and fever prevail more or less every year in Bengal, and may be expected independent also either of any deficiency in the food-supply of the people. It is more especially for the investigation of fevers, and especially of any fevers that may seem to be connected with famine, that I would reserve their assistance. At the same time other circumstances may arise in which their scientific aid may be of great value, and arrangements should be made now, so that it may be promptly rendered if necessary.

I would therefore recommend—

1*st*.—That the orders already given to the Sanitary Commissioner for Bengal should be followed, and that they should be communicated, with the College of Physicians' memorandum attached, more widely among the civil surgeons, so that the matters in hand may be observed not only in the special districts where distress may occur, but also in others where there is no chance of any distress; for it will be important to compare the results in the one with those in the other.

2*nd*.—That Dr. Coates should prepare his more full instructions for the civil surgeons; but, in order that there may be some unity in the inquiry, that they should be drawn up in communication with this office. By this means Drs. Lewis and Cunningham will be able to assist, and also lay the foundations of their own subsequent investigations, should they be required.

3*rd*.—That Dr. Coates should keep me informed every week of the health and condition of the people, making reports at shorter intervals in the event of anything unusual occurring [reports in the usual sense are not required, a mere line from each district will suffice]; and

4*th*.—That if it should appear to me that Drs. Lewis and Cunningham's services are required, I may be authorized to depute them to visit any particular place at once, and make a personal inquiry into disease on the spot without further reference.

No. 3442—S. R., dated Calcutta, the 29th May 1874.

From—J. F. K. Hewitt, Esq., Offg. Junior Secretary to the Government of Bengal,
To—Dr. J. M. Coates, Sanitary Commissioner, Bengal.

In continuation of orders No. 2874—S. R., dated the 4th instant, I am directed to forward, for your information, copy of a further communication, No. 1799, dated the 22nd idem, with its annexures, from the Government of India in the Department of Revenue, Agriculture, and Commerce, regarding the appointment of a special commission to investigate the influence of the present famine on the prevalence of diseases. With reference to the above, I am to request that you will be good enough to act according to the suggestions contained in paragraph 4 of the orders of the Government of India.

2. I am to add that the Surgeon-General has been desired to place at your disposal two medical officers for the purpose of diagnosing and reporting upon the condition of the relief labourers on some of the principal works in Tirhoot and North Behar, and to analyse the condition of the labourers, &c., in the same way as Dr. Birch has already done.

3. Any further arrangements that you may make in communication with Dr. Cunningham should of course be reported for the information of Government.

FURTHER INSTRUCTIONS TO OFFICERS AS TO THE SALE OF GRAIN IN FAMINE DISTRICTS.

No. 3504—S.R., dated Calcutta, the 1st June 1874.

From—C. BERNARD, Esq., Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department,

To—All Commissioners and Magistrate-Collectors in the distressed districts of the Rajshahye, Patna, and Bhagulpore Divisions.

THE Lieutenant-Governor has recently received information that there are large stores of grain at or near some of the railway-stations in Northern India, most of which is intended for transmission to the famine districts.

2. It is probable that much or most of this grain will find its way into the less distressed districts on the banks of the Ganges, where Government grain is not being sold to the public. But some part of these supplies may possibly reach some of the more distressed tracts. The Lieutenant-Governor therefore desires to draw the attention of all officers to Rule (*g*) of the instructions to relief committees, which provides that "sales (to the public) should be stopped as soon as the local trade receives sufficient supplies, and any competition with the local trade should be carefully avoided."

3. If therefore any intending importers ask what is to be the policy of Government, they should be told that if they bring in sufficient supplies to any market where Government sales are going on, those sales will cease in such market from the date of the actual arrival of the supplies until "a serious deficiency of supplies" is again apprehended. The action of all Magistrates and sub-divisional officers must be in accordance with this principle; where sufficient supplies come into a market, Government sales therein must be stopped, but they must be resumed when apprehension of serious deficiency again arises.

4. The Lieutenant-Governor must leave it to the discretion of Magistrates, and sub-divisional officers acting under the Commissioner's orders, to decide when "*sufficient* supplies" have been brought into any market or tract where there was previously a serious deficiency. The range of prices will be one among the several tests of such sufficiency or insufficiency. The requirements of the poorer and middle classes must always be borne in mind; and it must not be forgotten that the sale of Government grain to the public is one of the means for giving the people the benefit of the arrangements which the Government has made for averting the consequences of the scarcity.

H Price of best rice in the interior ranges from 11-8 to 14 seers, and of common rice from 11-8 to 17-14 seers per rupee.
I In the interior prices range as follow:—Wheat from 12 to 13 seers, best rice from 8 to 9 seers, common rice from 10 to 11 seers, and gram from 14 to 17 seers per rupee.
J In the interior the price of best rice ranges from 8 to 9 seers and of common rice from 9 to 12 seers per rupee.
K In the interior the price of best rice ranges from 11 to 12 seers, and of common rice from 12 to 16 seers per rupee.
L Large purchases and stormy weather prevailed since last week hence the rise in prices.
M In Patuakhali best and common rice at 14-4 seers per rupee.
N The price of rice has risen generally all over the district, in consequence of the rise in the river having afforded facilities for exportation. Large quantities of rice have been exported during the last week from almost every mart, and the dealers are unwilling to sell, in expectation of a further rise.
O In the interior the price of best rice ranges from 13 to 15 seers, and of common rice from 16 to 19-8 seers per rupee.
P In the interior the price of best rice ranges from 15 to 16 seers, and of common rice from 16 to 17 seers per rupee.
Q In the interior the price of best rice ranges from 13 to 16-8 seers, and of common rice from 15 to 21-4 seers per rupee.

Rainfall, Weather and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 30th May 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL			
	Western Districts.		
BURDWAN DIVISION. 1	Burdwan, 2nd* June 1874	2·41	Rain has fallen freely in all parts of the districts but Jehanabad. The standing crops, cotton and teel (oil-seed), have been benefited thereby; sowing of aous or early paddy progressing favorably. Fever as before. Cholera prevalent in the west of the district.
2	Bankoora, 30th May 1874	2·70	Heavy showers fell on different dates throughout the district. Temperature much lower. The general rain has rendered cultivation everywhere possible. The aous or early paddy is being sown and ploughing progressing. Indigo is flourishing. Small-pox and cholera still prevalent.
3	Beerbhoom, 30th „ „	2·06	Damp and cool. Rain has fallen. Prospects improved by the change in the weather, which enables the cultivators to commence ploughing. No crops on the ground except teel (oilseed), which is being gathered, proving about a 6-anna crop. Exportation by rail for week ending 23rd May, 2,866 maunds, chiefly to Bhagulpore Division. Prices shew a downward tendency.
4	Midnapore, 30th „ „	03 6	Only a third of an inch of rain fell in the Sudder Station, and at Tumlook; nearly a full inch at Garbetta and Contai. News from the north-west of the district show a copious rainfall, and the rivers are rising. Rain has fallen most copiously where it was most needed, viz. all along the north. Ploughing there is going on freely, and the prospects are wonderfully improved, especially aous or early rice and amun or late sowings and indigo. If more rain falls by the 10th June the prospects of the season will be good.
5	Hooghly, 30th „ „	·71	Cloudy and stormy. Wind from south and south-east. A heavy shower commenced on the evening of the 30th May. Three inches of rainfall between four and five that evening; good for crops, but the Collector fears injury to Government grain in transport.
	Howrah, 30th „ „	·50	There was a little rain on the 25th and 26th May throughout the district. Weather sultry and at times cloudy; wind generally from the south. The ryots have finished reaping boro paddy. They are sowing aous or early rice, and preparing lands for amun or late rice; but rain is still wanted; the rain has not been sufficient. Shampore, Khanacool, and Jugutbullubpore complain of want of rain. Sugarcane, jute, and teel (oil-seed) are also suffering for want of rain.
	Central Districts.		
PRESIDENCY DIVISION 6	24-Pergunnahs, 2nd† June 1874.	1·02	Days hot, evenings generally cloudy, and nights close. Rain has fallen throughout the district during the week, and, except in Diamond Harbour and Satkhira, the showers have been heavy. These have done much good; the early rice and jute sowings have now nearly been completed. A few deaths from cholera reported from thanas Bankipore and Muthoorapore. The disease has abated in thana Hurwah, but a few cases are still reported from Baduria. Fever continues in Barripore.
7	Nuddea, 30th May 1874	2·38	There has been generally sufficient rain for the present. The rice and indigo are getting on very well. The Collector has heard that a little early rice has been sown a second time in consequence of the failure of moisture, but this was very exceptional. So far prospects, on the whole, are good. Prices, however, are continuing to rise slowly. Cholera has almost disappeared.
8	Jessore, 30th „ „	2·42	Cloudy, with thunder and lightning and showers of rain, which have been very general throughout the district. The copious rainfall amounting in some places to as much as four and five inches during the week has been very beneficial. There is, however, some fear, owing to the lateness of the sowing, of injury from early inundation, especially to indigo and rice, should the rivers rise early this year. There has been a very marked rise in prices throughout the district during the week.
RAJSHAHYE DIVISION. 9	Moorshedabad, 23rd „ „	3·16	Rain on three days of the week, and heavy clouds throughout. Temperature somewhat cooled. The seedlings of both the early and late rice are looking extremely well. The heavy storm reported last week passed over a large area; much harm was done to mangos, a very large number of which were blown down. Prices have not risen much since the last report, excepting at Rampore Haut, where there has been a considerable rise. Cholera and small-pox still prevalent in parts of the district.
10	Dinagepore, 30th „ „	3·32	Rain general throughout the district. The boro paddy nearly all cut; the crop is a very good one. The rain has done immense good to the bhadoi or early crop, which was in some parts beginning to suffer from want of moisture.
11	Maldah, 30th „ „	2·71	Cloudy and rainy, cool easterly winds. There has been rain throughout the district; the only place where it has not been sufficient is Thana Kaliachack. The bhadoi or early crop now promises to be a very good one. Coarse rice is cheaper—12 seers for the rupee.

* Telegram of the 2nd June, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 2nd June, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)			
	Central Districts.—(Contd.)		
RAJSHAHYE DIVN.—(*Contd.*) 12	Rajshahye, 30th May 1874	6·02	There has been heavy rain all over the district on several days since the 24th May. The rain of the last five days has made a material change in the prospects of the growing crops, the condition of which is now most hopeful. In some of the lower lying parts of the district, there has been as much rain as is needed at present, and a further fall, without an interval of dry weather, will not be beneficial to the growing plants, and will also interfere with ploughing. The boro paddy is still being reaped. In the north-west of the district this crop was a good deal injured by a heavy storm of wind and rain of some seven hours' duration on the 24th May. In a few places prices have risen slightly during the week, the effects of the late rain not having been felt as yet. Cholera and small-pox have considerably abated.
13	Rungpore, 30th „ „	5·90	Heavy storms and much rain all over the district. The rain has done much good to the rice crop. Millet is being harvested, and the early rice is being cut in many places and brought to market. Much damage was done in the south to the millet and rice for want of rain, but now matters are improving; some early rice has been destroyed by inundation from the Brahmaputer river. Prices still high, Rs. 5 to 6 per maund.
14	Bogra, 30th „ „	4·53	Seasonable. Prospects of the early rice good.
15	Pubna, 30th „ „	8·68	Heavy rain on 23rd, 24th, 25th, and 27th May. The clouds have, however, at present cleared off and the weather seems to have set in fair. The late rain has been very favorable to cultivation; sowing of aous or early rice and early amun or late rice is going on vigorously. Some of the young plants in the low lands are said to have suffered from too much rain. The aous or early rice already sown looks very well. Health of the district good.
COOCH BEHAR DIVN. 16	Darjeeling, 30th „ „	1·04	In the hills there have been good showers daily throughout the week. In the plains there have been frequent rains. The Indian-corn in the hills looks very well and a splendid crop is hoped for. Potatoes are not so promising, but no serious complaints are heard of it. The rain has done great benefit to the crops in the Terai. The bhadoi or early rice promises well, and rapid preparations are being made for the later crops.
17	Julpigoree, 30th „ „	7·26	Hot, sultry, with occasional storms. Rain has fallen. Kowni (millet) good. Bhadoi or early rice progressing very favorably. Jute promising.
	Cooch Behar, 30th „ „	5·70	Cool for this time of the year. Several thunder storms. Rain has fallen. Reaping cheena (millet) is nearly over, reaping kowni (millet) is going on; the harvest of both is good. Aous or early rice prospects very good. The earliest kind is being reaped in the south.
	Eastern Districts.		
DACCA DIVISION. 18	Dacca, 2nd* June 1874	6·23	Rain has fallen. Weather very hot last four days. State of crops very good. The only fear now is, a too sudden rise of the rivers.
19	Fureedpore, 30th May 1874.	9·74	Nearly ten inches of rain fell during the week at the head-quarters, and the accounts from every part of the district show that heavy rain has been general. The rain has done much good to the country; sowing everywhere, excepting in the very high lands, about ¼ of the entire area of the district, have been completed; should the bright dry weather now being experienced continue for two or three days longer, the area remaining to be planted out will be finished. Price of coarse rice has fallen slightly at Fureedpore on account of larger imports, remains the same at Madareepore and Bhanga, and has risen slightly at Goalundo and Gopalgunge; the rise is in consequence of large purchases having been made, and at Goalundo the stormy weather having prevented the native craft from venturing on the river.
20	Backergunge, 23rd May 1874.	Nil	Very hot. There has been rain in some parts of the district, and where this has occurred, the crops are good; for instance, the crops are generally good in Dakhin Shahazpore and in the Mendigunge Thana. In the former place, and also in some other parts of the district, the high tides have partially made up for the want or insufficiency of rain. In Gournadi Thana and in the country round about Burisal the prospects are unfavorable.
21	Mymensingh 30th May 1874.	3·35	Rain on five days of the week. The weather is fine and seems likely to continue so at present. The river has risen very much. The condition of the crops is good, and the rain has had a beneficial effect; but the unusual rise of the river causes some apprehension that the aous or early crop on the low chur lands will be inundated and destroyed.
22	Sylhet, 23rd May 1874	5·20	Heavy rain and severe storms all over the district; weather hot at the latter end of the week. The crops on the low land are slightly injured through the heavy rains lately. Boro paddy cut, outturn very good. The sowing and transplanting of the early and *kataria* crops progressing. About 3,500 maunds of rice, 10,000 maunds of paddy, exported during the week. District on the whole healthy.

* Telegram of the 2nd June, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)			
	Eastern Districts.—(*Contd.*)		
Chittagong Divn. 23	Chittagong, 23rd May 1874.	1·20	A good fall of rain, with wind; thunder and lightning at Sudder Station on the morning of the 22nd. In other parts of the Sudder Sub-division rain fell on various dates within the week. None reported from Cox's Bazar up to 20th. Weather otherwise breezy and very hot. The rain has done much good to the young paddy. Ploughing going on actively. Cholera still very prevalent all over the district.
24	Noakholly, 23rd May 1874	0·3	Weather hot; storm and rain on the 22nd May. Sudharam.—The moong (pulse) have yielded and the chilly crops are expected to yield an average produce of 8 annas, and the sesamum (oil-seed), not yet ripened, 4 annas. The sowing of the aous or early paddy is progressing and the land is being ploughed for sowing the amun or late rice. Bamney.—The sowing of the early rice is completed and that of the late rice commenced. The plants are doing well. Sundeep.—Rain has done much good to the young early rice. Luskerpore.—The sowing of the early rice completed and that of the late rice commenced; about 12 annas of the moong (pulse) reaped; the chilly and sesamum (oil-seed) are doing well. Begumgunge.—Reaping of the chilly nearly completed, sowing of the late rice commenced and that of the early rice completed. Crops look well, but require more rain. Ramgunge.—Sowing of the early rice completed, that of the late rice progressing. Moong (pulse) and chilly reaped. Sesamum (oil-seed) getting on well.
25	Tipperah, 30th „ „	9·87	Very heavy rain, violent storms, looks like the commencement of the rainy season. Most of the early and late rice has been sown; as far as the season has gone, nothing can be better than the prospects of these crops.
26	Chittagong Hill Tracts, 23rd May 1874.	.....	Cloudy and sultry. No change to report. Sowing still going on.
	Hill Tipperah, 23rd May 1874.	Nil	There has been no rain at Head-quarters during the week, but there has evidently been some in the interior, as the air has been cooler than before. More rain is very much wanted. Ploughing is still going on, and about head-quarters the young paddy is coming up about 4 or 5 inches above ground. In some places it looks withering and dried up from want of moisture, but there is every appearance of rain coming shortly.
BEHAR.			
Patna Division. 27	Patna 1st June 1874 ...	Nil	Hot, with strong east wind. No rain at head-quarters, but slight falls have been reported from different parts of the interior. The cheena (millet) is being cut. No other crops on the ground. Health of the district good, though cases of small-pox are still reported from the city.
28	Gya, 30th May 1874	·07	Hot. No crops on the ground except sugarcane. Rain much wanted. Health good. Small-pox still prevails.
29	Shahabad, 30th „ „	Nil	Prevailing wind east. Very hot weather, at times threatening; a little rain fell on Sunday the 24th May, and some hail to the north-east of the district. No change since last week. Sugarcane, cheena (millet) and vegetables on the ground are doing well. Mango crop promising. Rain required to commence ploughing for the bhadoi or early crops. Small-pox still prevalent.
30	Tirhoot, 30th „ „	0·9	Excessively hot, east wind prevailing. The rainfall in the Hajeepore Sub-division was too partial to do much good to the crops, except those in the chur lands. In the high lands it will have done more harm than good by caking the ground. The low-lying moong (pulse) and paddy will have benefited by it. In the Mudhoobunnee Sub-division 1·06 inches of rain fell and has done much good to the paddy and bhadoi or early crops, as well as to the indigo crop. The people have commenced to sow paddy in low land, but more rain is wanted soon. No report has been received from Durbhunga and Tajpore Sub-divisions. Want of rain is much felt in the Sudder Sub-division. At Seetamurhee Sub-division station the rainfall was 0·82. An inch of rain fell at Dynchapra and two inches at Syedpore on the 23rd May, and half an inch at Amoon and Seetamurhee; on the 25th May also three-quarter inch fell. The rain has done great good; sowing is going on extensively. Many of the petty ryots have deserted relief works for their own fields. Prices remain stationary. Cholera has broken out in some parts of the town of the Sudder Sub-division.
31	Sarun, 30th „ „	Nil	Hot and clear, with occasional clouds. East wind prevailing. From Police and Sewan Sub-Divisional Officers' reports it appears that on the 25th May there was a good fall of rain within the jurisdiction of thanas Baragaon and Dorowlee and over the northern and eastern portions of thana Sewan, and slight rain in Dorowlee. The rain has been of very great benefit to the crops, where the fall was sufficiently heavy, and, will enable the ryots of those parts to sow the remaining lands for the bhadoi (early) crops. The sub-divisional officer adds that kodo and other seeds, which were sown in anticipation of rain, will not germinate well. In other portions of the district, however, there was no rain, though it is most anxiously looked for. The continued drought and excessive heat are proving very injurious to all crops. Indigo prospects continue to be unfavorable. Cheena (millet) in various stages of growth. A large number of mangos have been blown down by the recent high winds. Agricultural operations altogether suspended. Prices steady.
32	Chumparun, 30th „ „	1·50	Rain on the 23rd, 25th, and 29th May. Temperature much lower since the rain. East winds. The rain was more or less general throughout the district, and has been of great benefit to the paddy and bhadoi or early sowings, which are now being pushed on briskly.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)			
Bhagulpore Divn. 33	Monghyr, 30th May 1874	1·67	Strong easterly winds; heavy rain on the 23rd and 25th May. Weather cool and cloudy. Very little on the ground. Ploughing is going on actively. If more rain comes within a week, a vast area will be sown down.
34	Bhagulpore, 2nd* June 1874.	·58	On 23rd, 24th, and 28th May rain over all Muddehpoora and north and east parts of Soopool Sub-divisions; very favorable to all crops and cultivation. Ryots engaged in cultivating. Cholera reported from Kootri. Health elsewhere very good.
35	Purneah, 30th May 1874	0·36	Warm, strong easterly winds. Rain general throughout the district on the 23rd, 24th, and 25th May. The bhadoi or early sowings are everywhere going on briskly. The rains, especially heavy in the Arrareah, Kusba Amour, and Kissengunge divisions, have benefited the crops immensely. More rain is wanted in the Sudder Sub-division, where the rainfall has been slight. Kowni (millet) harvested, and is giving a fair yield. Very little sickness reported.
36	Sonthal Pergunnahs, 30th May 1874.	1·21	Pretty constant shower and heavy clouds; temperature variable; intensely hot before showers, and cool after. Wind in the beginning of the week with thunder and lightning. Still dry at Godda. A little rain at Rajmehal and a little more at Deoghur. Ploughing going on fitfully; ground still hard. Sowing begun. 29th and 30th May clouds all gone. The sun is bright and hot, but the breeze not so hot.
ORISSA.			
Orissa Division. 37	Cuttack, 2nd* June 1874	.....	Rain and storms in several places on 29th and 30th May. Ploughing actively progressing. Cholera in a few places. Public health generally good.
38	Pooree, 23rd May 1874	Nil	Hot and occasionally cloudy, but no rain. The harvest of the dalua rice has been very nearly completed and the crop is good. Cotton is being gathered with a fair outturn. Mangos are ripe, but the crop is poor. Agricultural operations are at a standstill, and sowing of the paddy has not yet been commenced for want of rain, which is urgently required. Sugarcane is doing well. Purchase of rice for export continues on a moderate scale, and prices are almost stationary. Public health generally good.
39	Balasore, 30th „ „	·54	Cloudy, with wind and rain. The week has been marked by timely and useful showers. Tillage is progressing vigorously. Cultivators are everywhere ploughing in their manure, except where early rice is being sown. Cholera disappearing.
CHOTA NAGPORE.			
	South-West Frontier Agency.		
40	Hazareebagh, 30th May 1874.	1·33	Storms. Rain has fallen. Sowing has commenced, and has been greatly facilitated by opportune storms, which have fallen generally and heavily throughout the district during the week. The people are deserting the Government works for their own cultivation. Works are, however, still being carried on.
41	Lohardugga, 30th May 1874.	1·20	Weather stormy with south-west winds; there has been rain on three days during the week. Sowing is going on generally in Chota Nagpore Proper. The late rains will prove very beneficial. Jungle produce is very abundant this year, particularly the serai, or fruit of sál tree, which is largely consumed by the poorer classes. Small-pox is still very prevalent in parts, but otherwise the general health is good. Prices appear to have a tendency to fall.
42	Singbhoom, 30th May 1874.	1·54	Cooler and cloudy. Heavy rain fell on the night of 26th May, sufficient for all field operations, which are going on all round.
43	Manbhoom, 30th May 1874.	·69	Stormy with occasional showers of rain. The showers of rain which have fallen have been welcomed both by man and beast. They have cooled the atmosphere, refreshed the withering grass, and checked the ravages of cholera, and have enabled the cultivators to plough and sow the early crops, and given hopes and restored confidence for the future. More rain, however, is wanted to enable the crops which have been sown to germinate freely. Cholera is still bad in some villages, but has abated in those between Barrakun and Raghoonathpore, where it first broke out.

* Telegrams of the 2nd June, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

• Velocity of wind in miles per hour.

CALCUTTA,
The 30th May 1874.

W. G. WILLSON,
Offg. Meteorological Reporter to the Government of Bengal.

Abstract of Observations as received in the Meteorological Office, Calcutta, during the month of March 1874.

N B.—The barometric data are reduced for temperatures and not for height above sea-level.

STATIONS	Height above sea-level.	BAROMETER. Mean of: Mean.	4 hours.	10 hours.	16 hours.	22 hours.	Range	RADIATION. Solar: Mean.	Max. Day.	Max. ⊖	Grass Nocturnal: Mean.	Min. Day.	Min. ⊖	TEMPERATURE OF AIR. Mean of max.	Mean daily range.	Mean of min.	Mean.	Mean of: 4 hours.	10 hours.	16 hours.	22 hours.	Highest Max. Day.	Highest Max. ⊖	Absolute range.	Lowest Min. Day.	Lowest Min. ⊖	HUMIDITY. Mean.	Mean of: 4 hours.	10 hours.	16 hours.	22 hours.	RAINFALL. In inches	Number of days.

NOTE.

Barometric Pressure.—The pressures in column 2 of the above table for all stations below 500 feet are reduced from those given in column 3 of the table on the previous page by adding the weight of a column of air of the temperatures given in column 17. For stations above 500 feet elevation the reduction is made by Dippe's tables, as given in Guyot's "Meteorological and Physical Tables." The temperatures at the sea-level are taken from column 3 of the above table.

Temperature.—The temperatures in column 3 are reduced from those in column 17 on the preceding page by adding 1° Fahrenheit for every 450 feet.

Wind Resultant.—The resultant wind direction and its comparative predominance are calculated from the whole number of wind observations recorded during the month. The relative predominance in the direction of the resultant is given as a percentage of the whole number of observations. The direction is computed in the usual way by Lambert's formula.

Serenity.—This column gives the average proportion of unclouded sky; a cloudless sky being indicated by 10, and one completely overcast by 0.

The above, being all comparable, afford the data for constructing a meteorological chart for the month, which shall show the isobaric and isothermal lines and the resultant wind directions, which last may be represented by arrows of varying length, proportioned to the prevalence of the wind. To these may be added the rainfall from the previous tables.

Calcutta,
The 31st May 1874.

W. G. Willson,
Offg. Meteorological Reporter to the Govt. of Bengal.

Results of the Meteorological Observations taken at the Surveyor-General's Office, Calcutta, from 22nd to 31st May 1874.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUTENANT-GOVERNOR OF BENGAL.

REVENUE AND GENERAL DEPARTMENTS.

No. 1746C.S.

GENERAL.—*The 2nd June* 1874.—Baboo Rakhal Das Haldar, Special Commissioner, Chota Nagpore Tenures' Act, availed himself of the leave granted to him under orders of the 25th May 1874, on the afternoon of the 18th idem.

The 8th June 1874.—Baboo Lolit Mohun Chatterjee, Deputy Magistrate and Deputy Collector, on special duty in Patna, is allowed leave for 15 days, under Section 3, Supplement F of the Civil Leave Code, with effect from the 15th May 1874.

Baboo Baroda Das Bose, Canoongo in Jessore, is appointed temporarily to be a Sub-Deputy Collector in that district during the absence on special duty of Baboo Bhyrub Nath Palit, or until further orders.

Mr. Frederick William Joseph Rees, B.A., is promoted to the First Grade of Joint-Magistrates and Deputy Collectors.

Mr. Townsend Molloy Kirkwood is promoted to the Second Grade of Joint-Magistrates and Deputy Collectors, and to continue to act in the First Grade.

The following officers are appointed to act in the First Grade of Joint-Magistrates and Deputy Collectors, viz.—

Mr. Herbert Mosley.
„ Arthur Weekes.
„ Thomas Edward Coxhead.
„ Francis Johnston Graham Campbell.
Mr. James Francis Bradbury.
„ Edward Hardcastle Ruddock, B.A.

The following officers are appointed to act in the Second Grade of Joint-Magistrates and Deputy Collectors, viz.—

Mr. Charles Deslandes Church Winter.
„ John Edward Beevor Jeffery.
„ James Kelleher.
Mr. George Mainwaring Currie.
„ John Charles Veasy.
„ Philip Nolan.

The 9th June 1874.—Mr. James Monro, Acting District and Sessions Judge of Rajshahye, is allowed leave for six weeks, under Section 21 of the Civil Leave Code, with effect from the 1st instant.

Mr. John Tweedie is appointed to act as District and Sessions Judge of Rajshahye during the absence on leave of Mr. J. Monro, or until further orders.

The following gentlemen are appointed to be Relief Officers in the districts mentioned, viz.—

Mr. George Jasper Nicholls, c. s., Dinagepore.
„ W. A. Nedham, Julpigoree.

POLICE.—*The 9th June* 1874.—In supersession of the orders of the 23rd December 1873, Mr. Henry Neville Harris, Acting District Superintendent of Police, Jessore, is allowed one month's privilege leave, with effect from the afternoon of the 24th November, to the afternoon of 20th December 1873.

EDUCATION.—*The 8th June* 1874.—The following Notification is published in substitution of the one which appeared in the *Calcutta Gazette* of the 20th May 1874:—

Subject to the approval of the Right Hon'ble the Secretary of State, Mr. Henry Francis Blanford, Professor, Presidency College, is allowed furlough for twenty months, under Section 10(*a*) of the Civil Leave Code, and subsidiary leave for two days, for the 2nd and 3rd instant.

MEDICAL.—*The 8th June* 1874.—Assistant Surgeon Sree Nath Mookerjee is appointed to have Civil Medical charge of Burrisal from the date on which he relieved Dr. C. E. W. Bensley to that of Surgeon Cameron's joining the station.

Third Grade Assistant Surgeon Bejoy Coomer Chuckerbutty, a Supernumerary at the Presidency, is appointed to have medical charge of the Endemic Dispensary at Shor, in the Burdwán district.

Third Grade Assistant Surgeon Mahomed Wazeer Ali Khan is appointed to Sarun to do duty in connection with relief works, with effect from the date on which he joined that district.

Mr. F. V. B. Webber, Civil Medical Officer, having reported his return to duty from furlough this day, the unexpired portion of the leave granted to him under orders of the 27th February 1873 is cancelled.

The 9th June 1874.—Third Grade Assistant Surgeon Rojonee Lal Set, attached to the Sub-division and Dispensary at Jehanabad, is appointed to the Sub-division and Dispensary at Raneegunge.

Third Grade Assistant Surgeon Obhoy Coomar Sen, of the Aklokey Endemic Dispensary, is appointed to the sub-division and Dispensary at Jehanabad.

Third Grade Assistant Surgeon Suresh Chunder Ghose a Supernumerary at the Presidency, is appointed to the Endemic Dispensary at Aklokey.

Surgeon-Major F. P. Staples is appointed to be Surgeon with the Lieutenant-Governor on tour.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

THE Lieutenant-Governor is pleased to order the publication of the following notification for general information:—

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

The 29th April 1874.—It is hereby notified for general information that three new buoys (iron) have been laid to mark the entrance of the Burabulung or Balasore river, viz. the "outer bar buoy" in 6 feet at low-water, painted black; the "inner bar buoy" in 3 feet at low-water, painted red; and the "Elfin flat buoy" in 3 feet at low-water, painted black.

A vessel bound for Balasore should first make the Balasore buoy shewn on all charts of the head of the Bay of Bengal, then steer north-west for the "outer bar buoy," pass close to south of it, and steer for the red or inner buoy; when this is reached, she should haul up north and pass close to the "Elfin flat buoy," after passing which she can run right into the river mouth.

There is only one foot at low-water springs on this bar, with a rise of tide of 13 feet; owing to the heavy sea which runs here at times, vessels should only cross the bar at high-water.

A beacon, called "Fairy beacon," to be put up on the south side of the river entrance, which will be useful in event of any of the buoys breaking away.

A tidal gauge has been erected opposite Balramghury house, levelled to 2 feet below low-water level of the tide of 23rd February 1874. This gives approximately the zero of driest season of the year; zero on this gauge gives one foot at low-water on Balasore river bar

The Balramghury flag-staff will show the following signals for information of vessels entering the river:—

Ensign at yard-arm	...	...	Vessel leaving river.
„ at mast-head	...	...	„ entering river.
First cones at yard-arm	...	...	Low-water.
Second cones at yard-arm	...	...	High-water

A. BAKER,
Offg. Master Attendant.

[Third Publication.]

NOTIFICATION.

The 21st May 1874.—The following rule for the Port of Calcutta having received the assent of the Governor-General in Council, under Section 7 of Act XXII of 1855, is published for general information :—

Additional Port Rule under Section 7 of Act XXII of 1855.

"Without the permission of the Commissioners, no vessel of, or exceeding 200 tons of burthen, shall move up or down the port through the opening of the Hooghly Bridge, unless such vessel is propelled or towed by steam; and then only at such a rate of speed, not exceeding four miles an hour over the ground, as is absolutely necessary to keep good steerage way."

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 4th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of a portion of the Badshahye road in the direction of Sherpore, pergunnah Sherpore, zillah Moorshedabad, it is hereby declared that for the above purpose three plots of land, measuring, more or less, 35 beeghas, 13 cottahs, and 6 chittacks, and as per boundaries set forth below, are required.

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

First plot, lying in the village of Khanoomahdango, is bounded on the north by an old track, on the east by the river Brahmani, on the south and on the west by an old track.

Second plot, lying in the village of Sayadpore and Faquirpore, is bounded on the north by the river Kana; on the east by the holdings of Ameermol, of Kessare Manjee, Sabroo Shaikh Kalimuddee Mondal, Dilvor, Nidhan Shaikh Noffer Dargohee, Khereat Shaikh, the villages of Sayadpore and Faquirpore, and the river Kana; on the south by the river Brahmanee; and on the west by an old track and the holdings of Ameer Shaikh, Torab, Kalimuddee, Hesab Shaikh, Nidhan Shaikh, Manick Shaikh, Khater Mundle, Kulam Shaikh, Sagur Shaikh, Sooja Mullick, Sadhu Kotal, and the village of Bogroparah.

Third plot, lying in the village of Faquirpore, is bounded on the north by the river Kana; on the east by a portion of the old Badshahye road, which has been encroached upon; on the south by an old track; and on the west by the river Kana.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 8th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up for Government at the public expense for a public purpose, viz. for a road from the village of Plassipara to the boundary line of village Chandghur, pergunnah Plassy, zillah Nuddea, it is hereby declared that for the above purpose a strip of land lying between Chandghur and Plassipara, and passing through the villages named in the margin, measuring 27,684 feet, or nearly 5·243 miles, in length, and 66·72 feet in average breadth, amounting to beeghas 128, kattas 5, chittacks 6¼, is required.

Koolgatchee.	Bijoynuggur.
Shahebnagur.	Plassipara.
Panchdara	

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

H. L. DAMPIER,
Secy. to the Govt of Bengal.

[First Publication.]

DECLARATION.

The 5th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up for Government at the public expense for a public purpose, viz. for a drainage cut, and for a road running alongside for part of its course, starting from the village of Chaltea to that of Rajdhurpara, pergunnah Azimnaggur, zillah Moorshedabad, it is hereby declared that for the above purpose a strip of land passing through the villages as per margin, and measuring, more or less, 14,242 feet in length and 100 feet in breadth, equivalent to 98 beegahs, 15 cottahs, is required.

Chaltea	Gadadhurpara.
Salimpore.	Borodangah.
Kessubhattee.	Rajdhurparah.

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

J. F. K HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 8th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for building bungalows, offices, &c., and for coal and general storage, and for the construction of the line in the villages of Jat Amroal, Beharipore, and Jogodishpore, pergunnahs Amroal and Tucgachee, zillah Rajshahye, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 55 beeghas, 6 cottahs, and 14 chittacks of standard measurement, bounded on the north by the river Atrai, east and south by a nick, and on the west by the temporary land for the construction of the line, is required within the aforesaid villages of Jat Amroal, Beharipore, and Jogodishpore. The plan of the land may be inspected in the office of the Special Deputy Collector of Rajshahye, Nattore.

This Declaration is published under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

J. F. K. HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 9th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for a line of road from Chareya, pergunnah Huwailee, to Bussuntpore, pergunnah Sultanpore, zillah Purneah, it is hereby declared that for the above purpose a strip of land, running from mouzah Chareya to mouzah Bussuntpore, about 26 miles in length and about 46 feet in breadth, more or less, is required,

This Declaration is made under the provisions of Section 6, of Act X of 1870 to all whom it may concern.

J. F. K. HEWITT,

The 2nd June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the Northern Bengal State Railway, from Julpigoree to the Mahanuddy, it is hereby declared that for the above purpose a strip of land, measuring 25 miles, more or less, in length, and 130 feet, more or less, in breadth, lying in villages Koomarpara, Kutwahbeeta, Bamanra, Alee Mohomedpara, Shebgunge Hât, Bhilakapa, Luckeebhecta, Chuterpara, Dhoorunbari, Ghomotabheeta, Pundahpara, in district Julpigoree, is required.

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 26th May 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for a line of road from Baroipara to Hurihurpara, pergunnah Koolberiah, zillah Moorshedabad, it is hereby declared that for the above purpose three plots of land, measuring in the aggregate 33 beeghas, 9 cottahs, 11 chittacks, more or less, as per boundaries set forth below, is required.

The *first plot* is bounded, north by the holdings of Shapool Sheikh, Golam Ashgur, Deenu Ghose, Hosmut Sheikh, Adher Molee, Enait, Jeeku and Ashmut, Jusha Molee, Sheraz Mondle, Fakeer Meraz Neehat, Kangol, Sham Biswas, Kudrut, Woozir Azim, Johuri Sheikh, Shobaz, Menaz; on the south by ditto; on the east by the old track which runs southward through the village of Mahamud Alipore; and on the west by the eastern end of the second plot.

The *second plot* is bounded on the north by the western boundary of the first plot; on the east by the holdings of Kristo Hari Biswas, Kristo Hari and Ramtonoo, Azim, Godadhar, Poresh Roy, Roop Mundol, Kali Manick Shaha, Baool, Jadub Biswas, Mazun Meah, Sreeram Mondle, Doulut, Mukund, Sreeram and Golam, Kristo Lall, Kedar Shah, and Nobeen Ghose; on the west by ditto; and on the south by the village Baran.

The *third plot* is bounded on the north by part of the old track and the holdings of Boyakulee Dafadar, widow of Danish Sheikh, Chunder Shah, Ameer Holshahova, Jadu Shaha. Shukhi Bewa, Jadu Shah No. 2, Gopal Mohoto, Nobeen Dass, Azim Shah, Shefarut Holshahova; on the east by part of the old track; on the south by the dwelling-houses of Ameer Mullick, Dolegobind Rojock, Godhon Shaha, and Begoo Bewa, and of Honso Sheikh; and on the west by the holdings of Dolegobind Rojock and the old track.

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 26th May 1874.—Whereas it appears to the Government of Bengal that land, particulars of which are subjoined, is required for a public purpose, viz. for the Post Office of Kumarkhali, it is hereby declared that for the above purpose a plot of land measuring 10 katas is required.

The land is situated in the district of Nuddea, pergunnah Mohamedshahi, thana Kumarkhali, village Sherkandi, and is bounded on the north, east, and west by the land of Baboo Debendra Nath Tagore, and on the south by the land belonging to the Eastern Bengal Railway Company.

This Declaration is made under Section 6 of Act X of 1870 to all whom it may concern.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

The following order, issued by the Government of India in the Home Department, is republished for general information :—

No. 364.—*Fort William, the* 1*st June* 1874.—*Notification.—Public.*—Privilege leave for two months, with effect from the 27th July next, is granted to the Hon'ble A. G. Macpherson, a Judge of the High Court of Judicature at Fort William in Bengal. This cancels Notification No. 280, dated the 9th ultimo.

The following order, issued by the Government of India in the Foreign Department, is republished for general information :—

No. 1204*P.*—*Fort William, the* 4*th June* 1874.—*Notification.—Political.*—In recognition of the distinguished services which have from time to time been rendered to the British Government in India by the family of Kumár Hárendrá Krishná, of the high character and rare acquirements of his father, the late Rájá Kali Krishná Bahádur, and of the honorable and meritorious discharge by Kumár Hárendrá Krishná himself of his official duties, the Right Hon'ble the Viceroy and Governor-General is pleased to confer upon him the title of "Rájá Bahádur," as a personal distinction.

The following orders, issued by the Government of India in the Financial Department, are republished for general information :—

No. 3540.—*Fort William, the* 3*rd June* 1874.—*Notifications.—Accounts.*—The services of Mr. J. Taylor are placed temporarily at the disposal of the Government of Bengal for employment on special duty in Behar.

Mr. E. W. Kellner is directed to take charge of the duties of the Deputy Accountant-General, Bengal.

No. 3563.—*The* 4*th June* 1874.—His Excellency the Right Hon'ble the Governor-General in Council has resolved to borrow two crores and fifty lakhs of rupees for the public service in the manner following :—

2. Promissory Notes bearing interest at the rate of 4 per centum per annum will be issued for sums of Rs. 500 and for sums above that amount in even hundreds. The form and conditions of the Notes will be those of the Notes of the 4 per cent. loan of 1842-43, of which loan they will form a part. The Notes will be payable to order, and interest thereon will be paid half-yearly on the 1st August and 1st February in each year.

3. Notice is accordingly hereby given that tenders will be received at the Office of the Secretary to the Government of India in the Financial Department from this date to noon of the eighth day of July next, for the whole or part of the above-named sum of two crores and fifty lakhs of rupees.

4. Tenders must be made in the form prescribed below, addressed to the Financial Secretary, Treasury Buildings, Calcutta, and sent in sealed covers superscribed "Tender for loan."

5. Tenders will be opened at noon on the 8th July next.

6. The amount of accepted tenders must be paid by the allottees on the dates and in the proportions following :—

One-fourth on 1st August next.	One-fourth on 1st October.
One-fourth on 1st September.	One-fourth on 1st November.

Any instalments may be paid before the dates fixed above.

7. Payment may be made into any Government Treasury or Treasuries in India that may be named in the tenders.

8. For the second, third, and fourth instalments interest to 31st January will be paid in anticipation of due date.

9. Each tender must be accompanied by a receipt from the officer in charge of any Government Treasury, for a sum of not less than one per cent. on the amount tendered for, or by a cheque on a banker in Calcutta, Madras, or Bombay, or Government Promissory Notes duly endorsed to the Financial Secretary for that amount. The deposit of one per cent. will be considered as in part payment of the fourth instalment; it will be forfeited if the allotment is not fully taken up.

10. Scrip receipts will be issued by the officers in charge of the treasuries at which payment is made by the allottees.

11. These receipts will be exchanged for Promissory Notes as soon as possible.

12. A right of preference will be given to the highest tenders in price. Those below a certain minimum will be rejected. A record of this minimum will be placed in a sealed envelope and opened simultaneously with the tenders. The amount allotted at the minimum rate accepted will be divided among those who tender at that rate in proportion to the amount of their tenders.

13. A list of the accepted tenders will be posted at the General Treasuries, Calcutta, Madras, and Bombay, on an early day after the 8th July next.

FORM OF TENDER.

I hereby tender for rupees of the Loan advertised in the Notification published in the *Gazette of India* Extraordinary of 4th June 1874, and agree to pay for the same, subject to the conditions notified, at the rate of rupees for every hundred rupees allotted to me.

I enclose a *deposit receipt** for rupees , and engage, if my offer be accepted, to pay the several instalments on or before the dates fixed by the Notification, *viz*:—

one-quarter on or before 1st August 1874,
one-quarter on or before 1st September 1874,
one-quarter on or before 1st October 1874,
one-quarter on or before 1st November 1874,
into the Government Treasury at†

*Or cheque or Government Promissory Note.

† Here enter the name of the treasury.

N. B.—A separate tender must be made for each rate proposed, and a distinct deposit must accompany each tender.

SEPARATE REVENUE.—OPIUM.

No. 3565.—*The 5th June* 1874.—Opium Revenue to date compared with the Estimate for the year 1874-75.

Bombay	197,958	210,000	12,042	391,412	450,180	58,768
TOTAL ...	619,833	668,203	48,370	1,657,037	1,783,830	126,793

SEPARATE REVENUE.—STAMPS.

No. 3581.—*The 5th June* 1874.—In exercise of the powers conferred by Section 16 of the General Stamp Act 1869, the Governor-General in Council is pleased to remit the duties chargeable under the said Act on all tenders for any portion of the loan advertised in the *Gazette of India* Extraordinary of the 4th June 1874.

The following orders, issued by the Government of India in the Military Department, are republished for general information:—

No. 573.—*Fort William, the 3rd June* 1874.—Her Majesty has been pleased to appoint the under-mentioned gentlemen to be Surgeons in Her Majesty's Indian Military Forces in the Presidency of Bengal. They are accordingly admitted into the service.:—

Medical Department.

Surgeon Timothy Moloney, M. D.,—date of arrival at Fort William, 25th May 1874.
Surgeon Frederick Robert Swaine, M.B.,—date of arrival at Fort William, 11th May 1874.

No. 576.—*The 5th June* 1874.—The services of Surgeon-Major F. P. Staples, of the Medical Department, doing duty with Her Majesty's 109th Foot, are placed temporarily at the disposal of the Hon'ble the Lieutenant-Governor of Bengal, for employment on His Honor's personal staff.

No. 585.—The following additions and corrections of G. G. O. No. 171, dated 25th February 1874, are notified for general information. Order books to be corrected accordingly:—

To paragraph 1 add the following note:—

"NOTE.—The advantages granted by the furlough rules of 1854 to officers who obtain furlough on medical certificate are not applicable to any officers of the British service whose regiments, battalions, brigades or batteries arrived in India after the date of the Passage Warrant of 1865, and neither those rules nor the furlough rules of 1868 are, *as respects furlough on private affairs*, applicable to British officers serving with their regiments or employed with a five years' tenure in staff situations (see para. 4).

'But officers of the late Indian Army who hold permanent appointments under the Governments of India, and who may have elected to abide by the furlough rules of 1854 in preference to those of 1868, of course retain their election."

2. For the 3rd clause of paragraph 5 substitute the following as clauses 3 and 4 :—

§ 3.—Such officers will be allowed an advance of passage-money, or free passage in a troopship if proceeding in the trooping season, the advance to be refunded on receipt of the balance of furlough pay. The English rate of pay of their rank only will be passed to them during their leave; but at its conclusion, on their presenting an order for them to return to India, the difference between that rate and furlough pay, less the passage-money they have received, will be paid to them in England conditionally on its refund if the order to return to India is not carried out.

Pay allowed them during furlough.

§ 4. Those Royal Engineer officers who arrived in India before the 1st July 1872 are, however, not subject to the provisions of the preceding clause as long as they do not exchange Indian for home service, but draw furlough pay during furlough as others.

3. After clause 4 of the same paragraph (para. 5) add the following :—

§ 5. An officer of the British service holding permanent staff employ under the Government who may proceed on furlough under circumstances which involve the forfeiture of his appointment, must obtain the furlough as a British regimental officer, and it will reckon as a portion of the aggregate eight years of furlough on pay to which an officer is restricted during his service by Rule XVI. But, on again becoming permanently employed, he resumes the right of obtaining furlough under these rules.

A British officer vacating appointment becomes, on re-employment, again eligible to these rules.

4. Instead of the concluding sentence of clause 1 of Rule XXII, following the words "if he possess one," read—

"The aggregate staff salary granted to the acting officer in such cases will not be less than Rs. 100 per mensem unless the full staff salary of the post in which he is officiating is less than that sum."

5. At the end of Rule XXII insert the following note :—

NOTE.—The indulgence granted by § 1 of this rule is only allowed to one *directly* officiating in the place of the officer absent on furlough, not to one acting in the room of an officer who is himself acting for an absentee on furlough.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 1747C.S.

JUDICIAL.—*The 29th May* 1874.—Mr. J. O. B. Sceales, Manager of the Lokepore Indigo Concern, is appointed to be an Honorary Magistrate in the district of Manbhoom, and is vested with the powers of a Magistrate of the Third Class.

The 1st June 1874.—The following officers are vested with powers to try summarily the offences mentioned in Section 222 of the Criminal Procedure Code, viz.—

Mr. William Shaw Rochfort Davis, Deputy Magistrate and Deputy Collector, in charge of the sub-division of Goalundo, in Fureedpore.

Mr. Edward Maxwell Reily, Deputy Magistrate and Deputy Collector, in charge of the sub-division of Atia, in Mymensingh.

Mr. Alexander John Fraser, Deputy Magistrate and Deputy Collector, Fureedpore.

Baboo Parbutty Churn Roy, Deputy Magistrate and Deputy Collector, in charge of the Moonsheegunge sub-division, in Dacca.

The 6th June 1874.—Baboo Kali Das Dutt, Subordinate Judge of Dinagepore, is allowed leave for eighteen days, under Section 8, Supplement F of the Civil Leave Code, in extension of the leave granted to him under orders of the 18th April 1874.

The 8th June 1874.—The following officers are vested with the powers of a Magistrate of the First Class, viz.—

Moulvie Syed Mahamed Mohsin, Superintendent, Hirnee Circle, in Tirhoot.

Baboo Bemola Nund Mookerjee, Superintendent, Hussenpore Circle.

Baboo Baroda Das Bose, who has, under separate orders of this date, been appointed to be a Sub-Deputy Collector in Jessore, is vested with the powers of a Magistrate of the Third Class.

The following officers are vested with the powers of a Magistrate of the Third Class, viz.—

Baboo Indur Behari Singh, Sub-Deputy Collector, Buxar, in Shahabad.

,, Juggessur Singh, Sub-Deputy Collector, Motiharee, in Chumparun.

The 9th June 1874.—Mr. Thomas James Murray, C. S., is appointed, under Section 3, Act II of 1869, to be a Justice of the Peace within the territories under the Lieutenant-Governor's control.

Mr. William Ostlife Adams Beckett, Assistant Commissioner, Cooch Behar, is vested with the powers of a Magistrate of the First Class and those of a Subordinate Judge in the District of Julpigoree.

The following gentlemen, who have, under separate orders of this date, been appointed to be Relief Officers in the districts mentioned, are vested with the powers of a Magistrate of the First Class, and with powers to try summarily the offices described in Section 222 of the Criminal Procedure Code, viz.—

Mr. George Jasper Nicholls, C.S., Dinagepore.

,, W. A. Nedham, Julpigoree.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 5th June 1874.—It has been represented to His Honor the Lieutenant-Governor that the multiplication of Rural Registration Offices, advantageous as it is to the public generally, entails some inconvenience on those proprietors of immovable property who reside, not within the sub-district in which their property is situated, but at the sudder station of the district.

With a view of abating the inconvenience complained of, and facilitating the registration of documents in the District Registry Office, instead of in the Sub-Registry Offices, in which they would ordinarily be registered, the Lieutenant-Governor, with the approval of the Governor-General in Council, is pleased to direct the substitution of the following article for the present article (*k*) of the schedule of fees.

(*k*) For registration by any Registrar (other than the Registrar of Calcutta) of any document under Section 30 (*a*).	An extra fee equal to the ordinary fee, or Rs. 5, whichever is less.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 27th May 1874.—The Lieutenant-Governor is pleased to direct the withdrawal from Mr. J. Weston, Judge of the Principal Court of Small Causes at Magoora, of the powers hitherto exercised by him of Judge of the Principal Court of Small Causes in the several Courts of Small Causes in the district of Nuddea, under the orders contained in Notification of the 25th June 1867, published in the *Calcutta Gazette* of the 26th idem.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

HIGH COURT NOTICES.

Order by the High Court of Judicature at Fort William in Bengal.

NOTIFICATION.

LEAVE OF ABSENCE.

The 5th June 1874.—Baboo Baney Madhub Ghosh, Moonsif of Seebgunge, in the district of Dinagepore, is allowed three months' medical leave, under Section 3, Supplement F of the Civil Leave Code, in substitution of the one month's privilege leave already granted to him under the Court's orders, No. 1261, dated the 6th May 1874.

By order of the High Court,

H. J. S. COTTON, *Offg. Registrar.*

Circular Orders and Memos. by the High Court of Judicature at Fort William in Bengal.

Circular Order No. 13.

Dated Calcutta, the 12th May 1874.

HIGH COURT.
ENGLISH DEPARTMENT.
Civil.

Questions having been raised in connection with the Court Fees' Rules, published in the *Calcutta Gazette* of the 25th February 1874, the Court are pleased to direct the issue of the following instructions in explanation of the effect of the rules:—

I.—Rules under Clause 1, *Section* 20, *Act VII of* 1870, *declaring the fees chargeable for serving and executing processes in the Civil Courts.*

(1.) The summons and supbœna to defendants (or respondents) and witnesses, on the issue of which a fee is provided by Article 1, Parts II and III, are those contemplated by Sections 48, 345, and 149 of the Code of Civil Procedure. They may in either case, therefore, by law contain the names of more than one defendant or witness, and the rules do not at present authorize the imposition of a separate fee on the respective copies prescribed by law to be served on the several persons named therein. If such fee be found necessary, the rule will be reconsidered.

(2.) This explanation does not apply to warrants to bring parties or witnesses before the Court, not being execution processes. In such cases a separate warrant will be issued against each person to be arrested, and a separate fee under Article 1, Parts II and III, as for an "order not elsewhere specified in the Table of Fees," is to be charged for every such process.

(3.) The processes provided for in Article 5, Parts II and III, are exclusively processes directed against a defendant after judgment and in course of execution of a decree.

(4.) Article 2, Parts II and III, which prescribes the fees leviable in respect of a commission and of the remuneration of the Commissioner, does not affect the rules laid down in Circular Order No. 10, dated 31st May 1873, except in so far as the rules direct the charge of a fee on every commission. Clause *a* applies to all commissions. Clause *b* only applies to the cases in which an officer of the Court specially appointed and paid by Government is employed. The charge for the services of such an officer is properly a Court fee payable to Government, which is therefore to be paid in stamps; and to such fees alone the rules apply. But when the Commissioner is a person not receiving pay from Government in respect of his employment as a Commissioner, the rules of remuneration prescribed by Circular Order No. 10, above referred to, apply, and the Commissioner will be paid in cash.

(5.) If the services of peons are required to serve any process which an Ameen or Commissioner is authorized to issue, a fee will be charged under the appropriate heading in the rules. The employment of peons as personal attendants on the Commissioner was not contemplated and is not authorized.

(6.) The amount of fee, when an officer is deputed to put a party in possession under a decree, is to be determined, according to circumstances, either under Article 1 or Article 2 at the discretion of the Court. If the delivery of possession is merely a formal act, and a peon can be employed, the fee as for an order would be charged under Article 1; but if the transaction is more complicated (as involving enquiry or the making of an inventory, or the like), a commission to a superior officer would more properly issue and a fee would be chargeable accordingly.

(7.) In the event of an excess deposit for a commission, or of a compromise rendering it unnecessary to execute the commission at all, the parties will be entitled to a refund in

cash of the excess, or, as the case may be, of the whole of the fees deposited under Clause *b*, but not of the fee under Clause *a* in any case The Accountant-General will issue separate instructions as to the form of voucher that will be necessary to obtain such refunds.

(8.) Article 3, Parts II and III, prescribes the fee leviable on every process of attachment of property by notice or proclamation. One fee only is chargeable under this article for each process irrespective of the number of items of property therein contained. Where copies have to be issued, no separate charge can be made under the rules as they stand.

(9.) The rules laid laid down in the note to Article 4, Parts II and III, must be followed. Refunds, where properly claimable under this note, will be made in such mode as may hereafter be settled in communication with the Accountant-General.

(10.) As there are no stamps of less denomination than one anna, fractions of an anna are to be abandoned under the rules.

(11.) The heading of the rules shows that they have no application to Revenue Officers acting otherwise than in a judicial capacity, or, in other words, than when they act as Revenue Courts.

(12.) The following Circular Orders are hereby declared cancelled or modified:—Circular Order No. 31, dated 25th September 1867 is cancelled, except paragraph 5 which will continue in force and for convenience of reference is reproduced in the margin. Circular Order No. 20, dated 25th June 1872, is wholly cancelled, as it is superseded by Rule III of the new rules. Paragraph 2 of the Circular Order No. 10, dated 31st May 1873, is in so far affected by the rules that a fee is now to be charged under Clause *a*, Article 2, Parts II and III, upon every commission. Circular Order No. 17, dated 2nd August 1873, is superseded by Rule III, so far as refers to the affixing of stamps to the process. In cases where application is made for the issue of process beyond the jurisdiction of the Court, the application will bear the proper stamp, and an endorsement will be made on the process to the effect that the proper stamps have been affixed to the application. Circular Order No. 19, dated 6th August 1873, is superseded by Article 6, Parts II and III of the rules, and is wholly cancelled.

In addition to [other] fees, the actual charge which must be incurred if it is necessary to employ boats or cross-ferries is to be levied from and paid by the person at whose instance the process is issued, before issue of the process to the peon who carries the process.

II.—Rules under Clause 2, Section 20 of the Court Fees' Act, declaring the fees chargeable in the Courts of Magistrates.

13. Rule I, Clauses 1 and 2, prescribes the fees leviable upon warrants of arrest and summonses. The process is one, whether one or more persons be named therein and whether such persons reside in one place or not, but an additional fee of 4 annas is chargeable in respect of every person exceeding one named in a warrant, and an additional fee of 4 annas is chargeable in respect of every additional person, not being the second person of more than two residing in the same village, named in a summons. Thus, if the summons include one person residing in village A, and a second person residing in village B, the additional fee is chargeable in respect of such second person.

(14.) Magistrates may follow the principle of Rule III of the rules under Clause 1, Section 20, for the Civil Courts, in realizing Court fees in Criminal Courts.

(15.) The charge for boat-hire, when it has to be incurred, is not a Court fee realizable by stamps. There is nothing in the rules to introduce a change in the existing practice, and the charge must be borne as heretofore by Government.

III.—Rules under Clause 3, Section 20, Act VII of 1870, for the remuneration of persons employed in the service of processes.

(16.) The intervals and rate of increment which govern the increase of salaries of the establishment to which the officer belongs are applicable under these rules and will take effect from the date of their promulgation, except when the application of this order will reduce the pay of present duly qualified peons.

(17.) The establishment of peons of a Subordinate Judge's Court when the Subordinate Judge is also Judge of the Court of Small Causes is to be kept distinct from the Small Cause Court establishment.

IV.—Rules under Section 22, Act VII of 1870, for calculating the number of peons to be employed by Civil Courts and Magistrates.

(18.) Clause 2, Section 20 of the rules clearly indicates that only processes in cases of offences, other than offences for which police officers may arrest without warrant, are to be served by peons employed under the Courts Fees' Act.

By order of the High Court,

H. J. S. COTTON, *Officiating Registrar.*

Circular Memo. No. 2.

Dated Calcutta, the 20th May 1874.

HIGH COURT.
ENGLISH DEPARTMENT.
Criminal.

IN accordance with a representation from the Inspector-General of Jails, the Court are pleased to bring to the notice of Sessions Judges and Magistrates that no Reformatory, or part of a prison declared to be a Reformatory under the Act, exists in Bengal at present. Sentences of confinement in a Reformatory, under Section 318, Act X of 1872, cannot therefore be carried into effect, and it is better to abstain from passing such sentences.

By order of the High Court,

H. J. S. COTTON, *Offg. Registrar.*

Sheriff's Office, the 2nd June 1874.

NOTICE is hereby given that the Sixth Criminal Sessions of the year 1874 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William and the places subordinate thereto, will be holden at the Court-House, in the Town of Calcutta, on Tuesday, the thirtieth day of June instant, at 11 o'clock in the forenoon, and so on from day to day until the said Session be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Session be then and there to prosecute.

M. RUSTOMJEE, *Sheriff.*

CALCUTTA CUSTOM HOUSE, the 9th June 1874.

CENTRAL RELIEF FUND.

Proceedings of the Thirteenth Meeting of the Executive Committee of the Central Famine Relief Fund, held on the 21st May 1874.

PRESENT:

The Hon'ble V. H. Schalch, *Chairman.*	J. R. Bullen Smith, Esq.
„ „ John Inglis.	Moonshee Ameer Ali Khan Bahadoor.
„ „ T. M. Robinson.	Hon'ble Baboo Doorga Churn Laha.

1. The Chairman read a letter, No. 3152—S.R., dated 15th May 1874, from the Government of Bengal,—it was in reply to the Secretary's No. 99, dated 18th April. The Lieutenant-Governor would notify to Government officers and to local committees that the Central Committee had taken upon the charitable relief fund the entire expense of giving relief throughout the famine districts, under heads (*b*), (*c*), and (*d*), of the Committee's notification of the 4th March. The Lieutenant-Governor thinks that "it will be better for each locality that the relief committee should obtain their grain from the Government stores, and that they should not, by going into the market, aggravate the dearness of prices. If the Central Committee take this view, then grain for charitable relief will be furnished from the Government stores, at the rate of 12 seers per rupee for cleaned rice, and at proportionate rates for other grains.

Resolved, that the Committee do accept the Lieutenant-Governor's view of the matter.

2. The Chairman read a letter from the Commissioner of Burdwan. This contained an application from the Collector of Bankoora for Rs. 4,000 in addition to the Rs. 5,000 already granted. The Chairman noticed that the Committee had already sent Rs. 2,000 in addition to the Rs. 5,000.

Resolved, to sent Rs. 2,000 more to Bankoora.

3. The Chairman read a letter from the Commissioner of Chota Nagpore, applying for Rs. 1,000 to be expended by the Palamow sub-divisional central relief committee in gratuitous relief. There were reported to be 800 persons receiving gratuitous relief in Palamow.

The Hon'ble [illegible]M. Robinson thought that gratuitous relief was sometimes given without the necessity [illegible]ing first sufficiently tested [illegible] to 50 per cent [illegible]rkpeople ha[illegible]ady [illegible]. It was known to him that more than them[illegible] of the wor[illegible] people will left some coal workings in Palamow in order to avail themselves of gratuitous relief.

Resolved, that the sum of Rs. 1,000 be sent to Palamow, but that the Secretary be instructed to bring the matter urged by Mr. Robinson to the notice of the Assistant Commissioner, and to state to the Assistant Commissioner that the Committee hoped the money would not be spent without proper and sufficient cause. People who can get regular employment and sufficient wages are obviously not in need of, and ought not to receive, gratuitous relief or require relief works under the committee to be opened for their benefit.

4. The Chairman read a letter from the Commissioner of Chota Nagpore, intimating that no money would be required for Lohardugga for the month of June.

Resolved, that the letter be recorded.

5. The Chairman read a letter from the Commissioner of Chota Nagpore, intimating that the Deputy Commissioner of Hazareebagh estimated his requirements for the month of June at Rs. 5,000.

Resolved, that Rs. 5,000 be granted accordingly.

6. The Chairman read a letter from the Commissioner of Patna, forwarding bi-monthly statements and accounts for the districts of Patna, Gya, and Sarun.

Resolved, that the Collector of Sarun be asked to explain why he has not entered in his accounts anything of the money forwarded to him by the Central Committee.

7. The Chairman read a draft of a proposed letter to the Government of Bengal, proposing a form of account and statement to be submitted periodically to the Committee by the Commissioners of famine districts. The letter further stated that, as "provision will have to be made for the orphans left destitute through the effects of the famine, the Committee have entered in the form of statement a heading to meet that contingency." The attention of the Government was directed to the Commissioner's letter No. 74, of the 26th March.

Resolved, that the draft be approved.

8. The Chairman read a draft of a proposed letter to the Commissioners of famine districts, stating a wish to supply the destitute and those unable to work with sufficient clothing, and that expense incurred for that purpose should be charged under (*b*). Also, that under the same heading should be entered—first, all expenses connected with the purchase and distribution and storage of grain at the expense of the Central Committee; second, with all poor-houses and relief centres into and from which persons are received and relieved at the expense of the Central Famine Fund. The letter further stated the Committee's desire that all cases coming under (*d*) should be liberally considered and dealt with.

Resolved, that the draft, as amended, be approved.

DISTRICT RELIEF COMMITTEES.

The following gentlemen have consented to act as members of the relief sub-committee at Manpore :—

Baboo Murdun Misser, of Bunkutwa.
„ Jugmin Misser, of Matheea.
„ Goshaeen Sheuruth Geer, of Putilash.
„ Harrakh Narain Sahi, of Lagoonha.
Shaik Bahadoor Sahi, of Lagoonha.
Baboo Soodees Narain Sahi, of Siswa.
„ Jogodees Narain Sahi, of Siswa.
„ Tapsee Narain Rai, of Dhanka Pukhnaha.
Baboo Koonj Behari Roy, of Rutwal.
„ Surnum Roy, of Rutwal.
„ Mookoot Nath Misser, of Mudhoobunnee Butsura.
„ Kawalhan Dutta Misser, of Mudhoobunnee Butsura.
„ Beejaee Misser, of Mudhoobunnee Butsura.

The 5th June 1874.

H. KEAN, *Collector of Chumparun.*

THE following gentleman has consented to act as a member of the district relief committee of Berhampore :—

Mr. F. A. Dawson.

W. WAVELL,
Offg. Magte. and Collr. of Moorshedabad.

BERHAMPORE, the 3rd June 1874.

At a meeting of the Bankoora district relief committee, held on the 18th May 1874 :—

PRESENT :

W. R. Larminie, Esq., C.S., *in the Chair.*

Members.

E. Grey, Esq., C.S.
R. H. G. Irvine, Esq.
J. O. B. Sceales, Esq.
W. B. Christie, Esq.
Baboo Kanti Chunder Chatterjee
„ Promotho Nath Banerjee.
„ Hurihur Mookerjee.
„ Mohesh Chunder Banerjee.
Baboo Kunjabehari Chuckervarti.
„ Ram Chunder Ditchit.
„ Dennonath Ghose.
„ Kumud Nath Dutt.
„ Rameshwar Sen.
Moonshee Alijamin.
Baboo Prankristo Chatterjee.

Baboo Kristo Govinda Gossamee, *Member and Secretary.*
„ Hurrisankar Dutt, *Member and Joint-Secretary.*

Read, the proceedings of the Bakulia sub-committee, anent the storage of rice at Bakulia, and the expediency of excavating a tank in that village, or in its neighbourhood, for giving employment to men, and particularly to women, who are able to work, and resolved—

1. That Baboo Joggobundho Khan, Deputy Collector on special duty, be requested to report whether the arrangements he originally proposed with regard to the storage of grain at Bakulia cannot now be carried out.

Read, a report from Baboo Behari Lall Hajrah, officer on special duty, forwarding an estimate of the cost required for rebuilding the houses of the inhabitants of Sreepura that have been destroyed by fire. Also, a report concerning the opening of a relief centre at Dhoboni, and resolved—

2. That as, under the rules, the funds of the relief committee are not available for rebuilding houses destroyed by fire, special subscriptions be raised for that purpose.

3. That Baboo Behari Lall Hajrah be requested to report the distance of Dhobon from the nearest neighbouring relief centre, before one can be opened at that locality.

Read, a report submitted by Baboo Grish Chunder Roy, Sub-Inspector on special duty, on the advisability of providing with capital, sweetmeat makers, blacksmiths, &c., enabling them to follow their respective callings, and resolved—

4. That the committee cannot provide capital to sweetmeat makers and other traders, but that work will be supplied them for their support.

Read, the proceedings of the Tihiri sub-committee, suggesting that rice be supplied to that committee from Bankoora, and a report from Baboo Behari Lall Hajrah, proposing that Public Works Department officers be specially requested to give employment to all able-bodied women who have no husbands or other near relatives to cut earth for them to carry, and resolved—

5. That sub-committees be informed that the Executive Engineer of Bankoora promises to see that no women who are able to work suffer for want of employment.

6. That the Tihiri sub-committee can receive supplies of rice from Saltorah.

7. Resolved, that the mofussil sub-committees be empowered to arrange for providing with work such people to whom it would be otherwise necessary to grant gratuitous relief at subsistence rates of wages, *i.e.*, at 1½ annas for a man, 1 anna for a woman, and 3 pice for a child.

8. That a mohurrir on Rs. 6 per mensem be allowed to the husking sub-committee of Bankoora, and that the sub-committee be authorized to sell any surplus quantity of rice husked after distribution at the relief centre.

9. That the accounts submitted by the Secretary, showing the receipts and disbursements during the previous week, be passed.

Read, a letter from the zemindar of Meliarah, requesting the committee to take upon them the management of his *Annachotra* (অন্নছত্র) on the assurance of his paying a monthly subscription of Rs. 50, and resolved—

10. That the zemindar of Meliarah be informed, with reference to his letter, that the committee are willing to appoint a mohurrir to take charge of his relief operations, provided the zemindar undertakes to supply whatever expenses, current and occasional, may become necessary.

11. That the accounts of the weavers' sub-committee be passed.

12. That the proposals of the weavers' sub-committee, regarding the advances of amounts to indigent weavers of Birsingpore through the medium of respectable men of the village, be approved.

W. R. LARMINIE, *Chairman.*

At a meeting of the Bankoora district relief committee, held on the 25th May 1874:—

PRESENT:

W. R. Larminie, Esq., C.S., *in the Chair.*

Members.

E. Grey, Esq., C.S.
R. H. G. Irvine, Esq.
W. B. Christie, Esq., C.E.
J. O. B. Sceales, Esq.
Baboo Kanti Chunder Chatterjee.
„ Promotho Nath Banerjee.
„ Mohesh Chunder Banerjee.
„ Hurry Hur Mookerjee.
„ Kunjoo Behary Muckerbutty.
Baboo Govinda Chunder Ghose.
„ Siva Doss Bhuttacharjee.
„ Ram Chunder Ditchit.
„ Ram Taruck Mookerjee.
„ Kumud Nath Dutt.
„ Rameshur Sen.
„ Nobin Chunder Chatterjee.
Moonshee Ali Jamin.

Baboo Krishna Govinda Gossami, *Member and Honorary Secretary.*

Read, a report from Baboo Behary Lal Hazrah, Head Constable on special duty, regarding the opening of a relief centre at Dhoboni, in pergunnah Mohesra, and resolved—

1. That a relief centre be opened at Dhoboni.

Read, a report from Baboo Mohima Chunder Ghose, about the opening of a relief centre at Chooamushna and Makrah, and resolved—

2. That relief centres be opened at Chooamushna, in thanas Bishenpore and Makra, in thana Ondah.

3. That a relief centre be opened at Dhoboni, in thana Gungajulghatty.

Read, the proceedings of the Telishair sub-committee, suggesting the expediency of excavating a tank in the neighbourhood of that out-post for giving employment to men and women who are capable of work, and resolved—

4. That as Mr. J. O. B. Sceales intends visiting Jamkundy, and promises to report as to the necessity of starting some work in that quarter, the sub-committee be informed that their recommendation will be considered at the next meeting.

5. Resolved, that a Mohurrir on a salary of Rs. 12 per month be allowed to the Joypore sub-committee to enable them to carry on their relief operations with greater promptitude.

6. Resolved, that all the Mofussil sub-committees be requested to report whether an increase to the quantity of rations allowed at present to paupers is necessary, stating their reasons for their opinions.

Read, a report submitted by Baboo Denonath Ghose, Sub-Deputy Collector, on the subject of the rates of wages to be allowed for husking paddy, spinning hemp, jute, and cotton &c., all over the district, and resolved—

7. That as the outturn of rice is just half the quantity of paddy husked, for every 22 seers of paddy, 10 seers of cleaned rice be returned by the persons employed in husking, and one seer of rice or two seers of paddy be allowed as wages for the labor.

That 14 chittacks of twine be returned for every seer of jute spun, and 2 annas and 6 pie be allowed as wages.

That for 1 seer of hemp, 14 chittacks of twine be returned, and 2 annas and 6 pie be allowed as wages.

That for 1 seer of cotton, 13 to 14 chittacks of thread be returned, and 4 to 5 annas be allowed as wages, according to the fineness of the thread produced.

That for weaving cotton cloth of fine or coarse quality (the width of cotton varying from 1¼ to 2 cubits) the wages to be allowed per cubit shall vary from 1½ to 2 pice.

That for every pun of 80 cocoons, 5 to 6 tolahs of tussur thread be returned, and 1 anna be allowed as wages.

That for weaving tussur cloth, the width varying from 2¼ to 2½ cubits, 2 annas be allowed as wages for every cubit of length.

8. Resolved also, that the above rates of wages, to be allowed for each of the above kinds of work, be circulated to the Mofussil sub-committees for their adoption.

9. Resolved that the accounts of the weavers' sub-committee be passed.

10. Resolved, that the accounts rendered by the Honorary Secretary, Baboo Krishna Govinda Gossami, be passed.

11. Resolved that Baboo Hem Nath Bose be elected member of the district relief committee.

W. R. LARMINIE, *Chairman.*

Proceedings of the Executive Relief Committee held on the 26th May 1874.

As relief works are in progress in the sudder division, and charitable relief is being given in several parts of the district, it is desirable that there should be sufficient food-grain in the district to meet the growing demands of the people. But as experience has shown that the stocks are most likely to run short from the slightest bad weather, and in accordance to Government letter No. 3262—S.R., of the 2nd instant, it is necessary that some grain should be stored in the district, it is therefore resolved that application may be made to Government to import 10,000 maunds of rice from Calcutta,—6,000 maunds to be sent to Goalundo and 4,000 to Kooshtea. Should Mr. Nolan ask for a further supply than what has been already allowed him, another application will be made afterwards. If the requisition be granted, it is hoped that information may be given as to when we may expect the supply.

2. Read the reports from the several sub-committees, but, there being nothing of sufficient importance to require prominent notice, orders passed on the reports themselves.

AMARNATH BHATTACHARJEE, *Secretary.*

The Calcutta Gazette.

WEDNESDAY, JUNE 10, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Thursday, the 16th July 1874, corresponding with 1st Sarabun *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

BHAGULPORE, RAILWAY DEPUTY COLLECTOR'S OFFICE, the 29th May 1874.

W. HEYSHAM, [illegible] *Railway Deputy Collector.*

ADVERTISEMENT OF SALE.

NOTICE is hereby given that the proprietary right of Government to the undermentioned estate, situated in the district of Burdwan, from 1873-74 to 1900, will be put up to sale at the sub-divisional office of Culna on Friday, the 19th June 1874, corresponding with the 6th Assar 1281, B. S., and that the proprietary right to be sold will not only entitle the purchaser to re-settlement at the expiry of the present settlement, but to the receipt of Malikana, should he decline the assessments which may then be fixed.

The purchasers of this estate will be subject to the following conditions :—

1*st.*—The estate will be sold, subject to a light jumma of Rs. 4 per annum, to the highest bidder.

2*nd.*—The sale will be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force,—and purchasers will be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd.*—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office-day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

5*th.*—The purchaser will be bound to perform putwaree duties.

No. in statement of Government estate.	No. on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government Revenue. Revenue assessed.	Upset price.	Remarks.

[First Publication.]

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Deputy Commissioner office at Debrooghur, will be sold by public auction at the said Deputy Commissioner's office at 12 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner.

SCHEDULE.

A lot of waste land consisting of about 741 acres, situated in mouzah Kodomoni, in the district of Luckhimpore, and bounded as follows:—

North—By a straight line through the forest from a pillar, 1, bearing 242°, past an intermediate pillar, 2, to pillar 3, measuring 2,282 yards.

West.—By a straight line from pillar 3, through tree forest, bearing 176° and measuring 1,040 yards, to a pillar, 4; and thence by a straight line through tree forest, bearing 151° and measuring 660 yards, to a pillar, 5, on the Tettelia bheel.

South.—From pillar 5, along the northerly edge of the Tettelia bheel and the course of the Lohitkota river, to a pillar, 6, measuring, as the crow flies, 1,650 yards.

East.—By a straight line from pillar 6, on the Lohitkota river, through tree forest, bearing 20° and measuring 825 yards, to a pillar, 7; and thence by a straight line through tree forest, bearing 355° and measuring 1,045 yards, to pillar 1.

The pillars are marked from 1 to 7 on the map filed in the Deputy Commissioner's office.

DEBROOGHUR, ASSAM, the 17th April 1874. W. S. CLARKE, *Dy. Commissioner.*

Notice

Is hereby given that the land specified in the Schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause. For the conditions of sale, see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of 1,087 acres 1 rood 20 perches, situated in Pergunnah Berkhola, Mouzah Abong, in the district of Cachar, and bounded as follows:—

East—The Abong river from pillar No. 1, at confluence of the Abong and Cacharee Cherra with the Dooloo river, to pillar No. 2, on the banks of the Abong and at the foot of the Casee Teelah to the north; thence, to pillar No. 3, on the top of the same teelah, and No. 4 pillar at the northern foot.

North.—From pillar No. 4, as above, to pillar No. 5 on the banks of the Mewah Cherra.

West.—From pillar No. 5 along pillars Nos. 6, 7, 8, 9, and 10, at the edge of the jungle on the teelahs to the west, and along No. 11 on the banks of the Cacharee Cherra.

South.—The Cacharee Cherra, between pillars No. 11 and No. 1.

The pillars are numbered from 1 to 11 on the map filed in the office of the Deputy Commissioner of Cachar.

SILCHAR, the 27th April 1874. O. G. R. MCWILLIAM, *Offg. Deputy Commissioner.*

Notice

Is hereby given that the lease for three years of the undermentioned lime-quarry, situate in the Khasi Hills, will be put up to auction at the Deputy Commissioner's Office, Shillong, on Wednesday, the 1st July 1874, at the upset price mentioned opposite the mehal.

The rent payable half-yearly in advance.

No.	Name of the Quarry.	Where situate.	Upset price per annum.
			Rs. As. P.
1	Borsyrmai	In Duara Nongtyrmen, Khasi Hills. Bounded on the north by paun-leaf plantation; south, Ka Lad Luka; east, Lum Dilong; west, Lum Raitruh.	1,000 0 0

H. S. BIVAR, *Dy. Commr., Khasi and Jynteah Hills.*

SHILLONG, DY. COMMR.'S OFFICE, the 30th May 1874.

Commissioners for making Improvements in the Port of Calcutta.

Dhappa Toll Collector's Office, the 3rd June 1874.

J. F Galiffe, *Collector and Superintendent, Calcutta Canals*

Public Works Department, Bengal.

DINAGEPORE DISTRICT.—TENDER FOR COAL.

TENDERS are invited for the delivery of (10,000) ten thousand maunds of best rubble coal, free from dust, at Dinagepore (Kanchanghat) on the Poornabhaba River. Delivery is to be completed before the 30th September 1874.

2. Sealed tenders will be received by the undersigned up to the 15th July 1874.

3. The undersigned does not bind himself to accept the lowest or any tender, and any Company whose tender may be accepted will be required to furnish security for its due fulfilment.

DINAGEPORE, the 25th May 1874. R. C. MCKENNIE, *Exe. Engr.*

Notice.

WANTED, a good Head Clerk, salary Rs. 100.

The post is temporary at present, but will in all probability be made permanent hereafter.

No one need apply who has not had some experience as a Senior Clerk in a Magistrate's, Collector's, or Commissioner's Office.

Applications with copies of testimonials to be forwarded to the undersigned not later than the 15th June ensuing.

By order,
SREENAUTH GHOSE, *Personl. Asst. to the Commr.*

COMMR.'S OFFICE, PRESDY. DIVN., the 6th June 1874.

Bhagiruthee River.

Weekly Water Report showing the least depth of water in the Bhagiruthee River for the week ending Friday, the 5th June 1874.

No. $\frac{A}{28}$

FROM

THE AUDITORS OF THE ACCOUNTS OF THE JUSTICES OF THE PEACE FOR THE TOWN OF CALCUTTA,

To

THE JUSTICES OF THE PEACE FOR THE TOWN OF CALCUTTA.

GENTLEMEN,

We have examined your Accounts for the year 1873, and have found them to be correct, with the following exceptions:

2. We have disallowed the charges described in the accompanying list for the reasons stated against them, and we are unable to certify to the receipts noted in the margin, in consequence of the following circumstances. No account or particulars of any kind are furnished in reference to the item marked A, which we understand represents net collections, but we have no information as to the character or amount of the charges deducted. According to the debenture registers, the amount of item B should have been Rs. 536, and the difference apparently has been made up in the present year, 1874. There are no ticket account and works register, by which may be tested respectively the correctness of the items marked C and D. The item E cannot be agreed with its relative charges.

	Rs.
A.—Fees for removal of nightsoil from private houses and from Tollah mehter's depôts ...	85,493
B.—Fees for renewal of debenture bonds	856
C.—Earnings of Municipal tramway...	8,043
D.—Earnings of Printing Department	1,758
E.—House-drainage fees ...	2,397

We have not completed the audit of your Store Accounts, partly because they were not furnished to us in time, and partly in consequence of the examination requiring more time than was expected, and we will not now report upon them, except in regard to a few questions which it is desirable to consider at once. The Store Accounts are more elaborate than they need be, as the issues are in small quantities according to daily requirements, and are valued with reference to their cost price in each case. The issues, moreover, in some instances, are not direct to the indenting departments, but through other depôts,—a system which only entails double accounting. The accounts may be simplified by registering separately, according to quantities, the supplies made to each department, the values being computed on the sum total of the month. These separate registers will facilitate the preparation of the monthly transfer bills, while the figures entered in them can readily be combined for ledger postings. Lastly, there should be agreement between the Store Accounts and the corresponding headings in your principal Ledger, and for this purpose the arrangements recommended in our last Annual Report might be carried out, and the balances verified by an annual stocktaking on 31st December. It is not necessary to examine every article in stock. It will be sufficient to test the accuracy of 25 per cent., provided the articles are selected at hazard, and without communication with the officers who have to deal with them. The transfer bill should exhibit only the quantity and value of stores supplied, such extra charges as coolie-hire, &c., being drawn on separate cash vouchers.

4. It is also our duty to bring the following matters to your notice. The Assessment Book does not afford a sufficient check upon the collection of city rates, as we have already brought to your notice on previous occasions. The city rates become due in January, April, July, and October of each year, but the largest collections are not generally made in those months. There is no list of outstanding bills on account of these rates with which the corresponding Ledger balances may be compared, and there appears to be no check on the abatements at 2 per cent. granted for prompt payment of the water-rate. The statistics of income and expenditure, which we recommended should be kept up, and which were commenced with your sanction, are not continued. The adjustments on account of the Sinking Fund relating to your debenture debt could not be made in the Ledger of 1873, in consequence of the Trustees not having furnished in time the returns required from them, but these returns have since been received, and show that the necessary investments were duly made.

We have the honor to be,

GENTLEMEN,

Your Most Obedient Servants,

EDWARD F. HARRISON,

Comptroller-General.

EDWIN W. KELLNER,

Assistant Comptroller-General.

COMPTR.-GENERAL'S OFFICE, the 12th May 1874.

Published under Section 34 of Act VI (B.C.) of 1863.

ROBERT TURNBULL,

Secretary to the Justices.

(227—1)

The Bengal Coal Company, "Limited."

THE Half-yearly General Meeting of the Shareholders of the Company will be held at the Office of the Company, No. 27, Dalhousie Square, Calcutta, at 11 o'clock A.M. on Saturday, the 13th June next.

By order of the Directors,
(199—4) T. M. ROBINSON, *Managing Director.*

Calcutta Landing and Shipping Company, "Limited."

NOTICE.

THE Twenty-second Half-yearly Ordinary General Meeting of Shareholders will be held at the Company's Office, 2, Hare Street, on Monday, 15th instant, at noon, for the purpose of receiving the Directors' report, passing the accounts for the half-year ended 30th April last, declaring a dividend, and transacting any other business which may be brought forward.

The Transfer Register will be closed from the 5th to the 15th instant, both days inclusive.

2, HARE STREET, the 1st June 1874. (220—2) G. LOWEN, *Manager.*

Notice.

MY SON, Mohendro Nath Bhose, has been authorized to sign my firm of Tariney Churn Bhose and Co. (214—6) TARINEY CHURN BHOSE.

Meteorological Telegraphic Report for the period 31st May to 6th June 1874 . .	1405
Results of the Meteorological Observations taken at the Surveyor-General's Office, Calcutta, from 1st to 7th June 1874	1406
Weekly Return of Traffic Receipts on Indian Railways	1407

ERRATUM.

IN page 1155 of the Supplement to the *Calcutta Gazette*, for the 3rd June 1874, at line 6 of paragraph 2 of the Lieutenant-Governor's Minute dated 16th May, on the subject of reserve water-carriage, *for the words* "20,000 tons" *read* "50,000 tons."

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

CHARITABLE OPERATIONS CARRIED ON BY THE ZEMINDAR OF HETAMPORE, IN BEERBHOOM.

No. 83—S. R., dated Burdwan, the 2nd June 1874.

From—C. T. BUCKLAND, Esq., Commissioner of Burdwan,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit, for the information of Government, copy of a letter, No. 185 of the 28th May, enclosing a statement showing the number of persons relieved during the week ending 23rd idem by the charitable works undertaken by Baboo Ram Runjun Chuckerbutty, zemindar of Hetampore, and to remark that the benevolence of the Baboo deserves the approval of Government.

No. 185, dated Soory, the 28th May 1874.

From—R. D. HIME, Esq., Officiating Collector of Beerbhoom,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit copy of the last weekly statement furnished by Mr. Reed, Manager of the estate of Baboo Ram Runjun Chuckerbutty, zemindar of Hetampore, from which you may judge of the magnitude of the charitable operations carried on by that proprietor:—

A.—*Number of persons employed on the Hetampore Relief Works.*

Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 6th June 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Division. 1	Burdwan, 8th* June 1874	1·4	Rain has fallen in all the sub-divisions except Jehanabad, but still more is wanted. Sowing of aous or early paddy going on extensively. Prices slightly higher in Burdwan and Raneegunge. Fever decreasing; cholera prevalent in the west of the district.
2	Bankoora, 6th „ „	2·01	Generally showery and cool. The rains have apparently set in. Agricultural operations progressing favorably. Aous or early paddy seedlings have sprouted in many places. Cholera and small-pox still prevalent.
3	Beerbhoom, 6th „ „	2·10	Rainy in the former and clear in the latter part of the week. No change since last report; planting out of sugarcane commenced. Export by rail, 3,866 maunds, chiefly to Bhagulpore Division. Prices slightly risen.
4	Midnapore, 6th „ „	0·55	There have been heavy showers in many places in the district, but more rain at the Sudder Station and to the west of it needed. As reports come in, it appears that the showers are so partial, that while some places have had an abundant rainfall, others, a few miles off, have had nothing to speak of. At the present moment prospects vary precisely as the rain falls. Where the soil is well saturated they are as good as can be desired; where the ground is hard, the people are in great anxiety. Cholera is very prevalent, and will be so till the first heavy fall of rain.
5	Hooghly, 6th „ „	.....	Cloudy and sunshine alternately; no rain; high wind ceased. Heavy dark clouds come up almost every evening from south-east; slight shower at noon of the 6th June; 1·28 inches of rain at Serampore. There have been showers at different places, but more rain is urgently wanted. Early rice and the seedlings of the late rice are being planted here and there, but it is now getting rather late to sow the early rice.
	Howrah, 6th „ „	·99	During the week there was rain more or less for two days throughout the district. Weather clear and at times cloudy. Wind generally from the south. The late rain has done much good throughout the district. The amun or late rice seedlings have been sown, and so have the aous or early rice and jute. Everywhere the ryots are ploughing land for transplanting the late rice. The young sugarcane plants are reviving.
	Central Districts.		
Presidency Division. 6	24-Pergunnahs, 8th† June 1874.	1·43	Hot, and occasionally rainy. Rain has fallen throughout the district. The early rice plants are coming out fairly. Amun or late rice sowings have commenced in some places. More rain wanted in parts of Satkhira sub-division. The harvest of boro rice will soon commence. Jute plants doing tolerably well. A few cases of cholera reported from Mathoorapore, Baduria, and Nyhatty. Fever still prevailing at Barripore.
7	Nuddea, 6th June 1874	1·15	Seasonable. The prospects of the rice, both early and late, and of indigo, are at present excellent. The rain has been sufficient, but not excessive, and comes after intervals of fine weather. The weather could not be more favorable, yet increase of distress must be looked for till the early rice is reaped. Distress is reported in two villages in Gangni thana. Prices have a slight tendency to rise.
8	Jessore, 6th „ „	2·26	Cloudy, with rain in moderate quantity. The prospects are good. Prices have, however, risen largely during the week, owing to the demand for exportation to other districts.
Rajshahye Division. 9	Moorshedabad, 6th „ „	0·21	There was some more rain during the week, but not general. In the west, heavy rain fell on the 4th June. The temperature is cooler; heavy showers fell on the afternoon of the 6th. The rice crops are progressing very favorably. In some parts aous or early rice is rather advanced for this time of the year. The amun or late rice nurseries are being prepared, and much of the crop has been sown broadcast. Other crops, such as mulberry and sugarcane, are in good condition. Prices have been almost stationary since last report. Small-pox and cholera are on the decrease.
10	Dinagepore, 6th „ „	1·6	Very general and mostly heavy rain. The bhadoi or early crop is all saved, and promises well.
11	Maldah, 6th „ „	0·27	Cloudy, westerly winds; rain seems to have fallen all over the district. The prospects of the crops throughout the district are very good, except in Kaliachuck, where, owing to the scarcity of rainfall, the bhadoi or early and indigo crops do not promise well. The whole of the boro rice has been harvested, and the outturn is a good one.

* Telegram of the 8th June, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 8th June, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)			
	Central Districts.—(Contd.)		
Rajshahye Divn.—(*Contd.*) 12	Rajshahye, 6th June 1874	·07	There has been very slight rain during the week in the Tanore quarter only. There have been considerable sowings of aous or early rice since the late rains, and the sowings are now almost completed. The condition of the growing paddy is excellent, and there is no immediate need more of rain. A very good teel (oil-seed) crop (a little less than a full crop) is ripe and being reaped in some places; other crops, such as indigo, mulberry, and sugarcane are doing well. Prices have not fallen in consequence of the rain of last week, as it was expected that they would do; on the contrary, rice is on all sides dearer than it was, the cause of this being probably a considerable falling off in importation. Small-pox and cholera have almost ceased.
13	Rungpore, 6th „ „	5·84	Much rain during the nights, and days hot. Crops all in excellent condition. To the south much improvement in prospects of early rice. Much rice is now cut and brought to market; the late rice is sown in many places, and transplanting begun here and there. Jute and sugarcane flourishing. Prices lower: Rs. 4 to 5-8 per maund.
14	Bogra, 6th „ „	·05	Seasonable. The prospects of the crops are very good. There was propitious rain, which has, it is hoped, made the aous or early rice crop secure. Ploughing for the winter crops has begun.
15	Pubna, 6th „ „	0·32	Slight rain on the 4th June; no change in weather since last report. Most of the aous or early, and amun or late paddy, has been sown, and looks promising; teel (oil-seed) and jallye paddy are being harvested.
Cooch Behar Divn. 16	Darjeeling, 6th „ „	1·06	Moderate showers of rain have continued to fall during the week both on the hills and on the plains, and have done much good. The bhadoi or early paddy is making very good progress. Kowni (millet) is being reaped. Heoti or winter paddy has been sown. Rice was little cheaper at the hâts during the week owing to Government rice having reached the district.
17	Julpigoree, 6th „ „	5·49	There have been heavy showers of rain during the week, with bright sunny days intervening—the very best weather that could be for the rice crop at this season. Bhadoi or early crop everywhere promising remarkably well. The jameera paddy, a very small crop, is in ear, and will be cut in about 20 days. There is very little of this crop grown in the district. Hymuntee or late rice sowings going on, and the promise is good. Jute crop progressing very well; sugarcane the same. Kowni (millet) being cut; crop middling only. In fact, nothing could be wished for better than the present promise of all crops.
	Cooch Behar, 6th „ „	6·59	Heavy rain oh several days. Reaping of the kowni (millet) is going on. The prospects of the aous or early rice continue to be excellent. Amun or late rice is being planted out in the low grounds.
	Eastern Districts.		
Dacca Division. 18	Dacca, 8th* June 1874	0·08	Weather very hot; few showers of rain. Prospects of crops most favorable. The rivers have slightly fallen.
19	Fureedpore, 6th June 1874.	Nil	First five days of the week bright and sunny weather, all that could be desired for the crops; since the 5th June it has been cloudy. 6th.—Every sign of rain, which will probably fall before close of the day. Sowings almost everywhere completed, and the present condition and prospects of the rice crops are most favorable. Prices of coarse rice have fallen at Fureedpore and at Goalundo, whence the sub-divisional officer writes that a large stock has accumulated. At Madaripore and Gopalgunge prices are stationary; at Bhangah, however, owing to decreased importation and villagers not selling their stocks, there has been a rise.
20	Backergunge, 30th May 1874.	3 69	Cool, and occasionally rainy. Favorable. The rain has come in time to save the aous or early rice crop.
21	Mymensingh, 6th June 1874.	0·40	Weather generally hot and dry. Rain on two days of the week. The river has fallen during the last few days. There was heavy rain in the sudder station on the 6th June, besides what is shown in this return. Accounts from all the sub-divisions state that more rain is wanted. There has been partial damage to the teel (oil seed) and early crops on the low lands, from the sudden rise of the river. The aous or early rice is, however, generally in a very satisfactory state, and the outturn promises to be an excellent one. The crop in the east and centre of the district is unusually forward. The health of the district is generally good.
22	Sylhet, 30th May 1874	4·10	Rather sultry at the close of the week. The rivers are falling a little owing to the break of dry weather. Prospects of crops much the same as last week. The dry weather has enabled the ryots to plant out more extensively. Crops promise well. The price of rice has fallen a little. Exportations slack: about 3,000 maunds of rice and 10 to 12,000 maunds of paddy. A few cases of cholera and small-pox reported by the Police, but the district is on the whole very healthy. The cattle disease at Gwineghat in Jaintiâ has carried off a good many heads of cattle.

* Telegram of the 8th June, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)				
		Eastern Districts—(*Contd.*)		
Chittagong Divn.	23	Chittagong, 30th May 1874.	9·42	Hot and fine in the day; heavy rain generally at night, up to the 28th May. The fall seems to have been general over the sudder sub-division. From Cox's Bazar only 1·62 inches reported up to the 27th. The rain has been most beneficial to the young paddy, which is coming on well. Field work going on actively. From the last reports cholera seems to be abating.
	24	Noakholly, 30th May 1874	4·04	Early part of the week cloudy and rainy, latter part very hot and close. Sowing of aous or early rice completed, and that of amun or late rice commenced. The rain has done much good to the young plants.
	25	Tipperah, 6th June 1874	·90	Hot still and muggy, with a few slight showers of rain; sun very powerful. The sowings of the aous or early rice have been quite completed, those of the amun or late rice nearly so. Up to the present, the prospects of these two great rice crops are as good as they can be.
	26	Chittagong Hill Tracts, 30th May 1874.	6·62	Occasional falls of rain throughout the whole week, with constant heavy squalls. The hillmen are busily engaged in sowing their jooms. The seeds sown last week have germinated.
		Hill Tipperah, 30th May 1874.	5 39	There has been abundance of rain over the district during the week, which has done an immensity of good. The young paddy is coming up and everywhere looks well. A break in the rains may now be expected, as sufficient has fallen for the crops, provided the regular rains come on in about a fortnight.
BEHAR.				
Patna Division.	27	Patna, 8th June 1874	·50	Weather seasonable, with strong east winds. There has been much more rain generally throughout the district than there has been at head-quarters. Lands being prepared everywhere for the *burhai* sowings, prices at head-quarters fallen in consequence. Health of the district good.
	28	Gya, 6th „ „	0·77	Stormy. A little rain throughout the district. No crops on ground except sugarcane and a little murwa and cheena (millet). Ploughing commenced generally. Health of the district good.
	29	Shahabad, 6th „ „	1·05	Rain fell on the 2nd June. Weather unsettled and uncloudy; east wind prevalent. Sufficient rain has fallen in the district to allow land to be prepared for the bhadoi or early crops. Cheena (millet) still being gathered. Small-pox still prevalent.
	30	Tirhoot, 6th „ „	1·37	Weather close and sultry; east wind prevailing, and cloudy in the night. In Mudhoobunnee sub-division 1·78" rain fell during the week. Rice and murwa (millet) have been sown in many places; the other lands are being got ready, but a great deal of hard rice land is as yet unploughed. Some of the crops now sown will be ripe by the end of August if all goes well. No report has been received from Hajeepore, but the reports from Seetamurhee are favorable; the rain has enabled the people to sow Indian-corn largely; also about a quarter of the paddy lands are sown. Rice seedlings are placed nearly ready for transplanting. In the sudder sub-division rainfall on the 3rd was ·37 and on 4th 1·12", and in many places the ryots have commenced sowing makai (Indian-corn) and murwa (millet). In Tezpore sub-division there was rain on Monday, Tuesday, and Wednesday, but it varied very much locally; in the north it was sufficient for the sowing of makai (Indian-corn); everywhere it has facilitated the preparation of land. In Durbhunga, the rain has materially improved the paddy that has been sown; it is feared that in some places, if general rain comes on, the lower land will be submerged, and no paddy sown; this refers more particularly to Singhia and part of Beherah.
	31	Saran, 6th „ „	·72	Hot, with occasional clouds; east wind prevailing. The rain was more or less general, though partial, throughout the district, and has been of very great benefit to the crops where the fall was sufficiently heavy. The ryots are engaged in preparing their lands for the next sowings. Bhadoi or early and aghani or late rice are now being sown. Cheena (millet) in various stages of growth, and is a fair crop where irrigated. Mango crop in places ripening. More rain is anxiously looked for. Prices have slightly fallen.
	32	Chumparun, 6th „ „	·89	Seasonable. No material change since last week. Agricultural operations going on well. Prospects getting better.
Bhagulpore Divn.	33	Monghyr, 6th „ „	0 58	Rain all over the district except Bukhtiarpore; local, and on different dates. Strong easterly wind. Storm on Monday. Heavy rain on Friday night. Very little crops on the ground. Ploughing commenced in earnest since the first rain. Every probability of a favorable sowing season.
	34	Bhagulpore, 8th June 1874.	1·05	Rain has fallen in the sudder sub-division; at Banka sub-division ·11; at Soopool 3 29. Other returns not received. Prospects of crops improved. General health good. Cholera ceased at Katooria.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
Bhagulpore Divn.	35	Purneah, 6th June 1874	4·04	The rains appear to have set in. The sowing of the bhadoi or early crop has been finished; that of aughanee or late rice in progress.* Moong (pulse) and kowni (millet) have been gathered; yield good. Makai (Indian-corn) has been largely sown. Jute and sugarcane promise well.
	36	Sonthal Pergunnahs, 6th June 1874.	·48	Wind variable; clouds gathering and dispersing. Very good shower on the 5th June. Air unusually clear. Showers constantly seen somewhere on the hills. Ploughing and sowing going on. A very little rain reported from Rajmenal. Ploughing going on there. Nothing to report about any crop.
ORISSA.				
Orissa Division.	37	Cuttack, 8th* June 1874	.....	Frequent and copious rain. Weather cloudy. Sowing going on. Prices of food-grains stationary. Public health generally good.
	38	Pooree, 30th May 1874	·35	Hot, and occasionally cloudy, with a little rain on 24th, 25th, and 28th May. The harvest of the dalua rice has been completed, with a good outturn. Cotton is being gathered, with a fair outturn. Mangoes are ripe, but the crop is poor. Agricultural operations are being slowly resumed where rain has fallen and sowings of paddy commenced on low lands. More rain is required and expected. Sugarcane is doing well Purchases of rice for export continue on a moderate scale, and prices are almost stationary. Public health good.
	39	Balasore, 6th June 1874	Nil	Cloudy and threatening, but without any rain beyond a mere sprinkling. Prospects of crops not so favorable as last week, since when there has been no rain worth mention; moreover, the northern and south-eastern portions of the district got scarcely any of the rain which benefited the centre of the district last week. Tillage and sowing are thrown back accordingly, and rain is anxiously awaited. Cholera has broken out in several places with some severity. It is hoped that it will cease with the first good fall of rain.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 6th June 1874.	2·71	In the course of the last six days there has been abundant rain. Bright and clear on the 6th June. Ploughing and sowing are going on merrily. Ryots and others are beginning to ask for advances. The popular idea is that the rain has come at the time when it is most valuable.
	41	Lohardugga, 6th June 1874.*	1·96	Weather stormy, cool, and pleasant; the rain appears to have been general. The cultivating season has opened most favorably, and the prospects at present are all that could be desired. The gora paddy and goondli have been sown, and agricultural operations are being actively carried on. Jungle produce is very abundant this year, particularly the "serai," or fruit of the sál tree, which is largely consumed, together with mohwa, by the poorer classes. In Palamow sub-division good rain has fallen, and the goondli and sawan crops are being sown; and a large number of the laborers have left the relief works for the fields. Small-pox is prevalent, but otherwise the general health is good. Prices have a tendency to fall.
	42	Singbhoom, 6th June 1874.	0·47	Cloudy, with occasional light showers during the week. All going on well. Sowings and ploughing going on. Small-pox reported from Seraikilla.
	43	Manbhoom, 6th June 1874.	1·46	Showery, cool, and seasonable. The timely showers of rain which have fallen during the week have enabled the cultivators to plough up their lands and sow the early rice, millet, grass-seeds, and Indian-corn. They have also made the grass grow for the cattle, and partly refilled the tanks and reservoirs. Cholera has also decreased, and the general prospects of the country very much improved,

* Telegram of the 8th June, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

[First Publication.]

NOTIFICATION.

The 16th June 1874.—Under Section 2 of the District Road Cess Act, 1871, the Lieutenant-Governor is pleased to direct that the cesses leviable under the said Act shall take effect in the districts noted in the margin from the 1st October 1874.

Tipperah.
Mymensingh.

Under Section 70 of the aforesaid Act, the Lieutenant-Governor is pleased to determine that the month in which the District Committees shall meet to prepare estimates of income and expenditure for the cess year next ensuing, as in the said Section provided, shall be August in the said districts.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[Third Publication.]

THE Lieutenant-Governor is pleased to order the publication of the following notification for general information :—

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

The 29th April 1874.—It is hereby notified for general information that three new buoys (iron) have been laid to mark the entrance of the Burabulung or Balasore river, viz. the "outer bar buoy" in 6 feet at low-water, painted black; the "inner bar buoy" in 3 feet at low-water, painted red; and the "Elfin flat buoy" in 3 feet at low-water, painted black.

A vessel bound for Balasore should first make the Balasore buoy shown on all charts of the head of the Bay of Bengal, then steer north-west for the "outer bar buoy," pass close

to south of it, and steer for the red or inner buoy; when this is reached, she should haul up north and pass close to the "Elfin flat buoy," after passing which she can run right into the river mouth.

There is only one foot at low-water springs on this bar, with a rise of tide of 13 feet; owing to the heavy sea which runs here at times, vessels should only cross the bar at high-water.

A beacon, called "Fairy beacon," to be put up on the south side of the river entrance, which will be useful in event of any of the buoys breaking away.

A tidal gauge has been erected opposite Balramghury house, levelled to 2 feet below low-water level of the tide of 23rd February 1874. This gives approximately the zero of driest season of the year; zero on this gauge gives one foot at low-water on Balasore river bar.

The Balramghury flag-staff will show the following signals for information of vessels entering the river:—

Ensign at yard-arm	...	...	Vessel leaving river.
„ at mast-head	...	...	„ entering river.
First cones at yard-arm	...	...	Low-water.
Second cones at yard-arm	...	...	High-water

A. BAKER,
Offg. Master-Attendant.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

The following order, issued by the Government of India in the Legislative Department, is republished for general information:—

No. 3.—*Fort William, the 10th June* 1874.—*Notification.*—The following Statute relates to India, and is hereby published for general information:—

37 VIC., CHAPTER 3.

An Act to enable the Secretary of State in Council of India to raise money in the United Kingdom for the service of the Government of India.

[30TH MARCH 1874.]

Whereas the exigencies of the public service in India require that the Secretary of State in Council of India, should be enabled to raise money in the United Kingdom on the credit of the revenues of India:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

Power to the Secretary of State in Council of India to raise any sum not exceeding 10,000,000*l.*

1. It shall be lawful for the Secretary of State in Council of India, at any time or times before the thirtieth day of April, one thousand eight hundred and seventy-nine, or, if Parliament be then sitting, before the end of the then Session of Parliament, to raise in the United Kingdom, for the service of the Government of India, any sum or sums of money not exceeding in the whole ten millions of pounds sterling, and such sum or sums may be raised by the creation and issue of bonds or debentures, or capital stock bearing interest, or annuities, or partly by one of such modes and partly by another or others.

Bonds may be issued under the hands of two members of the Council, and countersigned by Secretary of State.

2. All bonds issued under the authority of this Act may be issued under the hands of two members of the Council of India, and countersigned by the Secretary of State for India or one of his Under Secretaries, or his Assistant Under Secretary, and shall be for such respective amounts payable after such notice, and at such rate or rates of interest as the said Secretary of State in Council may think fit.

Debentures may be issued.

3. All debentures issued under the authority of this Act may be issued under the hands of two members of the Council, and countersigned as aforesaid, for such respective amounts, and at such rate or rates of interest, as the Secretary of State in Council may think fit, and shall be issued at or for such prices and on such terms as may be determined by the Secretary of State in Council.

As to payment of principal and interest on debentures.

4. All debentures issued under the authority of this Act shall be paid off at par at a time or times to be mentioned in such debentures respectively; and the interest on all such debentures shall be paid half-yearly on such days as shall be mentioned therein; and the principal moneys and interest secured by such debentures shall be payable either at the treasury of the Secretary of State in Council in London, or at the Bank of England.

Debentures transferable by delivery.

Coupons by delivery.

5. All or any number of the debentures issued under the authority of this Act, and all right to and in respect of the principal and interest moneys secured thereby, shall be transferable by the delivery of such debentures; and the coupons for interest annexed to any debenture issued under the authority of this Act shall also pass by delivery.

Capital stock and annuities may be created and issued.

6. Any capital stock created under the authority of this Act shall bear such a rate of interest, and any annuities to be created under the authority of this Act shall be at such rate per centum per annum, as the Secretary of State in Council may think fit; and such capital stock and such annuities may be issued on such terms as may be determined by the Secretary of State in Council; and any such capital stock may bear interest during such period, and be paid off at par at such time as the Secretary of State in Council may prescribe previously to the issue of such capital stock; and such annuities may be terminable at such period as the Secretary of State in Council may prescribe previously to the issue of such annuities.

7. In case of the creation and issue of any such capital stock or of any such annuities, there shall be kept, either at the Office of the Secretary of State in Council in London or at the Bank of England, books wherein entries shall be made of the said capital stock and annuities respectively, and wherein all assignments or transfers of the same respectively, or any part thereof respectively, shall be entered and registered, and shall be signed by the parties making such assignments or transfers, or if such parties be absent, by his, her, or their attorney or attornies thereunto lawfully authorized by writing under his, her, or their hands and seals, to be attested by two or more credible witnesses; and the person or persons to whom such transfer or transfers shall be made may respectively underwrite his, her, or their acceptance thereof; and no other mode of assigning or transferring the said capital stock or the said annuities or any part thereof respectively or any interest therein respectively, shall be good and available in law, and no stamp duties whatsoever shall be charged on the said transfers or any of them.

Transfer books of such capital stock, and annuities to be kept.

8. All annuities created and issued under the authority of this Act shall be deemed and taken to be personal and not real estate, and shall go to the executors or administrators of the person or persons dying possessed thereof, interested therein, or entitled thereto, and not to the heir-at-law, nor be liable to any foreign attachment by the custom of London or otherwise.

Annuities deemed personal estate.

9. The whole amount of the principal moneys to be charged on the revenues of India under this Act shall not exceed ten millions; and no money shall be raised or secured under the authority of this Act after the said thirtieth day of April one thousand eight hundred and seventy-nine, or, if Parliament be then sitting, after the end of the then session of Parliament, save for or upon the repayment of principal moneys previously secured under this Act as hereinafter provided.

The whole amount charged on revenues of India not to exceed 10,000,000*l*.

10. Upon or for the repayment of any principal money secured under the authority of this Act, the Secretary of State in Council may at any time borrow or raise, by all or any of the modes aforesaid, all or any part of the amount of principal money repaid or to be repaid, and so from time to time as all or any part of any principal money under this Act may require to be repaid, but the amount to be charged upon the revenues of India shall not in any case exceed the principal money required to be repaid.

Power to raise money for payment of principal money.

11. All bonds and debentures to be issued under this Act, and the principal moneys and interest thereby secured, and all capital stock to be issued under this Act, and the interest thereon, and all annuities to be issued under this Act, shall be charged on and payable out of the revenues of India, in like manner as other liabilities incurred on account of the Government of the said territories.

Securities, &c., to be charged on revenues of India.

12. The provisions contained in section four of the Act of the session holden in the fifth and sixth years of King William the Fourth, chapter sixty-four, with respect to the composition and agreement for the payment by the East India Company of an annual sum in lieu of stamp duties on their bonds and the exemption of their bonds from stamp duties shall be applicable with respect to the bonds and debentures to be issued under the authority of this Act, as if such provisions were here repeated and re-enacted with reference thereto.

Provisions as to composition for stamp duties on India bonds extended to bonds and debentures under this Act.

13. All provisions now in force in anywise relating to the offence of forging or altering, or offering, uttering, disposing of, or putting off, knowing the same to be forged or altered, any East India bond, with intent to defraud, shall extend and be applicable to and in respect of any debenture issued under the authority of this Act, as well as to and in respect of any bond issued under the same authority.

Forgery of debentures to be punishable as forgery of East India bonds.

14. Provided always, that, at the end of each of the half-years ending on the thirty-first day of March and the thirtieth day of September in every year, the Secretary of State in Council shall prepare or cause to be prepared a return of all loans raised in England under the provisions of this Act or of any other Acts, chargeable on the revenues of India, outstanding at the commencement of each half-year, with the rates of interest payable thereon, and the date of the termination of each loan, the debt incurred during the half-year, the moneys raised thereby during the half-year, the loans paid off or discharged during the half-year, and the loans outstanding at the close of the half-year, stating, so far as the public convenience will allow the purpose or service for which moneys have been raised during the half-year, and that a similar return shall also be prepared of all loans raised in India; that such returns shall be presented to both Houses of Parliament within fifteen days after the expiration of the said half-yearly periods as regards the loans raised in England, and within three months as regards the loans raised in India, if Parliament be then sitting, or if not sitting, then within one week after Parliament shall be next assembled.

Returns to be prepared half-yearly of moneys raised on loan, and presented to Parliament.

Accounts of all loans and liabilities to be included in account annually laid before Parliament.

15. The Secretary of State in Council shall include in the account to be laid before both Houses of Parliament, pursuant to the fifty-third section of the Act of the twenty-first and twenty-second Victoria, chapter one hundred and six, within the first fourteen days during which Parliament may be sitting next after the first day of May in every year, accounts of all stocks, loans, debts, and liabilities chargeable on the revenues of India, at home and abroad, at the commencement and close of the year to which such account shall relate, the loans, debts, and liabilities raised or incurred within that year and the amounts paid off or discharged during that year; and the provisions of the Acts of the twenty-first Victoria, chapter three, twenty-second Victoria, chapter eleven, twenty-second and twenty-third Victoria, chapter thirty-nine, twenty-third and twenty-fourth Victoria, chapter one hundred and thirty, twenty-fourth and twenty-fifth Victoria, chapters twenty-five and one hundred and eighteen, thirty-second and thirty-third Victoria, chapter one hundred and six, and thirty-sixth Victoria, chapter thirty-two, so far as regards the preparation and representation to Parliament annually of a return of all moneys raised on loan under the provisions of those Acts, and a return of all stocks, loans, debts, and liabilities chargeable on the revenues of India, at home and abroad, are hereby repealed.

Saving powers of the Secretary of State in Council.

16. This Act shall not prejudice or affect any power of raising or borrowing money vested in the said Secretary of State in Council at the time of passing thereof.

Stock created hereunder to be deemed East India stock.

17. Any capital stock created under this Act shall be deemed to be East India stock, within the Act twenty-second and twenty-third Victoria, chapter thirty-five, section thirty-two, unless and until Parliament shall otherwise provide; and any capital stock created under this Act shall be deemed to be and shall mean India stock within the Act of the twenty-sixth and twenty-seventh Victoria, chapter seventy-three, anything in the said last mentioned Act to the contrary notwithstanding.

Section 3, &c., of 33 & 34 Vic., c 93, extended to capital stock created under this Act

18. The provisions contained in the third section of the Act of the thirty-third and thirty-fourth Victoria, chapter ninety-three, and all other enactments in the said Act relating to or affecting such provisions, shall be extended and be applicable to any capital stock created under this Act, or any previous Acts, and chargeable upon the revenues of India.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 1803C.S.

The 11th June 1874.—Baboo Nobin Krishna Banerjee, Sub-Deputy Collector, Nuddea, is vested with the powers of a Magistrate of the Third Class.

Baboo Gopinath Matey, Moonsif, on special duty in Chumparun, is vested with the powers of a Magistrate of the Second Class.

The 12th June 1874.—The following Honorary Magistrates in the District of Tirhoot are vested with the powers of a Magistrate of the Second Class, viz.—

Mr. A. Tripe. | Mr. G. Anderson.

Mr. Donald Reid, Honorary Magistrate in the District of Sarun, is vested with the powers of a Magistrate of the First Class.

The 13th June 1874.—Baboo Sant Prosad, Sub-Deputy Collector, Sonthal Pergunnahs, is vested with the powers of a Magistrate of the Second Class, and with those of a Moonsif, to try all cases arising under the Sonthal Pergunnahs' Settlement Regulation of or under the value of Rs. 50.

Mr. John Arthur Craven, Deputy Magistrate and Deputy Collector, in charge of the Kissengunge Sub-Division, in Purneah, is vested with the powers of a Magistrate of the First Class, and with powers to try summarily the offences mentioned in Section 222 of the Criminal Procedure Code.

The 15th June 1874.—Baboo Kali Das Dutt, Subordinate Judge of Dinagepore, is appointed to be Second Subordinate Judge of Rungpore in addition to his present duties.

The 16th June 1874.—Baboo Amirto Lall Pal, Moonsif, on special duty, who has, under separate orders of this date, been posted to Julpigoree, is vested with the powers of a Magistrate of the First Class

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 11th June 1874.—Under the powers vested in the Lieutenant-Governor by Section 2 of Act II (B.C.) of 1867 (an Act to provide for the punishment of public gaming and the keeping of gaming-houses), His Honor is pleased to authorize the extension, from the 1st July next, of the provisions of Section 11 of the said Act to the town of Pubna. The limits of the town for the purposes of this Act will be the same as those defined for the purposes of Act VI (B.C.) of 1868 in the Notification of 26th January 1869, published in the *Calcutta Gazette* of the 3rd February following.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 5th June 1874.—It has been represented to His Honor the Lieutenant-Governor that the multiplication of Rural Registration Offices, advantageous as it is to the public generally, entails some inconvenience on those proprietors of immovable property who reside, not within the sub-district in which their property is situated, but at the sudder station of the district.

With a view of abating the inconvenience complained of, and facilitating the registration of documents in the District Registry Office, instead of in the Sub-Registry Offices, in which they would ordinarily be registered, the Lieutenant-Governor, with the approval of the Governor-General in Council, is pleased to direct the substitution of the following article for the present article (*k*) of the schedule of fees.

(*k*) For registration by any Registrar (other than the Registrar of Calcutta) of any document under Section 30(*a*).	An extra fee equal to the ordinary fee, or Rs. 5, whichever is less.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 27th May 1874.—The Lieutenant-Governor is pleased to direct the withdrawal from Mr. J. Weston, Judge of the Principal Court of Small Causes at Magoora, of the powers hitherto exercised by him of Judge of the Principal Court of Small Causes in the several Courts of Small Causes in the district of Nuddea, under the orders contained in Notification of the 25th June 1867, published in the *Calcutta Gazette* of the 26th idem.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

NOTIFICATION.

UNDER SECTION 64 OF ACT V (B.C.) OF 1870.

The 15th June 1874.—The Commissioners for making Improvements in the Port of Calcutta, with the sanction of the Lieutenant-Governor of Bengal, do hereby declare that the wharf on the east bank of the River Hooghly, extending from the northern boundary of Golabaree Ghât Road on the north to the southern boundary of Kassy Mitter's Ghât on the south, is ready for receiving, landing, and shipping goods from and upon vessels not being sea-going vessels, and order that within the limits of that portion of the Port of Calcutta situate between the said Kassy Mitter's Ghât on the south and the northern boundary of Thakoorbarree Ghât on the north, it shall not be lawful to land or ship any goods out of or into vessels of the class above specified except at the aforesaid wharf.

By order of the Commissioners,
W. D. BRUCE, *Vice-Chairman.*

HIGH COURT NOTICES.

Order by the High Court of Judicature at Fort William in Bengal.

NOTIFICATION.

LEAVE OF ABSENCE.

The 10th June 1874.—Baboo Atalbeharee Ghosh, B. L., Officiating Moonsif of Raneegunge, in the District of East Burdwan, is allowed 15 days' leave without pay, under Section 9, Supplement F of the Civil Leave Code. The Moonsif's Sheristadar to be placed in charge of the current duties of the office.

By order, &c.,
H. J. S. COTTON, *Offg. Registrar.*

HIGH COURT—Original Jurisdiction.

NOTIFICATIONS.

The following rules have been passed by the High Court of Judicature at Fort William in Bengal, to take effect from the 1st day of July 1874.

R. BELCHAMBERS,
10th June 1874. *Registrar.*

IT IS ORDERED that the following rules be read and passed as the rules and orders of the High Court of Judicature at Fort William in Bengal in its Original Jurisdiction, to take effect from the 1st day of July one thousand eight hundred and seventy-four :—

Production and Inspection of Documents.

1. Copies of documents referred to in, and annexed to, a plaint as exhibits, may be furnished to a defendant on his entering his appearance.

Defendant may obtain copies of documents annexed to a plaint as exhibits,

2. Documents annexed to a plaint as exhibits, may be inspected by a defendant who has entered his appearance, on 24 hours' previous notice being given to the plaintiff or his attorney.

And may inspect such documents.

3. A plaintiff or a defendant may, at any stage of a suit, but, if required to file a written statement, not until after filing a sufficient written statement [unless the Court or a Judge shall otherwise direct], be furnished with copies of documents annexed as exhibits to the written statement of the other party, and may inspect such documents, on 24 hours' previous notice being given to the party by whom such written statement has been filed.

Either party may obtain copies of documents annexed as exhibits to the written statement of the other party,

And may inspect such documents.

4. Until documents produced with a plaint, but not mentioned therein or annexed thereto as exhibits, have been offered and received in evidence, inspection thereof cannot be allowed, or copies thereof furnished, to a defendant without an order to be obtained under the following rules :—

Documents produced with a plaint, but not annexed thereto as exhibits.

5. A defendant may, at any stage of a suit, but, if required to file a written statement, not until after filing a sufficient written statement [unless the Court or a Judge shall otherwise direct], apply by summons at Chambers for an order that he, his attorney, or agent, be at liberty to inspect and peruse the documents mentioned in and produced with a plaint, [but not annexed thereto as exhibits], and take copies and abstracts thereof, and extracts therefrom.

Defendant may inspect documents mentioned in and produced with a plaint, but not annexed thereto as exhibits;

And may obtain copies of such documents.

6. A plaintiff, or a defendant, may at any stage of a suit, but, if required to file a written statement, not until after filing a sufficient written statement [unless the Court or a Judge shall otherwise direct], apply by summons at Chambers for an order that the other party do produce and leave with the Registrar, or produce at any other specified place, the documents mentioned in the plaint, or in the written statement of either party, [but not annexed as exhibits to or produced with the plaint, or annexed as exhibits to the written statement], and admitted to be in his possession or power, and that the applicant, his attorney, or agent, be at liberty to inspect and peruse the same, and take copies and abstracts thereof, and extracts therefrom.

Deposit and inspection of documents admitted by plaint, or written statement, but not annexed thereto as exhibits, or produced with the plaint.

7. A plaintiff, or a defendant, [a claimant under a decree in an administration suit being deemed a plaintiff], may, at any stage of a suit,

In what manner production obtained as between plaintiff and defendant.

but, if required to file a written statement, not until after filing a sufficient written statement [unless the Court or a Judge shall otherwise direct], apply by summons at Chambers for an order that the other party do file an affidavit stating whether he has or has had in his possession or power any, and, if any, what, documents relating to the matters in question in the suit, and accounting for the same, and that he do within a given time produce and leave with the Registrar, or produce at any other specified place, such of the documents as by such affidavit shall appear to be in his possession, except such of the same, if any, as he may by his affidavit object to produce; and that the applicant, his attorney, or agent, be at liberty to inspect and peruse the documents so produced and to take copies thereof and abstracts and extracts therefrom.

As between co-defendants.

8. A defendant may, at any stage of a suit, but, if required to file a written statement, not until after filing a sufficient written statement [unless the Court or a Judge shall otherwise order], apply by summons at Chambers as against any other defendant or defendants for an order similar to that to be obtained under the last preceding rule. The application must be supported by an affidavit, stating the interest of such co-defendant or co-defendants in the matter touching which discovery is sought, and the special facts and circumstances upon which the claim to obtain discovery from him or them is founded.

No affidavit in support of application in any other case.

9. Except as provided in the last preceding rule, no affidavit is necessary in support of an application for discovery and consequential production and inspection, and the costs of any such affidavit will in future not be allowed, unless the Court or a Judge shall otherwise order.

Where production by a corporation or public company affidavit by whom to be made.

10. Where the production is sought from a corporation or company authorized to sue and be sued in the name of an officer or trustee, the affidavit will be directed to be made, on behalf of the corporation or company, by any director, secretary, or other principal officer of the corporation or company who may be able to depose to facts required to be stated in the affidavit.

Where affidavit may be made by a third party.

11. The Court or a Judge may, for a sufficient reason, allow the affidavit to be made, on behalf of the party from whom production is sought, by any person competent to make the same.

Affidavit must be made, although there may be good reasons against production.

12. The party required to make an affidavit must make the same, although he may have good grounds against producing the documents; and he must describe the documents with sufficient distinctness to enable the Court or a Judge to order production if his objections should be overruled.

Description of documents.

Objections to be raised by the affidavit.

13. All questions of privilege, exemption, sealing up, or production without leaving at the Registrar's Office, must be raised in the affidavit.

Further time to make affidavit.

14. If extension of time for making the affidavit be required, the same may be obtained upon summons at Chambers.

No affidavit in answer to be received.

15. No affidavit in answer to an affidavit, or further affidavit, made by the party from whom production is sought, or on his behalf, will be received.

Course when documents are claimed to be protected.

16. If documents are claimed to be protected, the party seeking production, if desirous of raising the question, must do so by a further application for production. Such application must be made by summons, and may be heard before the Judge in Chambers, or adjourned to be heard in Court.

Course where sufficiency of affidavit questioned.

17. If the affidavit be considered insufficient as not containing a clear admission or denial of the possession of documents, or such a description of them that the Court can enforce its order, or from any other cause, the party seeking production may obtain a summons to consider the sufficiency of the affidavit.

Course where affidavit held to be insufficient.

18. If the affidavit be held to be insufficient, further time may, at the discretion of the Judge, be allowed to the deponent to file a full and sufficient affidavit; and such time may be further extended on his application by summons. If further time be not allowed, the deponent will be liable to process of contempt for disobedience, as if no affidavit had been filed.

Where books and papers in constant use.

19. If it appears from the affidavit of the party from whom production is sought, that the books and papers relating to the matters in question are in constant use in his business, and necessary for that purpose, or cannot be deposited without great inconvenience, the order, in the first instance, will only direct that they shall be produced for inspection at the place of business at which they are stated to be in use or other convenient place.

Where satisfactory inspection out of Court not obtained.

20. If where inspection has been ordered out of Court, it is found that a satisfactory inspection cannot be obtained, or if it can be shown that the documents are being tampered with, application may be made, by summons, for an order for the deposit and inspection of the documents in Court. Such application must be supported by affidavit.

Where they contain irrelevant matter.

21. If it appears from the affidavit of the party from whom production is sought that the books or papers contain matter which he is not liable to disclose, the order will be qualified so as to admit of such parts being sealed up.

Special application for leave to seal.

22. If the right to seal up be omitted to be claimed, a special application for leave to seal up may be made by summons. Such application must be supported by affidavit.

Course where there is reason to suppose the party has concealed relevant matter.

23. If the statements in the affidavit in support of a claim to seal up documents, or if the unsealed documents, or plaint, or written statement afford grounds for suspecting that the party has sealed up matter that ought to have been disclosed, the party seeking inspection may apply, by summons, for inspection of the documents which have been sealed, and the Judge may unseal such

documents and examine them in order to see whether the applicant is entitled to inspect the portions sealed up.

Upon deposit of documents, order and list to be produced therewith.

24. If the documents are ordered to be deposited at the Registrar's Office, a copy of the order and a schedule of the documents must be left at the time the deposit is made.

Delivery out to a party of documents deposited by him.

25. When the purpose for which documents have been deposited in Court is satisfied, the party by whom they were deposited may have them delivered out to him; but for that purpose he must obtain an order on summons, or the consent in writing of the other party.

Order for affidavit or production how to be enforced.

26. An order for an affidavit and production, or for production only, may be enforced by serving the same on the party ordered to produce the documents, with a memorandum endorsed thereon to the effect following, namely,—"If you, the within named A. B., neglect to obey this order by the time therein limited, you will be liable to be arrested and committed to prison for contempt." And if default be made in complying with the order by the time specified therein, or in a further order, the party making default may be proceeded against by attachment.

Forms.

27. The forms set forth in the schedule annexed are to be followed, with such variations as circumstances may require.

R. COUCH. W. AINSLIE.
F. B. KEMP. E. G. BIRCH.
LOUIS S. JACKSON. G. G. MORRIS.

A. G. MACPHERSON. W. F. McDONELL.
CHARLES PONTIFEX.

SCHEDULE.

No. 1.

Summons for inspection of documents mentioned in and produced with the plaint, but not annexed thereto as exhibits.

Let the plaintiff A. B. attend before the sitting Judge in Chambers at the Court-house on , the , day of 18 , at o'clock in the forenoon on the hearing of an application on the part of the defendant that the applicant, his attorneys and agents, may be at liberty to inspect and peruse the documents mentioned in and produced with the plaint [but not annexed thereto as exhibits], and take copies and abstracts thereof, and extracts therefrom as he shall be advised.

No. 2.

Summons for deposit and inspection of documents admitted by plaint, or written statement, but not annexed thereto, or produced with the plaint.

Let the defendant [*or plaintiff*] A. B. attend before the sitting Judge in Chambers at the Court-house on , the day of , 18 , at o'clock in the forenoon on the hearing of an application on the part of the plaintiff [*or defendant*] that the defendant [*or plaintiff*] may be ordered within [*four*] days after service, to produce and leave with the Registrar, the documents mentioned in the plaint or written statement [but not annexed as exhibits to or produced with the plaint, or annexed as exhibits to the written statement], and admitted to be in his possession or power: and that the applicant, his attorneys and agents, may be at liberty to inspect and peruse the same, and take copies and abstracts thereof, and extracts therefrom as he shall be advised.

No. 3.

Summons for an affidavit as to the possession of documents, and for deposit and inspection in Court of documents admitted thereby.

Let the defendant [*or plaintiff*] A. B. attend before the sitting Judge in Chambers at the Court-house on , the day of , 18 , at o'clock in the forenoon on the hearing of an application on the part of the plaintiff, [*or defendant*] that the defendant [*or plaintiff*] may be ordered, within [*four*] days after service, to make and file a full and sufficient affidavit.

[Or, *if against a corporation or a company, say:*— to file a full and sufficient affidavit: to be made by their Director, Secretary or other principal officer] stating whether he has, or has had, in his possession or power any, and, if any, what, documents relating to the matters in question in this suit, and accounting for the same. And that the said defendant [*or plaintiff*] may be ordered, within [*four*] days after filing such affidavit, to produce and leave with the Registrar of this Court the documents which by such affidavit shall appear to be in his possession or power: except such of them, if any, as he may by such affidavit object to produce. And that the applicant, his attorneys and agents, may be at liberty to inspect and peruse the documents so produced and left, and to take copies and abstracts thereof and extracts therefrom, as the applicant shall be advised.

No. 4.

Summons for an affidavit as to the possession of documents, and for leave to inspect same out of Court.

Proceed as in No. 3 *to* "accounting for the same"; *and continue thus:*

And that the said defendant [*or plaintiff*] may be ordered, at all reasonable times, upon reasonable notice, to produce at [*state where*], the documents which by such affidavit shall appear to be in his possession or power: except such of them, if any, as he may, by such affidavit, object to produce. And that the applicant, his attorneys and agents, may be at liberty to inspect and peruse the documents so produced, and to take copies and abstracts thereof, and extracts therefrom, as the applicant shall be advised.

No. 5.

Formal parts, see ante, No. 3.

Summons for further time to file an affidavit as to documents.

On the part of the plaintiff [*or defendant*], that the time limited by the order dated the day of , 18 , for the applicant to make and file an affidavit as to documents, may be enlarged until the day of , 18 ; and that the costs of this application may be costs in the cause.

No. 6.

Formal parts, see ante, No. 3.

Summons to consider the sufficiency in form of an affidavit as to documents.

On the part of the plaintiff [*or defendant*], to consider the sufficiency of the affidavit of the defendant [*or plaintiff*] A. B., filed the day of , 18 , as to the possession of documents, pursuant to the order dated the day of , 18 , and that the said defendants [*or plaintiff*] may be ordered to pay the costs of this application.

No. 7.

Formal parts, see ante, No. 3.

Summons for the production of documents objected to be produced.

On the part of the plaintiff [*or defendant*], that the defendant [*or plaintiff*] A. B., may be ordered, within [*four*] days after service, to produce and leave with the Registrar of this Court the several documents mentioned in his affidavit filed the day of , 18 , and in the second part of the first schedule thereto [*or as may be*], and thereby admitted to be in his possession or power, but which documents he thereby objects to produce. And that the applicant, his attorneys and agents, may be at liberty to inspect and peruse the said documents, and take copies [*continue as in No.* 3, *ante to the end*].

No. 8.

Formal parts, see ante, No. 3.

Summons for leave to seal up irrelevant matter.

On the part of the plaintiff [*or defendant*], that he may be at liberty to seal up such parts of the documents mentioned in the [first] schedule to his affidavit filed in this suit on the day of , 18 , as, according to an affidavit to be made by him, do not relate to the matters in question in this cause.

No. 9.

Formal parts, see ante, No. 3.

Summons for deposit and inspection in Court of documents ordered to be inspected out of Court.

On the part of the plaintiff [*or defendant*] A. B. that the defendant [*or plaintiff*] C. D. may be ordered within [*four*] days from the date of the order to be made hereon, to produce and leave with the Registrar of this Court the several documents mentioned in his affidavit filed on the day of , 18 , and in the second part of the first schedule thereto [*or as may be*], and thereby admitted to be in his possession and power, and which were by the order, dated the day of , 18 , ordered to be produced for inspection at the [*state where*] and that the applicant [*continue as in No.* 3 *to the end*].

No. 10.

Formal parts, see ante, No. 3.

Summons for leave to unseal documents.

On the part of the plaintiff [*or defendant*] A. B. that the documents mentioned in the affidavit of the defendant [*or the plaintiff*] A. B. filed on the day of 18 , and in the second part of the first schedule thereto [*or as may be*] and thereby admitted to be in his possession, as to such portions thereof as have been sealed up on the ground of privilege may be unsealed. And that the applicant, his attorneys and agents may be at liberty to inspect and peruse the said documents, including the portions so to be unsealed, and take copies [*continue as in No.* 3, *ante to the end*].

No. 11.

Formal parts, see ante, No. 3.

Summons for the delivery out of documents deposited in Court under an order.

On the part of the plaintiff [*or defendant*] that [*describe what; as thus:* all the documents, or, the documents mentioned in the schedule hereto] deposited by him with the Registrar of this Court, pursuant to the order dated the day of , 18 , may be delivered out to the applicant.

No. 12.

Affidavit admitting the possession of documents.

I, A B of [*place of residence and* description or addition] make oath [or solemnly affirm] and say as follows:—

1. That I have in my possession or power the documents relating to the matters in question in this suit set forth in the first and second parts of the first schedule hereto annexed.

2. That I object to produce the said documents set forth in the second part of the first schedule hereto.

3. That [*state upon what grounds the objection is made, and verify the facts, so far as may be.*]

4. That I have had, but have not now, in my possession or power the documents relating to the matters in question in this suit set forth in the second schedule hereto annexed.

5. That the last-mentioned documents were last in my possession or power on [*state when.*]

6. That [*what has become of the last-mentioned documents, and in whose possession they are now.*]

7. That, according to the best of my knowledge, remembrance, information, and belief, I have not now, and never have had, in my own possession or power, or in the possession or power of my attorneys or agents, or attorney or agent, or in the possession, or power of any other persons or person on my behalf, any deed, account, book of account, voucher, receipt, letter, memorandum, paper, or writing, or any copy of, or extract from, any such document, or any other document whatsoever relating to the matters in question in this suit, or any of them, or wherein any entry has been made relative to such matters, or any of them, other than and except the documents set forth in the said first and second schedules hereto.

The first schedule above referred to.
First part.
Second part.
The second schedule above referred to.

No. 13.

Formal parts: see ante No. 12.

Affidavit denying the possession of documents

1. That, according to the best of my knowledge [*continue as in ante,* No. 12, para. 7, to such matters or any of them.]

No. 14.

Order for inspection of documents mentioned in and produced with the plaint, but not annexed thereto as exhibits.

Upon the application of the defendant A—, and hearing the attorney for the defendant, and for the plaintiff—It is ordered, that the said defendant A, his attorneys and agents be at liberty to inspect and peruse the documents mentioned in and produced with the plaint [but not annexed thereto as exhibits], and to take copies and abstracts thereof, and extracts therefrom, as he shall be advised, [but previously to the said inspection, the plaintiff is to be at liberty to seal up such parts of the said documents as according to an affidavit to be made by him do not relate to the matters in question in this suit.]

No. 15.

Order for deposit and inspection of documents admitted by plaint, or written statement, but not annexed thereto as exhibits, or produced with the plaint.

Upon the application of the plaintiff [or defendant] A—, and hearing the attorney for the applicant and for the defendant [or plaintiff] B—It is ordered, that the defendant [or plaintiff] B, do produce and leave with the Registrar of this Court [or produce at any other specified place] the documents mentioned in the plaint or written statement [but not annexed as exhibits to or produced with the plaint, or annexed as exhibits to the written statement] and admitted to be in his possession or power, and the applicant, his attorneys, and agents, are to be at liberty to inspect and peruse the same, and to take copies and abstracts thereof, and extracts therefrom, as the applicant shall be advised, [but previously to the said inspection, the plaintiff is to be at liberty to seal up such parts of the said documents as according to an affidavit to be made by him do not relate to the matters in question in this suit.]

No. 16.

Order for affidavit of documents, and deposit and inspection in Court.

Upon the application of the plaintiff [or defendant] A, and hearing the attorney for the applicant and for the defendant [or plaintiff] B. It is ordered—that the defendant [or plaintiff] B, do within [*four*] days after service of this order, make and file a full and sufficient affidavit, stating whether he has or had in his possession or power any, and [if any] what, documents relating to the matters in question in this suit, and accounting for the same. And it is ordered, that the said defendant [or plaintiff] B, do, within [*seven*] days after filing such affidavit, produce and leave with the Registrar of this Court the documents which by such affidavit shall appear to be in his possession or power, except such of the same [if any] as he may by such affidavit object to produce. And the applicant, his attorneys and agents, are to be at liberty to inspect and peruse the documents so to be produced and left, and to take copies and abstracts thereof, and extracts therefrom, as the applicant shall be advised [but previously to the said inspection the said defendant [or plaintiff] is to be at liberty to seal up such parts of the said documents as according to an affidavit to be made by him do not relate to the matters in question in this suit.]

No. 17.

The like and for inspection out of Court.

Upon the application, &c., [*Form* 16 *ante*]—It is ordered, that the defendant [*or plaintiff*] B, do, within, &c., [*Form* 16], make and file a full and sufficient affidavit, &c., [*Form* 16]. And it is ordered, that the defendant [or plaintiff] B, do, at all reasonable times, upon reasonable notice, produce [*state where*] the documents which by such affidavit shall appear to be in his possession or power, except such of the same [if any] as he may by such affidavit object to produce, and the applicant, his attorneys and agents [*continue as in Form* 16 *to the end.*]

No. 18.

The like and for inspection against a corporation or public company.

Upon the application, &c., [*Form* 16 *ante*]—It is ordered, that the plaintiffs [or defendants] do, within, &c., [*Form* 16], file a full and sufficient affidavit, to be made by their director, secretary, or other principal officer, stating whether the plaintiffs [or defendants] have, or have had, in their possession any, and, [if any] what, documents relating to the matters in question in this cause, and accounting for the same. And it is ordered, [*continue as in Form* 16 *or* 17, *as may be ordered, to the end.*]

No. 19.

Order for inspection of documents held not privileged.

Upon the application, &c., [*Form* 16 *ante*], and the Judge being of opinion that the documents referred to in the schedules to the affidavit of the defendant [or plaintiff] C filed, &c., are not privileged, except such as are hereinafter mentioned—It is ordered, that the defendant [*or* plaintiff] C [as in Form 16 or 17, as may be ordered], the several documents in the first and second parts of the schedule to the said affidavit, except, &c., [*state documents held privileged*] referred to in the said schedules. And it is ordered, that the applicant, his attorneys and agents [*continue as in Form* 16 *to the end*].

No. 20.

Order enlarging time, where affidavit filed is insufficient.

Upon the application of the plaintiff [or defendant] A, and hearing the attorney for the applicant, and for the defendant [*or* plaintiff] B, and upon reading the order, dated, &c., and an affidavit of the said defendant [*or* plaintiff], filed the day of , in pursuance thereof, and the Judge being of opinion that the said affidavit is insufficient, and the said defendant [*or* plaintiff], by his attorney, now applying for further time to file a full and sufficient affidavit—It is ordered, that the time for the said defendant [*or* plaintiff] to file a full and sufficient affidavit pursuant to the said order be enlarged till the day of [*If deposit ordered:* And it is ordered, that the said defendant [*or* plaintiff] have till the day of to produce and leave with

the Registrar of this Court, pursuant to the said order, any documents relating to the matters in question in this suit, which, by the affidavit so to be made by him, shall appear to be in his possession or power, except such of the same, if any, as he may by such affidavit object to produce]; *If so*, and it is ordered, that the costs of this application be costs in this cause; *or*, that the defendant, *or* plaintiff, B, pay to the plaintiff *or* defendant, A, Rs. for the costs of this application; or the costs of this application to be taxed by the Taxing Officer in case the parties differ.

The following rules have been passed by the High Court of Judicature at Fort William in Bengal to take effect from the 1st day of July 1874.

R. BELCHAMBERS,

10*th June* 1874. *Registrar.*

IT IS ORDERED that the following rules be read and passed as the rules and orders of the High Court of Judicature at Fort William in Bengal, in its original jurisdiction, to take effect from the first day of July one thousand eight hundred and seventy-four:—

Admission of Advocates.

1. Any person who is entitled to practise as a Barrister in England or Ireland, or as an Advocate in the principal Courts of Scotland, may be admitted as an Advocate of this Court.

Qualification for admission.

2. Every person applying under the aforesaid rule to be admitted as an Advocate of this Court, must produce a certificate showing that he is entitled to practise as a Barrister in England or Ireland, or as an Advocate in the principal Courts of Scotland, together with satisfactory testimonials to his good character and ability.

Certificate of call to the bar.

Testimonials to character and ability.

3. The mode of applying to be admitted as an Advocate of this Court shall be by letter, stating the date on which the applicant was called to the bar, whether it is his intention to practise in this Court, and [in the case of an applicant who claims to be entitled to practise as a Barrister in England] the number of terms kept by him. The letter shall be addressed to, and left with, the Registrar of this Court, in its original jurisdiction, together with—

Mode of applying for admission.

Letter and documents to be left with the Registrar.

(1) The certificate required by rule 2;

(2) Testimonials to character and ability.

4. The Registrar shall circulate the letter, with the other documents to be left with him, to the Chief Justice and Puisne Judges.

And to be circulated by him to the Judges.

5. Every person on being admitted and enrolled as an Advocate of this Court may, without the payment of any fee besides the admission fee, obtain a certificate of admission under the signature of the Registrar and the seal of the Court.

Certificate of admission.

6. Any Advocate of this Court may, on the payment of a fee of 5 Rupees, [to be paid by means of Court fees stamps] obtain a certificate under the signature of the Registrar and the seal of the Court, that his name is borne on the roll of Advocates of this Court.

Certificate of being on the roll of Advocates.

7. The Registrar of this Court, on its original side, shall have the custody and care of the rolls or books wherein persons are at present enrolled as Advocates, and shall enrol the name of every person who shall be admitted an Advocate, with the date of his admission, in *alphabetical* order, in a roll or book to be kept by him for that purpose, to which roll or book all persons shall have free access without fee or reward.

Registrar to have the care of the rolls.

Infants and persons of unsound mind not so found by inquisition.

8. Every suit on behalf of an infant, [or a person of unsound mind not so found by inquisition] shall be instituted in the name of an adult person, who in such suit shall be called the next friend of the infant [or person of unsound mind] and may be ordered to pay any costs in the suit as if he or she were the plaintiff.

Infant, or person of unsound mind, must sue by next friend.

Costs.

9. If a plaint be filed on behalf of an infant [or a person of unsound mind not so found by inquisition] without a next friend, the defendant may apply by summons, to have the plaint taken off the file, with costs to be paid by the attorney by whom it was presented.

Plaint filed without next friend, to be taken off the file.

Costs.

10. Every application to the Court on behalf of an infant [or a person of unsound mind not so found by inquisition] shall be made by a next friend, unless such infant [or person] is a defendant, in which case it shall be made by a guardian *ad litem*.

Application to be made by next friend, or guardian *ad litem*.

11. Where the defendant to a suit, or respondent to any application, is an infant [or a person of unsound mind not so found by inquisition], the Court shall appoint a proper person to be guardian *ad litem* for such infant [or person] to put in the defence for such infant [or person], and generally to act on such infant's [or person's] behalf in the conduct and management of the case.

Guardian *ad litem* to be appointed by the Court.

12. Every order made in a suit, or on any application before the Court, in or by which an infant [or a person of unsound mind not so found by inquisition] is in any way concerned or affected, without such infant [or person] being represented by a next friend, or guardian *ad litem*, as the case may be, may be discharged with costs, to be paid by the attorney of the party at whose instance such order was obtained, if such attorney know, or

Order obtained without next friend or guardian may be discharged.

Costs.

might reasonably have known, the fact of such infancy or unsoundness of mind.

Who eligible to be next friend.

13. Any person, *sui juris*, may act as next friend of an infant, [or a person of unsound mind not so found by inquisition], provided his or her interest is not adverse to that of such infant [or person], and he or she is not a defendant, or respondent, or a married woman.

Next friend removable for neglect of duty, or having adverse interest.

14. If the interest of the next friend of an infant [or a person of unsound mind not so found by inquisition] is adverse to that of such infant [or person], or if he is so connected with a defendant, or respondent, whose interest is adverse to that of such infant [or person], as to make it impossible that the interest of such infant [or person] will be properly protected by him, or if he does not do his duty, or, pending the suit or application, cease to reside within the British territories in India, or for any other sufficient cause, application may be made on behalf of such infant [or person], or by a defendant, or respondent, by summons to be heard in Chambers, for his removal.

Next friend cannot retire without procuring new next friend, and giving security for costs already incurred.

15. Unless otherwise ordered by the Court or a Judge, a next friend will not be allowed to retire, at his own request, without first procuring a fit and proper person to be put in his place, and without giving security for the costs already incurred.

Application by summons for the appointment of a new next friend.

Fitness of new next friend must be shown.

16. The application for the appointment of a new next friend shall be by summons, and shall be supported by affidavit, showing the fitness of the person proposed, and also, unless he is a co-plaintiff or co-applicant, verifying the fact that he is not interested in the subject of the suit, or application.

Stay of proceedings on death or removal of next friend.

17. On the death, or removal as aforesaid, of a next friend, further proceedings shall be stayed until the appointment of a next friend in his place.

Who may apply for the appointment of a new next friend.

18. The attorney of an infant [or a person of unsound mind not so found by inquisition] may apply, by summons, for the appointment of a new next friend, whose fitness must be verified by affidavit. If the attorney of such infant [or person] omits, within a reasonable time, to take steps to get a new next friend appointed, any defendant, or respondent to any application, may apply, by summons to the attorney of such infant [or person], for the appointment of one.

Name of new next friend to be inserted in the proceedings.

19. On the appointment of a new next friend, his name as such shall thenceforth be inserted in the proceedings.

Written authority to act for next friend to be filed.

20. Before the name of any person can be used as the next friend of an infant [or a person of unsound mind not so found by inquisition], he must sign a written authority to the attorney for that purpose, which authority must be filed in the Registrar's Office.

Course to be followed by infant plaintiff, or applicant, on coming of age.

21. An infant plaintiff, or an infant not a party to a suit on whose behalf an application is pending, on coming of age, must elect whether he will proceed with the suit, or application. If he elects to proceed with it, he shall obtain an order discharging the next friend, and for leave to proceed in his own name. The title of the suit or application shall in such case be corrected so as to read thenceforth thus :—"A. B., late an infant, by C. D., his next friend, but now of full age." If he elects to abandon the suit or application, he shall, if a sole plaintiff, or sole applicant, obtain an order to dismiss the suit, or application, on payment of costs by himself. In either case the application may be made by petition, *exparte*; and it must be proved by affidavit that the late infant has attained his full age.

When sole plaintiff, or sole applicant.

Costs.

When co-plaintiff, or co-applicant.

22. An infant co-plaintiff, or co-applicant, on coming of age, and desiring to repudiate the suit, or application, must apply to have his name struck out as co-plaintiff, or co-applicant, or for permission to withdraw from the application. The application shall be by summons to the next friend, as well as to the defendant, or respondent; and it must be proved by affidavit that the late infant has attained his full age. The costs of all parties of such application, and of all or any proceedings theretofore had in the suit or matter, shall be paid by such persons as the Judge shall order.

Costs.

When suit, or proceeding, unreasonable or improper.

23. If any infant, on coming of age, can prove to the satisfaction of the Court that a suit or proceeding instituted in his name by a next friend was unreasonable or improper, he may, if a sole plaintiff, or sole applicant, apply to have the suit or proceeding dismissed, or, if a co-plaintiff or co-applicant, apply to have his name struck out as such co-plaintiff or co-applicant. The application shall be by summons to all the parties concerned: and the Court, upon being satisfied of such unreasonableness or impropriety, may grant the application, and order the next friend to pay the costs of all parties of the application, and all or any of the costs of all parties of any proceeding theretofore had in the suit or matter.

Costs.

Cannot appear by another attorney without order to change attorney.

24. An infant, on coming of age, will not be allowed to appear by another attorney, unless he has obtained an order to change the attorney.

Application for the appointment of guardian in the name of an infant, or person of unsound mind.

25. An order for the appointment of a guardian *ad litem* may be obtained upon petition presented in Chambers in the name of the infant [or person of unsound mind not so found by inquisition]. The petition must be supported by an affidavit verifying the fact that the proposed guardian has no interest in the

matters in question in the suit, or application, adverse to that of the infant [or person of unsound mind], and that he is a fit and proper person to be appointed: and it must also be proved by the affidavit of a medical man, or other person qualified to give the evidence, that the person who is said to be of unsound mind is actually in that condition, and incapable of taking care of his own affairs, or of understanding the purport or nature of the suit, or application or of defending or answering the same.

Who ineligible to be guardian.

26. A co-defendant, or co-respondent, if *sui juris*, may be appointed guardian *ad litem*, if he has no adverse interest; but neither a plaintiff, nor a party applicant, nor a married woman, can be appointed.

Assignment of guardian at the instance of a plaintiff or an applicant.

27. If no application for the appointment of a guardian *ad litem* be made on behalf of a defendant [or respondent to any application] who is an infant [or a person of unsound mind not so found by inquisition] the plaintiff, or applicant, may, if default be made by the defendant, [or respondent], in appearing to the suit, or answering the application, apply, by summons at Chambers, that a guardian *ad litem* may be appointed, and the Judge on being satisfied that such defendant [or respondent] is an infant [or a person of weak or unsound mind not so proved by inquisition], so that he is unable of himself to protect his interests in the suit, or application, may assign a guardian of such defendant, [or respondent] by whom he may appear to and defend such suit, or answer such application.

Appearance by infant, or person of unsound mind.

Guardian not to be assigned at the instance of a plaintiff or an applicant without notice.

28. No such order is to be made, unless it appears to the Judge, on the hearing of the application for the appointment of a guardian *ad litem*, that a copy of the summons was duly served, and that notice of such application was, after the time within which the defendant, or respondent, was required to appear or answer, and at least four clear days before the hearing of such application, served upon the person with whom or under whose care such defendant, or respondent, was at the time of serving the summons; and in case of such defendant, or respondent, being an infant not residing with, or being under the care of, his father or guardian, that notice of such application was also served upon the father or guardian, if any, of such infant, unless the Court or a Judge, at the time of hearing the application, shall think fit to dispense with such last mentioned service.

On death of guardian, *pendente lite*, new guardian to be appointed.

29. If the guardian *ad litem* dies pending a suit, or pending an application made against an infant not a party to a suit, a new guardian must be appointed in his place, in the same manner as the original guardian, and upon similar evidence.

Guardian neglecting his duty may be removed

30. If the guardian *ad litem* of an infant defendant, or respondent, does not do his duty, or other sufficient ground be made to appear, the Court may remove him, and may order him to pay such costs as may have been occasioned to any party by his breach of duty.

Costs.

When decree to be enforced against infant heir or representative, or person of unsound mind, notice, similar to that under section 216 of Act VIII of 1859, to be served on guardian.

31. When the enforcement of a decree is applied for against the heir or representative, being an infant, [or a person of unsound mind, not so found by inquisition] of a deceased party, a guardian *ad litem* of such infant [or person] must be appointed, and a notice, similar to that issued under section 216 of Act VIII of 1859, must be served on such guardian.

Day to show cause not to be given.

32. Where any decree is made against an infant defendant, no day to show cause will be given, unless the Court or a Judge shall otherwise order.

Where decree or order for infant or person of unsound mind, payment to be made to Receiver.

33. Where a decree or order, not solely for costs of suit, has been made by the Court, under which any sum of money, or any other thing, shall be payable to or receivable by an infant [or a person of unsound mind, not so found by inquisition], every such sum of money, or thing, shall, unless the Court shall otherwise order, be paid or delivered to the Receiver of the Court, whose duty it shall be to receive, or realize, or obtain possession of, and hold the same on behalf of such infant or person of unsound mind.

Before decree, next friend or guardian not to receive money without leave of the Court and giving security.

34. After the appointment of a next friend or guardian, no sum of money, or other thing, shall be received or taken by him at any time on behalf of an infant [or a person of unsound mind as aforesaid], at any time before decree or order, unless he shall first have obtained the leave of the Court, and shall have given security to the satisfaction of the Court, or the Registrar, that the money, or other thing to be received or taken by him, shall be duly accounted for, to, and held for the benefit of, such infant [or person].

Next friend or guardian not to compromise without leave of Court.

35. Every such next friend or guardian as aforesaid is hereby strictly prohibited from entering into any agreement, or compromise, on behalf of an infant [or a person of unsound mind as aforesaid], and from doing any act by which the interest of such infant [or person] may or can be affected, without the leave of the Court, to be applied for on petition. Any such agreement or compromise entered into without the leave of the Court shall be voidable against all parties other than the infant, or person of unsound mind.

Compromise without leave voidable.

TREASURY NOTICE.

UNCOVENANTED DEPUTY COLLECTOR BABOO NOBIN KRISHNA SIRCAR has been placed in charge of the Jessore Treasury, and authorized to draw Bills on other Treasuries.

SRINATH GHOSE, *Personal Asst. to Commr.*

COMMR'S OFFICE, PRESIDENCY DIVN., CALCUTTA, the 4th June 1874.

EDUCATIONAL NOTICES.

Presidency College, Civil Engineering Department.

THE SESSION 1874-75 of the Engineering Department will open on Monday, the 15th June.

Candidates for admission are requested to present themselves at the College at 10 A.M. on that date, and no applications for admission will be received after the 30th June.

PRESIDENCY COLLEGE, the 4th June 1874. J. SUTCLIFFE, *Principal.*

IT is hereby notified that, under the orders of the Government of Bengal contained in the Resolution dated the 5th of October 1872, promulgating the Junior Scholarship Rules, five junior scholarships of the second grade and ten of the third grade were allotted to the Presidency Division. They will be distributed among the several districts of the division in the following manner at the ensuing December examination :—

24-Pergunnahs	7
Nuddea	5
Jessore	3

The grade of the scholarship will be determined by the marks obtained by the successful candidate in the divisional list.

It is also notified, in accordance with paragraph 10 of the Rules, that not less than one half of the scholarships will be awarded to students who have qualified in drawing, surveying, and physical geography.

The examination in these subjects will be held in the Kishnaghur College, Jessore Zillah School, and the Senate House, on the 8th and 9th October 1874. For further information candidates can apply to the Inspector of Schools, Presidency Circle, No. 22, Chowringhee Road, Calcutta.

The 12th June 1874. H. ULICK BROWNE, *Commissioner.*

NOTICE.

IT is hereby notified for general information that, on and after the 1st of July next, all applications to the Collector of Customs must bear a court fee stamp of one anna, as required by Article I, Schedule II of Act VII of 187 , the use of the one-anna revenue stamps intended for bills and receipts on such applications being irregular.

CALCUTTA CUSTOM HOUSE, the 1st June 1874. T. B. LANE, *Offg. Collr. of Customs.*

OPIUM NOTIFICATION.

No. 578B.

NOTICE is hereby given that the Seventh Sale of Opium, the provision of 1872-73, will be held at the Government Opium Sale-Room, No. 2, Bankshall Street, on Monday, the 6th July 1874, at 11 A.M., and will comprise 3,750 chests, viz.—

	Chests.
Behar Opium	2,185
Benares „	1,565
Total ...	3,750

2. The general conditions of the sale now advertised will be the same as usual; they may be ascertained by reference to the Notification issued on the 8th November 1873, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3. The latest dates for deposit and clearance will be the 11th and 21st July, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room, will be received after 4 P.M. of Saturday, the 11th July 1874, and no Bank of Bengal Receipts in full payment of lots will be accepted after 4 P.M. of Tuesday, the 21st July 1874.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of Behar and Benares opium will be brought to sale in the present year on or about the dates specified below. The Member in charge of the Opium Department, however, reserves to himself the right of altering these dates, should circumstances render it expedient to do so:—

Dates.			Behar, about Chests.	Benares, about Chests.	Total, about Chests.
On or about Wednesday,	5th August	1874 ...	2,185	1,565	3,750
On or about Monday,	7th September	„ ...	2,185	1,565	3,750
On or about Wednesday,	7th October	„ ...	2,185	1,565	3,750
On or about Friday,	6th November	„ ...	2,185	1,565	3,750
On or about Thursday,	3rd December	„ ...	2,185	1,565	3,750
	Total	...	10,925	7,825	18,750

By order of the Member-in-charge,

W. H. GRIMLEY, *Offg. Secretary.*

BOARD OF REVENUE, L. P., FORT WILLIAM, the 2nd June 1874.

NOTIFICATION.

SEALED Tenders will be received at this office up to 11 A.M. of Tuesday, the 23rd instant, for removing all the chests of Abkaree and Provision Opium which may be brought down to the Presidency from the Patna and Ghazeepore Opium factories by rail, during a period of one year, from the East Indian Railway Company's Station at Armenian Ghat to the Government Opium Godowns situated within the Custom House premises, and there stacking them as the Intendant in charge shall from time to time direct.

2. The tenders should state the rate per hundred chests, all charges to be incurred being included. Security to the amount of one thousand rupees must be deposited by the party whose tender may be accepted.

3. The Member-in-Charge does not bind himself to accept the lowest or any tender.

By order of the Member-in-Charge,

W. H. GRIMLEY, *Offg. Secy.*

BOARD OF REVENUE, L. P., FORT WILLIAM, the 10th June 1874.

CENTRAL RELIEF FUND.

Précis of the Executive Committee's Proceedings from 4th May 1874 to 3rd June 1874.

MEETINGS were held on the 4th May, 14th May, 21st May, and 30th May. Up to the 30th May the receipts of the fund were—

	Rs.	As.	P.
Subscriptions	18,46,214	3	11
Government contributions	10,17,197	14	2
Total ...	28,63,412	2	1

The following remittances were made in May:—

	Rs.
Bankoora	4,000
Manbhoom	5,000
Lohardugga	1,000
Hazareebagh	11,500
Moorshedabad	20,000
Total ...	41,500

This, added to the Rs. 7,99,000 allotted up to the date of last précis, makes a total allotment of Rs. 8,40,500 up to the end of May 1874.

The requisitions made by the various districts for the month of June already exceed Rs. 1,60,000.

The committee have written to the Chief Commissioner of Oudh, and the Chairman of the North-Western Provinces' relief committee, to the effect that it has been held that subscriptions raised in England are intended to relieve famine not merely in Bengal, but in whatever part of India such relief is needed; and that in this view the committee will be glad to consider requisitions made upon the funds at their disposal by relief committees in Oudh and the North-Western Provinces.

In a letter of the 15th May 1874, the Lieutenant-Governor accepted the offer of the central committee to take on the charitable fund at their disposal the entire expense of charitable relief under the heads (*b*), (*c*), and (*d*), of the committee's notification of the 4th March. Arrangements have been made accordingly. Heading (*b*), it may be remembered, includes persons receiving gratuitous relief, who are physically unable to do work; heading (*c*) those who *are* doing work; and heading (*d*) those who, though able to work, are precluded from laboring on Government works by reason of their social rank or caste feelings. Instructions have been issued by the committee, both officially and demi-officially, that cases of persons deserving relief under heading (*d*) should be liberally considered and dealt with. It is the object of the committee to do something beyond the bare preservation of life, which is the duty which devolves upon the Government. They have directed that a supply of clothing should be given out to the destitute before the rains set in; but, beyond this, they have not suggested any particular method of affording assistance, because they think it best to leave the mode of affording such relief to the discretion of the local committees. But they have expressed a desire that such assistance, when deserved, should be given liberally, and have announced that all reasonable applications for funds for such purposes will be favorably responded to.

The Manchester committee, while forwarding £10,000, telegraphed that the sum was to be spent "for purchases Government cannot meet." The mail shewed this to be in accordance with rules passed at the Manchester meeting that, "the funds already or hereafter to be raised in Manchester ought not to be used as a substitute for those means which Government is bound to employ to meet the crisis in India, but should be devoted to purposes which Government, by the general rule of distribution, cannot meet."

The new arrangement seems exactly to comply with the wishes of the Manchester subscribers. The Government takes upon it the very heavy task of supporting bare life. The committee undertake to do more, to afford relief to those whose lives the State saves, and to do so with a degree of tenderness and liberality which cannot be expected in the distribution of State funds. The committee, therefore, expect that the Manchester subscriptions will now become available for use.

The sum of £10,000 has also been received through the Lord Provost of Glasgow, the money to be "applied for the relief of such as Government aid will not reach, or to supplement such aid where insufficient."

This sum also will be available, on the principle mentioned in the previous paragraph.

Replies to the committee's calls for bi-monthly accounts and statements of persons relieved have not been, as yet, received for all the districts.

The committee will therefore submit their accounts in the précis for the current month, drawn up in a new and much more complete form, which has been approved by the Government of Bengal.

DISTRICT RELIEF COMMITTEES.

The following gentlemen have consented to act as members of the additional relief sub-committees in the Jungypore sub-division:—

North-West, Sooty, Relief Sub-Committee.

Baboo Guru Gobinda Datta.	Baboo Chhakari Acharjea.
„ Rajeshar Chuckerbutty.	„ Hari Lal Bisvas.
„ Paresh Bhattacharjea.	„ Ishan Chandra Mittra.
„ Paresh Nath Panday.	„ Hara Dhan Mandal.
Sub-Inspector of Sooty, *ex-officio.*	

Dhulian Relief Sub-Committee.

Baboo Jaga Bandhu Ray.	Baboo Lal Chand Shaha.
„ Kala Chand Chaturji.	„ Dole Gobinda Paure.
Sub-Inspector of Shamshergunge, *ex-officio.*	„ Jadab Chandra Shaha.
	„ Bishen Chand Baid.
Baboo Shukha May Haldar.	„ Dina Bandhu Chaturji.

BERHAMPORE, the 10th June 1874. W. WAVELL, *Offg. Magte. & Collr.*

Proceedings of the Beerbhoom District Relief Committee at a Meeting held on Monday, the 1st June 1874.

PRESENT:

R. D. Hime, Esq., *in the Chair.*	Revd. W. A. Hobbs.
S. H. C. Taylor, Esq.	Baboo Rama Prosunno Singh.
Dr. R. A. Barker.	„ Kooloda Prosad Sen.

1. The Magistrate stated the particulars of his visit to the mofussil and to the several relief agencies on Sunday, the 24th May 1874, and intimated that Haradhun Dutt, Superintendent in charge of the Kusba depôt, has been removed, and Nobin Madhub Singh appointed in his place on a salary of Rs. 30 per mensem.

2. It was resolved that, as Baboo Ram Runjun Chuckerbutty, zemindar of Hetampore, shows great generosity in the relief of his ryots, and of the poor generally, particular notice of his proceedings be taken in committee, with a view to their publication for the information of the public, and for an example to other zemindars.

3. As the expenditure appears to have exceeded the funds at the disposal of the committee, it is resolved that a letter be written to Baboo Ram Runjun Chuckerbutty, calling upon him to pay up the remainder of his subscription, and also to convey to him the thanks of the committee for his highly laudable exertions in the relief of the distressed.

4. Read, a letter from the Government of India, giving cover to a set of rules for the guardianship of famine orphans. Resolved, that a copy of the rules be forwarded for the guidance of the several relief agencies.

5. Read, a letter from Mr. Simpson, the Executive Engineer, calling attention to the distressed condition of some villages on the Soory and Adjai road, where it is said many persons have died of cholera, leaving their families destitute. Resolved, that the relief agent at Kusba be directed to proceed to the villages and adopt such measures of relief as may be necessary, reporting full particulars to the Magistrate.

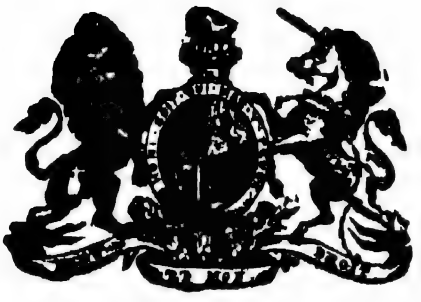
6. Read, a letter from the native doctor at Elambazar, forwarding a list of persons who, he says, are in great distress. The committee directs that the list be forwarded to Mr. Macewan, asking him to enquire about the persons named, and, if they are distressed, as stated, to give them such relief as he may think proper.

7. Read, a letter from Baboo Protap Chunder Singh, Honorary Relief Agent at Batikar, asking to have his travelling expenses on inspection duty paid. As the Baboo is a wealthy zemindar, it is resolved that he be requested to reconsider the application.

8. Read, a petition from Ram Das Tantee, of village Tanteepara, asking for ad , thread and cotton to his fellow villagers, who, he says, are in distress. The ' ce of .e stating that he has enquired through the police, who have reported to the effect tha- is no serious distress among the weavers of that village, the committee declines to acce

9. Rice having been found from the police returns to sell at an average rate of 12 seers 9 chittacks per rupee throughout the district, and at 13 seers per rupee at Bulpore, it was resolved that the committee cannot purchase the Government rice imported into this district at the rate fixed, viz., 12 seers per rupee.

Soory, the 4th June 1874. R. D. Hime, *Collector.*



The Calcutta Gazette.

WEDNESDAY, JUNE 17, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Thursday, the 16th July 1874, corresponding with 1st Sarabun *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

ADVERTISEMENT OF SALE.

NOTICE is hereby given that the proprietary right of Government to the undermentioned estate, situated in the district of Burdwan, from 1873-74 to 1900, will be put up to sale at the sub-divisional office of Culna on Friday, the 19th June 1874, corresponding with the 6th Assar 1281, B. S., and that the proprietary right to be sold will not only entitle the purchaser to re-settlement at the expiry of the present settlement, but to the receipt of Malikana, should he decline the assessments which may then be fixed.

The purchasers of this estate will be subject to the following conditions :—

1*st.*—The estate will be sold, subject to a light jumma of Rs. 4 per annum, to the highest bidder.

2*nd.*—The sale will be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force,—and purchasers will be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd.*—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th.*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office-day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

5*th.*—The purchaser will be bound to perform putwaree's duties.

خوب لعل محرر

NOTICE is hereby given, under Section 6, Act XI of 1859, and under Section 3, Act VII of 1868, that the undermentioned estates in the district of Rungpore will be put up to public and unreserved sale at the Collector's office of that district, on Wednesday, the 29th July 1874, corresponding with 14th Sraban 1281, B.S, for arrears of revenue and other demands which by the Regulations and Acts in force are directed to be realized in the same manner as arrears of revenue due on the 28th March 1874.

CLASS I.—PERMANENTLY SETTLED ESTATE.

To be sold for arrears of revenue.

No. 7.—Mouzah Moubhasha, &c., chackla Futtehpore. The shares of the recorded proprietors, Essan Chundra, Bhoyrub Chunder, Tara Mohun Chouhdry, Brojokishori Dassia, Dhanessury Dassia, Boroda Soondery, Joyuntee Debea, Nilkant Sirmah, Moharaja Nrependra Narain Bhoop Bahadoor, minor, Mohamed Sadutullah, for himself and Sadutullah and Komaruddin, on behalf of Majohurullah, Faratullah, and Enaitullah (minors), Mutiullah, Kutubullah, Harasundery Debya, Bamasundery Gupta Choudhurani, Shona Bibi, Amirullah, minor, Jodunath Shaha Chowdhry, having been separated under Sections 10 & 11, Act XI of 1859, are excluded. The shares of Ishan Chundra, Bhoyrub Chundra Chowdhry, Hurchunder Gossami, Protap Mul Rakha, Abrannessa Khatoom, and Hurish Chunder Roy, the sudder jumma of which is Rs. 719-5-5, will be sold for arrears of Government revenue. The entire sudder jumma of the estate is Rs. 6,554-13-8.

To be sold for arrears of revenue.

No. 241.—Mouzah Naskurpore, &c., pergunnah Borobillah. The shares of the recorded proprietors, Omaruddin Mohamed Chowdhry, Dhanessury Dassea, and Khajey Enaitullah Chowdhry having been separated under Section 11, Act XI of 1859, are excluded. The share of Omaruddin Mohamed Chowdhry will be sold. The sudder jumma of the share put up for sale is Rs. 46-5-10. The sudder jumma of the entire estate is Rs. 966-12.

RUNGPORE COLLECTOR'S OFFICE, the 8th June 1874. E. G. GLAZIER, *Offg. Collector.*

Notice

Is hereby given that the land specified in the Schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Nowgong, Assam, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Nowgong, Assam.

SCHEDULE.

A lot of waste land, consisting of about 396 acres, situated in mouzah Nizorikhat Hatigaon, in the district of Nowgong, Assam, and bounded as follows :—

North.—A line drawn from a pillar marked N on the bank of a stream called "Dogajooree" to a pillar O, on the north-east, along the edge of the above stream, distance 100 yards. From pillar O to a pillar P, on the north-west, along the edge of the above stream, distance 260 yards. From pillar P to a pillar Q, on the north-west, along the edge of the said stream, distance 360 yards. From pillar Q to a pillar R, on the south-west, along the edge of the above stream, distance 200 yards. From pillar R to a pillar S, on the north-west, along the edge of the above stream, distance 350 yards. From pillar S to a pillar T, on the south-west, along the edge of the above stream, distance 233⅓ yards. From pillar T to a pillar U, on the north-west, along the edge of the above stream, distance 140 yards. From pillar U to a pillar V, on the south-west, along the edge of the above stream, distance 233⅓ yards. From pillar V to a pillar A, on the south-west, along the edge of the said stream, distance 166⅔ yards.

South.—A line drawn from a pillar marked F, on the west, at the foot of the hill called "Matiapahar," to a pillar G, on the north-east, along the foot of the above hill, distance 233⅓ yards. From pillar G to a pillar H, on the south-east, along the foot of the above hill, distance 180 yards. From pillar H to a pillar I, on the south-east, distance 150 yards.

West.—A line drawn from a pillar marked A, on the bank of the stream called "Dogajooree" to a pillar B, on the south-east, distance 129 yards. From pillar B to a pillar C, on the south-east, distance 200 yards. From pillar C to a pillar D, on the south-west, distance 233⅓ yards. From pillar D to a pillar E, on the south-west, distance 625 yards. From pillar E to a pillar F, on the south-east, at the foot of the hill called "Matiapahar," distance 500 yards.

East.—A line drawn from a pillar marked I, on the south-west, to a pillar J, on the north-east, distance 250 yards. From pillar J to a pillar K, on the north-east, distance 233⅓ yards. From pillar K to a pillar L, on the north-east, distance 700 yards. From pillar L to a pillar M, on the north-east, distance 550 yards. From pillar M to a pillar N, on the north-east, distance 140 yards.

The pillars are marked A to V in the map filed in the office of the Deputy Commissioner, Nowgong, Assam.

NOWGONG, ASSAM, the 19th May 1874. J. SHERER, *Dy. Commr.*

[Second Publication.]

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Deputy Commissioner office at Debrooghur, will be sold by public auction at the said Deputy Commissioner's office at 12 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner.

SCHEDULE.

A lot of waste land consisting of about 741 acres, situated in mouzah Kodomoni, in the district of Luckhimpore, and bounded as follows:—

North.—By a straight line through the forest from a pillar, 1, bearing 242°, past an intermediate pillar, 2, to pillar 3, measuring 2,282 yards.

West.—By a straight line from pillar 3, through tree forest, bearing 176° and measuring 1,040 yards, to a pillar, 4; and thence by a straight line through tree forest, bearing 151° and measuring 660 yards, to a pillar, 5, on the Tettelia bheel.

South.—From pillar 5, along the northerly edge of the Tettelia bheel and the course of the Lohitkota river, to a pillar, 6, measuring, as the crow flies, 1,650 yards.

East.—By a straight line from pillar 6, on the Lohitkota river, through tree forest, bearing 20° and measuring 825 yards, to a pillar, 7; and thence by a straight line through tree forest, bearing 355° and measuring 1,045 yards, to pillar 1.

The pillars are marked from 1 to 7 on the map filed in the Deputy Commissioner's office.

DEBROOGHUR, ASSAM, the 17th April 1874. W. S. CLARKE, *Dy. Commissioner.*

Notice

Is hereby given that the land specified in the Schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause. For the conditions of sale, see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of 1,087 acres 1 rood 20 perches, situated in Pergunnah Berkhola, Mouzah Abong, in the district of Cachar, and bounded as follows:—

East.—The Abong river from pillar No. 1, at confluence of the Abong and Cacharee Cherra with the Dooloo river, to pillar No. 2, on the banks of the Abong and at the foot of the Casee Teelah to the north; thence, to pillar No. 3, on the top of the same teelah, and No. 4 pillar at the northern foot.

North.—From pillar No. 4, as above, to pillar No. 5 on the banks of the Mewah Cherra.

West.—From pillar No. 5 along pillars Nos. 6, 7, 8, 9, and 10, at the edge of the jungle on high teelahs to the west, and along No. 11 on the banks of the Cacharee Cherra.

South.—The Cacharee Cherra, between pillars No. 11 and No. 1.

The pillars are numbered from 1 to 11 on the map filed in the office of the Deputy Commissioner of Cachar.

SILCHAR, the 27th April 1874. O. G. R. MCWILLIAM, *Offg. Deputy Commissioner.*

Notice

Is hereby given that the lease for three years of the undermentioned lime-quarry, situate in the Khasi Hills, will be put up to auction at the Deputy Commissioner's Office, Shillong, on Wednesday, the 1st July 1874, at the upset price mentioned opposite the mehal.

The rent payable half-yearly in advance.

No.	Name of the Quarry.	Where situate.	Upset price per annum.
			Rs. As. P.
1	Borsyrmai	In Duara Nongtyrmen, Khasi Hills. Bounded on the north by paun-leaf plantation; south, Ka Lad Luka; east, Lum Dilong; west, Lum Raitruh.	1,000 0 0

H. S. BIVAR, *Dy. Commr., Khasi and Jynteah Hills.*

SHILLONG, DY. COMMR.'S OFFICE, the 30th May 1874.

Commissioners for making Improvements in the Port of Calcutta.

NOTICE.

UNDER SECTION 69 OF ACT V (B.C.) OF 1870.

THE following Packages, landed at the Jetties from the undermentioned ships, have been removed to the Commissioners' Import Warehouse, where they remain at the risk and expense of the owners. If not cleared within two months from the date stated against each item, they will be sold under Section 72 of the said Act.

R. HARDIE,
Secretary and Treasurer.

(232—1)

Administrator-General's Office.

THE undermentioned estates having come under charge of this office, all persons having claims upon, being indebted to, or holding property belonging to, the said estates, are requested to place themselves in immediate communication with the undersigned:—

William Hoadley, a Temporary Supervisor in the Neemuch State Railway, died at Burnugger on the 28th March 1874.

William Butt, an Engineer in the service of the Peninsular and Oriental Steam Navigation Company, died in Calcutta, on the 16th May 1874.

Joseph Samuel Powditch, employed in the Department of Public Works, at Jehanabad, in the district of Gya, died at Jehanabad on the 16th July 1873.

William Henry Ryves, a Brigadier-General in the Bengal Staff Corps, died at Agra on the 30th September 1873.

Clement Edward Benthall, a Captain attached to the General List of Cavalry, died at Allahabad on the 3rd September 1873.

L. P. D. BROUGHTON, *Administrator-General.*

HIGH COURT, CALCUTTA, the 6th June 1874. (231—1)

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, made in suit No. 324 of one thousand eight hundred and seventy-three (which Lewis Price Delves Broughton, Administrator-General of Bengal and administrator to the estate of Thomas Emerson Carter, deceased, is plaintiff, and William Spink, of No. 5, Government Place in the town of Calcutta, and George Parbury, of No. 87, Newgate Street, in the City of London, and William F. Allen, of No. 13, Waterloo Place, London, and Captain Engledue, of No. 3, Durham Villas, Kensington, London, and George Macnair, of No. 44, Hamilton Terrace, St. John's Wood, London, the liquidators of the Bank of Hindoostan, China, and Japan, are defendants), and dated the twenty-seventh day of January, one thousand eight hundred and seventy-four, the creditors of the said Thomas Emerson Carter, late of No. 34, Canning Street, in the Town of Calcutta, Merchant and Tea-planter, who died on or about the fourteenth day of August one thousand eight hundred and seventy-two, are, on or before Monday, the twenty-third day of November, one thousand eight hundred and seventy-four, to come in and prove their debts and claims at the Chambers of the sitting Judge in the Court House, or in default thereof they will be peremptorily excluded from the benefit of the said decree. Saturday, the fifth day of December one thousand eight hundred and seventy-four, at the hour of eleven o'clock in the forenoon, at the said Chambers is appointed for hearing and adjudicating upon the said claims.

M. CAMELL, *Plaintiff's Attorney.* R. BELCHAMBERS, *Registrar.*

CALCUTTA HIGH COURT, ORIGINAL JURISDICTION, the 16th day of May 1874. (221—4)

Notice.

NOTICE is hereby given that the effects belonging to the estate of George Augustus Harris, of the Trigonometrical Survey, who demised at Shillong, Khasi Hills, on the 12th May 1874, are in the custody of the Court of the Deputy Commissioner, Khasi and Jynteah Hills, and will be delivered to any person who may be legally empowered to administer to the estate.

H. S. BIVAR, *Dy. Commr., Khasi and Jynteah Hills.*

SHILLONG, DY. COMMR.'S OFFICE, dated 4th June 1874. (229—3)

Notice.

LOST or mislaid by the owner, the Title-deeds of the premises No. 53, formerly No. 21, Nebootollah Lane, Molungah, in Calcutta, belonging to Sreemutty Koosumkameenee Dabee. Any person bringing them to the office of the undersigned will be rewarded.

7½ HASTINGS STREET. (230—3) A. ST. JOHN CARRUTHERS.

Notice

Is hereby given that Munshi Abdool Guffoor, son of Munshi Masleyoodin, inhabitant of Salenda, pergunnah Akbarshayee, zillah Beerbhoom, a junior grade pleader at Chowki Gangarampore, in district Dinagepore, lost his pleadership certificate obtained on passing the examination held at Dinagepore in January 1873, and also the certificate of practice dated the 17th December 1873, and granted by the Judge of Dinagepore.

DINAGEPORE, the 8th June 1874. W. E. WARD, *Offg. Judge.*

THE FIRST SCHEDULE.

Forms.

THE SECOND SCHEDULE.

Enactments repealed.

A Bill to regulate Distresses for Rents in the Presidency Towns.

Preamble.

FOR the purpose of regulating distresses for rents in the Towns of Calcutta, Madras and Bombay ;

It is hereby enacted as follows :—

I. Preliminary.

Short title. Commencement.

1. This Act may be called "The Distress Act, 1874," and it shall come into force at once.

Local extent.

It extends to every place within the local limits of the ordinary original civil jurisdictions of the High Courts of Judicature at Fort William, Madras and Bombay ;

But nothing herein contained applies to any rent due to Government.

Enactments repealed.

2. The enactments specified in the second schedule hereto annexed are repealed to the extent mentioned in the third column of the same schedule.

All appointments made and securities given under any of the said enactments shall be deemed to be respectively made and given under this Act.

The reference to Act No. VII of 1847 made in Act XXIII of 1850, section three, shall be read as if made to this Act.

"Court of Small Causes" defined.

3. In this Act, "Court of Small Causes" means the Court of Small Causes held under Act No. IX of 1850 in Calcutta, Madras or Bombay, as the case may be.

II. Bailiffs and Appraisers.

Appointment of bailiffs.

4. The Judges of the Court of Small Causes may appoint four or more persons to be bailiffs and appraisers for the purpose of this Act, and may from time to time, with the previous sanction of the Local Government, fix such remuneration for the services of such officers as the said Judges think fit, and may suspend or remove them.

Security to be given by appointees.

5. The persons so appointed shall give security to be approved by the said Judges faithfully to discharge the duties of their office, and they shall be deemed to be public servants within the meaning of the Indian Penal Code.

III. Issue of Distress-Warrants.

Application for distress-warrant.

6. Any person claiming to be entitled to arrears of rent of any house or premises to which this Act extends, or his duly constituted attorney, may apply to any Judge of the Court of Small Causes for such warrant as hereinafter mentioned.

The application shall be supported by an affidavit to the effect of the form marked A in the first schedule hereto annexed.

Issue of distress-warrant

7. The Judge may thereupon issue a warrant under his hand and seal to the effect of the form contained in the same schedule (marked B) addressed to any one of such bailiffs.

The Judge may at his discretion, upon personal examination of the person applying for such warrant, decline to issue the same.

IV. Of the making of Distresses.

Time for distress.

8. Every distress under this Act shall be made after sunrise and before sunset, and not at any other time.

What places bailiff may force open.

9. The bailiff directed to make the distress may force open any stable, outhouse, or other building, and may also enter any dwelling-house, the outer door of which may be open and may break open the door of any room in such dwelling-house for the purpose of seizing property liable to be seized under this Act.

Provided that he shall not enter or break open the door of any room appropriated for the zanáná or residence of women, which by the usage of the country, is considered private.

Property which may be seized.

10. In pursuance of the warrant aforesaid the bailiff shall seize the moveable property found upon the premises mentioned in the warrant and belonging to the person from whom the rent is claimed (hereinafter called the debtor), or such part thereof as may in the bailiff's judgment be sufficient to cover the amount of the said rent, together with the costs of the said distress.

Impounding distress.

11. The bailiff may impound or otherwise secure the property so seized on the premises chargeable with the rent.

Inventory.

12. On seizing any property under section ten, the bailiff shall make an inventory of such property and shall give a notice in writing to the effect of the Form in the first schedule hereto annexed (marked C) to the debtor, or to any other person upon his behalf upon the said premises.

Notice of intended appraisement and sale.

The bailiff shall file in the Court of Small Causes copies of the said inventory and notice:

Copies of inventory and notice to be filed.

Application to discharge or suspend warrant.

13. The debtor may, at any time within five days from such seizure, apply to any Judge of the said Court to discharge or suspend the warrant, and such Judge may discharge or suspend such warrant accordingly,

and any of the said Judges may in his discretion give reasonable time to the debtor to pay the rent due from him.

Upon any such application the costs attending it and attending the issue and execution of the warrant shall be in the discretion of the Judge, and shall be paid as he directs.

V. Appraisement and Sale of Distress.

Appraisement.

14. In default of such application, any two of such bailiffs may at the expiration of five days from such seizure appraise the property so seized, and give notice in writing to the effect of the Form in the first schedule hereto annexed (marked D). The bailiff shall file in the said Court a copy of such notice.

Notice of sale.

Sale.

15. The distrained property shall be sold on the day mentioned in such notice, and the said bailiffs shall on realizing the proceeds pay over the amount thereof to the Chief Clerk of the said Court, and such amount shall be applied first in payment of the costs of the said distress and then in satisfaction of the debt, and the surplus, if any, shall be returned to the debtor,

Application of proceeds.

Provided that the debtor may direct that the sale shall take place in any other manner, first giving security for any extra costs thereby occasioned.

VI. Miscellaneous.

Costs of distresses.

16. No costs shall be taken or demanded or any distress under this Act except those mentioned in the part of the first schedule hereto annexed (marked E).

The Judges of the Court of Small Causes may apply the sum so raised as costs towards the payment of the contingent charges and remuneration of the said bailiffs as appears to the said Judges expedient.

Account of costs and proceeds.

17. The Chief Clerk of the Court of Small Causes shall keep a book in which all sums received as costs upon distresses made under this Act, and all sums paid as remuneration to the said bailiffs, and all contingent charges incurred in respect of such distresses shall be duly entered.

He shall also enter in the said book all sums realized by sale of the property distrained and paid over to landlords under the provisions of this Act.

Bar of distresses except under this Act.

18. No distress shall be levied for arrears of rent, except under the provisions of this Act;

Penalty for making illegal distresses.

and any person, except a bailiff appointed under section four, levying or attempting to levy any such distress shall, on conviction before a Magistrate of Police, be liable to be punished by fine not exceeding *five hundred* rupees and imprisonment for a term not exceeding *three* months in addition to any other liability he may have incurred by his proceedings.

THE FIRST SCHEDULE.

A.

[*See section* 6.]

In the Court of Small Causes for

A. B. (Plaintiff,)

versus

C. D.——(Defendant.)

A B. of——, in the town of——maketh oath and saith that *C. D.*——, of——, is justly indebted to—— in the sum of Rs.—— for arrears of rent of the house and premises No. —, situated at——, in the town of——, due for—— month, to wit from——to——, at the rate of Rs.——per mensem.

Sworn before me the—— day of—— 187 .

Judge.

B.

[*See section* 7.]

1 & 2 Phil. & M., c. 12	Impounding distresses	Ditto.
17 Char. 2, c. 7	Distresses	Ditto.
2 Wm. & Mary, c. 5	Sale of distresses	Ditto.

II.—ACTS.

Number and Year.	Subject.	Extent of repeal.
VII of 1847 ...	Distresses for small rents in Calcutta ...	The whole.
IX of 1850 ...	Extension of Act VII of 1847 ...	Section eighty-nine.
XXVI of 1864 ...	Extending jurisdiction of Presidency Small Cause Courts.	Section four.

STATEMENT OF OBJECTS AND REASONS.

In Calcutta, Madras and Bombay distresses for arrears of rent not exceeding a thousand rupees are provided for by the Small Cause Courts Acts, VII of 1847, IX of 1850, section 89, and XXVI of 1864, section 4. But for the law regulating distresses for arrears exceeding that sum, we must look to the Common Law and to the series of antiquated Statutes on this subject, eleven in number, which, from the foundation of the Mayors' Courts in 1726, have been deemed in force in the Presidency Towns.

This is obviously inconvenient, and the primary object of the present Bill is to extend the present law as to distresses for arrears not exceeding a thousand rupees to arrears exceeding that sum, and thus to render it possible to repeal expressly the Statutes above referred to. It will be found that so much of the law as is now useful and in active operation has been embodied in the present Bill.

The opportunity has been taken to amend the arrangement and wording of the present law relating to distress for arrears not exceeding a thousand rupees and to define the powers of bailiffs to force open places.

    and to sell and endorse such security.
26. No debt to be sold by Sheriff.

SECTION.

27. Shares in public Company may be charged in execution.
    Proviso.
28. Property standing in name of any officer of Court.
29. Party arrested under writ when entitled to discharge.
30. Order of attorney issuing writ when sufficient for discharge of party.
    Attorney not to give order for discharge without clients' consent.
31. Time for which unexecuted writ remains in force.
    Renewal of writ.
    Renewed writ entitled to same priority as its original.
    Proviso as to writ of possession.
32. Evidence of renewal.
33. Seizure under writ of sequestration.
    Sum ordered to be realized may be levied as under writ.

SCHEDULE.

I.—Statutes.
II.—Acts.
III.—Charters.

A Bill to consolidate the law relating to the Sheriffs and to the execution of the decrees of the High Courts in the exercise of their Original Civil Jurisdiction.

Preamble

WHEREAS it is expedient to consolidate the law relating to the Sheriffs of Calcutta, Madras and Bombay, and to the execution of the decrees of the High Courts of Judicature at Fort William, Madras and Bombay, in the exercise of their Original Civil Jurisdiction; It is hereby enacted as follows:—

I.—Preliminary.

Short title.

1. This Act may be called "The Sheriffs' Act, 1874:"

Extent.

It extends to the whole of British India;

Commencement.

And it shall come into force at once.

Repeal of enactments.

2. The enactments specified in the first and second parts of the schedule hereto annexed shall be wholly repealed.

And the Charters mentioned in the third part of the same schedule shall be repealed to the extent shewn in the second column thereof.

But all Sheriffs and Deputy Sheriffs appointed, fees prescribed and writs issued, under any such enactment or Charter shall be deemed to be respectively appointed, prescribed and issued under this Act.

II.—Appointment of Sheriffs and Deputy Sheriffs.

Appointment of Sheriffs.

3. The Local Government shall, yearly, on the first Tuesday in December or as soon after as may be, appoint a Sheriff for the year ensuing, to be computed from the twentieth day of December next after such appointment.

Proviso.

Provided that, in the case of the Local Government of Bengal, the person so appointed shall be one of three persons resident in or near the town of Calcutta, to be nominated yearly to the

Local Government by the Chief Justice of the High Court at least three days before the said first Tuesday.

The persons so appointed shall be called respectively the Sheriff of Calcutta, the Sheriff of Madras and the Sheriff of Bombay.

Tenure of office.

4. Every such Sheriff shall continue in office during such year, and until another is duly appointed into the said office.

Appointment to fill vacancy.

5. If the Sheriff die in his office, or depart from the Lower Provinces of Bengal, the Presidency of Fort St. George, or the Presidency of Bombay (as the case may be), another person shall, as soon as conveniently may be after such death or departure, be in like manner nominated and appointed, and shall continue in his office for the remainder of the year, or until another Sheriff is duly appointed into the said office.

Appointment of Deputy Sheriff.

6. Every Sheriff shall, by writing under his hand, appoint a Deputy Sheriff, and shall during his continuance in office be responsible for such Deputy.

III—Duties of Sheriff.

Duties of Sheriff and his Deputy.

7. The Sheriff and Deputy Sheriff are authorized—

(*a*) to execute all the writs, summonses, rules, orders, warrants, commands and process of the High Court;

(*b*) to make return of the same, together with the execution thereof, to the High Court;

(*c*) to receive and detain in prison such persons as are committed to the Sheriff for that purpose by the High Court and by the Chief Justice and Judges, respectively.

Execution of process against Sheriff.

8. Whenever the High Court directs or awards any process against the Sheriff himself,

or awards any process, which, on account of his being related to the parties, or for any other reason, it is inexpedient to require him to execute,

the High Court shall appoint some other fit person to execute and return the same;

and for that purpose the said process shall be directed to the person so appointed;

and the cause of such special proceeding shall be entered on the record.

Execution of process in Mofussil.

9. The Sheriff shall not be compelled or compellable to go in person or by his officers or deputies beyond the local limits of the ordinary original civil jurisdiction of the High Court for the execution of any of its processes.

But whenever the process of the said Court has to be executed beyond the said limits, the Court shall, by order or upon motion, direct by what person and in what manner such process shall be executed and the terms which the party issuing the same shall enter into.

And the Sheriff shall grant his special warrant or deputation to such person as the Court may direct for the execution of such process.

And in that case the Sheriff, his executors or administrators, shall not be responsible for any act done in or respecting the execution of such process under or by virtue of such special warrant.

And any persons aggrieved under or by pretence of such warrant may seek their remedy under any security which may have been directed to have been taken on the occasion, and which the said Court is authorized to direct to be taken.

IV.—The Sheriffs' Fees.

Sheriff's fees.

10. The High Court shall have power from time to time to settle tables of fees to be allowed to the Sheriff on account of the execution of process, whether issued by the High Court, or by a Court, Judge or Magistrate beyond the local limits of its ordinary original civil jurisdiction, and of the sums to be allowed for costs of advertisements or other notifications of sales of property;

Such tables, when, in the case of the High Court of Judicature at Fort William, they have received the sanction of the Governor General in Council, and in the case of the High Courts of Judicature at Madras and Bombay they have received the sanction of the Local Government, shall have the force of law.

Payment for execution of process issuing from Mofussil.

11. No Court, Judge or Magistrate beyond the local limits of the ordinary original civil jurisdiction of the said High Courts, shall issue any process to be executed by the Sheriff unless upon payment by the party applying therefor of the fees and sums payable under the said tables.

Mofussil Courts to keep account of fees paid to them under this Act.

12. Every such Court, Judge and Magistrate, issuing process as aforesaid, shall cause a separate account to be kept of the amount of all fees and sums so paid, and shall from time to time, as directed by Government, cause the amount thereof to be paid into the local treasury.

Local Government to pay over fees to Sheriff.

13. The Local Government shall, twice in each year, account for and pay over to the Sheriff for the time being, the amount of fees and sums so paid, after deducting all necessary expenses of receiving and keeping account thereof, and remitting the nett proceeds thereof to Calcutta, Madras, or Bombay, as the case may be; or, where the amount has accrued in the shrievalty of more than one Sheriff, shall apportion the sum paid accordingly between the Sheriff for the time being and the then late Sheriff.

Composition with Sheriff.

14. The Local Government may compound with the Sheriff for a monthly payment to be made to him instead of such fees and sums, and during such composition may appropriate the said fees and sums to the purposes of Government.

Sheriff's percentage on sales.

15. Over and above such fees and sums, or any such monthly payment received instead of such fees and sums, the Sheriff shall be entitled to a fee after the rate of two rupees eight annas for each hundred rupees of the value of any goods or property taken and sold by him in execution of any process issued by any Court, Judge, or Magistrate beyond the local limits of the ordinary original civil jurisdiction of the High Court, which fee shall be taken to cover all expenses connected with the seizure and sale, except the expense of advertisements.

16. No fee, estimated upon the amount of the sum for which any person is taken in execution, shall be payable to the Sheriff, or any of his bailiffs, for taking the body of any person in execution on any process issued by any Court, Judge or Magistrate out of the local limits of the ordinary original civil jurisdiction of the High Court; but instead thereof, such fees shall be payable to the Sheriff for taking the body of any person in execution of any such process as shall be settled from time to time by the High Court as aforesaid.

Sheriff's fee for arrests.

17. If any person taken in execution on any such process escapes out of the legal custody of the Sheriff, the Sheriff shall be liable only to a suit for damages in consequence of such escape, sustained by the person at whose suit the prisoner was taken.

Sheriff's responsibility for escapes.

The damages in such a suit and in any other suit against the Sheriff for breach of his official duty shall not exceed the amount of the loss which the breach has really occasioned.

V.—Execution of Decrees.

18. Under any writ of attachment issued out of the High Court, may be seized and sold any lands, houses, or other immoveable property of the party against whose effects such writ issues, whether his estate or interest therein be legal or equitable.

Sheriff's power under writ of attachment to seize and sell immoveable property.

19. The Sheriff under any such writ may put the purchaser in possession of such of the lands, houses, or other immoveable property sold under such writ, of which the judgment-debtor is in the actual possession, and of which an actual delivery can be made.

Procedure when property is in possession of judgment-debtor

20. If the immoveable property liable to be sold under such writ be in the possession of any person other than the judgment-debtor, the Sheriff shall not seize such property, but shall sell and convey all the right, title, and interest of the debtor; and such conveyance shall pass the same interest to the purchaser as if the same had been executed by the debtor.

Procedure when property is not in possession of judgment-debtor.

Effect of conveyance.

21. In such last-mentioned case, if the property be situate beyond the local limits of the ordinary original civil jurisdiction of the High Court, the Sheriff shall notify such sale to the Judge of the District, who shall cause notice of the same to be officially proclaimed in like manner as if the sale had been effected under a decree of his own Court.

Notification of sale to District Judge.

Proclamation of sale.

22. In any case of intended sale of immoveable property beyond the said local limits, the Sheriff shall cause a notice specifying the time and place of the intended sale to be stuck up in some conspicuous place in the office of the Collector of the District within which such property is situate and also on some conspicuous part of the property to be sold.

Publication of notice of sale.

The number of days between the publication of such notice and the sale shall not be less than fourteen days, if the property be not distant more than one hundred miles from the High Court; if the distance shall exceed one hundred miles, the number of days shall be increased by an additional day for every fifty miles of such excess of distance.

Length of time for publication of notice.

The want of such notice or any irregularity in respect thereof, shall not vitiate the sale in the hands of a *bonâ fide* purchaser.

23. If any lands, houses, or other immoveable property be seized or liable to be sold under any such writ, the Court may, on application to it on behalf of the execution-debtor or of any one of several execution-debtors, if the Court be satisfied that there is reasonable ground to believe that the amount of the judgment may be raised by mortgage of the estate, postpone the sale for a term not exceeding one month to enable the defendant to raise the amount, and direct that the money ordered to be levied by such execution shall be raised by mortgage instead of sale of such lands, houses, or other immoveable property, upon such terms as to the payment of interest upon the judgment or otherwise as the Court thinks fit, and in such case it may give all necessary directions for the execution of such mortgage.

When judgment debt may be raised by mortgage instead of sale.

24. Under any such writ of attachment may also be seized money, bank-notes, cheques, bills of exchange, promissory notes, hundís, Government securities, bonds, or other securities for money, and also debts belonging to the said person;

Sheriff empowered to seize money, bank-notes, &c.;

and the Sheriff or other officer having the execution of the writ may pay or deliver over to the party suing out such execution, any money or bank-notes so seized, or a sufficient part thereof,

and to pay execution-creditor;

and shall, with the order of the Court, endorse over or transfer, and without such order, shall hold any such cheques, bills of exchange, promissory notes, hundís, bonds, or other securities for money as a security for the amount by such writ directed to be levied, or so much thereof as have not been otherwise levied and raised,

with order of Court to endorse over, and without such order to hold, cheques, bills of exchange, &c.;

and may, where he retains the same, sue in his own name as such Sheriff or officer for the recovery of the sum or sums secured thereby, or for any debt seized as aforesaid, when the time of payment thereof has arrived.

and to sue in his own name for amount secured by bills of exchange, &c.;

or for debts.

The payment to such Sheriff or other officer, or to the party entitled under such endorsement or transfer, by the party liable, with or without suit, or the recovery and levying execution against the party so liable, shall discharge him to the extent of such payment or of such recovery and levy in execution, as the case may be, from his liability on any such cheque, bill of exchange, promissory note, hundí, bond, security, and debt;

and such Sheriff or other officer shall pay over to the party suing out such writ, the money so to be recovered, or such part thereof as may be sufficient to discharge the amount by such writ directed to be levied;

and if, after satisfaction of the amount so to be levied, together with Sheriff's poundage and all lawful charges and expenses, any surplus remain in the hands of such Sheriff or other officer, the same shall be paid to the party against whom such writ

shall be so issued, unless the same is duly attached in the hands of such Sheriff or other officer.

Provided that no Sheriff or other officer shall be bound to sue any party liable upon any such cheque, bill of exchange, promissory note, hundí, bond, security or debt, unless the party suing out such execution gives security to the Sheriff for indemnifying him from all costs and expenses to be incurred in the prosecution of such suit, or to which he may become liable in consequence thereof; the nature and amount of such security to be determined, in case they cannot agree, by the proper officer of the Court in which such suit is brought, or, if the Court so order, by some other person appointed by the Court for such purpose.

Indemnity for Sheriff.

The expense of preparing and executing such security shall be deducted out of any money recovered in such suit, and the nett proceeds only in this and other cases provided for by this Act shall be considered as received in satisfaction of the debt due to the execution-creditor.

25. If the Sheriff or other officer under any writ of attachment seize any Government security standing in the name of, or belonging to, the party against whose property such writ is issued, he may receive the interest due on such Government security, whether specially endorsed or otherwise, and sign a receipt for the same;

Sheriff empowered to receive interest on Government security seized by him;

and may also sell and dispose of such Government security through a broker at the market-rate of the day;

and to sell and endorse such security.

and if the endorsement of such party is required to transfer such Government security, the Sheriff or other public officer shall endorse the same thus, "*A. B.* by *C. D.*, Sheriff;"

and such endorsement shall be as effectual to pass the said Government security and to give a good title to the holder thereof as if the same had been endorsed by the party himself or his duly constituted attorney.

26. No debt shall be sold by the Sheriff under the process of the High Court, but the same shall be realized in the mode hereinbefore directed.

No debt to be sold by Sheriff.

27. If any person against whom any writ of execution has issued, has any interest in any stock or shares in any public Company, whether incorporated or not, carrying on business in India and within the reach of the process of the Court out of which such writ of execution has issued, the High Court or any Judge thereof, on the application of the party who has sued out such writ of execution, may make an order *ex parte* that such interest in such stock or shares, or such of them or such part thereof respectively as the said Court or Judge thinks fit, shall stand charged with the payment of the amount due in respect of such writ of execution.

Shares in public Company may be charged in execution.

Such order shall have the like effect and entitle the person in whose favour the same is made to the same remedies and priorities as a charge executed in favour of such person by the person against whom execution shall have been issued;

Service or notice of such order upon or to the Company whose stock or shares is or are the subject of such order, or upon or to any person claiming an interest in such stock or shares, shall have the like effect, and shall entitle the person in whose favour such order is made to the same remedies against such Company or such last-mentioned person as notice of a charge executed of even date with such order by the person against whom execution has been issued in favour of the person at whose suit the same has been issued.

Nothing herein contained shall prevent the person against whom such order has been made or any other person affected thereby, from applying to the Court or Judge by whom such order has been made for its discharge on such grounds as may be just.

Proviso.

28. If such debtor has any interest in any property standing in the name of the Accountant-General or any other officer of the High Court, or in the dividends, interest, or annual produce thereof, the Court or a Judge thereof may make an order that the interest of the defendant in such property shall be applied in payment of such debt, and the Court or Judge may from time to time make such other orders as may be necessary to give full effect to the above provision.

Property standing in name of any officer of Court.

29. A plaintiff or defendant arrested under any writ issued upon any judgment, order, decree, or sentence of any of the said Courts whereby money is ordered to be paid to any party, shall be entitled to his discharge from such arrest on payment or tender to such party or his attorney in the cause, or to the Sheriff or Gaoler in whose custody such person may be under such writ, of the amount directed to be levied by such writ.

Party arrested under writ when entitled to discharge.

30. A written order under the hand of the attorney in the cause by whom any such writ has been issued, shall justify the Sheriff, Gaoler, or person in whose custody the party may be under such writ in discharging such party, unless the party for whom such attorney professes to act has given written notice to the contrary to such Sheriff, Gaoler, or person in whose custody the opposite party may be.

Order of attorney issuing writ when sufficient for discharge of party.

Such discharge shall not be a satisfaction of the debt, unless made by the authority of the creditor; and nothing herein contained shall justify any attorney in giving such order for discharge without the consent of his client.

Attorney not to give order for discharge without client's consent

31. A writ of execution, if unexecuted, shall not remain in force for more than one year from the date of such writ, unless renewed in the manner hereinafter provided;

Time for which unexecuted writ remains in force.

but it may, at any time before its expiration, be renewed by the party issuing it for one year from the date of such renewal, and so on from time to time during the continuance of the renewed writ by being marked with the seal of the High Court and with a memorandum, signed by the officer, of the date of the day, month, and year of such renewal, or by such party giving a written notice of renewal to the Sheriff signed by the party or his attorney and bearing the like seal of the Court and memorandum signed by the officer as aforesaid;

Renewal of writ.

and a writ of execution so renewed shall have effect and be entitled to the same priority as the original writ would have had.

Renewed writ entitled to same priority as its original.

Provided, however, that no writ of possession shall be renewed without the special leave of the High Court or a Judge thereof.

Proviso as to writ of possession.

32. The production of a writ of execution or of the notice renewing the same, purporting to be marked with such seal and signed as aforesaid, showing the same to have been renewed according to this Act, shall be sufficient evidence of its having been so renewed.

Evidence of renewal.

33. All property of every kind that may be seized under a writ issued from the High Court, may be seized also under a writ of sequestration duly issued from the same, and the seizure must in all cases be made in the mode directed by this Act as to seizures under writs,

Seizure under writ of sequestration.

and any sum ordered by the Court to be realized by a sequestration, shall be realized in the same mode, and not otherwise, as if directed to be levied under a writ of attachment.

Sum ordered to be realized may be levied as under writ.

SCHEDULE.

(see section 2.)

I.—Statutes.

Year, reign and chapter.	Subject.
53 Hen. 3, c. 21	Replevin by Sheriff.
13 Edw. 1, c. 39	Delivery of writs to Sheriff.
28 Edw. 1, c. 16	False returns.
c. 19	Restoration of issues of land seized without cause.
Statutes of the Exchequer.	Wrongful distresses by Sheriff.
23 Hen. 6, c. 9	Sheriff not to let his county to ferm.
23 Hen. 6, c. 9	Sheriff's fees; Sheriff to let to bail, &c.
1 Mary, Stat. 2, c. 8	Sheriff not to be a Justice of the Peace.
29 Eliz., c. 4	Sheriff's fees.
3 Geo. 1, c. 15, s. 8	Power of Under Sheriff in case of death of Sheriff.

II.—Acts.

Number and year.	Title.
VIII of 1852 ...	An Act for remunerating the Sheriffs of Calcutta, Madras and Bombay for the execution of Mofussil process under Act XXIII of 1841.
VI of 1855 ...	An Act to extend the operation of, and regulate the mode of executing writs of execution in Her Majesty's Supreme Courts of Judicature.

SCHEDULE—*continued.*

III.—Charters.

Charter establishing the Supreme Court of Judicature at Fort William, dated 26th March 1774.	Clause IX.
Charter establishing the Supreme Court of Judicature at Madras, dated 26th December 1800.	Clauses XV, XVI, XVII.
Charter establishing the Supreme Court of Judicature at Bombay, dated 8th December 1823.	Clauses XX, XXI, XXII, XXIII.

STATEMENT OF OBJECTS AND REASONS.

This Bill is the second of the series of measures which have been prepared in order to diminish the bulk of the English Statute-law in force, or supposed to be in force, in the Presidency Towns. It repeals some ten Statutes relating to the office of Sheriff, and it consolidates, with such amendments as are required by present circumstances, the clauses of the Charters under which the Sheriffs are appointed, and the two Indian Acts which relate, respectively, to their fees for executing Mofussil process and to their functions in executing decrees made by the High Courts in the exercise of original civil jurisdiction.

A. HOBHOUSE.

CALCUTTA; *June* 1874.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill, and Statement of Objects and Reasons accompanying it, are published for general information, by order of his Excellency the Governor-General, under the 22nd of the Rules for the Conduct of the legislative Business of the Council of the Governor-General:—

No. 12 OF 1874.

A Bill to declare the Statutes in force in the Presidency Towns.

WHEREAS doubts exist as to what Acts of Parliament are in force in the Towns of Calcutta, Madras and Bombay, and it is expedient to remove such doubts; It is hereby enacted as follows:—

Preamble.

1. The enactments specified in the schedule hereto annexed (being Statutes or parts of Statutes passed before the year 1727), shall be deemed to apply, so far as local and personal circumstances admit, to all places and persons within the local limits of the ordinary original civil jurisdiction of the High Courts of Judicature at Fort William, Madras and Bombay.

Statutes declared to apply to the Presidency Towns.

2. All other Statutes passed before the said year 1727 are hereby repealed so far as they affect British India.

Repeal of other Statutes passed before 1727.

Provided that the repeal by this Act of any enactment shall not affect any Statute, Act or Regulation in which such enactment has been applied, incorporated or referred to:

Nothing in this Act shall—

(*a*) affect the validity or invalidity of any thing already done or suffered, or any indemnity already granted, or any right or title already acquired or accrued, or any remedy or proceeding in respect thereof, or the proof of any past act or thing;

(*b*) affect any principle or rule of law, or established jurisdiction, form or course of pleading, practice or procedure, or existing usage, custom, privilege, restriction, exemption, office or appointment, notwithstanding that the same respectively may have been in any manner affirmed, recognised or derived, by, in, or from any enactment hereby repealed;

(*c*) give validity to any transaction which, if it had occurred before the passing of this Act, would have been held invalid on the ground of its breeding litigation or of being otherwise unrighteous, unconscientious, or against public policy;

(*d*) provide or restore any jurisdiction, office, custom, privilege, restriction, exemption, usage or practice not now existing or in force;

(*e*) operate as an implied repeal of any enactment,

(*f*) affect the laws of inheritance, partition, succession and contract as administered to Hindús, Muhammadans, Buddhists, Sikhs and Jainas, or

(*g*) affect the laws of marriage as administered to persons not being Christians.

3. No Statute passed in or after the said year 1727 shall be deemed to apply to any part of British India, unless it expressly or by necessary implication extends thereto; and no Statute shall be deemed to extend by necessary implication to any part of British India merely because it repeals, amends or modifies the whole or any part of a Statute mentioned in the said Schedule.

When Statutes passed in or after 1727 apply.

SCHEDULE.

(See Section 1.)

13 Edw. 1, c. 1 ...	Statute *De Donis*.
c. 22 ...	Waste between joint-tenants and tenants in common.
18 Edw. 1, cc. 1, 2 ...	Statute of *Quia Emptores*.
25 Edw. 1, *Magna Carta*, c. 1 ...	Confirmation of liberties.
c. 29 ...	Civil and Criminal Justice.
Confirmatio Cartarum ...	Confirmation of charters.
5 Edw. 3, c. 9 ...	Unlawful attachment.
25 Edw. 3, Stat. 1 ...	Status of children born abroad of English parents.
28 Edw. 3, c. 3 ...	Civil and Criminal Justice.
27 Hen. 8, c. 10, ss. 1, 2 and 3 ...	Uses.
28 Hen. 8, c. 15, ss. 1, 2 and 4 ...	Offences committed at sea.
31 Hen. 8, c. 1 ...	Partition by joint-tenants.
32 Hen. 8, c. 32 ...	Partitions by tenants for life.
c. 34, ss. 1 and 2 ...	Grantees of reversions.
c. 37, s. 4 ...	Recovery of rent after death of *cestui que vie*.
c. 38, (except as concerning pre-contracts) ...	Degrees of consanguinity.
13 Eliz., c. 5, ss. 1, 2, 3 and 5 ...	Fraudulent conveyances.
27 Eliz., c. 4, ss. 1, 2, 3 and 4 ...	Fraudulent conveyances.
3 Char. 1, c. 1 ...	Wrongful imprisonment.
18 & 19 Char. 2, c. 11, ss. 1, 2 and 4 ...	Evidence of death of *cestui que vie*.
29 Char. 2, c. 3, ss. 7—11 ...	Trusts.
31 Char. 2, c. 2, except s. 14 ...	Habeas Corpus Act.
1 Will. & Mar., c. 6 ...	Coronation Oath.
1 Will. & Mar., Sess. 2, c. 2 ...	Bill of Rights.
2 Will. & Mar., c. 1 ...	Confirmation of late Parliament.
4 Will. & Mar., c. 16 ...	Frauds by clandestine mortgages.
9 Will. 3, c. 17 ...	Inland Bills of Exchange.
10 Will. 3, c. 22, down to and including the words "in anywise notwithstanding" ...	Inheritance of posthumous children.
11 Will. 3, c. 7 ...	Piracy.
c. 12 ...	Punishment of Governors of plantations.

NOTE.—The references in this schedule are made to the Statutes as printed in the Revised Edition, London, 1870.

STATEMENT OF OBJECTS AND REASONS.

1. It is generally held that, on the establishment of Mayors' Courts in Calcutta, Madras and Bombay, under the charter of 13 Geo. I, the Statute-law in force in England in the year 1726 was introduced into the Presidencies so far as it was applicable to local circumstances.

2. Under the qualification contained in the last part of this proposition, large classes of Statutes are obviously excluded. The Statutes, for instance, dealing with the subjects of Advowsons, Bankruptcy, Bastardy, Clergy, Commons, Dilapidations, Elections, Excise, Forests, Police, Poor-relief, Sewers, Tithes, and the qualification of Sheriffs were clearly framed with reference to the special conditions of England, and have never been deemed applicable to any part of India. Other Statutes, such as those relating to Coroners, Crimes, Executors, Jurors, Justices of the Peace, Lotteries, Oaths, Pleading and Riotous Assemblies, have been rendered by recent Indian legislation unnecessary and therefore inapplicable. Others again, which form the basis of the English law of real property—such as the Statutes of Entails, of Subinfeudations and of Uses—are clearly applicable to the property of Englishmen, though not to the property of Hindús or Muhammadans. But there remain some as to which differences of opinion may and do exist. If we inquire, for example, whether the Statutes relating to Maintenance and Champerty are in force in Calcutta, whether a European can be arrested here on a Sunday, or what law regulates distresses for arrears of rent exceeding a thousand rupees, we at once fall into doubt and difficulty. It is true that, in the absence of any declaration by the legislature, the Judges of the late Supreme Courts and those of the present High Courts have exercised the function of declaring what Statutes shall be deemed in force within the local limits of their ordinary original jurisdiction. But, in the first place, the Judges have made such declarations in comparatively few instances; in the second place, their decisions have not always been reported; thirdly, it may be doubted whether their declarations have always laid down the most convenient rule; and fourthly, the rulings of the Judges of one Supreme or High Court are not binding upon or always in accord with those of another.

3. Even in cases where a Statute certainly operates in the Presidency Towns, it is not always clear whether it applies to all the inhabitants or only to Europeans. Thus every one agrees that the Statutes of Elizabeth relating to Fraudulent Conveyances are in force in Calcutta, Madras and Bombay; and in Calcutta, the late Mr. Justice Norman (2 Ind. Jur. O. S. 7) held that they applied to Natives as well as to Europeans. But in Madras, Sir Adam Bittleston seemed to think, in a case reported in 6 Mad. H. C. Rep. 474, that they applied only to British subjects other than Hindús or Muhammadans.

4. The result is a great amount of uncertainty as to the Statute-law in force in the Presidency Towns, and this not merely in rare instances, but in matters of not infrequent occurrence.

5. Two Bills published simultaneously with this, and relating to Distresses and to the Sheriff, will, when passed, remove many doubts as to the law applicable to the subjects with which they respectively deal.

6. There will remain, however, many ancient Statutes as to which it is desirable that the legislature, in consultation with the learned Judges of the Presidency High Courts, should expressly declare either that they are, or that they are not, in force in Calcutta, Madras and Bombay. This, shortly, is the object of the present Bill. It declares that some forty Statutes shall, subject to the tests of applicability which have always prevailed, be deemed to apply to all places and persons in the Presidency Towns. These include Magna Carta; the Statutes *De Donis* and *Quia Emptores*; the Statute of Uses; the Statutes relating to Fraudulent Conveyances; the Habeas Corpus Act; the Bill of Rights and the Act of Settlement. It then expressly repeals all other Statutes passed before 1727.

7. Some of the Statutes inserted in the Schedule have been so inserted for caution's sake, but with considerable doubts as to whether they are of any practical use. Such are the provisions of the Statute of Frauds relating to trusts of land; the Statute 4 & 5 Will. & Mar., cap. 16, relating to frauds by mortgagors effected by concealment of prior charges; the Stat. 10 Will. III, cap. 22, giving the benefit of contingent remainders to posthumous children; and the Stat. 4 & 5 Anne, cap. 3, relating to warranties. There are also three Statutes conferring powers on the Admiralty Court in case of piracy, as to which it is not known whether they are still of any use or are superseded by modern legislation. These are the 28 Hen. VIII, cap. 15; the 11 Will. III, cap. 7, and the 8 Geo. I, cap. 24.

8. Among the repealed Statutes are those which relate to Champerty and Maintenance, eight in number. It is not intended by the repeal to alter the law on this subject, and a cautionary clause [sec. 2, cl. (*c*)] has been inserted accordingly. It is certain that the law applicable to transactions to which the names of Champerty and Maintenance are still applied, has drifted away from the Statutes; that numerous transactions falling within the scope of the Statutes are perfectly lawful, and that the decisions have in modern times been rested more and more on the broad principles of the Common Law, and have turned on the question whether or no the impeached transaction is unrighteous, unconscientious, and against public policy. The law in the Mofussil on this subject appears to be in a very efficient and reasonable state, though unaided by the Statutes; and the same law prevails in the Presidency Towns. See the case of *Grose* v. *Amirtamayi Dasi*, 4 Beng. L. R. Orig. C. J. 1, in which all the foregoing remarks are illustrated.

9. The opportunity has been taken to declare that no Statute passed in or after the year 1727 shall be deemed to apply to any part of British India, unless it expressly or by necessary implication extends thereto; and that no Statute shall be deemed to extend by necessary implication to any part of British India merely because it amends or modifies or repeals the whole or any part of a Statute mentioned in the Schedule.

BENGAL FAMINE.

NINETEENTH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL, FROM THE 29TH MAY TO 11TH JUNE 1874.

THE Lieutenant-Governor (Sir Richard Temple) writes from Monghyr on the 10th June the following account of the Tirhoot district to be included in the present narrative:—

"During the last fortnight I have visited Tirhoot, traversing the district from its south-eastern to its western border. I have conferred with all the principal European officers in the district, with some of the European non-official residents, and with many of the principal natives. Many relief circles and sub-circles were inspected."

"As Tirhoot is by far the most important of the distressed districts, and has to bear the brunt of the present trouble, some account may appropriately be given of its condition during the first ten days of June."

"As regards the weather and the crops of Tirhoot, the month of May has been against the district. The drought was great—water was only to be reached at double the usual depth below the surface. The supplementary coarse grains sown in February withered in the heat. The wheat crop was

in many places indifferent. The fruit of the mango groves, so abundant in this district, failed to yield the usual sustenance to the people. The indigo production is marred by one of the greatest failures known in this generation; and but little was done for ploughing or sowing the rice for next harvest. June, therefore, opened ominously. But now the preliminary showers have fallen, in some places abundant, in others scanty; in some parts towards the south their coming was so long delayed that a certain proportion of loss at next harvest was thought inevitable. By long-established agricultural practice, the extensive depressions in the surface of the ground ought, by the beginning of June, to have young rice springing up, but are this year only beginning to be broken up. Countless patches of ground, which ought to be filled with plants of rice ready for transplantation, have this year almost nothing. Thus the want of the April and May showers has caused way to be lost for next harvest, which can hardly be made up in full. The rains, however, seem to be coming; the industry of the peasants is stimulated to the utmost; and the next rice harvest may yet escape any serious diminution."

"On the other hand the poppy has flourished, and the opium yield will be favorable. The tobacco crop, too, has proved a source of wealth to the southern part of the district."

"Still the losses which have been superadded to the destruction of the last rice crop, combined with an apparent possibility of some deficiency on the next rice harvest, have produced an effect on the grain trade; have caused much timidity among the dealers in advancing grain to the cultivators, or in producing it for sale in the markets; and have rendered private rice an almost unobtainable article. Great as the losses have been, low as the private stocks may have fallen, one cannot believe that the rice markets would have been so empty as we found them to be before we opened sales of Government grain, were it not that the holders of grain apprehend losses yet to happen, and keep whatever they have in view of such eventualities."

"It is to be remembered that in Tirhoot—unlike other districts—there is no early rice, and but a small September rice crop, and but little Indian-corn. In the eastern and north-eastern parts of the district, where the distress would be worst, there is nothing, save some coarse grains of inconsiderable quantity, to come in till the great rice harvest of December. In other districts fears arising now might happily be dissipated by August, while in Tirhoot they could not be removed till the end of autumn. This consideration enhances the gravity of the situation in Tirhoot."

"As regards the condition of the people of the poorer classes, the improvement in their appearance in full two-thirds of the district is declared by all witnesses to be marked, and the change for the better is the most perceptible in those parts which were in the outset most threatened with distress. Since the middle of March last, at least one-quarter, often one-half, sometimes even three-quarters of the people have been receiving assistance from Government in some shape or other, which assistance has, in the majority of cases, amounted to maintenance. Hundreds of thousands of persons (literally) who came on relief in March last in a thin and weak state, have recovered from the depression; are now in at least an average physical condition, and are as well as they ever would be in ordinary years. It is this, perhaps, which may have caused a supposition to arise that these poor creatures have been too well cared for. They have been properly fed, that is all. We could not do less than feed them properly, as we undertook to rescue them from what must have ended in starvation."

"Still, however, persons are frequently met with in such a degree of emaciation (such severe distress is sometimes unexpectedly encountered in places previously believed to be beyond the reach of danger) as would prove the peril from which the population at large has escaped, and which would again threaten it if any circumstances were to interrupt or weaken the administration of relief. It is, as I believe, the fact that in many thousands of instances relief was afforded only just in time to save life; and that in many

hundreds of villages the relief officers arrived only just in time to prevent mortality. If this be so, then looking to the narrow border which separates preservation from destruction, can we reasonably doubt that there must have been some cases which terminated fatally before the arrival of aid? If the people had been ready to ask for aid, our officers might have had some opportunity of acting in such cases. But on the contrary the sufferers were too often disposed to die in silence, and to this day, with all our elaborate organisation of relief, there is the danger to be guarded against of destitute individuals remaining unobserved. The metaphor of ships sinking in sight of port is terribly applicable to emaciated persons lying down to die in the very midst of a relief system."

"I have heard much oral evidence of the sickness and mortality, and the sad scenes in consequence, which occurred during 1866 in those parts of Tirhoot where destruction of the rice harvest had occurred. The área of such destruction is known to have been very much larger on the present occasion than in 1866. The prices in Tirhoot of rice, 9, 8, even sometimes 7½ seers the rupee during the hot months, were as dear, or dearer than they were in 1866; and the dearness began in many places at an earlier date than in 1866, and this, too, notwithstanding the fact that the relief operations are on a much larger scale now than in 1866. From this consideration some notion can be formed of the mortality and its attendant miseries, which must have prevailed in Tirhoot during the spring and summer of 1874 but for the relief operations, and which would still prevail during the summer and the autumn if those operations were to be relaxed. The sad occurrences which, as we hope, were limited in 1866 to a comparatively few places in Tirhoot, would, in 1874, have happened in many places, and would have increased more and more till they spread over perhaps half of this extensive and populous district."

"I have enquired much as to the number of deaths which may be attributable to starvation. As is well known, the authenticated cases are very few. It seems certain that such clear cases of this sad description as could be embodied in official returns are rare. Even if all the deaths in the numerous field hospitals—which deaths are medically attributed to various causes—were deemed indirectly attributable to want of food, still the number would be statistically inconsiderable. And inasmuch as Tirhoot is fortunate in having a great number of well-informed and independent witnesses scattered all over it, who must have stated all they knew, it seems equally certain that no considerable mortality can have occurred in any part of the district. But that the available statistics can show all the deaths from want of food, is, to my mind, incredible. The patience with which, at the first, numbers would pine away without resorting to any authority, and the manner in which individuals will do so even to this day, convinces me that some must have died of hunger of whom we shall never hear."

"My predecessor, Sir George Campbell's view on this matter was expressed in March last to the following effect:—

"'In times of scarcity and the early stages of famine, it is totally impossible to distinguish deaths accelerated by scarcity and bad food from natural deaths. The Lieutenant-Governor has not the least doubt that among a very poor and helpless population, such as exists in North Tirhoot, many people die when food is dear who would not die, or would not die so soon, if it were cheap. He believes that there have not been deaths from direct starvation among healthy adults; but from what he saw of the people about Bahera, and some of those on the works near Durbhunga, he fears that among such a population a good many old, weakly, and sick people must have succumbed to insufficient nourishment.'"

"I entirely subscribe to that view. I am as unable as he was to state any number. But I believe that if it could be exactly known, it would be found so extremely small as not to affect appreciably the death-rate among the large population concerned."

"Looking to all the circumstances, however, and to the numbers receiving some sort of relief in Tirhoot (over 1,100,000 on 1st June, besides the numbers receiving aid indirectly as purchasers of Government grain), I hope that some work of humanity will be found to have been accomplished in this district up

to that date. But there remains the anxious question whether that work can be successfully sustained during the trying months yet to come?"

"In respect to the organisation of relief, I found the circles and sub-circles into which the whole country is divided to be in complete working order. And such working order implies that every village, and the majority of houses in every village, are brought under relief inspection; that those who are unable to labor have tickets entitling them to subsistence; that those who are able to labor are employed on digging the village tanks on piece-work, and are paid in rice; that enquiries are going on village by village regarding the cultivators who need advances of grain; that the village grain-dealers have a supply for retail of rice obtained from the Government stores; that the jeyt ryot, or head-man of the village, has a supply of rice from the neighbouring granary for the disposal of which he is accountable; that there is a sub-depôt of rice in every sub-circle comprising from ten to fifteen villages, and a depôt for every circle comprising from ten to fifteen sub-circles; that arrangements are being made for regularly conveying rice from the depôts to the villages during the flood season by carriers, by bullocks and ponies, and even by canoes; that in every circle there is a poor-house for the worst cases, and a field hospital with native medical attendants; that every sub-circle has its native officials, and every circle its European officer or its superior native officers."

"In respect to relief-laborers, the number returned is 910,657, the largest yet seen in this district. We may, indeed, hope that this may prove to be the highest point, and that during the month of June the number will decline, as agriculture and other private employments may afford subsistence after the falling of the rains. Great numbers have already gone, and will yet go off to the fields. But in case any should linger on the relief-works, while they might be better engaged privately, orders have been issued to discharge all such persons, and to afford every encouragement for the transfer of the laborers from the works to other occupations. The works will, however, be kept open for all who cannot otherwise obtain employment so long as the weather shall permit. It is to be expected that the rains will soon entirely stop tank-digging, and even impede road-making. This, however, is the very season when the men thus thrown out of work will be able to obtain private employ. If any should fail in this, they will be cared for under the circle system just described. At the worst, they would come on charitable relief, but any augmentation of this form of relief (already so large) is to be deprecated; and there is the fear that persons discharged from relief-works may try to resort to the public bounty. Orders have issued to guard against this possible abuse. Still, even during the rainy season, there will be intervals of time when people cannot obtain employment either on relief-works or in private employ. Some of these may have to be admitted to charitable relief; others will, it is hoped, be able to support themselves by what they saved from their earnings while on the works. It is very probable that large numbers have thus saved enough to sustain themselves during such intervals, and orders have issued to prevent those who are thus comparatively independent from claiming further relief. In the dispensing of such liberality as that which has been dispensed, some abuses are practically inevitable; but this is all the greater reason why vigilance should be exercised against all those abuses of the State bounty which can be foreseen. In my last narrative (25th May) I stated that rates of pay for piece-work, which had been appropriate in April, were becoming too high under improved circumstances in May and June, and that a reduction would be undertaken. I am glad to find, on the spot, that this is being carried into effect without difficulty."

"As regards charitable relief in the Tirhoot District, the number of the recipients is now returned as 166,477. Of these, many would even in ordinary years be subsisting on private charity; this year, however, they would be foodless, as the donors, being themselves in difficulties, cannot give. Many again belong to the better castes, even to the Brahmin caste. Special enquiries are being made to search out village by village all those who are pining in hunger at home, and from pride or fear are deterred from seeking relief. Th

fear among some castes of being included in the same category with the paupers is such as to lead them on towards extremities. While craving aid, they will ask that they may pay a little, or be debited with part repayment, in order to avoid being classed as recipients of gratuitous relief. In very many places women are set to work with spinning and weaving, cotton being supplied to them for that purpose. The Tirhoot Brahmins constitute a well-known and numerous section of that great caste, and numbers of them are suffering, and will yet suffer more and more, that sort of distress which it appears to be the object of the charitable subscription fund to relieve; distress—borne, perhaps, with false pride, but still with fortitude—enough to straiten them sorely but hardly enough to threaten that immediate danger which State charity undertakes to obviate. Orders have been reiterated to treat these cases according to the generous and considerate intentions of the subscribers."

"As regards advances to the ryot cultivators, there has been, and still is, fear lest this class, the most important class of the community, should incur lasting impoverishment from using up for immediate subsistence that which they ought to keep, namely, their seed-grain, and the little capital of their husbandry—which result, if now allowed to happen, would leave evil traces in the district long after this crisis shall have passed away. The men have got their land, their implements, their cattle, and their own power of labor, but they have not food till next harvest. Ordinarily there are dealers whose business it would be to advance grain for food, but often—perhaps generally—they refuse to do so this year, because the prospect of next crop is not assured: Hence the need of making to the cultivators advances of Government grain repayable hereafter. But as all cultivators are not in need—as many still have small private stores—it is important to make systematic enquiry, village by village, in order to discriminate real from simulated necessity. Such enquiry is being conducted, and it is already seen that the number of really deserving applicants is very considerable. It is better that the advances should be made by the zemindars; and many of the large landlords are doing so. But where the zemindars are petty proprietors (and much of the land in Tirhoot is minutely sub-divided) the advances, if they are to be made at all, must be made by the State. In all these cases, however, the principle is borne in mind (as laid down in the Governor-General's letter of the 16th December last) of inducing the zemindar to become security, or to allow the land to be virtually pledged, in addition to such security as the cultivator himself can offer. It is hoped that a large part of the advances will be thus covered by security. Many zemindars have already agreed: more, doubtless, will yet agree; and I hope to be able to state ultimately that most zemindars, great and small, have done well in this matter. The number of cultivators in Tirhoot under advances of grain for food will be considerable, but it cannot be stated as yet."

"As I have elsewhere stated, it is on the efficiency of the system of advancing grain for food that we must partly rely for preventing the consumption of seed-grain. The ryots still possess some seed; the dealers certainly possess much, though they defer disposing of it to the last safe moment. Assistance is being rendered by making cash advances to cultivators for purchase of seed-grain; by exchanging Government food-grain for local seed-grain, which latter is afterwards sold to the ryots; by importing Government seed-grain from a distance."

"As regards the sale of Government grain, it has just been stated that there is no private rice in the markets of two-thirds of the Tirhoot District; private stores there must be, but they are not brought forward, and whether they will be, depends on the course of the rainy season. At present the local traders say that they have nothing to sell, and that they will not attempt to import until the rising rivers afford water-carriage, land-carriage being too expensive; they will not promise to do so even then. The ordinary course of trade is the reverse, namely that of exportation; they have rarely or never tried importation; the prices down south, whence rice might be obtained, are too high to yield profit to an importer to Tirhoot; they will be glad to buy wholesale from Government, and with that stock to make some profit by retail. One

may pass from mart to mart in Tirhoot, and receive from the grain dealers, great and small, this almost stereotyped reply. One may ask the grain merchants at Patna, which is the great *entrepôt* for Tirhoot, they will say that they have not, as a rule, imported, and do not intend to import rice from the south-east. They do import other grains from the north-west, hundreds of tons daily, and hope to go on importing until the Indian-corn of Behar shall come in, next September. This north-west grain they send daily across the Ganges in quantities; they will send more still when the navigation of the rivers becomes easy; the grain will go all over the southern half of Tirhoot, as far as Mozufferpore and Durbhunga; whether it will go beyond that to the more distressed parts they cannot say; probably not, it never does go ordinarily."

"Meanwhile the markets in two-thirds of Tirhoot are destitute of rice, the staple food of the people. Therefore, sales of Government rice are being opened, under the rules explained in my narrative of the 11th May, throughout the sub-divisions of Durbhunga, Modhoobunnee, Seetamurhee, and a part of Mozufferpore, and are very much resorted to by the people. But orders have been reiterated that such sales will be suspended immediately on the arrival of private supplies, and that the trade be informed accordingly. I believe that every trader must by this time know that if he will import grain, the field which the Government is forced to occupy temporarily will be at once vacated for him."

"In the remaining one-third of Tirhoot, the Sub-divisions of Tajpore and Hajeepore, and half the Sub-division of Mozufferpore, sales of Government grain have not been opened."

"As regards the allotment of Government grain for Tirhoot, 4,200,000 maunds, or 154,411 tons, the question at once arises, will it bear the depletion to be caused from June to December by all these outgoings, for paying relief-laborers in kind, for feeding the recipients of charitable relief, for advances of food-grain to cultivators, for sales to the public? Up to end of May about 642,000 maunds or 23,600 tons* only have been expended, and this is but a small portion of the whole, and is less than was expected originally. The amount comprises regular issues only as expenditure, and does not include loss or wastage. But then the numbers of persons on relief up to the end of May—

On relief works	...	...	...	...	910,657
On gratuitous relief	...	...	...	...	190,914
			Total	...	1,101,571

somewhat exceeded the estimate of distress (1,000,000) on which the allotment was made. The cause of the excess over estimate is the aggravation of distress in the tract immediately to the west and north of Mozufferpore. The above numbers will, we hope, decrease during June; but that will be more than counter-balanced by the development of advances to cultivators and sales to the public. All the local officers believe that the expenditure of grain will be very great during June: their estimates show an expected consumption of 1,147,000 maunds (42,095 tons) in the Tirhoot district during this month. The progress of the grain expenditure will be watched till the beginning of July, when the allotment will be reconsidered. Under any circumstances, there will be enough for some time to come. If there should be any prospect of deficiency in the autumn, additional supplies can be brought in by water-carriage."

"In regard to all the circumstances of Tirhoot, it has been determined to despatch to that district before the heavy rains set in six and a half lakhs of maunds of rice additional, four and a half from the reserve at Calcutta, and two from supplies that could be spared from neighbouring places, equal to about 24,000 tons. The total allotment for this district, originally about 154,000 tons, will therefore now be 178,000 tons."

* This is approximate, I am not able to state the exact figure

Sir Richard Temple writes from Monghyr on the 11th June, the following general remarks to be included in this Narrative, in continuation of his special remarks regarding the Tirhoot district:—

"During the fortnight the rains have been abundant in the eastern half of the distressed districts; and sufficient, though long-delayed, in the western half. The river Koosee, running into the Ganges north of Bhagulpore, may be taken as the approximate boundary; to the east of the river the agricultural prospect is very good; to the west, not so good. The improvement in the weather has infused energy into husbandry, and has somewhat raised the local grain markets from the condition into which they were falling, without however, essentially lowering the general range of prices."

"I am not able to state precisely the amount of Government grain expended up to the 1st June, nor to correct properly the figures given in my Narrative of the 25th May. It is difficult to get a timely return from so many granaries scattered in remote localities. But it will probably be found that up to the middle of May the quantity expended was less than that estimated (50,000 tons). The best return that can at this date be made up, shows 57,000 tons expended up to the last week in May (though not up to the last day of May). This figure cannot be put forward as absolutely correct, but it is the best that can be given at this time of writing."

"During the last days of May, however, the expenditure from most depôts increased rapidly: the payment of relief labourers in kind had taken effect; the sales of grain had been largely opened; the cultivators had been receiving the grain advances authorized after enquiry. These causes continued to augment the expenditure during the first days of June, and will, as the local officers believe, still continue during this month. Estimates have been obtained from these officers of the expenditure from the last week of May to the end of June. I have had the advantage of discussing with them on the spot some of the most important of these estimates. The result of these estimates is that up to the 1st July 156,462 tons in all are expected to be expended. The statement means expenditure, and does not at all include wastage or other losses. This figure must not be regarded as more than an estimate. If the actual expenditure shall prove less, then the fact is so far to the good as regards our preparations. If it shall be as much, or more, then it will put our preparations to the test. For, even after the 1st of July, there are, for the most important of the distressed districts, five months of distress yet to come, beginning with July and ending with November."

"As is well known, in most parts of Bengal and Behar, new crops will come in during September, affording relief in some of the distressed districts. There are many distressed localities, indeed, where relief may be hoped for earlier than September. And this may naturally convey the idea that the general distress will, in the main, be over in September. Such is not the case, however, as regards North-Eastern Tirhoot,—by far the most important area of distress—and some other parts of Chumparun and North Bhagulpore. No substantial improvement can happen there till the end of November or beginning of December. If, therefore, 156,000 tons shall prove to have been actually expended, the balance of supplies will not be more than what we ought to have for safety."

"In my narrative of the 25th of May, the number of persons receiving assistance in some shape or other from Government or from the charitable public was estimated to be upwards of 2,500,000, which number was expected to increase daily. A more precise calculation on the 18th May had given the number at 2,224,965 persons.

"The present narrative shows 1,737,768 persons on relief-works, and 307,505 persons on charitable relief, or 2,045,273 persons in these two categories alone. But, as shown in the last narrative, there are two other categories of persons who receive assistance, namely, those who purchase, and those who obtain advances of Government grain. On the 18th of May these were

estimated to comprise 820,000 persons.* By the 1st of June they would comprise very much more. And this consideration would bring the total from the 2,045,273 for the first two categories to nearly three millions for the whole four categories during the first week in June. I will not, however, attempt an exact figure in a matter where exactness is unattainable. When large quantities of grain are sold wholesale to be retailed, it is impossible to say precisely how many persons will receive assistance from such sales."

"Still the matter is one that has to be examined every fortnight by the light of the best calculations which we can make. And during the first week of June, if we could know the average daily expenditure of grain, we might arrive at a calculation of the number of persons receiving assistance. Such assistance is now, with but few exceptions, afforded in grain. Now, out of the 156,000 tons above estimated up to end of June, 99,000 tons were estimated for the last week of May, and for the whole month of June, say 38 days. This, at ¾ seer per head per diem, would give 3,889,526 persons receiving assistance daily, which number is above the number, 3,500,000, estimated by me in March last. The present estimate of 3,889,526 persons would include all the four categories, and all persons of every sort receiving assistance. It is not, indeed, free from doubts, especially in regard to this, that many of those who purchase in June may be laying in some supplies for June. If this be so, then the calculation may prove to be somewhat too high."

"We shall soon have the means of correcting these calculations, but now that the elements of sale and advance enter into the computation, we shall hardly advance beyond a calculation, and shall not be able to present an absolute statement of fact. Meanwhile, so far as is known at this time of writing, the number of persons receiving assistance appears to be as high as the highest for which provision was made in March last, namely, 3,500,000. It has never been expected or affirmed that all who receive assistance would be absolutely maintained by Government. But as the provision had to be made on an estimate of the numbers likely to require it, it was necessary to reckon those who would buy, or would obtain advances of grain, just as much as those who would receive in kind either wages or subsistence."

"Looking to the supplies of Government grain now *in situ*, or in reserve, I am still hopeful that there is enough for such emergencies and requirements as may be reasonably anticipated at present. But I have not met any responsible officer of any grade who thinks that we have more than enough."

"The expenditure of so large a quantity of Government grain must be accompanied by a system of special accounts conducted by selected officers, and for this arrangements have been already made."

"Regarding private trade, I have said that the dealers in the interior of Tirhoot will not import grain until the rainy season causes the rivers to rise; and that they are anxious to take Government grain and retail that. In South Behar, on the banks of the Ganges, and in the Sarun district generally, there is much private trade in grain; even in the Tirhoot bazars there is still some barley, coarse millet, pulse, and a little wheat. But the supply on a market day is speedily exhausted, and there is no hope that private stocks will be replenished from outside until the rivers rise towards the middle of July. The source from which private trade draws its supplies is chiefly Northern India; there are many indications from Serajgunge, Pubna, Goalundo, Julpigoree, and even Dacca, that Bengal Proper has, at present, very little surplus rice to send into Behar. Happily the surplus of other grains in the Punjab and North-Western Provinces appears to be great, and on an average 800 tons a day are received thence by rail at Patna."

* See paragraph 8 of Minute dated 18th May—

III	...	...	...	..	529,252
IV	...	...	...	...	291,260
					820,512

"The prices-current reported for the 6th June, show that by that date some of the markets of Behar and Northern and Eastern Bengal had felt the effects of the favorable rain of the previous week. Prices have cheapened materially during the fortnight in Rungpore, Pubna, Julpigoree, and Mymensing; in Central and Western Bengal, prices are as dear as they were a fortnight ago. In seven out of the ten districts of Behar, the price of common rice is now appreciably cheaper than it was a fortnight ago. In the other three districts of Behar prices are unchanged."

"Instructions have been reiterated to the local officers in all the distressed districts to suspend the sales of Government grain, wherever sufficient supplies are brought in by trade, and to inform all traders accordingly."

"At the present time there is beginning a transition from one stage of our operations to another. If the rains shall happily continue, the relief laborers will gradually leave the works, and go to the fields. Every co-operation is afforded by the relief officers by contracting or closing the works, wherever and whenever agriculture or other private employment affords remunerative occupation. The expedience of avoiding economic disturbance by restoring the people as soon as possible to their normal condition, is quite understood. Vigilance will be exercised to prevent those relief laborers who have saved from their earnings during the hot months, enough to support themselves during the rainy months, from coming on charitable relief, or receiving other assistance. But when that which has been heretofore the hardest part, namely, the management of relief works, shall have diminished, the supplying of the empty markets with rice, until trade brings up supplies, or the next crops come in, and the advancing of food to the cultivators until they can reap the fruits of their industry, will come into greater prominence. Perhaps also, the administration of charitable relief will expand. But whatever be the phase, whatever the proportions of the affair, I am sure that the officers of all grades, in all branches of the administration, will evince an unabated spirit of devotion to the humane cause in which they are engaged."

Weather and rainfall.

THE reports from all quarters on this subject have been most satisfactory and encouraging, and with the exception of parts of Monghyr,* Burdwan, Midnapore, Balasore, Pooree, and the Mudhoobunnee Sub-division in Tirhoot, the latest returns show an ample fall of rain sufficient for all requirements, and no excessive fall has yet been reported.

State of the crops.

2. The reports as to the prospects of the coming crops are generally excellent, and except in those parts mentioned above, where insufficient rain has fallen, a more than average harvest is expected. In the few places where no rain had fallen up to the latest dates to which returns had been received, there is no cause for alarm, as there is still ample time for sowing.

Prices.

3. Prices have remained generally steady, and on the whole seem to be rather inclined to fall than to rise, especially in the distressed districts, where there has been an almost general fall. In Burdwan, Hooghly, and Howrah, in the Burdwan division, a slight rise is reported. In the other three districts, there has been no change. In the Central districts, prices have risen in Calcutta, the 24-Pergunnahs, Nuddea, and Jessore, and a fall is reported in Rajshahye, Rungpore, Bogra, and Pubna. In the Eastern Districts there has been a slight rise in Backergunge, Chittagong, Chittagong Hill Tracts, and Tipperah, and a somewhat greater rise (from 15 seers to 14) in Noakholly. In Fureedpore, Mymensingh, and Sylhet there has been a fall. Throughout the whole of Behar and Chota Nagpore,

* NOTE.—Reports have since been received of rain in Monghyr.

prices are easier, except in Monghyr, the Sonthal Pergunnahs and Manbhoom, where they are stationary. In Orissa there has been a slight rise in Cuttack, prices remaining as before in the other districts of the division.

Seed-grain.

4. It has been stated in previous narratives that seed-grain for the next crop would, for the most part, so far as Government or its officers could foresee, be forthcoming from the stores of grain-lenders, landholders, and cultivators. Some of the ryots would, it was supposed, have insufficient means to purchase seed, and advances of money were made to them for this purpose. At the same time there were apprehensions that in parts of Mudhoobunnee, Durbhunga, Ramnuggur, and Soopole, there might be lack of seed-grain. Further experience has confirmed these views; the ryots have produced or obtained seed-grain sufficient to sow an unusually large breadth of early (September) rice, and every one seems confident that seed will also be forthcoming for the late (December) rice crop everywhere, save in a few particularly destitute tracts of North Behar. For these tracts the Government has bought—

15,000	maunds of seed-grain	from	Julpigoree.	
68,000	„	„	„	Central and Eastern Bengal.
12,000	„	„	„	certain tracts in South Behar where last season's crop was good.
95,000	„			

The Julpigoree seed was sent to Soopole in North Bhagulpore. At first there was little demand for it, but during the last fortnight, since the rain fell, the ryots have become anxious to take it at the rate of 15 seers per rupee. The remainder of the seed has been distributed—

30,000	maunds	to Mudhoobunnee.
30,000	„	to Eastern Durbhunga and Mudheypore
20,000	„	to Ramnuggur.

The last consignments of seed-grain left Calcutta on the 27th May, and it is all now on its way to the depôts whence it is to be distributed.

5. The quantity of seed-grain bought by Government for distribution, is thus small in reference to the large area of distressed country; but looking to the comparative smallness of the areas where occasional lack of seed was expected, the Lieutenant-Governor deemed it unnecessary to lay in a larger supply. No arrangements were made to supply seed-grain to Dinagepore or the rest of the Rajshahye Divisions, as those tracts were believed to possess sufficient supplies of their own. During the tour he has just taken in North Behar, Sir Richard Temple learnt that landholders and cultivators were themselves in some cases fetching seed-grain from a great distance, and that in Tirhoot, at any rate, no general complaint had been heard that seed-grain would be wanting over any considerable area.

Private trade to Behar

6. The usual note on the movement of food-grains will be found in Appendix A. The returns of grain imported to Behar show an increase in the upward traffic from Howrah of 2,829 tons, and a decrease of 3,476 tons in the downward traffic from the North-Western Provinces and Punjab, as compared with the returns of the preceding fortnight; but, as shown in Sir Richard Temple's remarks, the decrease is probably only temporary, and we may expect to see, shortly if not an increase, at least a return to the former level of imports.

North Tirhoot.

7. The rain that has fallen in the last few days has greatly improved the prospects of the worst parts of this district, though in Mudhoobunnee there is said to be a great deal of land which has still to be ploughed. In Seetamurhee the prospects of the crops are very good, and they have greatly improved in Durbhunga. Sales of grain to the public are necessarily almost universal, as private trade seems to have done little or nothing for this part of the country, and supplies were short everywhere, except in Seetamurhee, where they seem to have been fairly abundant. In Durbhunga and Mudhoobunnee almost the only stocks of grain, except those

in the Government golahs, are small stores held by private persons for their own consumption.

8. The condition of the people, to judge by the results of an inspection by Dr. MacDonnell of a considerable number of persons in the receipt of charitable relief in Durbhunga, as compared with the statement quoted in the 17th narrative as showing the condition of laborers on relief-works at the end of April, has materially improved; but in order to estimate the great advance shown by the results given in the later returns, it must be recollected that they represent the state of the most distressed section of the population, while Dr. Birch's observations were made on those actually laboring, though at that time the separation between able-bodied and weakly recipients of relief had not been so carefully made as has been done since. The following figures show the results of the two inspections:—

	Dr. MacDonnell.	Dr. Birch.
Normal condition ...	55·5	49·
Under fed ...	23·4	27·
Emaciated ...	17·8	12·

The Additional Commissioner, Mr. Metcalfe, considers that Dr. MacDonnell has adopted too high a standard, and that, as compared with the usual state of the Tirhoot peasantry, the results ought to be even more favorable than those given above; and he is probably right, as the low average physique of the lower classes in Tirhoot has been noticed in the annual jail reports, and remarked on by independent observers.

South Tirhoot.

9. The prospects of this district have materially improved; land is being prepared, and crops sown everywhere. In Hajeepore, distress had increased considerably before the rainfall, and it had been found necessary to institute relief circles and increase the number of relief-works; and though no severe suffering had been experienced, yet numbers of those newly arrived on the works looked thin and pinched, owing to an insufficient diet. In the Head-Quarters Sub-division sales of grain to the public have been found to be necessary in the east, owing to the insufficient supplies in the bazars. The western tracts and Tajpore and Hajipore have received sufficient supplies from the Patna trade, about 1,00,000 maunds (nearly 4,000 tons), being imported weekly into the district.

Chumparun.

10. The condition of the people continues much as before, while future prospects continue to be most hopeful. Private trade is very active in the Gobindgunge and Dhaka Sub-divisions, to which grain is conveyed by the Gunduk, and it has consequently been found possible to restrict the sale of Government grain within very narrow limits, only a little over 2,200 maunds having been sold to the public and to laborers up to date. In the rest of the district, supplies have been shorter, and sales have been found to be necessary.

Sarun.

11. This district continues to be well supplied with food, but the laborers increase on the relief works. The causes of the great demand for labor have been explained in previous narratives, and need not be repeated here. Rain has fallen everywhere since the date of the Collector's narrative, and now that cultivation has seriously begun, a diminution in the crowds on the relief works may be looked for. An attempt was made to draft a number of men from the district works to the Soane canal, where they would be able to obtain higher pay at piece-work rates than they could get on the district works, but though a considerable number consented to go at first, yet they afterwards refused, having taken into their heads the idea that the alleged demand for laborers for the Soane Canal was merely a pretext for getting them out of the district, and then shipping them off to the Mauritius.

South Behar.

12. The rainfall in the three districts of the Patna Division south of the Ganges has been sufficient for ploughing, but sowings have not yet begun. These districts are always later than those to the north of the river, and sowings are not usually made before

the middle of June, so that the prospects are still very good. The bazars continue to be well supplied with grain, chiefly through importations from the North-Western Provinces. These average 1,50,000 maunds a week in the Patna district, and the Shahabad returns also show an active trade.

Bhagulpore Division. Tracts south of the Ganges.

13. In this part of this division, prospects continue to improve, and the rainfall, which has been general except at Buktiarpore* in the Monghyr district, is said to have been sufficient to give every prospect of a most favorable sowing season. Distress is confined almost entirely to the southern part of the Sonthal Pergunnahs, Buktiarpore, and a small tract near Sheikpoora, also in Monghyr. Relief measures appear everywhere to be adequate, and there is no anxiety felt by the authorities or the people. Private trade is said to be reviving in Monghyr.

Tracts north of the Ganges.

14. Rain has also been plentiful in these parts, especially in Purneah. The sowings of the autumn crop have been completed, and those of the late rice crop are in progress. Prospects are everywhere most favorable. During the period covered by the Collector of Purneah's narrative, there was a sudden outbreak of dacoities and grain robberies near Kissengunge, a place well known for the turbulent character of its inhabitants, and a panic, accompanied with riots arose among the people owing to a sudden rise of prices resulting from the cessation of imports from Julpigoree, in which district distress had appeared. The panic was allayed by sales from the Government golahs, and the offenders against the law have been arrested and punished. In no case did it appear that crimes were committed under the pressure of want, as all those arrested were hale, hearty men, in good condition.

Private trade has generally been active except in Soopool, but sales of Government grain have been found to be necessary in Purneah as well as in Soopool. In the latter tract there is said to be little or no grain except that in the Government golahs, and the sales there have consequently been very large.

Rajshahye Division.

15. The prospects in all the districts of this division are excellent, and up to the present time the promise of the coming year's crops is everything that could be wished. Still pressure is being felt in some districts, especially in Dinagepore and Rungpore. In the former district private trade is doing very little, and the people are almost entirely dependent for present supplies on the Government golahs. In Rungpore trade is active along the Teesta and Durlah, but in the west and north no fresh supplies are being imported. In both districts large sales of Government rice have been found necessary, and must in all probability be continued. The health of the people is generally good, and cholera, where it previously appeared, had abated.

Cooch Behar Division. Julpigoree.

16. The district narratives of the Deputy Commissioner of Julpigoree and Commissioner show an improvement in the district. The Commissioner has satisfied himself that the relief-works and organisation will be quite sufficient to cope with any distress that is likely to arise. The only part of the district about which he now feels any anxiety is South Boda, where the people already seem to have suffered somewhat, and to have nearly come to the end of their resources, but arrangements have been made for advancing grain freely to the cultivators, and relief works are being increased. The prospects of the coming crop are excellent, and it is now calculated that only 50,000 maunds of Government grain will be wanted for the district instead of 1,00,000 as was at first calculated. A panic, arising from the distress in the adjoining parts of the district, led to grain riots and robberies in Mynagoori, where no distress has been experienced, and where none is expected to occur. The panic was taken advantage of by the bad characters of the country, who are somewhat notorious for their turbulence, and it was not till a small detachment of 50 men was brought down from Buxa to Mynagoori that confidence and order were fully restored.

* Rain is since said to have fallen at Buktiarpore.

Burdwan Division.

17. More rain is reported as being wanted throughout the division, especially in Jehanabad, Burdwan, and in the west of the Midnapore district. On the whole rain seems to have been more partial throughout the Midnapore and Burdwan district than in other parts of the country, and all present anxiety about the coming crops had not therefore disappeared. Cholera is prevalent in Burdwan, Midnapore, and Bankoora.

Nuddea.

18. There is nothing to report about this district except that distress does not appear to be increasing, and that the prospects of the coming crop are good.

Chota Nagpore Division.

19. The reports from this division are improving. In no district is the condition of the people at all critical except in Manbhoom. There, liberal advances of grain have done much to relieve distress, and what remains is amply provided for by the relief works which have been opened. Cholera has somewhat abated, and the prospects of the coming crop are good. In Palamow, the Commissioner confidently expects that in another month there will be an end of distress in that part of the country, and measures are being taken to remove the laborers from relief works to their ordinary agricultural work, where their help is much wanted.

Transport of grain.

20. The transport of grain has now almost actually ceased, except in so far as is necessary to keep the minor golahs stocked from the larger store-houses. The only districts where large quantities of grain have been received during the fortnight have been Tirhoot, the Sonthal Pergunnahs, and Manbhoom. In the first-named district, Major deKantzow has kept up his very large average to the last, and nearly 30,000 maunds (somewhat over 1,000 tons) of grain, exclusive of engineering tools, fodder, treasure, and Government stores, have been daily sent off on carts from Bunkar Ghât. The transport is expected to be completed, and the golahs fully stocked by the 15th June. In Manbhoom, considerable difficulty has been experienced, first from the cholera, and afterwards from the floods in the Damooda, as boats could scarcely be procured, but Captain Grant has successfully overcome all hindrances, and expects to complete the carriage of the whole allotment within the next few days.

Relief works.

21. The numbers of laborers on relief works according to the latest returns available, as compared with previous returns, is given below :—

	Last previous return	Present
Patna Division	1,112,828	1,231,496
Soane Canal	41,019	34,850
Gunduk Embankments	23,964	45,247
Bhagulpore Division	107,269	109,417
Rajshahye Division	180,064	194,131
Northern Bengal Railway	18,202	22,129
Burdwan and Chota Nagpore ...	69,786	96,950
Cooch Behar	No previous return.	3,548
Total ...	1,553,032	1,737,768

There has been an increase in almost all districts except Chumparun, Purneah, and Rajshahye. In the two former districts the decrease has been considerable; from 44,122 to 38,952 in Purneah; and from 1,46,285 to 1,29,034 in Chumparun. In the Rajshahye Division, though there is an increase in the numbers as compared with those reported in the last narrative, yet it is probable that this increase is more apparent than real, as the returns for the fortnight are much more

complete than those previously submitted. The present returns certainly show a considerable decrease from the total of 209,635, reported in the seventeenth narrative.

22. On the whole, the tendency is undoubtedly to a decrease in the number of relief laborers in those districts where there has been an abundant rainfall; and as the accounts of the last few days show that there are now very few places where enough rain has not fallen, it may be fairly hoped that each succeeding narrative will show a decrease in the numbers on relief-works. Strict orders have been issued that laborers are not to be kept on relief-works where field labor is available; and advances of grain are being everywhere made to ryots to enable them to feed their laborers, wherever food-grains are scarce.

23. In July, and the early part of August, in the interval between the sowing and planting of the winter crops and the reaping of the autumn crop, a considerable number of laborers will probably return to the relief-works in Behar; but in the Rajshahye Division, where the early rice harvest is much earlier than in Behar, we have good ground for trusting that if the prospects of the early rice crop continue to be as good as they are at present, distress will begin to decrease by the end of July or the beginning of August. All accounts agree in stating that the areas sown with early rice and autumn crops are much greater than in ordinary years; and as the districts, as a rule, export rice in large quantities, and as the proportions of the autumn crop vary in ordinary years from one-eighth of the whole food-area in Dinagepore and Moorshedabad, to about one-fourth in other districts, the yield of this crop ought to furnish an addition to the food-supply, sufficient to maintain a considerable percentage of the population till the main rice crop is reaped.

24. The annexed statement shows the numbers employed in each district on relief-works, with details of those working under public works and circle officers, as far as they can be gathered from the returns received. Also, details of the numbers employed on task or piece-work, and on daily wages, are entered for those districts whence the information has been received; but the returns, it will be noticed, are still imperfect, and by no means represent accurately the real state of things, especially in the Rajshahye Division, whence returns are almost wholly wanting, though it is known that piece-work has been introduced and generally enforced throughout Rungpore and Dinagepore, the two districts where the largest numbers of laborers are employed. In Bogra it is applied to the able-bodied men, but not to the women and children, of whom there are very large numbers on the works.

25. Of the laborers employed under district officers and engineers, about three-fourths have been working upon roads, and, as these are more wanted in Bengal than in other parts of India, the improvement in the communications, resulting from the large amount of labour expended, will, there is every reason to hope, add greatly to the resources of the country; while the tanks that have been dug and repaired and the improvements effected to the irrigation channels and village roads by the remaining labor will provide against a want of water, which was becoming a subject of complaint in many parts, and increase the fertility of the soil and the comfort of the people.

Upper Gunduk embankment, and high level canal in Chumparun.

26. Out of the whole 69 miles of embankment, 61 have been finished; 19 miles having been completed during the fortnight; so that the work has probably ceased by this time, and the engineers will be able to concentrate all their energies on the high level canal. On this work the centre line has been marked out up to the 68th mile, and 1,283,000 cubic feet of earth-work have been excavated. Considerable numbers have left the work since the rainfall, and the demand for labor is said to have abated.

Soane Canal.

27. The works are progressing, but labor is reported to be decreasing in Arrah, owing to the rainfall, while in the Buxar division the soil is said to have become so hard from the long drought, that the more weakly laborers could not excavate it, and have consequently left the canal for other works.

Northern Bengal Railway.

28. The total amount of earth-work done on the railway up to date amounts to 47,773,700 cubic feet, equal to 100 miles of 4-foot bank, and 78 miles of feeder roads have been constructed.

29. The following statement shows the numbers in the receipt of charitable relief according to the latest returns :—

Divisions	Name of Districts	Number of centres	This fortnight.	Last fortnight.
Patna	Tirhoot	279	1,57,477	1,40,814
	Chumparun	59	11,997	9,314
	Sarun	65	12,364	9,700

* Of these 6,101 employed in spinning and weaving, and light road work.
† „ 1,693 ditto ditto ditto.
‡ „ 850 ditto ditto ditto.

These returns show an increase in the recipients of charitable relief in all districts except Gya, Shahabad, Purneah, Dinagepore, Bogra, and Manbhoom; but in most districts the increase is not more than might naturally be expected. In Bhagulpore and Rajshahye the great increase is more apparent than real. In the former district the returns for the last fortnight were very imperfect, and a truer line of comparison would be the returns for the previous fortnight, which showed a total of 7,413 persons receiving relief. In Rajshahye, a considerable number is shown as receiving charity who ought more properly to be entered as laborers on relief works.

30. The return printed in the appendix shows that a total number of 3,026 emigrants have been sent up to date to Burmah. Out of these only 957 came directly from the distressed districts, and not one single emigrant from Tirhoot has been yet registered.

Emigration.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A TO THE 19TH SPECIAL NARRATIVE.

Movement of food-grains.

1. THE consolidated return of exports from the Bengal Presidency during the month of May is given in schedule A

The figures are—

			Tons.
Exports	...	...	12,967
Imports	... On Government account	...	81,943
	... On private account	...	7,169
	Total	...	89,112

Of the private imports, 4,964 tons were from Orissa, 1,516 tons from Moulmein, and the rest from ports on the Madras Coast.

The total figures to date (31st May) stand thus:—

			Tons.
Exports	...	...	225,730
Imports	...	...	403,390

2. Between the 17th and 30th May, 16,546 tons of food-grains were sent up to Behar from stations below Rajmehal and Jamoooe, making a total of 408,971 tons since 1st October, inclusive of Government grain. The down-traffic of food-grains to Behar from the North-Western Provinces, was 18,640 tons during the same period, making a total of 188,694 tons since the 1st November.

The up-traffic during the fortnight thus fell off by 15,963 tons, and the down-traffic increased by 515 tons, both results being due, more or less, to the near completion of despatches of Government grain to Behar from Howrah. The total amount of food-grain poured into Behar by the East India Railway to date (30th May) is shown below:—

	Govt. grain. Tons	Private grain. Tons	Total. Tons.
Up ...	265,475	143,496	408,971
Down ...	35,873	152,821	188,694
Totals ...	301,348	296,317	597,665

3. The importations of food-grains to Calcutta by the Eastern Canals from the 23rd May to the 5th June were 4,059 tons, making 188,632 tons in all since the 1st October.

4. The private traffic registered on the Ganges is as shown below:—

Stations	Date	Direction	Tons.	Up to date from 1st November 1873. Tons.
Sahebgunge ...	17th May to 6th June ...	Up the Ganges ...	2,763	34,173
Ditto ...	Ditto ditto ...	Down „ ...	346	11,983
Goalundo ...	17th to 30th May ...	Up „ ...	691	23,397
Kooshtea ...	Ditto ditto ...	Down „ ...	295	12,452

G. TOYNBEE, C.S.,
On Special Duty.

No. 3504—S.R., dated Calcutta, the 1st June 1874.

From—The Officiating Secy. to the Govt. of Bengal, Scarcity and Relief Dept.,

To—All Commissioners and Magistrate-Collectors in the distressed districts of the Rajshahye, Patna, and Bhagulpore Divisions.

THE Lieutenant-Governor has recently received information that there are large stores of grain at or near some of the railway stations in Northern India, most of which is intended for transmission to the famine districts.

2. It is probable that much or most of this grain will find its way into the less distressed districts on the banks of the Ganges, where Government grain is not being sold to the public. But some part of these supplies may possibly reach some of the more distressed tracts. The Lieutenant-Governor, therefore, desires to draw the attention of all officers to Rule (*g*) of the instructions to relief committees, which provides that "sales (to the public) should be stopped as soon as the local trade receives sufficient supplies, and any competition with the local trade should be carefully avoided."

3. If, therefore, any intending importers ask what is to be the policy of Government, they should be told that if they bring in sufficient supplies to any market where Government sales are going on, those sales will cease in such market from the date of the actual arrival of the supplies until "a serious deficiency of supplies" is again apprehended. The action of all Magistrates and sub-divisional officers must be in accordance with this principle; where sufficient supplies come into a market, Government sales therein must be stopped, but they must be resumed when apprehension of serious deficiency again arises.

4. The Lieutenant-Governor must leave it to the discretion of Magistrates, and sub-divisional officers acting under the Commissioner's orders, to decide when "*sufficient* supplies" have been brought into any market or tract where there was previously a serious deficiency. The range of prices will be one among the several tests of such sufficiency or insufficency. The requirements of the poorer and middle classes must always be borne in mind; and it must not be forgotten that the sales of Government grain to the public is one of the means for giving the people the benefit of the arrangements which the Government has made for averting the consequences of the scarcity.

No. A, dated Bankipore, the 31st May 1874.

From—A. C. MANGLES, Esq., Collector of Patna,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the following narrative for the fortnight ending Saturday, the 30th instant.

A.—STATE OF THE COUNTRY.

2. There is still an abundant supply of all sorts of food-grains in the several bazars of this district, and no deficiency is reported from anywhere. The new grain from the North-Western Provinces and the Punjab, as well as rice from Lower Bengal, is being freely imported by the private traders; the amount of importation during the fortnight ending 23rd instant being 3,62,246 against 3,40,959 shown in the last narrative.

3. The subject of the block at the Patna stations has received my best attention during the fortnight, and with every one doing their best, as they are at present, I hope we may tide over the rush without any great hindrance to trade or inconvenience to the public. I spent the whole of the forenoons of the 28th and 30th instant at these stations,—on the first occasion in company with Messrs. Corbett and Mears,—and on the second with Captain Wallace, Messrs. Batchelor, Fox, Thomas, Corbett, and Mears, and am glad to be able to report that great improvements have been made since the despatch of my last narrative on the 17th instant. In the first place, many of the obstructions to the north of the line at the Patna city station have been removed, so that now there is much more room for coolies to pass in or out with their loads, and one of the slides or shoots has been put up on the bank to the south of the line, several others being in course of construction. The new siding between the city and ghat stations, though by no means complete, has been brought into use, and up to yesterday two trains, composed of some 49 carriages, had been unloaded there, and at

the time of my last visit I saw the traders engaged in removing their goods by means of pack bullocks. It was a matter for discussion as to whether Mr. Corbett had done right in making use of the siding when it is still in such an incomplete state, or whether it would not have been better for him to have left it perfectly clear to allow of Mr. Fox the more easily getting on with the earth-work. Taking everything into consideration, I am of opinion that Mr. Corbett has acted rightly, for, though no doubt in its present state the merchants are put to some difficulty in removing their goods, I think they would rather undergo this inconvenience than have them left in the waggons without the possibility of getting at them; besides which, it must be remembered that the siding is entirely composed of new earth; that the rains are not far off, and that when they once commence, till the earth has had time to settle, which it will take some little time to do, the siding will be of comparatively little use, as a cooly with a two-maund bag on his head, would have considerable difficulty in getting about, even if he could get about at all, so that I think Mr. Corbett has acted wisely in making use of it the first minute he can, even in its unfinished state, and letting the work of completing it go on at the same time. With the view of rendering the Railway Company all the assistance in my power, I have stopped the relief and local fund works in the vicinity of that part of the town, informing the laborers that they can get plenty of employment at the station, either under Mr. Fox, in making the siding, where all hands could be employed, or under Messrs. Bird and Co., in removing the bags, where only the strong and able-bodied would obtain employment, but where they would get better wages than they do on the roads. I am also issuing a notice on the mahajuns, warning them how close the rains are upon us, and how necessary it is that they should make every endeavor to remove their grain from the stations before they set in.

4. The following were the rates of food-grain obtaining in the principal markets of this district during the fortnight:—

Patna City.

Rice, best	11 seers.
Rice, common	12¾ „
Wheat	16 „
Barley	19 „
Maize	17 „
Gram	19 „

Behar.

Rice, best	9½ seers.
Rice, common	10 „
Wheat	13 „
Barley	18 „
Maize	15 „
Gram	16 „

Dinapore.

Rice, best	from 9¾ to 10½ seers.
Rice, common	„ 11 to 11½ „
Wheat	„ 13½ to 15½ „
Maize	„ 16½ to 17 „
Gram	„ 16 to 18 „

No return has been received from the Barh sub-division.

In the interior of the sudder sub-division the prices were as follow:—

Bankipore Thana.

Rice	from 10 to 11 seers.
Wheat	15 „
Gram	17 „
Barley	19 „
Maize	16 „

Bickrum Thana.

Rice	from 11 to 12 seers.
Wheat	„ 14 to 15 „
Gram	„ 18 to 19 „
Barley	19 „
Maize	17 „

Masourhee Thana.

Rice	from 10 to 11 seers.
Wheat	14 „
Gram	17½ „
Barley	18 „
Maize	16½ „

5. The sub-divisional officer of Behar writes: "On account of an insufficient fall of rain up to this date prices are still stationary. It is expected in all quarters that there will be a fall as soon as the rains come down. The markets are full. People are only waiting to see whether they are to expect another year of scarcity or whether things will take a better turn."

6. We had no rainfall at the sudder station during the fortnight, but very slight showers were reported from some parts of the interior, not enough, however, to enable cultivators to commence on their agricultural labors. Rain is now much wanted, and there appears to be every chance of our soon having some heavy banks of clouds making their appearance nearly every evening. The cheena crop on the ground is now being harvested.

7. No case of misery or starvation was reported from any part of the district, with the exception of the following, from the Dinapore sub-division. The sub-divisional officer says: "the death of a girl, of about 8 or 9 years of age, is reported to have occurred in the town of Old Dinapore on the 23rd instant. It appears that the deceased was begging in the street, when, on arriving at the shop of a *talee* at 7 o'clock in the morning, she sat down and suddenly died. The body was taken to hospital and a *post mortem* held. The hospital assistant stated it as his opinion that the deceased died from starvation, and in this opinion Dr. Tuson concurred. He said 'starvation and exposure.' The name of the child is not known, and she was apparently without relatives in the place. This is quite an isolated case; there are no signs of distress in this sub-division, and fewer beggars are here now I am told than usual."

8. Barring the above case, the condition of the people is as good as stated in my last report. There are plenty of relief works for them, both public and private, everywhere, so that those seeking it can always obtain labor. With the commencement of agricultural operations I have reason to hope our anxiety regarding the people will cease.

9. 147 persons were registered during the fortnight as emigrants for the Natal Colony, whereof 42 belonged to this district, 72 to Gya, 6 to Shahabad, 4 to Sarun, and 23 to other districts.

10. One case of grain-robbery was reported during the fortnight, in which a man of the Moosahir caste, in the Masourhee thana robbed one Sonkhee Koormee of 10 seers of wheat and gram; he was arrested on the spot and has been sent up for trial. There were only three cases of theft, all of a petty nature.

B.—Relief Works.

11. The subjoined statement will show the number of laborers employed during the week ending the 23rd instant, the latest date for which information has been furnished on the several Government relief works:—

Sudder Sub-division.

	Average daily number
Road No. 9, from Meetapore to Mohabullypore	1,168
„ „ 11, from Nowbutpore to Masourhee	709
„ „ 12, from Durveshpore to Bickram	353
„ „ 22, from Dinapore to Nowbutpore	289
„ „ 24, from Rampore to Mohabullypore	503
„ „ 23, from Ekangy Serai to Masourhee	658
Total	3,680

Behar Sub-division.

Road No. 29, from Futwah to Behar	2,148
„ No 31, from Bucktiarpore to Rambagh	4,680
„ No. 36, from Behar to Asthawon	1,948
„ No. 37, from Rajgeer to Giruk	1,235
„ No. 38, from Futwah to Ranee bagh	1,432
Total ...	11,443

Barh Sub-division.

Road No. 4, from Bagh Jaffer Khan to Futwah	98
„ No. 15, from Futwah to Burhea	1,325
„ No. 30, from Mokameh to Surmeyrah	134

Dinapore Sub-division.

Road No. 10, from Phoolwaree to Surradha	496
„ No. 13, from Munair to Paree	134
„ No. 14, from Munair to Bihta	143
Total ...	773

or a grand total of 17,453 laborers, composed of 5,741 men, 9,053 women, and 2,657 against 15,833 reported in my last narrative.

The following are the average daily number of laborers employed by the zemindars and our advance-holders on village and tank works—

On tank at Sonmye in the south of the sudder sub-division ...	296
Ditto at Sondah ditto ditto ...	200
Ditto at Masourhee ditto ditto ...	240
On embankment works in the south	387
Ditto in the south-west of the sudder sub-division	458
Ditto in the Behar sub-division	356
On a tank in the Patna City	200
Total ...	2,137

against 1,549 shown in the last report.

12. During the fortnight the following additional grants were sanctioned on the undermentioned relief works :—

	Rs.
Road No. 29, from Futwah to Behar	2,000
,, No 31, from Buktearpore to Raneebagh	5,000
,, No. 38, from Futwah to Raneebagh	2,000
,, No. 36, from Behar to Asthawon	2,000
Total ...	11,000

C.—Transport of Grain.

13. The following statement will show the quantities of grain imported into the district during the fortnight ending the 23rd instant by rail—

	Rice.	Wheat, oat, and barley.	Janera	Other grains.
By rail	3,70,226	80,269	29,408	2,02,343
By river	3,050	125	100	1,147
Total ...	3,73,276	80,394	29,508	2,03,490

making a grand total of 6,86,668 maunds, whereof 3,20,000 maunds were Government grain received at the Barh station and the remaining 3,66,668 were private importations. Figures regarding the Government grain received at the Futwah Branch station have not as yet been furnished

14 I have during the fortnight made enquiry as to where the very large amount of grain imported by the private traders to the Patna city is sent, and, as far as I have been able to ascertain, the following is the state of things About 1,50,000 maunds of grain are imported into the city every week, whereof about 50,000 maunds is kept for the use of the city and the interior of this and the Gya districts, and the remaining one lakh is despatched by boats to Sukwarpore on the other side of the Futwa ghat, where a golah has been set up by the Tirhoot grain-dealers, and also to Hajeepore and Lalgunge and Govindgunge for exportation to Chumparun. Another golah has been set up by the Tirhoot merchants at Borarpore, just opposite to Barh, to which place the grain received at Barh and Bucktearpore stations is exported for consumption in Tirhoot.

15. I have lately issued a circular to all my advance-holders for the purchase of grain, drawing their attention to the near approach of the rains, and warning them that if they want to replenish their stock they should do so at once, before the grain is likely to get damaged in course of transit and before the roads become impassible for wheeled traffic.

16. Up to date I have sent about 50,000 maunds of bhoosa to Chumpta Ghat, but have now, under orders of the Commissioner, stopped despatching any more, and will accordingly close my accounts with the different contractors.

D.—Storage of Government Grain.

17. Of the 25,000 maunds of grain ordered by the Commissioner to be despatched from my golahs to Bunker Ghat, for use of the Mozufferpore golahs, about 23,000 maunds have already gone, and the rest will be sent in the course of a few days, so that we are now left with only 18,800 maunds in the district, stored in the different sub-divisions as given below :—

	Rice Mds.	Mixed grain Mds. Srs.
Sudder sub-division	4,639	1,000 0
Dinapore sub-division	1,137	979 0
Behar sub-division	7,592	3,250 20
Total ...	13,668	5,229 20

18. Having therefore only some 18,000 maunds of Government grain left in the district, I do not wish to part with it all at once, which I undoubtedly should do, were I to give it instead of money wages to the laborers on all the works, and what I propose doing therefore is, to keep a strict watch over the rates prevailing in the bazars in the vicinity of the different works, and where I see them rising above the means of the people then supply the Government grain to those willing to purchase it, either through the shopkeepers deputed to the works, or to take it in lieu of money wages. With this object in view, I have, during the past fortnight, directed the Deputy Collector of Behar to commence selling the Government grain on four of the works in his sub-division, and as soon as my salt officers are relieved of their present duties of despatching grain to Tirhoot, I will commence in the same way in the Sudder and Dinapore sub-divisions should necessity arise. By this means, I shall be able to eke out the small amount of grain left to me (which I hope, however, will be quite sufficient to meet all my requirements) till I can see what the prospects of the bhadoi crops are likely to be, and till the works on the different roads shall have been brought to a stand-still. These proposals will, I trust, meet with the approval of Government as did those contained in my previous narrative of selling to banias in the different villages in the vicinity of the works, which approval was conveyed to me in Government letter No. 319—T.F. of the 22nd instant.

E.—Advance to Private Parties.

19. None during the fortnight. The village works for which advances were taken are still in progress, and the zemindars who had received advances for the purchase of grain are selling it and sending me periodical returns.

F.—Charitable Relief.

20. None in this district.

No. 798, dated Gya, the 31st May 1874.

From—A. V. PALMER, Esq., Collector of Gya,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my fortnightly report on scarcity and relief in the Gya district for the fortnight ending Saturday, 30th May.

A.—STATE OF THE COUNTRY.

2. The annexed table shows the comparative prices of food at the principal markets in the district.

BAZARS.	WHEAT.		BARLEY.		RICE, BEST SORT.		RICE, COMMON.		MILLET.		MAIZE		GRAM.	
	Week ending 30th May.	Week ending 16th May.	Week ending 30th May.	Week ending 16th May.	Week ending 30th May.	Week ending 16th May.	Week ending 30th May.	Week ending 16th May.	Week ending 30th May. 3. The table of food-grains imported, which will be given under heading C, shows that the decrease of importation is so very slight as to call for no special remark.

4 The price-currents show that though rice in some places is dear, other grains are cheap, and as long as this is the case, there is food for all. The prices remain firm. The Aurungabad sub-divisional officer remarks that the decrease of importation is owing to a scarcity of carts. The canal officers and opium department have during the past fortnight been engaging all the carts they can lay hands on.

5. The Deputy Magistrate has had some difficulty in procuring carts for bringing 5,000 maunds food-grains from Bihta. All the carts in the vicinity of the railway are reported to have been taken by the Magistrate of Patna for transport of cattle-fodder to Tirhoot, and a large number of independent cartmen have proceeded north of the Ganges to make their fortunes there.

6. The sub-divisional officer of Jehanabad reports an increasing scarcity of rice; but, as I have already mentioned with other grains at the prices marginally noted, there is no cause for alarm.

	S. C.
Barley	16 0
Jowar	15 12
Indian-corn	16 0
Gram	15 5

7. In Nowada the markets remain fairly stocked. At one market, Gobindpore, prices are slightly higher than in the rest of the sub-division. There is as yet no cause for interference. Road-work with Government grain is to be had in the immediate vicinity of this village.

8. In the Sudder sub-division there is no change, the importations being 2,082 maunds against 2,030 maunds of the previous fortnight.

9. It is somewhat strange that the sale of Government grain to the public in the town of Gya should not in the slightest degree have influenced the market prices there.

10 I consider the order directing these sales to have been highly judicious, and it shows that such sales, if arranged so as to exclude traders, afford material assistance to the poor, and in no way injures the legitimate trade of the grain merchants.

11. The further my inquiries go with respect to the existence of a sufficiency of seed-grain in the district, the more assured I feel that there is no cause for anxiety on that score.

12. Seed-grain is the one thing that agriculturists of Behar *do* take some forethought about. The orders of Government authorising the exchange of food-grain for seed-grain has been well disseminated, and it is not unreasonable to suppose that if seed-grain were scarce, or that the tightness was so great as to compel its being brought into consumption, some applications at any rate for the exchange would have been made with a view to obtain food for consumption and to preserve a portion of the seed-grain in stock.

13. I may further point out that in a district like this, in which a greater portion of the rents are paid in grain, the self-interest of the landlord combines with that of the tenant to ensure a supply of seed-grain being preserved, without which the main crop on which they live and pay their rents and revenue would not be secured.

14. During the last week there has been very slight rain throughout the district at different times, as per margin. The rainfall in Nowada was not especially reported, as it fell on three different occasions in very small quantities, $\frac{1}{100}$, $\frac{44}{100}$, and $\frac{33}{100}$.

Gya sub-division	·07
Jehanabad	·14
Nowada	·88
Aurungabad	Drizzle.

15. More rain is very much wanted. What fell in Nowada has been sufficient to set all the agriculturists to work in ploughing, and some have already sown rice. Rain is also required for the transplanting of murwa throughout the district.

16. With the exception of a little cotton, cheena, and sugarcane, there are no crops now in the ground.

17. I am happy to be able to continue to report that the general condition of the people remains good.

18. The number of persons gratuitously relieved has somewhat increased; but this is mainly owing to the house-to-house search within the municipality of Gya and the exertions of the deputy supervisors and others who, under instructions, send into relief-houses those who are fit subjects for such relief.

19. No cases of misery or starvation have been reported. With all the arrangements that have been made and the care with which these have been promulgated, such cases can scarcely occur.

20. Grain-thefts or robberies have not increased to any appreciable extent. Crime is reported to have increased slightly in Nowada, but elsewhere it is, if anything, below the average.

21. The alleged distress reported in paragraph 17 of my last narrative on the confines of the Patna district was promptly inquired into, first, by a head constable; and secondly, by the Sub-deputy Collector. The report was clearly shown to be utterly without foundation. I may mention that the prices of food ruling in the adjacent bazar were as per margin. With food at these prices it is difficult to conceive the existence of general distress.

Total ...	7,037	3,915	1,276	12,228	6,805	15,570	5,448	27,832

Grand total	40,060
Daily average	2,861

23. I have been, and am still, doing all that lies in my power to insist on piece-work being more generally adopted.

24. It entirely rests with the officer in charge of the works whether this is or is not effected.

25. Daily payment is more popular, because, with no regularly organised or proper supervision, the system was abused, more or less, by every duffadar and laborer employed.

26. The laborers worked or not at discretion, and with the small number on our works the system was unsuitable, and certainly nothing could be more unsatisfactory or inconsistent than the results. I have therefore adopted as a general rule, and have accordingly instructed officers in charge of works, that all able-bodied men are to be offered piece-work at remunerative rates, a distinction being made between professional earth-cutters and those that are not so.

27. These rates are 50 per cent. in excess of the ordinary rate at ordinary times for professionals. The rates for non-professional laborers will be from 75 to 100 per cent. in excess of ordinary rates.

28. That those who are not able-bodied, and excluding those that are invalids, sickly, emaciated, &c., who are proper subjects for charitable relief under clause B or C of Central Committee's Instructions, should only be employed under the daily payment system; and as the number flocking to the works is comparatively small, and as there is so little demand for labor amongst the poorer classes in this district, I trust that this rule may be allowed to stand.

29. Where there are large masses of laborers and great distress, such as exists in North Behar, I fully understand the necessity of giving laborers their choice of systems, but I submit that this state of things happily does not apply to this district.

30. The daily average of laborers employed during the last fortnight is 2,861 as against 2,081 of the previous fortnight, showing an increase of 780 laborers.

31. The increase is owing to the Bela, Gobindpore and Puraya Roads having recently been started.

32. Arrangements are being made for the payment of laborers in Government grain, as directed by Government orders marginally noted.

No 3230 of 20th May.
No. 3369 of 26th idem.

33. In accordance with suggestions from the Commissioner, contained in a circular forwarded with his No. 121F. of 21st instant, I have made the arrangements I am about to detail.

34. I may mention that these arrangements have already been put in practice on most works.

35. It is desired that on each work Government grain should be available for the laborers employed on the works. This is effected either by a trader consenting to take food from the golahs and sell it on the spot to laborers only, he receiving remuneration in the shape of ½ seer grain for each rupee's worth taken, or by the employment of a bunniah servant on each work to weigh and sell on behalf of Government, the bunniah being paid by a monthly salary.

36. The first course I have hitherto been able to follow is by far the least complicated, and practically the simplest and best.

37. The trader pays for the grain before he removes it from the golah, and all that remains is to see that he sells to laborers only.

38. The laborers are paid in pice, the greater part of which they exchange for Government grain. It is far better that any surplusage over and above their daily requirements for food should be in pice and not in grain, thereby enabling them to indulge in a few condiments and luxuries, which make them contented, as also to put a trifle by for the approaching agricultural season.

39. As regards contract work, we should hardly be morally justified, having once entered into a contract for money payment to change this into direct grain payment without the consent of the contractors. But practically this is effected by selling Government grain on the spot at rates slightly favorable to those obtaining in the bazar.

C.—Transport of Food-Grain.

40. The annexed table will show the quantity of reported private importations during the past fortnight:—

Bazars	Wheat	Barley.	Rice, best sort.	Rice, common	Millet	Maize	Gram	Total.
Gya ...	432	226	131	797	...	39	457	2,082
Nowada ...	20	10	.....	25	...	10	20	85
Jehanabad ...	70	45	45	105	110	15	110	500
Aurungabad ...	149	.....	36	278	...	....	132	595
Daoodnuggur ...	1,300	79	350	290	...	....	375	2,394
Total ..	1,971	360	562	1,495	110	64	1,094	5,656

41. This gives a total of 5,656 against 6,366 maunds in the previous fortnight. This decrease has, under heading A, been explained as being attributable to local causes. The firmness of prices in the markets show that there is no uneasiness as to the stocks of food.

42. The importations in the Sudder bazar require no remark.

43. They are as follow:—

	Wheat.	Barley.	Rice, best sort.	Rice, common.	Maize.	Grain.	Total.
Fortnight ending 16th	432	220	94	857	65	382	2,030
Ditto ditto 30th	432	226	131	797	39	457	2,082

D.—Storage of Government Grain.

Grand Total ...	.....	1,46,360

45. Of the 5,000 maunds of grain received at Bihta station during the fortnight, 838 maunds have been carried and stored at Aurungabad. The remainder may be expected to be stored during the ensuing fortnight. Of the 5,000 maunds consigned to Bukhtiarpore, 333½ maunds were dispatched to Nowada before the orders countermanding the consignment were received. The balance of this consignment, 4,666 maunds, is at Bukhtiarpore, and awaits the Commissioner's orders as to its disposal.

46. As directed by Sir Richard Temple, I submit the storage and consumption of Government grain statement.

Statement showing the Storage and Consumption of Government Grain in the Gya District for the fortnight ending 30th May 1874.

Name of circle.	Dates for which figures are given.	Total allotment.	Total quantity received and stored.	Total quantity of Government grain consumed up to date.			Estimate of receipt of the ensuing fortnight.	Estimate of expenditure during ensuing fortnight.

F.—Charitable Relief.

52. As directed in Bengal Government No. 3216, dated 19th May, I propose to give a detailed account as to what has been done, and what spent up to the 30th May in charitable relief under headings *b*, *c*, and *d*.

53. This may be concisely done by a reference to the accompanying statement. It will then only be necessary to explain in detail how the charitable intentions of the subscribers to the relief fund have been interpreted, and how the funds have been applied.

54. It will be observed that by far the largest expenditure is under heading *b*. This is to be expected.

55. In the first instance houses of charity were established at the sub-divisional head-quarters, as per margin, where they could be efficiently supervised, and care taken that the funds were properly applied.

Gya.
Nowada.
Aurungabad.
Jehanabad.

56. Buildings were erected or obtained, cook-houses established, and a sufficient staff of servants employed to ensure properly cooked food being punctually distributed.

57. The opinion of native gentlemen and the medical officer was taken as to the quantum of food it would be desirable to serve out daily to the recipients. This was fixed at 8 ch. rice and 4 ch. dal, and salt. To those who were thin and weakly an additional meal of ¼ seer sathoo was provided in the evening.

58. Subsequently it was found expedient to vary the food. Wheat-porridge, sathoo, and such like, were occasionally given, orders being issued that rice and dal should never be given less than twice a week.

59. Subsequently as scarcity increased, it was found necessary to increase the number of these relief-houses. Gratuitous relief was accordingly administered at the centres marginally noted, in addition to those already established.

Sherghotty.
Bheloda.
Ticaree.
Pukri Burwan.
Rujowlee.
Ruffigunge.
Kootoomba.
Daoodnuggur.

60. The sub-divisional officers have all taken a heart-felt interest in providing for the poor, and have spared no personal exertions in adding to their comforts; and by constant attendance at the distribution of food, have effectually put a stop to any attempt to serve out short rations under heading *b*.

61. Professional beggars, persons who from age, want, illness or other causes are found incapable of earning their livelihood by manual labor, are the classes that have been freely admitted into these houses of charity. It is satisfactory to be able to state that the greater portion of these admissions have been lepers and professional beggars. In Jehanabad, which was the last to be established, there is a large preponderance of non-professional indigents but these are mostly aged and decrepid persons. Cases of weakness from starvation are exceedingly rare.

62. These houses of charity are being resorted to now in greater numbers, in consequence of the exertions of the deputy supervisors and others, who are travelling over the country for the main purpose of seeking out all cases of distress and sending them in for charitable relief.

63. Medicines have been freely supplied for those that are sick, but these are but few. There is no doubt that had these institutions not been provided, hundreds would have died from inability to procure the necessaries of life.

64. Relief under heading *c* has been extended more in the Sudder sub-division than elsewhere. A fight is always made to obtain relief without any *quid pro quo*. This, where the

means of employment is all that is required, is obviously wrong, but it requires no little patience and persuasion to bring about a commencement.

65. Relief under this head, *c*, has hitherto been confined to spinning of cotton, weaving of cloth and twisting of grass-string. These are all of the lightest possible labor, and it is surprising that relief in this shape has not been more sought after.

66. I have now authorised sub-divisional officers to start and include under this head, light labor gangs. These will consist of a class between the incapables and the able-bodied. They will be paid in uncooked grain, and their employment will be to do petty earth-work repairs, filling up holes, raising, straightening, and draining village paths, and such like.

67. Under heading *d*, two purdanasheen ladies in the Aurungabad sub-division were ascertained to be pinched for food. Their cases were at once enquired into by the Deputy Magistrate, and relief afforded.

68. A staff of native officers has this day joined at Gya, who will be employed in a village-to-village visitation, searching out incapables, those wanting work, and those who, for different reasons cannot earn a livelihood by manual labor.

69. These officers, in addition to the deputy supervisors already employed on this work, are provided with funds to relieve any immediate cases of distress, and all cases that they discover will be brought to the notice of the sub-divisional officer and of myself, or the parties will be sent in according to the circumstances of each case.

70. I think it right to state here that I do not anticipate any large expenditure under heading *d*. Relief in these cases will, as a rule, be granted in grain and not in cash.

71. I am satisfied that all my subordinate officers are actuated by but one feeling, and that is to carry out the charitable intentions of the subscribers to the fund to the best of their power; to see that these funds are humanely and legitimately expended; but that while they will spare no exertions to ferret out and relieve fitting objects for relief, they will not countenance any misapplication of funds with the expenditure of which they have been entrusted.

G.—Financial Results.

72. The total expenditure shown in last narrative (16th May) was Rs. 1,08,906-12-6.

73. During the fortnight under notice the following expenditure has been incurred:—

On account of establishment and contingencies.

	Rs.	As.	P.
Paid to Deputy Collector of Nowada on account of salary of chowkidars and mohurirs loccaed at the golahs of his sub-division for the month of April ...	131	14	10

74. Government grain was sold to the public at the four sub-divisional head-quarters for a few days under the Government circular No. 2950—S.R., dated 6th May. On receipt of the Commissioner's circular No. 102F, dated 15th idem, explaining that these sales were only to be where specially ordered, this was at once stopped.

75. The Commissioner's sanction to sales of Government grain to the public at Jehanabad was accorded, the high prices of rice there being precisely the same as at Gya.

76. These have since been stopped by me, on finding that though rice was high, other grains were comparatively cheap throughout the sub-division.

77. The following is a statement of Government grain sold during the fortnight:—

Sub-divisions.	To public.	To laborers.	To relief committees.	Total.
	Mds. S. C.	Mds. S. C.	Mds. S. C.	Mds. S. C.
Gya	1,572 22 1	38 2 12	41 5 4	1,651 29 1
Jehanabad	338 0 12	20 25 2½	23 6 15	381 31 13½
Nowada	Particulars not given.			242 0 0
Arungabad				305 17 9
Total	.....	.....	.....	2,580 38 7½

78. In Gya alone Government grain is now being sold to the public. The sales have not interfered with the grain merchants, nor affected their prices. Grain is being sold through the trade by five selected bunniahs of good character; sales from the golah direct have been stopped.

79. I have to report the arrival this day of the gentlemen as per margin.

Mr. Nawaswayam, Overseer.
Syed Tofuzul Hossein, Tehsildar.
Ajodhya Prosad, Moonseirim.
Jhunmnu Lall, Ditto
Nagerhur Prosad, Ditto
Gokool Prosad, Ditto

80. They have received their orders, and will start at once to their destinations.

81. In the Sudder sub-division grain is being sold to laborerson all the roads, with the exception of Bela. This will be arranged for at once. In Jehanabad grain has hitherto been sold to laborers by a bunniah paid at a monthly salary. This the sub-divisional officer is about to change for a bunniah receiving as remuneration half a seer of grain for each rupee's worth he takes.

82. In Aurungabad sub-division "piece-work" is being gradually adopted, and arrangements are being made for bunniahs with Government grain on each work.

83. In Nowada similar arrangements are reported as made.

Statement of Expenditure incurred on Charitable Relief, and the number of persons relieved in the District of Gya, from the commencement of operations up to 16th May 1874.

Gya Collectorate,
The 31st May 1874.

A. V. Palmer,
Collector.

No. 365F, dated Arrah, the 2nd June 1874.

From—H. W. Alexander, Esq., Collector of Shahabad,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to submit my 13th narrative for the fortnight ending the 30th May.

A.—State of the Country.

Abundance or scarcity of supply in the bazars

No scarcity of supply in the markets is reported from any part of the district; the bazars appear to be sufficiently stocked for all local requirements.

Kinds and prices of grain selling at one or more specified principal marts.

A reference to Appendix A will show the kinds and prices of grain selling at the chief marts in the district. In the Arrah sub-division there has been little variation in the rates since the date of the last narrative. The same remark will apply to the Buxar sub-division.

In the Sasseram sub-division prices are, on the whole, easier than they were last fortnight, exhibiting a slight rise in Chennary only.

In the Bhubooah sub-division prices in all the markets are generally steady. The Sub-Divisional Officer remarks, in regard to the two last-named sub-divisions, that "the small imports in proportion to the population do not account for the steadiness in prices. It is clear, therefore, that private stocks are being brought into the market. Hitherto there have been no signs of a famine of food in either sub-division."

Rainfall.

There has been a slight shower of rain in the neighbourhood of Arrah on Sunday last, and a fall of hail about 3 miles to the north-east of the town. The weather has been unsettled and threatening.

In the Buxar sub-division, in the eastern part of the Bhojpore pergunnah, down south from Doomraon, a good shower of rain fell, and ploughing has commenced.

There has been no rain either in the Sasseram or Bhubooah sub-divisions; it is anxiously looked for.

State of the crops.

The cheena crop is being rapidly harvested. The boro rice in the few places where it has been planted has turned out a good crop. The mango crop is on the whole promising, although not so good as it was originally reported.

Condition of the people.

The condition of the people remains much the same as last reported.

No cases of misery and starvation have been brought to light. Small-pox is still prevalent, but not in an aggravated form, nor more extended or serious than in ordinary years.

There have been six cases of thefts of grain; in one case 24 maunds of rice are reported to have been taken; in the other cases the amount stolen was under five maunds.

No robberies have been reported

B.—Relief Works.

In Appendix B will be found full particulars in regard to all the relief works now in progress in the district, and the number of laborers employed on each.

A commencement has been made during the fortnight to sell Government grain to the laborers on relief works; and as arrangements have now been completed, this system will come into full and general operation during the ensuing fortnight.

In the Arrah sub-division payments to coolies (class II) in grain instead of money (excepting only 1 pice each, which is given them for wood, oil, &c.,) was introduced last week on the relief work on the Kaemnuggur road; this week it will be introduced on the Sahar and Peroo roads.

In the Buxar sub-division arrangements have been made to sell Government grain to the laborers employed on the roads from Sonepa to Saraya and Doomraon to Bikrum.

Under this head Mr. Eyre remarks: "During the week ending the 23rd May, I travelled through the entire Ramgurh jurisdiction, and tested the measurements made in view of excavation of old silted tanks as a relief measure. I have selected—

First.—The Sisounda tank, on the road from Ramgurh to Nonon.

Second.—The Doomdooma tank, south-east of Nonon.

Third.—The Oopree tank, north-east of Ramgurh.

Fourth.—Koolheria tank, east of Ramgurh, on the Koodra River.

"The estimates for these works will be submitted next week. I arranged with the zemindars for the halting of the laborers either on the work or in the contiguous village, at the zemindar's cost. Bunnoahs (salary 5 per month) for the sale of grain to the laborers were nominated at each village, and agreements taken from them. Existing buildings for minor depôts were selected at Nonon and at Bedamun Chuck. I had wished to select a relief work of the same kind (viz., tank,) between Doorgawutti and Kuramnassa to the north-west. A slight sun-stroke, however, compelled my return on the 23rd to Mohunia bungalow. I accordingly deputed the Ramgurh Supervisor, who had up to that time accompanied me, and knew what was to be done, to select a tank in the country named. His report has not yet been received."

Paid salesmen are now employed on the Hatta and Durouli road. They have been arranged for at the four relief works in the Ramgurh jurisdiction, and will commence operations the ensuing week on the Jehanabad and Bhubooah road, the Jehanabad and Buraon road, and the Jehanabad and Khiree road. The work on the Akberpore and Judonathpore road has been completed, and also on the Chennary and Mullipore road. There is a small sum over in the former, and proposals for a continuation of both roads will be shortly submitted.

C.—Transport of Food.

The statement of the private importations of grain by rail will follow. The importations have not been so large lately as they were a short time ago to the stations in the Arrah and Buxar sub-divisions.

The imports into the Sasseram sub-division during the fortnight are as follows, as reported by Mr. Eyre:—

	Mds.
By rail	1,014
Interior	3,176
Exterior	3,023
Total ...	7,213

"These imports, especially from the interior, are mostly of wheat and gram.

"The imports into the Bhubooah sub-division during the fortnight amounted to—

	Mds.	Srs.
By rail	379	5
Interior	573	10
Exterior	1,011	30
Total ...	1,964	5

"There has thus been a decrease of market imports into Sasseram and an increase into Bhubooah sub-division during the fortnight, as compared with the previous same period.

"The transport for 25,000 maunds of grain to be delivered from the North-Western Provinces at Zumuniah, Buxar, and Doomraon, has been waiting for some time at the points of delivery. Some of the grain has arrived. In case of the transport means at my disposal being insufficient, I have thought it advisable to apply to the Deputy Collector of Buxar for assistance, which he has kindly promised to give. I hope to have the entire consignment stored before the rains set in."

D.—Storage of Government Grain at Relief Works.

The arrival at Zumuniah of 1,000 maunds of grain and at Buxar of maunds 823 seers 24 is reported for storage in the Sasseram and Bhubooah sub-divisions. The former is in

transit, the latter was received only on the 31st May. No other grain has been received or stored during the fortnight under report.

E.—Advances to Private Parties and their Results.

An advance of Rs. 9,352 has been made to Mr. E. Solano for the purchase of grain and bullocks to help his ryots.

F.—Charitable Relief.

The charitable relief operations in both the Sasseram and Bhubooah sub-divisions are as follow:—

Heading B.

Relieved at Poor-houses.—Cooked Food.

	Men	Women.	Children.	Daily average

Grand Total	614	1,887	246	2,747	183

The supervising Relief Officers were engaged in regular village-to-village enquiries up to the end of the last fortnight. Up to the end of the last fortnight in the Arrah sub-division 367 villages have been visited by them, in the Buxar sub-division 217 villages, and in the Sasseram and Bhubooah sub-divisions 550 villages.

Through their enquiries aid has been given in the way of light labor, gratuitous relief, and subsidised in-door labor to 1,548 persons.

With reference to Government letter No. 3216—S.R. of the 19th ultimo, I annex herewith a statement showing the number of persons relieved, and the sum spent in connection with charitable relief from the commencement of relief operations until now.

G.

Financial results of the fortnight are given in a separate statement (Appendix C).

Arrah,
The 2nd June, 1874.

H. W. Alexander,
Collector.

No. 376F, dated Arrah, the 3rd June 1874.

Memo. by—H. W. Alexander, Esq., Collector of Shahabad.

Forwarded to the Officiating Secretary to the Government of Bengal, in continuation of the narrative for the fortnight ending the 30th ultimo.

Statement showing the number of persons relieved, and the amount spent in connection with charitable relief in the District of Shahabad.

No. 563, dated Durbhunga, the 1st June, 1874.

From—C. T. METCALFE, Esq., Additional Commissioner, Patna Division,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative report of scarcity and relief for the three Sub-divisions of Seetamurhee, Mudhoobunnee, and Durbhunga, for the fortnight ending Saturday, the 30th of May.

A.—State of the Country.

2. Cool east winds and banks of clouds have modified the intense heat prevailing during the fortnight ending the 16th of May. The currents of air still guide the rain towards the Nepaul Terai, where there has been a considerable rainfall. The rise of the Kumlah and other rivers attest this. The lower hill ranges to the north have been clearly visible, a sure criterion of heavy rain. Slight showers have fallen in many places within our territories, but not sufficient to soak the ground. Still the agriculturists have ventured sowing in many places, and young rice seedlings are sprouting along our northern frontier and in parts as far south as Kumtoul. The lower lands in the more northern tracts have all been ploughed. For the bhadoi crops there has been insufficient rain. The prospects of rain since the morning of the 29th have lessened, and the sky had up to yesterday again assumed the brazen look of the warmer months. There is a very marked difference between the country south of Kumtoul and the more northern tracts. The southern soil is drier, while the mango orchards bear scarcely any fruits.

3. On the 28th the rainfall telegraphed was as follows:—

Narayah	...	...	...	...	½ inch.
North Poopree	...	...	...	...	$\frac{9}{10}$ "
South Poopree	...	...	...	...	$\frac{6}{10}$ "
Seetamurhee	...	...	...	...	$\frac{9}{10}$ "
Saidpur	...	...	..	...	3½ inches.
Dyne Chupra	...	...	...	...	1 "
North Mudhoobunnee		...	...	...	2 "
South Mudhoobunnee		...	...	...	1 "
Durbhunga	...	...	...	...	1¼ "

Cultivation.

4. In Mudhoobunnee the cheena crop has been reaped everywhere; towards the south-west it is reported as having been good. Indigo prospects, too, in this sub-division have improved.

5. In Behara and Singhiya, moong has been sown. Throughout the Durbhunga Sub-division lands have been freely ploughed.

6. From Narayah reports are that in all directions ploughing has commenced, but not to the extent that is required. Rain fell abundantly all over the sub-division last Sunday; there was again rain on the night of Wednesday. Mr. Mosley writes: "This rain ought to have sent the people to the fields more than it has done. By this time the land required for the main crop should have been broken up, which has not been done." The liberal rates are keeping back the cultivators from the fields. I find that women and children can do enough work alone to more than keep them.

The women can easily earn two annas per diem. The matter of cultivation is getting serious, and I would solicit instructions on the subject. From Seetamurhee the reports are that there has been a good downfall of rain, most favorable to agricultural operations. In this sub-division it is reported that the relief laborers have left their works to go to the fields to plough and sow. Indian-corn, rice, kownee, shama, marwa, have all been sown. In places the dhan seedlings are ready for transplanting. To the south-east and south-west the rainfall is calculated between 3½ to 6 inches, as the land has been thoroughly soaked. From Poopree the narrative shows that at present agricultural prospects are fair. A fall of $\frac{8}{10}$ on the 25th and $\frac{6}{10}$ further south has driven the agriculturists to the field. A very large proportion of the lands have been ploughed. To the north of Poopree the Indian-corn is coming up strong, about ¼ of the crop having been sown. In places rice seedlings are ready to be transplanted. The summary, then, of these reports is, that if the present rain is supplemented by a further fall, there is every prospect of a good bhadoi harvest. Narayah grows no bhadoi, and there is the prospect of only moong and marwa. About Durbhunga, Baheyra and Gungdah the soil is still too dry to allow of sowing, or, indeed, much ploughing, in the chur lands.

7. Price-current of the fortnight under report:—

Name of place.	Wheat.	Barley.	Rice.	Millet.	Indian-corn.	Gram.

* Government rice.

State of District Grain Stores.

8. There are still extensive private stores, chiefly of dhan seed, but the holders persistently refuse to dispose of them till the rainfall is sufficient. The stereotyped reply of the holders to the agriculturists is this: "When I see your chances of crop in the moisture in the ground I will open my stores, and not till then." To my question to one of these mahajuns a few days ago, "Are you not afraid that your constituents by taking advances from the Government stores may be able to do without your seed?" the reply was, "The Government may or may not recover its advances. If I lose mine I lose everything. I can only advance when I see a positive assurance of at least a return of my advance." I give these details because I believe they show the principle on which private stock-holders work. Feeding the agricultural population between harvests is with them a profession. The grain is their capital, not to be lent except on the security of a good in-coming harvest. The grain stock is generally seed available both for sowing and husking, and hence it is not in famine times there is always seed available as soon as the rainfall predicts a possible harvest.

9. In Seetamurhee and Poopree, where there has been rain, there are no real complaints of want of seed.

10. To the private grain stocks in hand no additions are being made by private importations. Salt and Indian-corn are now coming in, but for the latter there is now but little demand. The great demand is for rice (*a*) for consumption, (*b*) for payment of agricultural labor.

11. The agriculturists who still may have home stocks and money are purchasing the Government rice to pay for field labor, and the laborers working on relief works are buying for daily consumption. Of the rice sold there a part is for the present stored, but the greater part consumed. These two classes, then, are in no immediate want As agriculture draws labor to the fields, the grain now going into home store will again be brought forward.

Cultivation	1 beegha.
1*st* ploughing	2 seers.
2*nd* „	2 „
Seed	15 „
	19 „

12. The present rates for field-labor are two kutcha seers of grain per diem, and one seer of boiled rice. The cost of cultivation is marginally given.

13. The classes who really are now pinched for food are the poorer classes of—

1*st*—Agriculturists of all castes.

2*nd*—The poorest of the Tirhootia Brahmins, who through prejudice will not work.

The condition of these two classes at present chiefly occupy the local officers. Neither have home stores for consumption, and the former have no grain to pay for field-labor; without Government aid both must perish.

14. Amongst the agriculturists there has been much transfer of the little property they possessed, and though they will be able to get seed from mahajuns to sow, without grain advances they cannot get on.

If there is a fair bhadoi harvest they will, where that crop succeeds, shortly better their condition, but in pergunnah Allapore, where the lands are chiefly rice lands, we may expect to have a large portion of the population on our hands, at least till the end of September.

15. The amount of money that the working classes have laid by is very considerable. To those who have not benefited by our works advances are the great question. All classes, whether well-to-do or poor, are willing to take money. Such advances have been stopped. Where pecuniary aid is really required, it is given in presents debitable to the charitable fund. In some of the circles the officers are taking village by village, and sparing no labor to ascertain the families whose condition requires aid.

16. Tabular statement E shows the extent of the operations. The Durbhunga return gives the operations in the different circles:—

Name of Circle.	Money advances to date.	Grain advances to date.
Dosowta	10,792	7,939
Hussunpore	749	540
Singhiya	14,690	1,380
Gungdah	13,739	1,439
Hirnee	5,209	3,636
Warisnuggur	737	2,963
Bhundar	.....	139
Mahomedpore	1,297	2,395
Hyaghat	4,331	2,362
Durbhunga	2,049	2,397
Rohur	4,502	1,144
Lehera	3,000	698
Total	61,095	27,028

Condition of the People.

17. No disease or sickness is reported, save a mild type of small-pox. Those on charitable allowance are equally as healthy as the more able-bodied.

18. In his report Mr. Magrath writes. "The only people who cause any great anxiety are the people from Nepal. About 600 of these come daily to Ladanyah for cooked food, and return at night; they are in a miserable plight.

19. Destitution is (if the increasing numbers on relief can be taken as a sign) increasing.

I find in my visitations a better class of persons, Brahmin widows, &c., seeking relief. At first charitable relief was confined to the kullars, *i. e*, the beggars, and to the weak and aged of both sexes; then the weaker amongst the laboring classes came, and now we have the widows and others who ordinarily through shame reject charitable relief.

20. As regards the condition of the classes, I annex here a statement of observations made by Dr. MacDonell. These figures also represent the worst portion of the population, viz. those on charitable relief. I give the figures as the result of medical observation, but my own view is that too high a standard has been fixed for what represents the normal condition of the people of the tracts :

Dosowta Circle—

Normal ...	41·1
Underfed	20·4
Emaciated	28·5

In Rohur the average is—

Normal ..	64
Underfed	13·8
Emaciated	20·5
Starving	1·7

In the neighbourhood of Hathee the average is—

Normal ...	63
Underfed	25·5
Emaciated	11·5

In Singhiya—

Normal...	78·8
Underfed	17·7
Emaciated	2
Starving...	·5

In Gungdah—

Normal ...	55·2
Underfed	32·3
Emaciated	12·5

In two villages of the Bundhur circle the conditions were—

Normal	31·
Underfed	31·
Emaciated	32·

21. Seetamurhee is under the medical charge of Dr. Gayer. I have not received any percentage of the underfed and emaciated, but the Sub-divisional Officer writes: I have travelled during the week to Shewhur, Amwah, Muspa, Bhugwanpore, Gurha, Dumra, Rogoputty, Punchore, and Mahynd circles, with Dr. Gayer, and noticed the condition of the people generally as pretty fair; but here and there emaciated children were to be seen. At Narainpore and Koaree, two children fell under observation, one of whom, though he had been six weeks under treatment, showed no signs of improvement.

The men seen working on the roads seemed able-bodied and in condition, but there was a very small proportion of women to be seen employed by the Public Works Department, which is mainly owing to the introduction of the contract system. In places I saw women working with the spade.

B.—Relief Works.

22. Within the last fortnight a change of system in paying the laborers in grain in lieu of money has been started, and wherever tried, and the Sub-divisional Officers have given their attention to it, it has been carried out successfully. The Seetamurhee Magistrate reports arrangements are being made to carry out this system. The plan of grain payments is more popular than that of paying in pice, and there is less room for peculation. At

Shewhur, Dyne Chupra, Garsha, Bhoolahee, and Seetamurhee circles, I have noticed payments made in grain successfully. In Mudhoobunnee the Magistrate still clings to alternative No. 1, viz., payment in money and the erection of bunneahs' shops adjacent to each work. Mr. Magrath writes: "I have not issued positive orders to pay in grain, as I am apprehensive of its exhausting my stores too quickly. In Durbhunga grain payments have been introduced on all works, and money payments have ceased. In the Mahomedpore circle the change has been partially made, and is by this time completed. In the Warisnuggur and Hyaghat circles the change is still partial. In Bhundar grain payments are in abeyance, pending the deputation of Mr. Cornish. In the Hathee Sub-division grain payments have, it is reported, been introduced everywhere, as also in Hussunpore. In the Dosowta circle it had been introduced on three tanks only. Before the next narrative the change will have been completely made." With this change the abolition of the daily-payment system on roads and tanks should cease. It is far better that the weakly should receive grain as charitable relief, than collect in crowds to do no work, as is still notably the case in the Motipore circle, and I would submit this matter for the orders of Government. The following statement shows the numbers still seeking work:—

Names of Sub-divisions.	Daily average of laborers on relief works.	Public Works.		Circle Officers.	
		Task-work.	Daily wages.	Task-work.	Daily wages.
Seetamurhee	36,883	19,265	.....	8,407	9,211
Poopree	36,744	not given	.....	33,001	3,743
Mudhoobunnee	349,455	92,423	.....	128,441	128,591
Narayah	117,436	.....	811	116,625	.. ...
Durbhunga	75,801	22,077	.....	53,724	.....
Hathee	65,645	23,017	.....	42,628	.....
Court of Wards	10,329	10,329*	.....	.....	.....
Add for Court ..	692,293	167,111	811	382,826	141,545
of Wards, just received ..	27,450	25,841	.....	1,609	.....
	719,743	192,952	811	384,435	141,545

* This includes only a small number of those on Raj works.

23. In Mudhoobunnee 92,423 persons were employed on public works. There was a total expenditure by Public Works Department of Rs. 1,02,793, of which Rs. 54,620 were paid on contract and Rs. 48,173 on daily wages; of the 92,423 persons, 47,426 were men, 29,943 women, and 15,054 children.

Under circle officers the proportions on task-work and daily labor vary very considerably, depending upon the mental characteristics of the circle officers:—

	Task-work.	Daily labor.
Mudhoobunnee	56,594	61,652
Motipore	7,323	35,673
Butwa	21,014	3,006
Jhungharpur	17,474	7,720
Oomgaon	5,425	....
Kuchra	20,611	20,540
	128,441	128,591

24. In my last narrative I reported the success which had attended Pundit Adjodear Pershad's efforts to induce the poorer class of Brahmins to work. This month I have to report that Mr. A. C. Mackertich, at Muddehpoora, has been equally successful. In this circle there are upwards of 140 village works under the circle officer; grain is supplied to all these works through the jeyt ryots, who purchase from the golahs and supply the people in their villages. It is perhaps invidious to make distinctions where all are working so well, ably and zealously, but the Muddehpoora village system seems to me to be working under Mr. Mackertich's arrangements admirably. Besides Brahmins there are also Rajputs at work, and the numbers, which commenced at 30 male and 11 females, with 4 children, are gradually increasing.

C.—Transport of Food.

25. The transport operations in Eastern Tirhoot are now fast drawing to a close. The actual amount still to be delivered is small, and the operations will have been successfully brought to a close by the 15th June. The Durbhunga out-golahs have been supplied by the agency of the coolie corps, under Lieutenant Dickson, of the Bombay Staff Corps. Returns are being received from relief officers of the means by which the sub-golahs will be supplied during the rains.

Consumption and Grain-sales.

26. On the important point of sufficiency of stocks, the Sub-divisional Officer at Mudhoobunnee writes:—"I do not think the grain will more than just last the required time. In Jhungharpur there is a consumption of 1,200 maunds daily, and the relief officer calculates his stock will not last beyond the 15th of September. The stock in the Butwa circle will probably last only eight weeks, as the sales are from 1,100 to 1,900 maunds per diem. In the Motipore circle the consumption has only been about 3,000 maunds, but the sales are increasing. In Kuchra the sales are about 7,000 maunds per week, and at Oomgaon 14,000. The sales at Mudhoobunnee itself are not accurately given. Mr. Magrath calculates his probable daily consumption and sales at 259 tons a day, and he speculates on the possible necessity for a further* allotment hereafter. The sales all along our frontier are very brisk, but I anticipate that a part of the demand now made on the Mudhoobunnee golahs will be transferred to Seetamurhee. There is a very great demand for Government grain everywhere, and sales are restricted by the difficulty of weighing off more than a certain number of bags per diem Every encouragement is being given to persons of all classes to purchase, and the supervision over the golahdars is almost daily. At the principal granaries some of the picked Native Cavalry Officers have been placed in charge.

* Of five lakhs maunds

27. The following statement shows storage and consumption:—

28. Regarding the Narayah sales the Sub-divisional Officer reports:—"Government grain is being bought in such large quantities, that I can only conclude the people are storing it for consumption in the rains. The bunneahs, I believe, are not storing, but selling all they buy. These stores, added to those already existing, will keep the bulk of the population throughout the rains; for the relief purposes the sub-golahs are kept constantly full, and as quickly as it is possible grain is being stored in every village.

Perhaps the best supplied markets in the three sub-divisions are those in Allapur, and now that Government rice is sold there, the supplies are plentiful and varied. The sales in Seetamurhee have been very small, only 19,832 maunds up to date; but this has been due to the sales having been conducted on what is called the rupee system, *i.e.*, selling only a rupee's worth at a time. I have now put a stop to this, and ordered free sales everywhere to Nepaulese subjects, as well as to our own.

D.—Storage of Grain.

29. The amounts of grain stored are as follows:—

	Mds.
Seetamurhee	8,04,069
Mudhoobunnee	6,07,347
Narayah	5,35,608
Durbhunga	7,55,196
	27,02,220

E.—Advances.

	Money advances to date.	Grain advances to date.
	Rs	Mds
30. Seetamurhee and Poopree	39,015	2,260
Durbhunga and Hathee...	61,095	27,028

The Seetamurhee figures are exclusive of a further sum of Rs. 30,735 advanced to traders, and under the Land Improvement Act.

In Mudhoobunnee there have been no money advances within the fortnight, and of grain 1,824 maunds advanced have been reported.

F.—Charitable Relief.

31. The numbers on charitable relief for the different circles vary very considerably. In the north-western circle of Dyne Chuprah, in 60 villages there are only 770 persons asking for or requiring relief; in the Butwa circle there were till lately 16,000. These figures have been reduced partly by drafting persons to their own circles, partly by striking off persons who really did not require relief. Upwards of 600 persons from the Terai have sought relief in this circle.

In the Narayah circle the number of persons on charitable relief has now swelled to 17,125.

32. The statement for the whole area of the three sub-divisions is as follows:—

Names of Sub-divisions.	Circle.	No. of men, women, and children in receipt of gratuitous relief.	Remarks.
Seetamurhee	Dyne Chuprah ...	770	
Ditto	Other circles ...	3,533	
Mudhoobunnee	Sudder circle ..	1,316	
Ditto	Motipore ...	3,569	
	Jhungharpur ...	2,470	
	Bhukwa ...	14,790	
	Oomgaon ...	1,687	
	Kuchra ...	4,574	
Narayah	.....	17,125	No details received.
Durbhunga	Sudder circle ...	9,932	
	Mahomedpore ...	6,443	
	Hyaghat ...	12,438	
	Warisnuggur ...	5,530	
	Rohur ...	5,056	
	Bunhar ...	5,390	
	Lehera ...	11,942	Letter just received shows strict revision has reduced number very considerably.
	Dosowta ...	12,971	
	Gungdah ...	10,945	
	Singhiya ...	5,302	
	Hirnee ...	6,300	
	Hussunpore ...	15,394	
	Total ...	157,477	

33. In the Mudhoobunnee sub-division, there has been an increase in Mudhoobunnee and Motipore, and a decrease in Jhungharpur, Oomgaon, Kuchra, and Bhukwa, as compared with the figures in the last return.

34. In Durbhunga there has been a large increase; this is due partly to errors in the last fortnightly narrative, and partly to the increasing pressure of distress among widows and the poorer Brahmins. We have now about $\frac{1}{3}$th of the population of this sub-division in charitable relief.

35. G.—Financial Results of the Fortnight.

† All work done by contract.

No. 1585F, dated Mozufferpore, the June 1874.

From—C. F. Worsley, Esq., Officiating Collector of Tirhoot,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to submit my narrative of scarcity and relief in the Hajeepore, Tajpore, and Sudder Sub-divisions, for the fortnight ending Saturday, the 30th May 1874.

A.—State of the Country.

In Hajeepore Sub-division the bazars generally have been sufficiently supplied, but in thana Mhowah prices are running high, and there is an undoubted deficiency of grain.

2. In Tajpore Sub-division prices have fallen. The sub-divisional officer remarks: "The tendency of prices to fall, noted in my last report, has thus declared itself clearly during the past fortnight. I should derive more satisfaction from this state of things could I report increased activity in the local markets. This there has not been. Indeed the sale of Government grain across the Gunduck has had a distinctly depressing effect on some of the neighbouring markets. Rice has virtually disappeared from the Sarmistipore bazar, and a very active trade in the Bibbutpore market opposite Rawsera has been damped. I believe traders are getting rid of their stocks quicker than they otherwise would have, and are limiting their prospects. In Bibbutpore the traders I talked to were evidently disclined to speculate much on importation. Rice supplies are not plentiful at the small markets in the interior; Government rice finds its way into consumption here, though not sold at any place in the sub-division. I know as a fact that carters, working at Durbhunga, import Government rice thence on their return journeys, though of course not in large quantities."

3. I am not aware of the extent to which Government grain has of late been sold in south-western Durbhunga, but my general experience leads me to question the correctness of the above views. As reported in paragraph 21 of my narrative dated 6th ultimo, I found on a recent tour that vendors of Government grain in Seetamurhee persistently refused to sell to villagers of the Sudder Sub-division, and considering how very severe distress has been in Durbhunga Sub-division, I should have expected a similar policy to prevail there. In the eastern and north-eastern circles of the Sudder Sub-division private importations, such as they were, have not been checked by sales of Government grain; and in the western circles such sales have been followed by increase of private trade. Do what we will, there must still be ample room for private trade, and with the exception of carriage, there is no matter about which private importers can have any right to complain. It is too often forgotten that when Government entered the field there was, comparatively speaking, no such thing as an import trade in grain, or vested interests of grain importers in this district.

4. In the Sudder Sub-division, scarcity of grain is very great, and it is only the system of small retail sales which I am obliged to maintain at present, that prevents a too rapid expenditure of Government grain.

5. The subjoined statement should show the kinds and prices of grain selling at some of the principal marts on 30th ultimo:—

	Wheat.	Barley.	Common rice.	Lesser millets.	Maize.	Gram.
Hajeepore	12¾	17	9½	...	15	16¾
Maowah	12	15	8½	17	13	15
Tajpore	12½	16	9	15	15	16
Poosah	Not received.					
Mozufferpore	11½	14	8½	...	13	14
Sahebgunge	12	16	11	...	15	16

6. The rainfall during tthe fortnight was as follows:—

Hajeepore	·10
Tajpore	·30
Mozufferpore	·09

Over a small tract in the Toorkee circle (16 miles north from Mozufferpore), there was a fall on 1st instant of about one inch rain, and the weather is now very unsettled and cloudy.

7. The sub-divisional officer of Tajpore reports that "a great deal of marwa, sama, kownee and kodo have been sown" and that "the dhan wants rain badly, it being in many places very backward, and in some getting burnt."

In the western parts of the Sudder Sub-division, the crops are reported to be "as bad as they possibly could be," owing to want of rain. In the north, some of the lands have been sown, and many have been cultivated, but there are still considerable tracts of low rice land lying untouched. The makai lands have been nearly all prepared, and will be sown on the first good fall of rain.

8. During the fortnight I have been over the greater part of the Hajeepore Sub-division. Though there is not at present any thing like distress anywhere, there are indications of pressure in the Mhoweh thana jurisdiction. Several of the laborers whom I saw on the tank-works in Shapore circle (26 miles north-east from Hajeepore) were lean, and had evidently been living on a lower diet than usual; and I have no doubt, that, but for the opening of the relief works, they would soon have become very thin and weak. Most had run through their supplies of grain, and there were few who were not dependent on the works for their support. The Shapore circle is the only part of the sub-division in which there is reason to apprehend severe distress. Here the rubbee crops failed, and the high prices of grain and comparatively large number of laborers on relief works, show that the failure is already being felt. In the Chutwara and Singhya circles, (16 miles north-east and 12 miles north, respectively, from Hajeepore), there is a growing demand for employment, but in the rest of the sub-division, the relief works are very poorly attended.

9. The Tajpore officer considers that the majority of the laboring class are in good condition, but that "the petty cultivators are much pinched." The latter, however, will not go to the relief works. "It is not only high caste men" writes Mr. Wace "who decline to work, but koirees and koorners, and such like; everyone wants advances, and the applications are generally for money and not for grain. Mr. Dalgleish, of Dulsing Serai lately offered some rice bought under advance to some ryots who professed to be, and he says seemed to be, distressed. He demanded repayment in money in easier times at the rate of 11 seers to the rupee. They declined his offer and begged for money. Mr. Wace is now more anxious about the eastern part of his sub-division than about the country lying further west. I have only myself seen so much of the sub-division as lies between Shapore and Poosah, and in that part the condition of the people, and the state of the crops, appeared good. The Manager of Doollee Factory, however, considers that distress is near at hand in his dihat.

10. In the Sudder Sub-division there has been no marked change in the condition of the people, except in the Belvandh and Rajkhand circles, which I have lately visited with the Commissioner. In the former circle we saw several very emaciated children who were said to be in receipt of charitable relief; and though there is much distress, and many relief works have been opened, the attendance of laborers is very small. In my last narrative I noticed the unpopularity of relief works in this circle, and I have now, with the Commissioner's permission, directed Mr. S. Jackson of the Opium Department to relieve the present incumbent of his duties.

In Rajkhand circle, the number of laborers has enormously increased. It now amounts to 22,000 persons, or about one-third of the total population of the circle, and the sales of Government grain exceed 300 maunds a day.

11. No deaths from starvation have been reported.

12. In the appendix is given a statement of crime for the past month.

(B).—Relief Works.

13. The total number of laborers employed daily is as follows:—

Hajeepore Sub-division	..	..	..	..	6,891
Tajpore	„	..	..	..	..	5,995
Sudder	„	..	..	..	..	178,028
				Total	..	190,914

Detailed statements are annexed to this report.

14. In Hajeepore Sub-division, payments of wages have been made partly in money and partly in grain, but Mr. Tute has now arranged to make grain-payments everywhere. In Tajpore Sub-division, grain-payments are made on all works in the Poosah circle, and also on the Jitwarpore and Dulsing Serai road. On the Belwara road, a bunniah has been appointed to sell Government grain, and on the remaining works wages are paid in money. Mr. Wace is strongly opposed to selling Government grain on all his works, believing that such a course will discourage private importations, and he would prefer to pay bunniahs for selling their own grains on out-of-the-way works; but as Government grain has been imported for the special benefit of our laborers, I have declined to sanction such an arrangement. I think Mr. Wace is inclined to over-estimate the effect of our sales on private trade. If there is a really serious deficiency of grain in his sub-division, the effect on private trade, of our

feeding some 6,000 or even 20,000 laborers out of a population of 640,000 souls must be quite inappreciable; but if the deficiency is small, there is no peculiar advantage in stimulating a petty import trade that must expire with the disappearance of famine. Many intelligent natives believe, that with existing carriage resources, Government and private trade together cannot import sufficient grain for this district, and one of my circle superintendents knows a zemindar who holds 40,000 maunds of grain and refuses to sell, openly boasting that his time will yet come for making a handsome profit. Looking at the enormous private importations by rail and river into Shahabad and Patna, it would seem that the more enlightened and enterprising dealers foresee large demands that cannot be supplied by Government in the Behar districts.

15. In the Sudder Sub-division, grain payments have been introduced on many works and are being extended to all as rapidly as possible. But if the number of laborers continues to increase at the rate of 2,000 or 3,000 a day, or even remains at its present figure, I greatly fear that with grain payments, grain advances, and sales to the public, our supply will not last for six weeks.

C.—Transport of Food.

16. Means of transport continues to be sufficient for the conveyance of Government grain.

D.—Storage of Government Grain.

17. The amount of Government grain now stored is as follows:—

	Mds.
Hajeepore Sub-division	5,170
Tajpore	20,753
Sudder	95,687

The quantity of Government grain disposed of during the fortnight, in detailed statements shewing the quantities of grain paid in wages, sold to laborers and the public, and expended in charitable relief, are given in the Appendix.

18. Good progress has been made in most circles towards filling the sub-golahs in each group; but as these buildings have been constructed to hold only 200 maunds, it will be necessary to replenish them frequently. No difficulty is anticipated in forwarding supplies regularly to the sub-golahs.

19. In the circles administered by planters, the grain will be stored only at factories and out-works, as with the resources at their command, they can easily arrange for keeping up a constant supply of grain at the relief works.

E.—Advances.

20. The making of advances still proceeds too slowly, though there has been an improvement of late in the Sudder Sub-division, where Rs. have been paid away. The matter is a very difficult one indeed for young officers to deal with, as they have no local knowledge, and so many attempts are made by designing persons to obtain loans improperly.

The Hajeepore officer writes on this subject: "There seems to be a general impression throughout the sub-division, that Government are prepared to advance money indiscriminately to any one who asks for it.

"In most of the cases into which I made enquiry, the applicants were either insolvent, or wanted the money for their private uses. The vague expression "to benefit my ryots" is invariably used, but I have not as yet had any plan proposed to me for the carrying out of this benevolent plea. I have hitherto refused these advances, and am disposed to continue doing so until I see what effect the sale of Government grain on the relief works will have on the market; and in any event I would prefer hereafter, if it should be found necessary, advancing grain to deserving ryots, to advancing money which would with great difficulty, if ever, be realised. I think the works we have opened will benefit the classes in need of help, and although the small malicks may be pinched, they hardly come under the category of those we are bound to relieve, and after all their petitions are one and all for themselves, and not for their ryots." The Tajpore officer reports that all the petitions he receives are for money, which he is not competent to advance, except for the purchase of seed-grain, and of this there is no want. He is of opinion that "directly rain falls, and there is any prospect of a good bhadoi crop, money will be forthcoming for most people from the usual sources."

As the circumstances of the Hajeepore and Tajpore Sub-divisions are widely different from those of the Sudder Sub-division, I trust that the action of these officers may not be considered ill-advised, and that they may be allowed to use their own discretion in selecting the time for making advances.

F.—Charitable Relief.

21. The number of persons receiving charitable relief is as follows:—

Hajeepore Sub-division	3,921
Tajpore ,, ...	1,155
Sudder ,, ...	7,850

Detailed statements for each sub-division are appended.

22. The Hajeepore Sub-division has now been formed into seven circles for relief purposes, each of which, excepting Hajeepore itself, has been placed under the manager of a factory. With the Commissioner's approval, a salary of Rs. 100 per month has been allowed to two managers of small factories, and also to two assistants in other factories, and an assistant on Rs. 100 per month will be placed under Mr. Tute, who himself administers the Hajeepore circle. For each planter's circle an establishment has been sanctioned on Rs. 100 per month.

The names of circles and superintendents are given below :—

Names of Circles.	Names of Superintendents.	Names of Assistants.	Remarks.
Hajeepore	Mr. Tute Sub-divisional Officer.	One, not yet appointed.	
Singhiya	„ Pope ..	Mr. Sheffield ..	Head-quarters of circle 12 miles north from Hajeepore.
Bhatowlia	„ Macgregor ..	....	Ditto 18 miles north.
Karhari	„ Campbell ..	....	Ditto 15 miles north north-east.
Sarsai	„ Park ..	....	Ditto 11 miles north-east.
Chutwana	„ Blake ..	....	Ditto 16 „ „
Shapore	„ Smith ..	Mr. MacBean ..	Ditto 26 „ „

In the extreme south of the sub-division there is no probability of distress, and consequently no circle has been formed in the jurisdiction of Mohwar outpost.

23. Charitable relief is given at the head-quarters of each circle on every Sunday at 5 P. M., and each pauper receives a week's supply of food.

24. Of the recipients of charitable relief in the Hajeepore Sub-division it appears that—

Two-thirds are professional beggers and persons hitherto supported by private charity.

One-third are persons reduced to distress through failure of crops.

25. In the Tajpore sub-division the relief organisation consists of 4 sub-committees and 5 relief circles under management of planters. The names of the circles are Dhollee, Jitwarpore, Harsingpore, Shapore Undi, and Dulsingserai. The question of salaries and establishments has not yet been settled.

26. In the Sudder Sub-division it has been found necessary to sub-divide the sudder circle into two parts. Mr. Warde-Jones retains charge of one portion, which will still be called the sudder circle ; and the other under the name of the Chajun circle (8 miles south-west from Mozufferpore) has been placed under the charge of Mr. Kavanagh. This, I hope, is the last change that I shall have to report in the organisation of circles in the Sudder Sub-division.

G.—Financial Results.

27. Statement showing the financial results of Sudder, Hajeepore, and Tajpore Sub-divisions for the fortnight ending 30th May, 1874 :—

	Rs.	A.	P.
Transport of Government grain	2,80,778	12	9
Storage	2,715	13	0
Contingencies	1,311	10	9
Purchase of grain by Government	6,000	0	0
Advances to zemindars for support of ryots	15,700	0	0
Advance to ryots	13,000	0	0
Relief works	1,76,018	0	0
Charitable relief	13,349	1	10
Public Works Department	2,57,425	0	0
Total ..	7,66,298	6	4

Known Cases of Misery and Starvation.

19. Mr. Hudson writes as follows under this head :—

"No cases of starvation are known to have occurred, but many cases of demi-starvation (as above reported) have come under my observation. Miserable and revolting objects are to be seen amongst the pensioners at every relief centre, and persecute me daily here. But these I believe, like 'the poor,' 'are always with us,' and furnish no special indication of the existence of distress. Most of these are cases of *incurable wretchedness*, such indeed being their stock-in-trade, nor could they be restored to the outward semblance of well-being by the utmost efforts of charity. Here, however, I must not fail to note, as an indication of the poverty of some classes of the people in Bussuntpore thana, that when at Bala Factory, I saw about 20 boys and women, in the early morning, engaged in grubbing up and sifting the surface soil on the spot where the payments of coolies had taken place the night before, in order to glean such few scattered grains of rice as might have been spilled in distribution."

20. And the Manager of the Hutwah Raj, Mr. Hodgkinson, reports thus :—

"A death was reported by Mr. Reid, of Maniarah, of a professional beggar, who had been in receipt of gratuitous relief in the shape of cooked food for a fortnight. The death had no doubt been accelerated by previous starvation. It does not appear that the person belonged to any village in the sub-division."

21. No other specific cases of misery or starvation have been reported.

Grain-thefts or Robberies.

22. There have been twelve grain-thefts during the fortnight.

23. Mr. Hodgkinson writes under this head :—

"Mr. Buskin has informed me that an unsuccessful attempt to break into and steal rice from the Sreepore store-houses was made about a fortnight ago by a number of persons, none of whom were identified. It is suspected that some of them were factory servants."

24. A report has been received that at one of the embankment golahs the persons in charge were removing the Government grain across the river, and selling it with the view of purchasing other cheaper grain in the market, and appropriating the difference. The matter is under enquiry.

Condition of any Special Tracts.

25. As apparent from previous portions of the narrative, it is more and more evident that the Bussuntpore thana comprises the worst tract in the district. There are, however, large quantities of grain stored there; advances to the cultivators village by village are in progress; spinning relief is largely afforded to purdah women; and when the village relief organization is thoroughly completed, it is hoped that the distress may be coped with even on the closing of the relief works which have so long kept large numbers in these parts from starvation. But it is trusted that the work on the new road from Bussuntpore to Sewan may still be carried on during the rainy season, and afford employment to many who cannot be expected to find continuous occupation in agricultural operations.

B.—Relief Works.

Progress of Relief Works.

26. The annexed statements show the relief works in progress, and the number employed thereon. The mean daily number employed during the fortnight was 226,137, and the number on the last day was 219,344. The returns have been received so late that there is now no time to analyse or comment on them; so merely the figures are given.

27. Under this head Mr. Hodgkinson writes :—"Payments in grain have not been made direct to the laborers yet; they will be commenced from the 1st June. But a considerable quantity of the grain shown under the head of 'sales to public' has been sold to bunneahs, and through them found its way into consumption amongst those employed. The distribution of grain advances has entailed upon me and my staff (now reduced by the illness of Mr. Boileau) such an immense amount of additional work, that I have hitherto been unable to organise any of the prescribed systems."

Collection and Despatch of Laborers for the Soane Canal Works.

28. Arrangements had been made for the despatch of 10,000 laborers to the Soane Canal Works, and it was thought that there could be no difficulty in sending the whole 20,000, when, owing to a mischievous report set on foot by some one, that the laborers were all to be shipped to the Mauritius on pretence of being engaged for work in the Arrah

district, a panic set in among them, and all suddenly declined to go. It may be that the attempt to induce to go in whole families may have engendered suspicion amongst an ignorant and distrustful body of people, and every effort is now being made to get them to leave on the terms offered, singly or not, as they like. Still the result has hitherto been unfortunate. During the rainy season, I hope, we may be more successful. Another circumstance, which at the present time is against the scheme, is that the Noonneeahs, or professional digging class, have been, and are still, hard at work all over the district, manufacturing saltpetre; and as they earn considerably more than they would in the canal works, it will be difficult to persuade them to go until the rains put a stop to their present occupation.

State Emigration to British Burmah.

29. There were 41 emigrants in the depôt, and they were all despatched to Calcutta on the 30th May. Orders have now been received to discontinue further recruiting.

C.—Transport of Food.

30. Under this head, Mr. Hodgkinson reports thus regarding the Hutwah grain supplies:—

"I regret to say that the transport of Raj grain has not been going on satisfactorily, owing to the scarcity of available carts. But an officer has been deputed to Revilgunge, who will, I trust, quickly succeed in despatching the grain accumulated there, either by carts now or by boats which will come up the Daha on the first fall of rain. The accumulation mainly arises out of the appropriation by Government of the greater part of the carriage on the East Indian Railway. Messrs. Schœne, Kilburn and Co., from whom the Raj rice was principally purchased, being only private traders, have therefore been unable to get consignments of grain sent off regularly, and on two occasions our transport operations were brought to a temporary close, owing to there being no grain at Revilgunge to bring in. Not only has this entailed delay, but it has lost us carts which were working for us, and which went over to other parties when we could no longer give them employment."

D.—Storage of Government Grain.

Distribution and Expenditure of the Government Grain.

31. There having been still further changes in the distribution of the Government grain, a revised statement of the allotments as they now stand is appended; receipts and expenditure of Government grain are also shown in this statement. To meet, at least, to the extent possible, the demand for grain in thana Chupra on account of the relief laborers, the entire quantity now remaining at Revilgunge has been ordered to be *detained* there, and the balance remaining to be transported at Singhai Ghât has been diverted from Bala to Gurkha. This closes all transport operations, and none too soon, as the rains appear to have commenced.

Gradual Expenditure from Government Grain Stores, and possibility of more Grain being actually required.

32. If sale of grain to the relief laborers is to be maintained, more grain will certainly be required for the Chupra and Manjhee thanas, as without it it will be impossible to make grain advances to the ryots. As in these two thanas alone there may possibly be 60,000 maunds required to be advanced in this way, and with the limited stocks available it seems very unadvisable to cripple our resources at the outset by disposing of so much grain to the relief laborers, I would ask that further sales or payments of grain to relief laborers in these thanas may be stopped at once. It may be said that more grain might be diverted from other places, but independently of the impossibility of foreseeing whether all the grain may not be wanted in the places where stored, it would be a business of great difficulty now to transport it.

E.—Advances to Private Parties, and their Results.

33. There have been no money advances during the fortnight, except for purchase of seed-grain and plough cattle, on which account Rs. 732-2* has been advanced. The grain advances to ryots are shown in the annexed statement. Though these advances are only just commencing, rapid progress with the preparation of the village lists is being made in most parts of the district, and it is hoped that the allotments for each village will be completed and the orders on the golahs be in the hands of all ryots requiring advances by

* Besides Rs. 2,108 for land improvement, making up the total on this account to Rs. 1,16,741.

the end of this month at latest. The Government orders have been received to make these advances of cleaned rice at 12 seers for the rupee, as far as possible, so as to avoid to some extent the incentive offered to the people by the extremely favorable rates fixed for other sorts of rice to speculate with the Government grain. What effect this has had, or will have, on the number of applications for advances, cannot yet be stated, but it is not believed that the necessity of taking rice at a higher rate will deter those really in need of such advances from applying; though it is possible that objections may be raised to the use of cleaned rice at all, on the ground of the coarser kinds forming the ordinary diet.

34. Mr. Hudson reports as follows regarding advances:—

"I have commenced the village distribution of the Government stores of grain, and hope to have got well through with it, before the setting in of the rains shall have rendered impassable the lines of transport. Advances for land improvement are now stopped, partly owing to the near approach of the rains, and partly owing to the pressure of work entailed by the village distribution."

35. The following report is submitted by the Sub-Divisional Officer of Sewan:—

"During the fortnight advances in grain have been made by me to zemindars to assist their ryots to the amount of Rs. 500 only. I have made no advances in cash. As Mr. Rattray has been in Sewan for nearly the whole fortnight, parties requiring advances have been referred to him, and during the fortnight he has given orders to 124 applicants for advances in grain to the amount of 5,949 maunds 36 seers, valued at Rs. 15,359-4-0.

* * * * * *

He has also given Rs. 200 in cash for land improvements. Mr Rattray reports also that grain advances have been made to ryots by the Circle Officer of Karbala to the amount of 20 maunds, and by the Circle Officer of Mairwah to the amount of 92 maunds."

"Mr. D. N. Reid, in charge of the Suddowah circle, is making extensive advances to the ryots in his circle on the joint security principle. I am unable to state the quantity of grain to be given in advances for which he has issued orders, as his report has not reached me. The accompanying statement, however, shows the quantity of grain actually given out from the Burrowlee golah in compliance with his orders.

"No advances have as yet been made by Mr. Rattray or myself to whole villages on the joint security principle. Lists, village by village, of applicants requiring grain advances are being prepared, and as soon as they are ready, advances will be made."

Mr. Rattray reports as follows regarding the preparation of these lists:—

"During the past fortnight, every endeavour has been made by me to hasten the preparation of the village lists of applicants for grain advances. Forms and instructions are now in the hands of every Circle Officer, and I am glad to be able to report that the work is progressing favorably in the majority of the circles in this relief sub-division. I have been able to visit the relief circles at Mairwah, Bousopali, Hajipurwah, and Dhanowtee. Mairwah has the largest number of villages allotted to it amongst all the circles placed under my supervision. The member in charge, Baboo Bubban Singh, is actively interesting himself in the management of his circle. The preparation of village lists has so far progressed in the Bhagar and Bousopali circles under the direct charge of adjacent Circle Officers, that there is no longer any necessity for the appointment of special officers to the charge of these two circles. Owing to the inability of Mr. Proudfoot to look after the management of the Sohagrah circle, the preparation of the village lists in that part of the sub-division is likely to be delayed. Baboo Bikramajeet Dubé, zemindar of Bakulori, near Sohagrah, has been asked to accept the management of the circle. His reply has not been received yet. Very few villages have been alloted to the Sohagrah circle; consequently the work, when once started, will not take long in completion."

Mr. Rattray has been directed to appoint a special officer to the charge of the Sohagrah circle if Baboo Bikramajeet Dubé does not accept the management at once, so that no delay may take place in preparing the village lists of that circle.

36. Mr. Hodgkinson makes the following report under this head, with respect to the Hutwah Raj:—

"A large quantity of grain has been given out in advances to ryots, and orders for a very much larger amount issued. As soon as it was known about Hutwah that advances were being given, my house was beseiged by villagers, who came uninvited; one day at least some 7,000 or 8,000 ryots collected. The advances are being made village by village. Dates are fixed for each village to attend; and each case is then gone into. Orders have been distributed to nearly 200 villages at Hutwah alone; and

Mr. Browne at Bhorey and Mr. Buskin at Sreepore, have given out a large number of tickets. The amount that will be distributed in advances will probably exceed 60,000 or 70,000 maunds. I regard this as the most important portion of the whole relief system; and I trust that if I have been found backward in carrying out other portions of it, it will be attributed to my desire to finish, as far as possible, the distribution of advances before the cultivating season is brought in by rain falling."

F.—Charitable Relief.

37. The number receiving charitable relief, as far as is known, is given in the annexed statement.

38. With increased staff at my disposal, I have been enabled, with the view of pushing on the village relief organisation as fast as possible, to divide the district into six relief sub-divisions, composed as under, and in charge of the gentlemen named, and the progress made in the new sub-divisions will be noticed in the next fortnightly narrative:—

Names of Officers.	Names of thanas placed in charge.	Population.
1. Major W. Jackson	Chupra	236,986
2. Mr. C. F. Tonnèrre	Manjhee	136,063
3. „ W. H. Hudson	Mushrukh & Bussuntpore ...	466,704
4. „ W. Barry	Pursa & Dighwara ...	329,698
5. „ A. Rattray	Sewan, Durrowlee, and a portion of thana Burrowlee ...	544,409
6. „ G. J. S. Hodgkinson... ...	Burragaon and a portion of thana Burrowlee ...	350,000

To assist Mr. Hudson, who has the heaviest charge in the sudder division, Mr. Grant has been placed at his disposal, and deputed to Bussuntpore thana, with head-quarters at Gopalpore, and put in immediate charge of the circle; and it is trusted that the work in that sub-division will now be pressed on with increased rapidity.

39. Three new members have been added to the Relief Committees, viz.—

Baboo Debi Pershad, zemindar of Mushrukh.

„ Choonee Lall, banker of Chupra.

„ Preonath Chatterjee, agent to Messrs. Ralli Brothers and Co., Revilgunge.

40. Mr. Wright reports as follows:—

"The accompanying two statements,* made out from returns received from the gentlemen in charge of relief circles, show the number of persons who have received gratuitous relief, and the number receiving relief in the way of cotton-spinning."

"With reference to the orders contained in paragraph 5 of Government Circular No. 3216—S.R., of the 19th ultimo, I beg to state that from the commencement of relief operations up to date sums, aggregating Rs. 3,350 in cash, have been sent to the officers in charge of the relief circle in this sub-division for affording gratuitous relief to the incapable poor. Out of the above sum, Rs. 577-15-8 has been expended in giving gratuitous relief to the poor under clause (*b*) of the Central Committee's notification. Besides this, Rs. 7-13 worth of grain has also been given in gratuitous relief up to date. The above relief was given to 4,752 persons. Under clause (*c*) assistance has been afforded to 226 purdah-nusheen women at a cost of Rs. 104, in spinning cotton. The officers in charge of relief circles have each been furnished with a supply of cotton wool for the purpose of affording employment in spinning for those who are in need of it and able to work. Under clause (*d*) no relief has as yet been given."

Mr. Rattray reports, under the head of charitable relief, that he has issued instructions to the Circle Officers, directing that relief is to be confined to each village for its own distressed, so as to prevent the congregation of masses at the head-quarters of each circle. The distribution of relief to the poor of each village is to be under the care of the village putwarees, who are to be under the supervision of the Group Superintendents. Village returns of charitable relief will be furnished to the Circle Officers by the Group Superintendents for incorporation with their weekly returns.

* Embodied in the abstract district return.

The plan of village relief alluded to by Mr. Rattray has been and is being adopted elsewhere in other parts of the district, and is no doubt the best system

41. Mr. Hodgkinson writes as under:—

"The attendance of the villagers affords on opportunity of making the fullest enquiries, village by village, as to the persons requiring charitable relief. The monthly allowance is distributed through the putwaree to persons unable to come for it from infirmity or caste prejudices; and cotton for spinning is given out in the same way. I regret I am unable to state the exact number of persons receiving relief under clause (*d*), as no separate list of them has been kept. I will endeavour to supply the information desired in my next fortnightly narrative.

"Village circles have been roughly sketched out in Bhorey, Marur, and Dhobowl; and I intend to visit this portion of the estate at once, and definitely make the necessary arrangements to put them in working order, as well as to organize a system for the payment of the relief laborers in grain.

"Owing to the extremely small size of the villages in this part of the district, one Village Superintendent can easily look after 20 or 25, if not more. The number at present receiving charitable relief is shown in the annexed table:—

No. Circle.	Average daily number of persons receiving cooked food.	Average daily number of persons receiving uncooked food	Total
1. Bhorey	108	204	312
2. Maniarah	10	5	15
3. Jugdishpore	35	.....	35
4. Chukia	21	.....	21
5. Gopalgunge	15	.....	15
6. Hutwah	50	143	193
7. Sreepore	148	108	256
8. Sonowhula	12	13	25
Total ...	399	473	872

"This return is, I regret to say, very incomplete, as the tehsildars in charge of Afrad (Sonowhula) and Dhungharee (Brajarria) do not appear to have understood the instructions given. There are, I learn from other sources, about 200 persons in receipt of the monthly allowance in these tuppahs, whereas 13 only are shown in the return, evidently the number to whom new tickets have been issued. The actual number in receipt of charitable relief is about 1,100."

G.—The Financial Results of the Fortnight.

42. The financial results of relief operations are given below :—

	Rs. A. P.	Rs. A. P.	Rs. A. P.

J. S. DRUMMOND,
Offg. Magistrate and Collector of Sarun

BHUBANESWOR DUTT,
Supdt., for Manager, Court of Wards,
Raj Hatwah.

HUTWAH,
The 4th June 1874.

No. 1728F, dated Chumparun, the 1st June 1874.

From—H. KEAN, Esq., Collector of Chumparun,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit the fortnightly narrative of scarcity and relief for the fortnight ending the 30th May 1874.

A.—STATE OF THE COUNTRY.

During the past week (23rd—30th) there has been, I am very glad to be able to report, a most opportune fall of rain, which was more or less general throughout the district. It has been of immense value, enabling the cultivators to prepare their lands and sow paddy, marowa, sathi, and maize. This rain has also saved the grass which was being rapidly burnt up, compelling cattle-owners to feed their animals, on the leaves of trees. The country, which before the rain had assumed a brown and burnt-up appearance, is now becoming green again.

In the Motiharee Sub-division (No. 1), owing to the quantities of Government rice thrown into the market, the state of the bazars seems more favorable than it was a month ago; wheat and maize, which had disappeared as articles of food, are now being offered but find no purchasers. Even the Government stores of these grains are refused, Mr. Oldham says, though offered at one seer less than the current bazar rate. Rice is sought with general eagerness, and has now been issued in quantities sufficient to make it very fairly abundant. Private importations have not yet reached as far as Segowlie.

Regarding grain in stock, Mr. Oldham states "that there are few, even of the persons laboring on the works, who have not some little store of 'ashar' or barley. The zemindars, large farmers, and mahajuns, and most of the well-to-do cultivators, still hold stores; there is not the slightest reason to apprehend a deficiency of seed-rice of which there are large stores in many places. It is thought that the supplies of maize seed are shorter, but nothing like general anxiety on the point is expressed. The mahajun's stores are still tightly held up, as they acknowledge, till rain gives them a chance of opening them safely and profitably." It had rained in a partial manner all the past week, beginning on the 23rd. The shower, however, had been very partial, and Mr. Oldham states that there is still a large tract of the rice-growing country north of the Sikrawah which has had no rain to speak of. He says. "Generally, however, sowing-rain has fallen and done much good. The millets (cheena and kodo) are now being largely resown in areas not ready for rice or maize. Rice has already been sown in considerable quantities, and there has been enough rain in a few places to give a good hope of its germinating."

On the Nepal border very heavy rain had fallen.

It is the tract immediately south of it that has not had enough. As to the condition of the people, Mr. Oldham says: "The condition of the people continues so far satisfactory, that is, all in want are provided for. The number of recipients of charitable relief is decreasing. The inspectors report that on each successive tour they find fewer and fewer ticket-holders, and that former recipients have recovered sufficiently to join the works. The poor-house inmates are now only 66." No cases of bad distress had been found amongst people of the respectable classes, though diligent enquiries had been made. Cases of emaciation on the works are still fewer than they were, and the work-people are generally thriving. The poorer cultivators are still the class that is feeling the scarcity most. The present position of the people is thus described by Mr. Oldham: "A portion of the population has benefited decidedly and directly by the scarcity. This comprises not only those whose services have had to be sought for in connection with it, but the bunniahs and holders of grain into whose hands the large sums spent on works ultimately come with this portion subtracted, the rest of the population are all feeling the scarcity from the well-to-do cultivator, whom it compels to the utmost frugality, descending through the poorer cultivators, who are so reduced and pinched that the effects of the scarcity have told perceptibly on their persons, down to the pure laborers, full half of whom are working for bare life on the relief works, and who would die by thousands were those works closed for a week; many of these people have had to subsist in years of plenty on one meal a day, and in this exceptionally healthy season, find no difficulty in thriving on it now. Food is their only object, and till rice became procurable in the bazars at its present rate, all but the old amongst them used to grumble loudly at the Sunday dole of pice instead of grain, saying that they had done so long without salt and condiments that they did not want them then."

No further cases of misery and starvation have come to light, but the whole sub-division, Mr. Oldham says, "causes incessant anxiety and needs constant watchfulness. The needs of the northern portion, which I have always regarded as the worst off, and in which most works have been maintained and the greatest attention concentrated, have now been I believe fully gauged, and its condition is improving. In the south Shikranah tract, on the contrary, in which the "rubbee" crops were fair, and which had not had so much attention paid to it, there has been almost a rush upon the works within the fortnight, and th' has been the more unexpected, as there was heavier rain here than in parts of the north se where the laborers are beginning to leave the works in large numbers."

This account of the condition of the people is on the whole sat rain has fallen, and there is every prospect of a continuance of moisture doubtless commence making advances to the ryots.

In the Dhaka sub-division (No. 2) Mr Kilby reports that there is no change to chronicle. The bazars continued to be supplied from Revelgunge, Sahibgunge, and Chapra, and as far as he has ascertained, the trade is even more brisk than it was during the previous fortnight. This Mr. Kilby attributes to the fact of many more carts being now available, as the Government importations have ceased. The Titurea and Meerpore circles, which had hitherto been considered the best off, have showed signs of distress, and more relief works have in consequence been started and the difficulty met.

The fact shews, however, as Mr. Kilby says, how dependent the people are on the relief works, and that constant vigilance is necessary. The Government rice has been given to the laborers at the rate of 12 seers per rupee, but the public at 10 to 11½. Arrangements are being made to distribute mixed grain in lieu of rice to the laborers every third day, as it is found to be deteriorating. Small-pox has decreased in this sub-division, and now that rain has fallen, will probably disappear. The health of the people is on the whole remarkably good. The rain had been pretty general; about 1 inch had fallen

In the Govindgunge sub-division (No. 3) Mr. Weekes reports that rice still continues very scarce, and that in most villages the ryots have now consumed, it is believed, the whole of the rubbee crop. Some of the ticcadars are said to have stores of grain, though much smaller than usual; this they are holding back to pay their laborers for work done in the rains. There had been two heavy showers of rain which had fallen over the greater part of the sub-division. It was greatly wanted; "not only had the millet and indigo been scorched up over an enormous extent of country but shrubs, bushes, mango and even jack-fruit were withering." The condition of the people, Mr. Weekes says, "has visibly changed for the worse, they begin to crowd on the relief works, and village works have been opened in consequence in the worse tracts, and advances of grain made to the cultivators (20 seers per man) pending larger advances" A brisk trade, however, is going on in maize and gram. In a few places, such as Kessariah and one or two other large marts, grain is stored, and this is now finding its way into the markets. Fears are entertained as to the supply of maize-seed, and seed-rice is much wanted.

From the Bettiah sub-division Mr Samuells reports that good accounts have come in from all the circles; there had been two falls of rain, and it was raining when he wrote (31st). He says: "The first fall of rain did not reach Bettiah town, and passed over Lowria without results. At Lowria, however, and at Dokraha Lalseriah, and all down the banks of the river, the fall ranged from 1 to 2 inches. Its effects were perceptible at once in the diminution of the number of kodalee-wallahs on the roads. The fields are being rapidly prepared, and I have heard no complaints of difficulty in procuring labor, nor have I reason to believe that there is any general scarcity of seed-grain. Isolated cases there no doubt are, and it is with regard to these that I should like authority to buy on behalf of the charitable committee, say 100 maunds for distribution through circle officers to the very poorest classes. We are not authorised to buy seed-grain, and the people who have no seed-grain to exchange for food-grain are the very people I wish to assist; to give them money would not mend matters, as they might in some places have a difficulty in buying."

To meet these cases Mr. Samuells has purchased 100 maunds from Mr. Gibbon for immediate distribution, and charged the same to the charitable fund.

The bazars are, Mr. Samuells reports, well supplied through the local trade. The bunniah's stores of rice are failing, Mr. Samuells thinks, but other grains are plentiful.

The general health is reported to be excellent, and the condition of the laborers on the relief works could not be better.

From the Ramnuggur sub-division (No. 5) Mr. Howe reports as follows: "There has been rain during the past week, heavy in the north north-west and central part of the sub-division and comparatively light in the east. A severe storm is also commencing as I write; ploughing has every where commenced." No change in the condition of the people is reported, but there had been a steady increase in the number resorting to the relief works, the daily attendance being now 31,880. The rain had not as yet drawn many from the works, but when once the rains fairly set in, a large decrease may be expected, as most of the laborers who are cultivators also will return to their fields.

The following are the prices at which food-grains have been procurable in the five sub-divisions.

No. 1943F, dated Purneah, 3rd June 1874.

From—W. KEMBLE, Esq., Magistrate and Collector, Purneah,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to forward herewith the fortnightly narrative for the period ending 30th May 1874.

A.

I have, during the past ten days, visited myself every relief circle in the district. Everywhere the crops are looking well, particularly in the north, where there has been a most beneficial fall of rain. In a few villages near Kushba Amour, the hail and wind has done considerable damage to the kauni and the mangoes. In every thana it has been brought to my notice, and I have myself seen, that a much larger area than in other years has been planted with bhadoi rice. The late rains have enabled people to hoe and weed their fields. As evidence of the distress in Kushba Amour, Dengrah, and South Kishengunge, I may mention that in some villages complaints were made to me that the ordinary laboring class were obliged to go on our works because the owners of fields could not afford to pay hired laborers, and had to weed and hoe and plough their own fields.

SUPPLY OF FOOD IN THE BAZARS.

Notwithstanding the large sales of Government grain, there has, in my opinion, been no falling off of private trade. I am constantly in the town, and at every visit find the traders as busy as ever. In my last narrative I said that Mr. Rattray had reported that "private importations were rapidly ceasing, making way for Government rice." I added that his impressions were formed from what he saw in the neighbourhood of his golahs, as I was satisfied that private trade could go on side by side with Government sales. I thought then that he was wrong in this opinion, and what I have since seen confirms my view of the question in that sub-division.

I have this fortnight seen in Kudbah as many pack-cattle as ever bringing grain up from Sahebgunge, and I have seen it sold in the hâts. I was at Dengrah ghât a few days back, and learnt that about 250 maunds of rice had been taken by private traders northwards across the ferry on that day. Since prices have risen at Kishengunge, complaints have been made by residents in Purneah, that the traders of that sub-division were buying in Purneah bazar.

Lieutenant Coles, relief superintendent of the Sudder, reports that at Mathour hât, 10 miles from Purneah, up the Ganges and Darjeeling road, he found a number of petty traders selling rice at 10 seers for the rupee; he reports the same of other hâts. On Saturday, on my way from Kudbah, I met traders going to and coming from market with private grain. In order to prevent any clashing with private trade, an arrangement, first commenced at Kushba Amour, has been made to sell at centres on days other than hât days, is being carried out throughout the district Government grain, however, finds its way to nearly every market.

CONDITION OF THE PEOPLE.

The condition of the people has improved in every circle except in Kishengunge and Bahadoorgunge, where, up to within the last month, importations from the Morung and Julpigoree kept the markets plentifully supplied. After the supply from the north began to fail, the people were in great distress, and there was a rush to get employment upon our works, and to buy grain from our stores; the people seemed seized with a panic; dacoities and grain-robberies were numerous. I visited Kishengunge and Bahadoorgunge myself, and directed that the sales from the Government golahs should be made by paid mooflies at the different minor golahs; the traders in the bazars were encouraged to turn their attention to importing from Purneah, and advances, which some of them took, were offered to them.

Baboo Ramchund Setya, agent for Rae Dhunput Singh, who has done much for his ryots in Kudbah, has bought some Government grain in Purneah, which he will send to Bahadoorgunge for sale to his ryots. Mr. Craven, the sub-divisional officer, has arrested a large number of dacoits and rioters, many of whom he has convicted and punished. Captain Knyett, the District Superintendent of Police, has gone up with some extra constables, and reports that the country is now quieter, and that the robberies had all been committed by hale and hearty men, and that in no case did the offenders appear to be in want. Kishengunge has alway been notorious for the lawless character of its inhabitants, and a number of bad characters have been recently released from jail. I have called upon all these to furnish security for their good behaviour.

Lieutenant Carnac has arrived to take charge of the sub-division as relief sub-divisional officer; this will leave Mr. Craven time to look after its criminal administration, and to restore, soon I hope, complete order.

The annexed memorandum shows the increase in crime.

B.

Mr. Cordner's return is attached; it shows a daily average of 17,404 laborers, being 1,406 less than were reported last fortnight.

The decrease is principally on the lower Koosi road No. 1, where the laborers have gone off to their fields.

On roads Nos. 5, 9, and 16, where the old and infirm have, since the last report was sent up, been drafted on to the petty relief works, and on road No. 7, where a few cases of cholera appeared, which caused all the work-people to disperse to their homes, the native doctor and relief officer went out and administered relief, rain fell and the disease soon disappeared, and the District Engineer now reports that the number of laborers is again increasing.

On the big north road the number of laborers has increased from an average of 6,058 to 8,044 per diem. Except on the north road, to which, under special orders, the system has not yet been extended, all the laborers are paid in grain A full review on the working of the system, which, so far as I have seen, is very satisfactory, will be submitted with the next report. The number of laborers on the relief officers' works amounts to a daily average of 24,753, being an increase of 11,490 over last fortnight's number. A copy of return C is annexed.

In the Sudder circle, the principal work is the Bishenpore tank, which, in the middle of the most distressed villages in this part of the country, affords work to 1,987 persons daily, mostly women and children. In Kushba Amour, Mr. Gouldsbury has 36 works, affording employment to 8,355 persons. I reported in my last narrative that women were working here with the hoe; from the last report, and from what I have seen myself, I find that they continue to work satisfactorily and willingly. In consequence of the near approach of the rains petty repairs to village roads are being planned, such as can be carried on in any weather.

In Bahadoorgunge and Kishengunge there has been a great demand for work. Mr. Bertelsen has eight roads in hand running all through his circles, besides a few tanks. Baboo Rajanee Nath has more tanks than roads. Work being opened at 30 villages, two most useful tanks have been nearly finished by the light labor ticket-holders on the Ganges and Darjeeling road.

Mr. Rattray has all along had ample work in hand. In Kishengunge sub-division, 6,360, and in Arrareah 6,990 persons are employed. On every one of our relief works payments are made in grain. I have seen them made in the Kishengunge and Kushba Amour circles: the people are all made to sit down according to their villages in gangs, and if their tasks have been done they get their daily dole served out. The task imposed is in all cases light, and it is only the incorrigibly idle who cannot get through it. Eight women do 100 cubic feet of earth-work in Kushba Amour; in Kishengunge, a little more.

C.

In consequence of the demand for grain for Julpigoree and Kishengunge, transport operations have been got in full work again. To supply the 50,000 maunds to Julpigoree maunds have been sent off from Dengrah; 10,000 maunds are now *en route* from Purneah; 5,000 have been sent from Kaleeagunge, and an order for 6,000 sent to the Naib of Boda on Gowalpokhur which is close to his frontier, and 5,000 maunds are to go on from Bishengunge, which will be replenished from Kudbah.

In consequence probably of bad weather, the Maldah boats have not been arriving very fast lately. I have heard of two boats having been lost, but the contents were in each case recovered. We have been working pack-ponies in the Sudder circle to fill the minor golahs.

The following table shows the number employed and engaged:—

	Employed.	Engaged.	Total.
Sudder	750	500	1,250
Kishengunge	400	281	681
Bulrampore	...	84	84
Total		...	2,015

No returns have been received from Dengrah or Kushba Amour where I have seen pack-ponies working in large numbers, and it was reported to me that Mr. Thornton had despatched grain by their means to Bahadoorgunge.

D.

The stocking of minor golahs has been going on satisfactorily.

Mr. Gouldsbury has in this been most energetic; he has not only got his 17 minor golahs stocked, but he has distributed a few maunds to nearly every village in his circle, where it is kept in the custody of the headman.

The quantity stocked is as follows:—

	Mds.
Sudder	5,792
Kusba Amour	7,454
Dengrah	9,500
Bulrampore, about	8,950
Kudbah	Not stated
Kishengunge	10,791
Bahadoorgunge	Not stated.
Arrareah	Ditto.

Though in Kudbah, Bahadoorgunge and Arrareah the actual quantity stored is not reported, I know that the golahs are ready and transport work going on.

E

The only advances made have been in grain, viz —

1,000 maunds to Mr. Shillingford.
500 „ „ Cave.

Bonds have been taken from these gentlemen to sell the grain at the Government rate, viz., 15 seers for Burmah and 12 seers for cleaned rice.

The advances made to villages by relief officers will be noted under the next head.

F.

I annex a copy of my district relief return for the month, which shows a daily average of 21,000 persons relieved, after deducting those shown as relieved by sale of grain.

In the Sudder circle Mr. Coles has included in the persons relieved by uncooked food those who came to his centres for relief under the ticket system.

Mr. Rattray has not yet fully introduced relief by ticket or by spinning and weaving, but he has been so very liberal in his general advances, that the necessity for this more special kind of relief has not been felt.

The system of advancing to village communities on their joint bonds has been worked chiefly in the Sudder, Arrareah, Dengrah, and Kushba Amour circles. In Bulrampore, acting on my order that so long as he found the village people ready and able to buy grain he should not advance to them, Mr. Moiklejohn has not taken any bonds, but a few have been taken in Kishengunge and Bahadoorgunge. Last week I ascertained that in Kusbah Amour and Dengrah, where there had been the greatest failure in the crop, the people had nearly all been supplied with an advance, with which they could, without having to consume their seed-grain, keep themselves and their field-laborers in tolerable comfort. I also saw that there was too great a rush for advances, that many persons applied for them, and in many cases got them, who ought not to have had them; and that the time of the relief officer, who ought to be more actively engaged in looking after real relief work, was too much taken up in listening to exorbitant demands and in settling disputes among villagers as to who should be and who should not be entitled to share in the village allotment

I also began to fear lest our stock of grain, for which there was a daily increasing demand for wages on our relief works and for purchase, should fall short; I therefore ordered that no more advances should be given, and that sales in small and limited quantities by salaried moodies, scattered in greater numbers over the country, should be increased. The annexed table shows the quantity of grain sold and advanced during the fortnight The village grouping has now been in a way finished all over the district in Dengrah; and in Kushba Amour it has been very completely carried out. In Kissengunge circle the arrangements appear good, and will no doubt be soon placed in working order by Mr. Carnac, who proceeds to-morrow to take charge of the sub-division. In Bahadoorgunge Mr. Bertlesen has arranged to have 17 groups, but has not been able, owing to press of work in such a large circle, where distress has been more severely felt than was anticipated, to allot to each by name the proper number of villages, and to instruct the Superintendents in their duty. In Arrareah Mr Rattray has arranged all the villages in his sub-division, viz, 746 in 89 groups; these groups I have divided into four circles, under the assistant relief officers, Gown Chunder Mookerjee, the Sub-Deputy Collector, and Gour Sahai, whom I have nominated as inspector.

The groups are in charge of the headmen of the villages, whose principal business will be to attend to the distribution of grain according to tickets given by the relief officer's assistants.

The total number of circles completed and officered is as follows:—

Sudder	13	
Kushba Amour	17	
Dengrah	12	
Bulrampore	8	more to be appointed
Kudbah	12	
Kissengunge	12	to be revised by Mr. Carnac.
Bahadoorgunge	17	
Arrareah	89	

All these, except those in Arrareah, are minor golahs and relief centres

If to the number of persons who according to the abstract from the daily relief return referred to in the first part of this section, which shows a daily average of 21,000 persons in receipt of charitable relief, be added 14,209, the number employed on the Department Public Works roads, we have a total of 35,209.

The total quantity of grain disposed of by the sale to the public and advances during the fortnight is 63,707 maunds.

It is hard to say how many persons relieved are represented by this; Mr. Rattray estimates that the quantity of grain which he has advanced, viz., 39,536 maunds, will be divided among 18,768 households—taking 5 persons to a household, this will give relief to 93,840 persons.

The annexed table shows the working of the native doctors. Dr. Picachy, the Civil Medical Officer, is now making a round of the circles. He visited Kudbah with me on Saturday, and found everything working well; he is now going up north

G.—Financial Results of the Fortnight.

The expenditure reported last fortnight amounted to Rs 7,17,939-9-0 + 12,604-11-5 = 7,30,544-4-5.

	Rs.	A.	P.
Village roads	10,468	0	0

A Daily register of persons relieved each month in each Relief Circle for the month beginning 25th April, and ending 24th May 1874 (*inclusive*).

N. B.—1. This is to be kept by each superintendent. It should show results from the 25th of one month to the 25th of the following month. One copy should be sent by the superintendent direct to his immediate superior, another to the Collector, and another to the Commissioner. These last two should be posted so that they will reach the addressees not later than the first of the following month.

2. Each Collector is also required to send on the 1st of each month for the whole of his district, a Statement of relief in the above form.

The figures in column 3 shew the actual stock in the government Golahs on the 25th May 1874, as per goladars' returns, exclusive of the grain in the minor golahs as reported in the body of the fortnightly report. The figures in columns 4 to 8 will not generally tally with the last return, as the circle officers have submitted more accurate returns this time.

W. KEMBLE,
Magistrate-Collector.

PURNEAH DISTRICT.

Names of roads.	Progress in marking out relief works	Progress in opening works.	Number of laborers thereon				Supply of food thereat		Condition of the laborers and general features of the country	Mode of payment.	Rate of wages	Arrangements for tools	Disbursement during the week.
			Class I	Class II A	Class II B.	Total.	Amount of Government grain sold to laborers.	Proceeds of sale.					
							Mds. Sr	Rs. A P.					Rs A P
No. 1 Purneah to Kedgunna.	All line has been laid out, and a portion levelled, estimate in progress.	8 parties at work	1 071		411	2,612	130 28	349 8 6	There is a further decrease in the number of laborers on this road to that stated in last week's report I was under the impression that probably a large number might be employed on 2nd class relief works, but on visiting them I found very few able-bodied men employed This road does not run through a highly populated country, and a great many of the cultivating community are now employed in the fields. The class IIB people were only employed in the early portion of the week, and have now been handed over to the relief officer Rain is very much required in this part of the country, as there has not been any for some time The country is high and sandy so that it can't remain so long without rain as the lower lands. Condition of laborers is very good.	All payments are made to the laborers by sub-cashiers, the number of whom depends on its length. A sub-cashier generally pays two or three parties, if they are not too far apart He is himself situated between two parties on either side, and as he is allowed two cash jemadars he sends them out to each of the parties every day These cash jemadars receive pay orders from the sircars, and the money is given to the duffadars of the various gangs for distribution to his men He then brings back the pay orders signed by the duffadars, thereby making them receipts, and hands them over to the sub-cashier, who makes the necessary entries in his cash book, a copy of which is sent in weekly to Executive Engineer for recoupment accompanied by the vouchers.	The contract rates are as follow for class No I — Ordinary earth work in banks up to 5 feet in height at 3 annas per 100 c. ft Ditto in banks above 5 feet, 3½ annas Earth work in hard ground banks up to 5 feet, 4 annas per 100 c. ft. Ditto in banks above 5 feet, 4½ annas In exceptionally hard ground rates up to 6 annas may be granted at the discretion of the Executive Engineer The task work rates for Class II, Division A, are as follow - Annas. Men . .. 2 Women . 1½ Children 1 In order to earn the above rates, each man must excavate 50 c. ft. in ordinary ground for banks up to 5 ft., and 45 c. ft in banks above that height In hard soil a man must do 40 c ft., in banks up to 5 feet, and 35 c ft in banks above that height. Except in the case of beldars' women, who work with their husbands at contract rates in Class I, it is very difficult to lay down a task as in most cases they refuse to carry earth, we have therefore but few women in Class II A In laying down each man's task I have been guided by the fact that a non-professional laborer, after he has been at work for some time, can earn from 2 annas to 3 annas per day at our present contract rates by working really hard	Every effort has been made to induce the laborers to bring their own tools, but it is to be regretted that this has not been attended with any very great success, and especially since we began to issue large quantities of Government tools to each of the works. When the works were first started but very few Government tools were issued, and most of the laborers who came to our work brought their own It was feared, however, that villagers were beginning to think that it was no use applying for work unless they brought kodals, so that, after a consultation with the Magistrate, tools were issued to each work, and now, as a rule, the aborers work with Government tools These remarks only apply to the unprofessional laborers, as they and others, as a rule, have their own tools and bring them to the work	415 12 0
No. 2, Nathpore to Alwaree	The whole line, 82 miles in length, laid out and levelled, estimate in progress.	13 parties at work	50,653	3 063	2,577	56,313	1,716 5	4,663 0 0	There has been an increase in the numbers this week as the works have been opened out in some new places. From the latter end of the week *all* the class IIB laborers have been handed over to 2nd class relief works When these people come to us we just give them work until arrangements can be made concerning them, as we refuse work to no one until we are certain of 2nd class work being ready for them. Rain is very much wanted up in the north. As yet the crops look well, but they can't stand much longer without a good shower, clouds have been hanging about, and rain is daily expected Condition of the laborers is everywhere very good.				5,111 7 3
No. 4, Kissengunge to Nekmurd	The whole line laid out and levelled, estimate submitted.	3 parties at work	6,007	73		6,080	146 30	388 10 8	There has been a slight increase in the number of laborers since last week There are no class IIB people employed on this road, as there are plenty of 2nd class relief works in the neighbourhood.				468 0 0

									There are signs of distress towards the eastern end of the road, but as far as the Public Works Department laborers are concerned they are all in good condition. The crops are looking well, but rain is much wanted in this part of the country. A slight shower fell at Kissengunze on the 20th. The number of laborers are gradually increasing, but we have not yet got back as many as we ought to have of the able-bodied class. A great many people are now employed in the fields at weeding and other works.		It may be observed that the rate per 100 c. ft. for task-work is in excess of that for contract, but then it must be remembered that a man can never earn more than 2 annas as long as he elects to do task-work, and he can at any time join the contract gangs, where by real hard work he may get up to 3 annas a day. All able-bodied men must now join either the contract or task-work gangs, and subsistence allowance will only be granted to such as are really unable to do earth-work.		
No. 5, Dengrah Ghat to Toorkali.	Whole line has been laid out, levelled, and estimate submitted.	4 parties at work.	8,478	... ..	.....	8,478	558 0	1,382 6 3	We have no class IIB laborers, as the relief officers have taken all of them off our hands. The crops are looking well, but rain is much wanted. The condition of the laborers is everywhere good. There is a decrease in the number of laborers this week, as some left the road for field work. All the laborers are employed on piece and task-work.	.....	They will be chiefly employed in breaking clods, dressing slopes and surfaces of roads. The pay for this class, is— A. P. Men ... ... 1 6 Women ... ... 1 0 Children 0 6	.....	1,923 11 3
No. 6, Dengrah Ghat to Bhopla Tajpore.	Whole line laid out and levelled, and estimate submitted.	Ditto ...	8,499	490	.....	8,989	385 23	1,057 13 6	Rain is much wanted in this part of the country, and the bhadoi crop is not looking so well as it was. I am happy to state that cholera is fast disappearing in this part of the country, though our numbers are still reduced in consequence of the panic, and those who left the work between the 16th and 18th miles have not as yet returned. This has thrown the work back a great deal, but I trust that in a few days all will be as before. It was unfortunately one of our largest parties of class I laborers that were dispersed, so that our number in this class are much reduced in this week's report.	.....	.....	.....	1,119 12 3
No. 7, Bulrampore to Tarapore.	The whole line has been laid out and levelled, and estimate submitted.	4 parties, distributed in gangs over the roads.	6,659	273	8,994	15,931	400 0	1,065 0 0	This is the last week that we will show such a number of class II B people on this work, as Mr. Meiklejohn has informed me that he is now prepared to take them over from us. The crops are looking well, as the heavy rain that fell on the 12th instant did a great deal of good. The condition of the laborers is good.	.....	.....	.....	2,645 15 1
No. 8, Hurinkhoree to Maldah.	Work surveyed and levelled, and estimate submitted for sanction.	Work can be taken in hand as soon as it is considered advisable to do so.							The number have decreased on this road, as many of our class IIB people has been taken over by the relief officer, and also some have left the road for field work.	.....	.....	.....	.....

W. KEMBLE,
Magistrate-Collector.

R. A CORDNER,
Executive Engineer Purneah, District

No. 349—S. R., dated Doomka, the 2nd June 1874.

From—JOHN BOXWELL, ESQ., Officiating Deputy Commissioner, Sonthal Pergunnahs,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit a narrative for the fortnight ending May 31st.

I have received reports from Deoghur, Rajmehal, Jamtara, Kundahit, Hendua, Benagarhia, and Godda. The last only came in to-day. I have not heard directly from Sultanabad.

A.—STATE OF THE COUNTRY.

Grain has absolutely failed nowhere, but it is quite clear that in many places we have been barely in time with Government aid to save failure.

Sahebgunge is well supplied; plenty of food can be had at a fair price. In Rajmehal the price of rice went up to 7 seers. Mr. Stewart brought the price down to 9 seers by importing and selling from a Government store.

Rice is said to be very hard to get down the bank of the Ganges from Rajmehal. The reports are from Englishmen who ought to be able to import, at all events for their own coolies. Some traders in the Daman have imported from Sahebgunge maize, which they previously exported from Bario. It is plain enough that this export of grain was pure waste.

Mr. Stewart says about Rajmehal:—"The real cause of the deficiency was the inability of private traders to import rice with any chance of being able to sell it at remunerative rates." This is an obscure sentence, and the matter wants enquiry.

In Godda prices are high, and rice is very high, but among five markets quoted by Mr. Grant, the following is the line of cheapest food:—

(1.)	Belbadda	... Barley	... 13	seers.
(2.)	Perozepore	... „	... 14	„
(3.)	Murrow	... „	... 15	„
		... Rice	... 11	„
(4.)	Godda	... Barley	... 15	„
		... Rice	... 12	„
(5.)	Pathargawa	... Barley	... 15	„
		... Gram	... 13	„
		... Janara	... 12	„

This cannot be called bad for a distressed district.

Both in Rajmehal and Godda people are said to be looking well. Mr. Stewart does not wish to start charitable relief; Mr. Grant has already begun. Mr. Grant believes that as the native store of food lessens day by day the people are being pinched more and more, and that they are now suffering great distress. I shall give some reasons later on to show that the facts reported by Mr. Grant would support a more hopeful lookout than his.

Mr. Wilmot says food is getting scarcer in Deoghur. He has searched out so-called cases of half-starvation with great care; he has reported them minutely, and I agree with him in thinking them all rather favorable signs than otherwise. If nothing worse than the worst of them has occurred, the sub-division is well off for the times.

Prices are rising, and people are becoming very anxious. There, as in the district generally, there is an inclination to cry out to the Government to give help. This feeling is very infectious; it has come across our border from Manbhoom chiefly.

In the south of the district prospects now are a good deal worse than anywhere else. I have already described this tract; it is about cut in equal parts by the Ajay river, and one-third of it lies west, and two-thirds east of the chord-line at Jamtara. As I have already said, it has been neglected by everybody. In October the Jamtara officer was removed to settlement work. The police were left there against orders, because I was afraid to remove them suddenly in the face of scarcity difficulties, with no superior officer on the spot.

The farthest parts of Pabia are more than 50 miles from Doomka by a bird's-flight across the Ajay, and the more, with no road.

A fortnight ago Mr. Smith went to Jamtara, giving up all other work to manage relief. His report shows a bad state of affairs: people are thin and wretched, none are said to have died of actual want of food, but the poor people are all very badly off. Mr. Smith says—"the appearance of a great many people who flock to our works is very bad indeed; the signs of want of food show plainly on them,—men, women, and children are equally emaciated, some so much so that I have made them over to the native doctor for sick diet. Again, one day it was reported by a chowkeedar that two persons were dying; I sent off the native doctor at once, and found that two children, aged 10 and 2½, were suffering greatly from want of food, but they had been relieved by the village mustajir before he arrived."

Mr. Smith has been giving charitable relief in Jamtara.

Within the last fortnight we have an immense accession of strength in officers. Mr. Hand has taken charge of relief operations in Jamtara; sub-deputies are at work in Nala and Kundahit, and a canoongo in Jamjuri; I have also turned the Deputy Inspector of Schools into a relief officer.

The distances are—

Jamtara	to Nala	...	15 miles S. E.
„	to Kundahit ...	...	23 „ E.
„	to Jamjuri ...	...	15 „ N. E.
„	to boundary of district ...	...	23 „ W.
Doomka	to Jamtara ...	....	40 „ S. W.

We have lately got a supply of 18,000 maunds of rice to Jamtara, which has been distributed between Jamtara, Kundahit, and Nala. Useful clearing of old tanks has been started; the poorest people are being relieved gratuitously; while work is given to all who can and will work. This part of the district has thus been caught not a moment too soon. There is now breathing time to settle on the next step, which I shall do under orders of the Commissioner.

Nearly the whole of the past fortnight I have been in Doomka. I went to Noni for two days, and then sent Mr. Birch there. The zemindar of Nagwan has promised to obey orders in everything, and has engaged to take Rs. 5,000 advance from the Government to help his tenants,—they are mostly Sonthals, and are averse to dealing with him. Mr. Birch reports badly of the ryots' prospects, but neither he nor I saw any signs of present want anywhere; they are noisy and clamorous for help, and say if they don't get it they must eat their seed-corn. The eastern part of Hendua belongs to Rajah Nilanund Singh; his naib has sent a message that he wishes all the ryots to be left to him, but he wants to borrow Rs. 20,000 from the Government. I am in doubt whether the strict order to made future advances only in grain applies to advances for the improvement of estates or not: I expect an answer daily from the Commissioner. The west of Hendua belongs to Baboo Udit Narayan Singh, of Nagwan; beyond saying he would like to borrow, he has done nothing yet to help his people, he says they won't let him. I have heard no bad news from the Daman, and all the people who come from that side look comfortable; in fact, there are no miserable people coming into Doomka yet from any quarter.

The chowkeedars of Mohammadabad came in yesterday. The pergunnah is 20 miles long and 10 wide in the widest place; it lies immediately south of the Ranibahal hills, north of Beerbhoom, and east of Kundahit. The chowkeedars all looked well and hearty; some of them who had been dispossessed of their land this sowing time were loud in complaint, but there was not a word of anybody starving. There had been rain in the east about Rajbundh, and ploughing was going on, and a little dhan had been sown. In the west they were still waiting for rain.

This pergunnah of Mohammadabad I had always classed with Kundahit and Dari Malleshwar. In Benagarhia I was told Mohammadabad was in a worse plight than Dari Malleshwar, and Mr. Dawson said the Mohammadabad crops were as bad as any in his beat. I know the hard times must be felt there, but nothing like the cry has come up that has come from Kundahit. I have had no special report from Sultanabad; but I have heard incidentally that things are looking better there than was feared some time ago.

The weather has changed all over the district. The change was long in coming, and is slow now, but undoubted. We had very few storms and very little rain in April and May, though lightning was unusually fatal. Ploughing was long delayed. At Doomka for the last ten days clouds have been gathering and clearing; thunder is frequent; some good showers have fallen. The hot westerly winds have long ceased, and now the sky is black with clouds, and it has just stopped raining. In Rajmehal Mr. Stewart thinks the rains have set in steadily. There has been a little rain in Deoghur; none yet in Godda.

Small-pox is bad in many places, and cholera has broken out often in widely distant prts, sometimes very fatal over a small area, but never settling down badly on any one considerable tract, or lasting long anywhere. I hear of no fever except among Bengali clerks and our servants.

Food-thefts are not increasing, they seem more numerous in and about Doomka than anywhere else; but we have had three dacoities at the two ends of Mohammadabad.

Beggars are wonderfully few. Lepers, cripples, and blind men come for copper or rice, generally on Sunday; but I can safely say that, judging from the bodies of the people I have seen, I should never have dreamed of scarcity. The short crops we saw in November and December, the cessation of rain, and what I hear, are the sole grounds for believing in the scarcity.

I know now that in Kundahit and Jamtara there are many people whose bodies show signs of want of food, though I have not seen them. But this fact remains, that Manihari, North Rajmehal, Sultanabad, and Benagarhia cried out long before Kundahit and Jamtara, and that Jamtara alone up to this shows actual signs of want. This proves that cries are not to be trusted. I suppose everyone knows this, but there is no harm in saying it.

I have heard of about 30,000 maunds of grain stored privately. I can only repeat that I think the information useless. There must be so much more than we shall ever know of, and so many lies are told when questions are asked, that I think the heading might very well be struck out.

The crops on the ground are now hardly anything,—a little sugarcane is about all.

B.—Relief Works.

The list of work is given separately with the daily average. Piece-work and grain-payments have been introduced wherever there is grain to pay, that is, in Rajmehal,* Godda, and Jamtara.*

In Benagarhia payment must be made in cash because the grain there in store belongs not to the Government, but to a merchant who has bought it for cash from the Government; we could not give coolies orders on stores not our own.

The new road from Doomka to Mullarpore has been lined out. The Commissioner has stopped work on it. The small Daman bunds are going on well enough.

Payment in grain has been begun so lately that it has not been found possible to discuss the system at length in this report.

On one of our largest works, the Jamtara and Doomka road, grain had not been stored till within the last fortnight, and even now only to the extent of 2,000 maunds.

At Katikoond we have no grain, and there never was any proposal to store there. I perfectly understand that we must pay in grain wherever we have it, but I have not understood so far that we are to indent for such additions to our original estimates as will enable us to pay in grain everywhere.

C.—Transport.

Our transport difficulties may possibly be beginning, up to this we have had none; we had plenty of carriage, and generally short distances. We shall have to import more grain than was expected, partly on account of the orders to pay laborers in grain, and partly on account of the unexpected distress in Kundahit and Pabia. No part of the southern distressed tract is more than 25 miles from a railway, loop or chord-line. The Ajay is between the chord-line and Kundahit; from Saintia the More and another river are between the loop-line and Muhammadabad. From Mallarpore there is no river in the way, but there is no road.

From Saintia there is a good road to Soory and on through Nagar to Kundahit. Carts will now be dear and hard to get, a Sonthal who owns 15 refused to hire out one because tillage time is coming on. But there will be no very great difficulty in carrying what rice we want. My first batch of 30 Doomka carts left this to-day. We have already got 4,000 maunds of rice across the Ajay from Jamtara and into store at Nala. There is nothing to say about carriage in the north and east.

D.—Storage.

The Rajmehal rice has all been received and stored. Some of the Taljhari rice is at Patna, waiting for a wagon to carry it on, and the Patna rice is in the bungalow. I believe the Godda rice is all stored; the report is not clear. I have heard nothing of storage at Sultanabad. In Jamtara there is room now for 5,000 maunds, golahs for 4,000 more are being made; the zemindar could give room for 6,000 if required. At Nala a golah for 2,000 maunds is nearly ready.

Golahs are being made at Kundahit. 4,000 maunds have been sent to Nala; 2,000 have been delivered to the Public Works Department for the Jamtara road; and 1,000 have been advanced to the zemindar of Jamtara.

E.—Advances.

There is nothing to report.

F.—Charitable Relief.

About 100 persons a day are receiving charitable relief. The officer at Nala is also giving relief; particulars have not been received. Mr. Grant has expended in charitable relief over 6 maunds of rice. Charitable relief is only just begun; in the next narrative I shall have results to give.

G.—Financial Statement.

The information is given in a separate sheet.

---

* Not accounted for in detail.

Statement showing the Storage and Consumption of Government Grain in the Sonthal Pergunnahs for the fortnight ending 30th May 1874.

Men ... 891 Women ... 373 Children 128	Up to this time difficulty has not been felt by the laboring class in obtaining food-grains from the hatias and bazars. The stock of the country is enough for ½ of the inhabitants till the next harvest.	Task-work, cent. per cent.	The condition of the people has not become very miserable yet; food grains are still available, but their value is gradually enhancing; so it seems that distress will be soon felt.	Twice a week by sub-cashier and overseer in charge of work.	Digging kunkur at 4 as. per 100 cubic feet.	Supplied by department.	26 5 9
13	Repairs to Bhagulpore and Soory road.	Ditto ...	Ditto ...	Class I. Men ... 154 Women ... 5	Ditto ...	Ditto ...	Ditto ...	Twice a week by overseer in charge and sircars.	Ditto and carting metal at 8 as. per 100 cubic feet.	Ditto ...	30 12 6
14	Repairs to Bahawa and Burhait road.	Ditto ...	Ditto ...	Class I. Men ... 800 Women ... 659 Class II. Men ... 23 Women ... 38	No information received this week from the Superintendent in charge of the work. Explanation called for.						
15	Repairs to Moonaroe and Amrapara road.	Repairs nearly complete. The work is stopped at present, as it cannot be carried on until the rains set in.									
16	Repairs to Pakour and Heeranpore road.	Complete project.	Completely opened.	Class I. Men 515 Women 150 Children 14	No information received this week from the Superintendent in charge of the work. Explanation called for.						
17	Repairs to Doomka station roads.	Complete project...	Ditto ...	Class I. Men ... 59 Women ... 12	Same as in No. 10 ...	Task-work, cent. per cent.	Same as in No. 10 ...	Twice a week by overseer in charge and sircars.	Digging kunkur at 3 as. 6 p. per 100 c.ft. and carting at 7 as. per 100 c. ft.	Supplied by department.	6 8 9

20	Burhast to Godda road.	.....	.....	Class I. Men ... 1,328 Women ... 407 Children... 89 Class II. Men ... 285 Women ... 315 Children .. 167	No information received this week from the Superintendent in charge of the work. Explanation called for.						
26	Brinda tank ...	.....	.....	Class I. Men ... 2 Women ... 14 Children.. 6	No information received from the overseer in charge of work.						
29	Mohashpore to Doomka road.	10 miles of road nicked out, and the centre line of 5 miles laid out, —total 15 miles.	6 miles	Class I. Men ... 933 Women .. 699 Children... 4	Nothing ...	.....	On local enquiry it was found that the Sonthals of the villages between Narangur and Soondreesal had not rice for their food for the last three months. They lived chiefly on roots of certain indigenous plants, green leaves of peepul trees, mohwa and seeds of sál trees. They appeared somewhat reduced in health, owing to want of proper nourishment. Relief works should be commenced at this quarter at once, in order that the people may recruit sufficient strength to work during the rains, when it is apprehended sickness will prevail over the half-starved people. The country between Narangur and Bissonpore presents an undulated surface, with hardly any intervening plains.	Daily payments in copper and silver coins are made to the laborers by the civil authorities.	A. P. Men ... 2 0 Women ... 1 6 Children ... 0 9	The laborers bring their own tools.	699 0 0 The work is going on under the Civil Officers.
31	Constructing a bund at Katikoond.	Plan ready ...	.....	Class I. Men ... 599 Women ... 439 Children .. 29	Same as in No. 10 ...	Task-work 90, and daily labor 10 per cent.	Same as in No. 10.	Daily by sircars.	Men ... 1 9 Women ... 1 3 Children ... 1 0	Supplied by department.	81 9 0
											2,915 2 9

No high-caste coolies have yet appeared; they generally belong to the lower classes, such as Sonthals, Dhangers, Bacories, Koots, &c.

DENO NATH MOOKERJEE,
Accountant, for Offg. Executive Engineer, on tour.

SONTHAL PERGUNNAHS DISTRICT.

NOTE.—No high-caste men such as Brahmins, Kayasts &c., have yet appeared to work, but some unprofessional men, such as Khatoories, are seen on the works.
* No daily reports received. The overseer in charge of works shows in his weekly progress report that the number of laborers on this work has been included in that on the Boria to Moulhari Road, No. 7 Explanation called for.

DINO NATH MOOKERJEE,
Accountant, for O. g. Executive Engineer, on tour.

No. 5162—S.R., dated Bhagulpore, the 9th June 1874.

From—H. M. DURAND, Esq., C.S., on Special Duty, Bhagulpore,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly Divisional narrative due this day.

A.—STATE OF THE COUNTRY.

2. Since the submission of the last report, the condition of the distressed tracts has on the whole continued favourable. The most marked feature of the fortnight under review has been the considerable rainfall by which the greater part of the division has been visited. Accounts from all quarters agree in showing that heavy showers have fallen throughout the four districts, and prospects are materially improving. The one exception is the Godda Sub-division of the Sonthal Pergunnahs, from which no rain is reported. The deficiency, however, appears to be local. A severe storm passed over the neighbouring tract of Monecbaree some days ago, and numbers of labourers were leaving the works for their fields.

The Bukhtiarpore circle in Monghyr was still suffering from drought when the Collector's fortnightly narrative was submitted, but Mr. Manson has since reported the welcome fall of a smart shower, and there seems to be every prospect of more.

From the report of the Purneah District for the week ending 4th June it appears that the rainfall at the Sudder Station amounted to 4·19 inches, and the Collector states in his diary for the previous week that heavy rain had fallen elsewhere and the crops were looking well.

From the north of Bhagulpore the accounts are equally satisfactory. Mr. Kirkwood telegraphs on the 3rd instant "torrents of rain during the last 12 hours," and his narrative received yesterday gives further particulars. It may be gathered that the whole of the distressed tract has benefited largely, though unequally, by the weather of the last few days.

The same remark applies to the division; a sudden impetus has been given to the cultivation. Labourers are steadily at work in the fields, and in parts the relief works are showing a decrease in numbers.

General Condition of the People.

3. The general condition of the people seems to be good. Prospects have decidedly improved of late, and there are no symptoms of increasing distress in the tracts originally affected. In Kissengunge, there seemed at one time to be serious grounds for apprehension. The price of grain had risen in parts to the extreme famine figure of five seers, and crime was greatly on the increase. The Collector, however, visited the sub-division in company with the District Superintendent of Police, and it was ascertained that the various robberies and dacoities reported were the work of old and notorious criminals, not of a starving population. Action was successfully directed against several of these cases, and the panic has, in great measure, passed away. The Collector is still of opinion that there is a decided deficiency of grain throughout the tract in question; but it is hoped that by the aid of advances the southern trade may be stimulated, and that meanwhile the measures of relief adopted may prove fully adequate to meet the wants of the population. I may mention here that in addition to the special sub-divisional officer recently appointed by Government, two naib tehsildars have been sent to Kissengunge for employment on relief work.

In the Monghyr district the tract of country about Chakaie was lately reported to be suffering from a sudden increase of distress, but since that time the Commissioner has had the opportunities of eliciting full particulars from Mr. Campbell, the Joint-Magistrate at Jamoooe, and he is of opinion that there was hardly sufficient cause for the alarm. It appears that some 200 or 300 persons have collected about Simultolah where they have been receiving relief from Mr. Foley. Mr. Campbell seems to have assumed from this circumstance that distress existed in the surrounding country, though he admits at the same time that his own special inquiries, and those of the sub-deputy, failed to support the assumption. It is stated that the people assembled in Simultolah in receipt of relief came from eighteen specified villages. The Commissioner has directed an inquiry to be made with a view to their identification. If the result be to show that the people in question do not belong exclusively to the villages specified, but rather to the beggar population of the whole sub-division, there would be no reason to anticipate equal distress throughout this part of the country where Mr. Campbell himself reports that crops were not specially bad. In case the recipients of relief do in fact belong exclusively to the specified villages, it will be ascertained whether there be any special circumstances to account for their condition. If it appear that the whole tract is likely to be affected in the same manner, immediate action will be taken. Meanwhile there is no reason to apprehend any failure of food supply, as Mr. Foley is in possession of a store of grain, and the place is within reach of the railway.

With regard to the remarks made in the fortnightly district narrative of the Sonthal Pergunnahs concerning the state of the Deoghur Sub-division, no details as to the distress therein referred to, have yet reached the Commissioner. An application for a supply of 7,000 maunds for the town of Deoghur was lately made, and to this demand the Commissioner refused to accede without further particulars. A report has been called for. Reference was made in the last narrative to certain alarming statements which had been circulated as to the state of the Sinerahi circle. Mr. Kirkwood has visited this tract, and it appears from his report that the

country around Peepra is in fact suffering somewhat severely; the rest of the circle seems to be free from any increase of distress. Mr. Kirkwood found the management of affairs very far from satisfactory. He thinks more works should have been opened. The officer in charge seems to have trusted entirely to the principal roads which the people did not follow up as the work gradually removed further away from Peepra. Measures have been taken to bring about a better state of affairs.

Seed-Grain.

4. The question of seed-grain still seems to be in a somewhat unsettled condition. In Purneah, where alarm was at one time felt, there appears to be an ample supply. The Collector came some time ago to the conclusion that advances of food made to ryots with the view of setting free any means they might possess for the purchase of seed would be a sufficient measure of relief. Since then nothing further has been heard on the subject.

In North Bhagulpore the people refused to purchase at cost-price the seed brought up from Julpigoree. Mr. Kirkwood, however, seems sanguine that the whole quantity will be gladly taken at the local rate of 15 seers. In connection with this point the Commissioner has noticed in the last fortnightly narrative of the Bhagulpore Division, a remark to the effect that Baboo Ram Shunker Sein had purchased 100 maunds of seed-grain for relief purposes. It is not understood why the imported grain was not utilised, and an explanation has been called for. Mr. Kirkwood is now at Sinerahi, and will no doubt set matters on a proper footing.

In the Monghyr district there seems to be some difficulty in the seed-supply. During his visit to Monghyr, three days ago, the Commissioner had an opportunity of ascertaining the latest views of relief officers on this point. They seem to be of opinion that there is a deficiency of seed in certain tracts, though it is to be procured in other parts of the district. Mr. Currie especially reports that it is impossible to carry out the proposed arrangement of advancing grain to ryots for exchange in seed. Under these circumstances the Commissioner has directed the Collector of Monghyr to take the orders of the Lieutenant-Governor immediately on His Honor's return from Tirhoot, upon the proposal now again brought forward to advance in cash for the purchase of seed. The Commissioner is himself opposed to the cash advances. He entertains considerable doubts as to the alleged deficiency. Seed is admittedly procurable in Kherukpore, immediately adjoining the distressed tract of Jamooee. Moreover, the distress in Jamooee itself has so far fallen short of general expectation. There seems to be even less ground than usual for trusting the outcry that ryots are helpless in obtaining seed, and the Commissioner cannot but think that the granting of cash advances in this case would involve an unnecessary departure from the declared policy of Government.

Prices.

5. A table of prices throughout the division is appended.

The Commissioner has noticed in the district narrative of the Sonthal Pergunnahs, a table showing "the line of cheapest food" in the Godda Sub-division. He would remark on this point that prices in Godda seem to him to be excessively high. Mr. Grant's report shows the rates of rice at Belbadda, Ferozpore, Godda, and Patherguma to be from 7½ to 9 seers. In Murrow only does the price fall to 11 seers. Mr. Grant has started charitable relief among certain destitute women and children, who had collected at head-quarters, and it appears to the Commissioner that his action was fully warranted by the state of prices in his sub-division. According to the latest returns there has been a considerable fall in the price of rice at Purneah, which is owing, no doubt, to the favorable prospects of the season.

Village Groups.

6. There is nothing important to note with regard to the state of the grouping system. The work is going on well everywhere, and no hitch or difficulty seems to have arisen.

B.—Relief Works.

7. The condition of the relief works throughout the division is on the whole satisfactory. The Purneah district particularly shows a most gratifying state of affairs. Regular piece-work and payment in kind have now been universally introduced, and the system is working admirably. With reference to the question of payment, the Executive Engineer remarks, "Payments to laborers in grain is now the established rule in this district. Just at first starting some of the laborers objected to the new system, but where its advantages were explained to them and that they would have no difficulty in disposing of what they earned over and above that required for consumption, they all agreed to it, and the new arrangement is now very popular."

The number of laborers in this district, is increasing. On a few works a decrease is noted, but this is owing, no doubt, in part to the absorption of second-class laborers, and to the late rainfall, which has given an impetus to agricultural work.

In Bhagulpore, the state of affairs is not altogether so satisfactory. Grain payments are not yet universal throughout the district. In the case of works south of the Ganges, payment in cash cannot be avoided, as there are no Government grain stores within reach, but some other works are still under the old system, and an explanation has been called for by the special Executive Engineer.

The number of laborers on a few of the works shows a decrease. This is no doubt attributable, as elsewhere, to the rainfall and the absorption of the second-class labor.

In Monghyr where the state of the works has always been backward, cash payments are still very general. Measures have been taken to bring about the more rapid introduction of the new system.

In the Godda Sub-division of the Sonthal Pergunnahs, Mr. Grant reports that the number of laborers has risen from 8,000 to 12,046. In other parts of the district numbers fluctuate, probably under the same influences as have been at work elsewhere.

The introduction of piece-work is going on rapidly, and seems to be generally successful. Appended table shows the percentage of first and second-class laborers in each district. It will be seen from this that Monghyr is decidedly behind-hand. An explanation has been called for and the matter is under enquiry. The broad results of the fortnight under review seem not unsatisfactory. The percentage of regular contract piece-work laborers throughout the division is about 84. The second-class laborers now form only 5 per cent., and they are still being rapidly absorbed. Grain payment is being introduced on all works which admit of it, and where already introduced is becoming popular. The condition of the laborers is good, and the work seems to be sufficient to meet the wants of the population.

Import and Export.

8. The annexed table shows the movement of grain under review.

Classification list of laborers on D. P. W. Relief Works throughout the Division during the fortnight under review. Total number of laborers of all classes, 334,395.

Name of District.	Class I.		Class II.
	(a) Laborers doing actual contract piece work.	(b) Laborers doing task work.	Laborers paid by the day.
Bhagulpore	147,738 over 90 per cent. ...	10,915 under 7 per cent. ...	4,813 under 3 per cent.
Monghyr	26,823 „ 70 „ ...	1,531 „ 5 „ ...	10,284 over 25 „
Sonthal Pergunnahs	18,037 „ 64 „ ...	9,468 over 93 „ ...	883 „ 3 „
Purneah	87,991 „ 94 „ ...	14,530 „ 14 „ ...	1,927 under 2 „
Total for division ...	280,584 or about 84 per cent.	36,444 or about 11 per cent.	17,907 or about 5 per cent.

Storage of Grain.

9. A table is appended showing the storage of grain throughout the division.

The three Districts of Bhagulpore, Monghyr, and Purneah have now been mapped out with a view to the rapid defusion of food during the rainy season, if necessity should arise for replenishing the Government golahs. Suitable depôts have been chosen in central positions on road or river, and it is hoped that a sudden call from any point could be promptly met.

The special report upon this head called for by Government Circular No. 1838—SR, of the 26th March, has lately been submitted.

Sales.

10. With reference to sales of Government grain, the Commissioner is glad to be able to report that no interference with private trade has as yet been observed. From all sides accounts agree in showing that in those parts of the country where Government sales are allowed, there is absolutely no private trade, or else that if trade does exist there is ample room for sales as well. In the Purneah District alone, as far as the Commissioner is able to judge, does private trade show any vitality, and here the Collector especially reports that he has observed Government sales and private sales going on side by side. The cheaper Government grain is a convenience to the poorer classes, while those who are well-to-do prefer paying a higher price for the food to which they are accustomed.

Mr. Wilkins again writes from Begoo Serai to the same effect. The sale of Government grain has in no way interfered with private trade in his sub-division, and its results seem to have been most satisfactory.

In a report just received from Mr. Kirkwood he mentions that "some grain" is finding its way into the south of Soopool Sub-division from Monghyr, and that a few hundred maunds of Bengal rice coming up the Koosee had reached Protabgunge and Belluabazar in the eastern part of the same tract. The late Government circular requiring officers to observe the rule of non-interference with trade will no doubt lead the Collectors to watch the state of supplies in this part of the district, and to stop the sales of Government grain if it seems right to do so.

Advances.

11. Advances are now universally in grain, and they are apparently becoming very popular. Mr. Currie writes from Luckee Sorai:—"The ryots are crowding in for advances in

grain." In North Bhagulpore Mr. Kirkwood reports that extensive advances are being made. An agreement has been entered into with Raja Lellanund Singh, from which it is hoped that much relief may be looked for. The Commissioner has arranged that the villages in the Raja's territory are to be inspected and a list drawn out showing the number of ryots and the amount of advance required. The list will be presented to the Sub-divisional Officer and an order issued on some suitable golah. The ryots will attend in person to receive the grain, the Raja at the same time executing a bond and engaging to pay to Government the value of the grain so loaned. It may now be anticipated that advances will be required in considerable quantities. The late rainfall, as before remarked, has everywhere started cultivation, and the people are coming in for aid. No doubt many of the labourers on relief works will now leave their employment and come upon our hands for a different form of relief in the shape of advances.

Charitable Relief.

12. I have already had occasion to mention that the condition of the Godda Sub-division has induced Mr. Grant to start charitable relief in that part of the district. His operations are happily of no very great extent at present.

In the district of Purneah the Government relief operations are going on well. Besides this Rai Luchmeputt Singh has signalised himself by his liberality in the distribution of food to the distressed population. During the fortnight under review a large number of persons have received daily relief at his hands. The Collector writes, "I have much pleasure in bearing testimony to the good work done by Rai Luchmeputt Singh, and the active interest taken in it by his agent Baboo Ram Chand Setya."

In North Bhagulpore charitable relief is on a good footing and exhibits weekly more satisfactory results. The improvement noticed in the last divisional fortnightly report continues to make itself seen. The poor-houses and centres are giving way to better methods of relief. Mr. Kirkwood reports that 27,595 persons are now actually on the household registers as against 24,000 a fortnight ago. He looks for a further increase of 4,500 during the next fortnight, and anticipates a final total of no less than 41,095 before the end of the rains. Besides the system of house-to-house relief by tickets, many other forms of relief are in force and are doing good.

In Monghyr the relief operations are on a comparatively small scale, but they are said to be sufficient for the wants of the population.

Returns.

13. Certain returns usually submitted with the divisional narrative have not come in. That showing the consumption of grain throughout the division for the period ending the 8th June, the fortnightly poor-house return, and the abstract relief returns for the month of May, are altogether incomplete. The Commissioner is therefore forced to send in this report without them. He fears that it is hopeless to go on any longer trying to obtain accurate returns for the separate period dealt with by his fortnightly narrative. Every effort has been made, but without avail. It appears to him that it will be better in future to submit the divisional, report without appending returns, as it seems impossible to offer anything more trustworthy than a mass of guess-work figures. The returns appended to the district narratives, and those submitted direct to Government by sub-divisional officers, will convey the necessary information, though it is greatly to be regretted that no later figures can be sent in with the Divisional report.

H. M. Durand, C.S.,
On Special Duty.

Narrative of Scarcity and Relief in Moorshedabad for the fortnight ending the 30th May 1874.

I have the honor to forward my narrative of scarcity and relief in the Moorshedabad district for the fortnight ending Saturday, the 30th May 1874.

During the fortnight I visited Rampore Haut, saw some of the relief works that have been going on in the vicinity of the head-quarters of the sub-division, and arranged various relief matters with the sub-divisional officer. There are a good many Sonthal villages in the west of this sub-division, and I have given directions that minor relief works in the way of repairs to village roads, &c., be kept on as long as possible.

A.—State of the Country.

1. *Abundance or scarcity of supply in the bazaar.*—There is still a sufficient supply of food-grain in the bazaars and hâts of the head-quarters' sub-division, but the stocks in the hands of sellers are by no means large, and require frequent replenishment. In the Lalbag sub-division the rice supply in the bazaar at head-quarters is still sufficient for the requirements, but in thana Bhadrihaut the supply is scanty, and the village shops are ill supplied. In all small bazaars in the Jungipore sub-division the supply of rice is becoming more and more scanty. In the larger bazaars the supply is sufficient to meet the demand. In consequence of the scanty supply of "Purbi" rice some enterprizing merchants of Dhulian are importing rice from Calcutta by rail. It is reported that difficulty is experienced in transporting the grain from Pakour to Dhulian in consequence of impressment of carts for service in the Behar districts. The sub-divisional officer has represented the matter to the Extra Assistant Commissioner of Maheshpore, within whose jurisdiction Pakour lies. The Behar transport is, I believe, finished, and carts will return very shortly, if not arrived already. It is to be regretted that no enterprizing merchants are to be found in the Roghunathgunge bazaar. A cargo-boat laden with "Purbi" rice arrived here on the 27th instant. No such thing has been heard of within the last six months, owing probably to the bad state of the river. In the Rampore Haut sub-division the supply is scarce in the markets of Nulhatty, Palsa, and Khargram, but in thana Rampore Haut the scarcity has not been very much felt. When at Azimgunge the other day, I found that the local merchants were importing rice, chiefly from Burdwan, Gooshkhora, and Mancoor on the chord line.

2. *Kind and price of grain selling at one or more principal marts.*—The average price of common rice in the Sudder sub-division is 11½ seers per rupee—not much different from the price given in the last narrative, but showing an upward tendency. It is dearest at Serajgunge, Gowas, Jellinghee, Nowadah, Satooee, and Kandee, and cheapest at Dowluttabad, Beldangah, and Sukteepore. Until very recently, rice was cheapest at Nowadah, in the south-east of the district, where both aous and amun of last year were fair, and the sudden rise in the price was, I believe, owing to the absence of rain which made the prospects of this year's crops look gloomy. The late rain, which has fallen in Nowadah as

elsewhere, will, I trust, bring the price down to a more normal rate. There is a slight rise in the prices of wheat, barley, and gram in some station circles, being counterbalanced in fall in other stations. In the Lalbagh sub-division the best kind of rice is sold at Jeagunge at 9¾ seers, and in the city at 9 seers. Common rice sells at these marts at 11 seers, at Bhugwangolah at 10½ seers, at Bhadrihaut and Sagurdighee at 9½ to 10 seers per rupee. Wheat is quoted at 13 seers, barley at 19 to 20 seers, and gram at 17 to 18 seers per rupee. In the Jungipore sub-division, in the Roghunathgunge bazaar, the retail price of rice is 10½ to 10¾ seers per rupee. At Shumshargunge rice sells at 12½ to 13 seers. At Mirzapore the latest quotation is from 10 to 10½ seers per rupee. At Dewanserai rice sells at 10 to 11 seers. It is dearest at Sooty, where it sells at 9½ seers. In the Rampore Haut sub-division the prices are as follow:—

	Fine rice.	Coarse rice.
Rampore Haut	9	11
Nulhaty	...	12
Palsa	...	11
Khargram	10½	12

3. *Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots, and others.*—It does not appear that large quantities of food-grains are still in the possession of most of the mahajuns, zemindars, and others; but I believe that the mahajuns have sufficient in stock to lend to the ryots, and some are doubtless holding back their stocks in anticipation of a rise of prices. The sub-divisional officer of Lalbagh reports that there is every reason to believe that the stock in the hands of the traders at Baluchar and Azimgunge is still considerable. There is a large amount of paddy stored at Patibona on the Ganges in the Bhugwangolah thana. In thana Bhadrihaut it appears on inquiry that several traders have, comparatively speaking, large stocks, but that they hesitate to advance to ryots. Advances of this kind naturally depend much upon the prospects of the crops, as involving the prospect of eventual repayment. The late favorable rains will doubtless have the effect of causing the mahajuns to lend more freely. The sub-divisional officer of Rampore Haut appears to consider that the stocks are small, and I believe that they are very scanty in the Khurgaon thana; but notwithstanding the comparatively large quantities that have been exported during the past five months, the exportations from this sub-division by rail still exceed the importations.

4. *Rainfall, if any.*—There has been considerable rainfall during the fortnight under report throughout the whole district, as has been specially reported. The rain has been very beneficial to the standing crops of aous, amun, sugarcane, mulberry, and indigo Its utility in replenishing the water-supply which in nearly all parts was very deficient, and in some almost absolutely wanting, and in causing an increase in the pasturage for the cattle, cannot be exaggerated. The rain has also, I believe, helped to some extent to check the course of epidemic diseases, and it certainly has dispelled much of the gloom which overhung the prospects of the crops.

5. *State of the crops.*—The crops have passed through a most critical time, and their prospects are now, I believe, everywhere favorable. Had the rain, however, which fell during the last week of May, been delayed for a week or ten days more, a large proportion of the aous crop would have been destroyed and the amun seedlings would also have suffered. The relief sub-divisional officer of Kandi reports that the rain, which appears to have fallen more copiously in the Bhurtpore thana than in other parts of the district, except perhaps about Jungipore, has greatly improved the prospects of the aous crop, most of which is now 7 or 8 inches above the ground. Harrowing and weeding are actively going on. In the south-east of the sub-division the outturn of this crop would greatly relieve the local markets. The sugarcane is also very promising, and the indigo will probably yield more than usual. The mulberry too has been considerably benefited. Throughout this sub-division there is the greatest activity among the agricultural classes. Some of the amun has now come up. The til, however, will suffer from the rain. Much of it is now being cut. The mangoes have been injured, and many trees stripped by the high winds which have preceded or accompanied the rain. The Lalbag sub-divisional officer reports that at the commencement of this fortnight the state of the crops was very critical. Rain was then absolutely needed for the young aous plants as well as for the amun sowings and for indigo. The rain has however removed all anxiety on the subject. It has already invigorated the young aous paddy, and on all sides ploughing has commenced. The indigo and other crops on the "dearah" lands has specially been benefited. The sub-divisional officer of Jungipore states that the prospects of both bhadoi and haimunt crop have been improved by the rain. The late sowings of boro paddy have also been benefited by it. The sub-divisional officer of Rampore Hât reports that the outturn of boro paddy will be most probably fourteen-sixteenths of an average crop. The late rains have enabled the cultivators to commence their agricultural operations, and have done much good to the sowings of aous, til, and sugarcane. In the east of the Sudder sub-division, where the aous is the chief crop, the plants, and especially the early sown ones, were languishing on account of the heat and lack of moisture; but the crops in this part of the district have, for the time at any rate, been

saved by the timely rainfalls. A larger area than usual has been sown down with the early rice, and the calamity of an almost total loss of the sowings, with difficulty in many cases of procuring seed for resowings, would have been very great.

6. *Condition of the people.*—The agriculturists have been much encouraged by the late showers. Mr. Jones, special relief officer, states that reports of distress among persons of a position above that of the ordinary cultivators are becoming more common, either because distress is increasing, or their aversion to accept assistance is wearing off. There has not been, so far as my experience has gone, much aversion on the part of this class to accept assistance, provided that the assistance is of the kind desired. I am inclined to believe that the distress among the "bhadra lok" has been, and is being, exaggerated, as I know that in certain cases it has been exaggerated with regard to persons lower in the social scale. The average price of rice throughout the district during the past month of May has been at the very least 11½ seers per rupee, whereas during the same month of 1866 (with which year the present one may well be compared), the average price was 10 seers per rupee. So far therefore as the price of rice is a criterion of distress, the "bhadra lok" must have suffered more in 1866 than in the present year, and yet very little was heard of their sufferings. I was not in this district during that year, but I have made very frequent inquiries in various parts of it, and nowhere have I been told that there was great suffering, still less that there were any cases of starvation. Notwithstanding, however, the lower prices of the present year there is a prevalent impression, which is probably not incorrect, that the stocks in the district are smaller than in 1866. The sub-divisional officer of Lalbag says that the labouring classes within the three thanas of the municipality do not appear to be in any distress, as they can always procure employment. In thana Bhugwangolah, though people are not so well off as in municipal bounds, there appears to be as yet but little want, and this want is specially on the part of persons who in ordinary years are supported by charity. This class of persons are also suffering in the Bhadrihât thana, and here it does appear that the poorer ryots are somewhat pinched. Their own stores are but very small, mahajuns refuse to advance them grain, and the village shops afford but meagre supplies. As stated in my previous narratives, the distress in the eastern and south-western portions of Mirzapore, in the Jungypore sub-division, is greater than in any other part of that sub-division. Next comes N.-W. Sooty—Shumshergunj—which was hitherto well off, and is now as bad as the eastern portion of thana Sooty. The number of beggars there is fast increasing, while the amount of private alms is diminishing. I have recommended that there should be a Sub-Committee at Dhulian for thana Shumshergunj. The Sub-Divisional Officer reports that the condition of the people has not improved, but rather become worse, since the submission of the last narrative. The late rains, however, have given employment to the agricultural classes nearer their homes. The Sub-Divisional Officer of Rampore Haut reports that the poorer class of people are generally in difficult circumstances. In thana Khargram it has been reported that the poorer classes get one meal a day, and that with difficulty. Work for the able-bodied is supplied on the Badshahi road, and other minor relief works have been started. As parts of the Khargaon thana are away from the water-tracks, I have sent a relief assistant with special instructions to visit the less known parts, and have requested the Sub-Divisional Officer to proceed at once to make enquiries and observations in some of the villages. Gratuitous relief in the shape of cooked food in some places and uncooked in others is now given in many places in this sub-division as well as in other parts of the district.

7. *Actual Facts as to any* known *cases of Misery and Starvation.*—In the Jungypore sub-division a rumour was afloat that two cases of death from starvation had taken place at Bohotali, in thana Sooty. On enquiry by the relief assistant, the rumour has turned out to be utterly unfounded. The Sub-Divisional Officer of Rampore Haut states that no cases of misery and starvation have yet come to his notice.

8. *Grain-thefts and Robberies.*—Six cases of petty theft of grain, such as paddy, linseed and rice, were reported during the fortnight in the head-quarters sub-division. In the Jungypore sub-division no case of grain-theft was reported during the fortnight; though one case of theft of a brass vessel occurred, due, the Sub-Divisional Officer reports, to scarcity. Since January there have occurred three dacoities in thana Mirzapore, of which two took place within five days of each other: the Nowadaparah dacoity on the 13th May, and the Tackshok dacoity on the 18th. This indicates the quarter in the Jungypore sub-division where the distress is heaviest. There have been three grain-thefts in the Rampore Haut sub-division during the fortnight under report. A comparative statement of crime is annexed which shows a very marked increase of crime in all the sub-divisions except Lalbag. It will be observed that there have been no less than eight dacoities in the fortnight, while in the previous fortnight there was only one. This offence appears to occur by fits and starts, a period of freedom from its occurrence being followed by one in which the offence abounds in various parts of the district. Many of these dacoities are doubtless owing to the pressure of high prices on the bad characters of the district, who prefer plunder to work.

9. *Condition of any Special Tracts.*—Cholera and small-pox are stilll prevalent in some parts of the sudder sub-division, but since the rain cholera has slightly decreased. Fever is

said to be prevalent at Saktipore. Cases of small-pox and cholera still occur in the City Moorshedabad Municipality Cholera appears in isolated cases in thanas Bhugwangola and Bhudrihaut. In the latter thanas mallpox exists in some villages to the north and north-west of Sagurdighee The mortality has, however, considerably decreased Cholera is raging in most parts of the Rampore Haut sub-division to a certain extent. The Sub-Divisional Officer of Jungypore reports that these diseases have abated since the late rain, and this has probably been the case elsewhere. The extra Native Doctors who have been deputed to this district have been sent out to those parts in which the ravages of disease appeared to be worst, and have given medical relief to many of the sufferers.

B.—Relief Works.

The average number of persons employed on the several relief works is 4,142. The laborers are generally in good condition; food is easily obtained except in the cases of a few works. Cash payments are made at the rate of two annas per diem, except in the case of one work, at which the payment is made at one anna nine pie per diem. The rates of task-work vary from two annas six pie to three annas per 100 cubic feet The workmen, as a rule, bring their own tools. A statement showing the expenditure on relief works during the fortnight is herewith submitted. The orders contained in the Government No. 3369—S R., dated the 26th May, will be carried out as soon as Government grain is distributed to the various works. It is now being sent to the places where the principal works are carried on, and supplies have been diverted to the three sub-divisions, and for the use of some of the Relief Sub-Committees.

C.—Transport of Food.

It appears that 8,101 maunds of food-grain have been exported from the Rampore, Haut sub-division, and 5,636 maunds have been imported to the sub-division during the fortnight under report. As before remarked, private importations are being made into the Lalbagh and Jungypore sub-divisions, at Azimgunge and Dhulian. The stormy weather of the past month was unfavorable to imports by the Ganges in the east of the district, and these fell off largely.

D.—Storage of Government Grain at Relief Works.

The prescribed statement is annexed, with the columns filled in as accurately as is possible, considering the recent arrival of the grain and the uncertainty as to its consumption as wages for labor, for gratuitous relief, and for advances to zemindars and ryots. Of the consignments hitherto sent, portions have been diverted and forwarded to various places in which it is required for these purposes. The expenditure on rice by the various Sub-Committees in gratuitous relief, has of late considerably increased, and there is reason to believe that this will be progressive, as prices increase during the rains. I have therefore requested that the daily supply of 500 maunds of Government rice may be continued for a week at least after the lapse of the fifteen days during which it was ordered to be sent. In some places arrangements for storage had before been made, in others they are now being made, and for works in the vicinity of head-quarters supplies will be sent out from the central golah at Berhampore as they are required.

E.—Advances to Private Parties and their Results.

There were 46 cases pending at the end of the previous fortnight under the Land Improvement Act in the sudder sub-division; seven fresh applications were received during the fortnight. Out of the total 53, 31 cases are under investigation; in eleven cases orders for payment have been made; in one case the applicant has refused to take advance; in three cases applications have been rejected, and in seven cases the securities tendered have been found to be insufficient. A sum of Rs. 2,828 has been advanced to fourteen parties during the fortnight under report.

In the Rampore Haut sub-division, 249 applications for land improvement have been received during the fortnight. Some of these have been sent to the police for enquiry, but no money has yet been paid to the applicants. For the applications filed in the previous fortnight, Rs. 935 have been advanced for the excavation and re-excavation of tanks

Many of these appear to have been made by ryots who desire advances on the security of their jotes The Sub-Divisional Officer has been informed that the duty of making advances to such rests with the zemindars, to whom advances could have been made, if necessary, under the orders of Government.

F.—Charitable Relief.

The statement prescribed by Government No. 1251—S.R., dated the 5th March last, is annexed as regards each sub-division separately. There was a balance of Rs. 844-1-1 only at credit of the District Relief Fund at the close of the last fortnight. The total receipts during the present fortnight amount to Rs. 28,471. This sum includes the grant of Rs. 20,000 made to the Relief Fund by the Central Committee during the past month, and a Government grant of Rs. 7,963, being the equivalent of private subscriptions in the district to that amount. The total expenditure from the fund during the fortnight has been Rs. 12,701-12-6.

During the past fortnight a cook-house has been started at Gokum, and a leper's hospital at Rungamati; preparations are being made for the distribution of cookod food at Saktipore The registration of the blind, lame, infirm, and leprous has been completed in the villages under the Salew, Talihpore, Bharatpore, and Saktipore Sub-Committees. To these lists additions must necessarily be made from time to time. Mr. Jones reports that basket-making is now a regular branch of relief work at Kandi. The system of granting small loans to ryots and chowkeedars is being carried into effect.

Jungypore Sub-Division.—In this sub-division the monthly subscription promised up to date is Rs. 69-8, and donations Rs. 826-8. The total receipts up to date amount to Rs. 2,484-7-9, and the total expenditure during the fortnight is Rs. 1,539-4-8, leaving a balance of Rs. 945-3-1.

During the fortnight under report 135 persons received wages, amounting to Rs. 35-13; three persons received doles of pice, amounting to Rs. 4, and 4,400 persons received doles of rice weighing 86 maunds and 20 seers.

In the Lalbag sub division, Roy Luchmiput Sing Bahadoor has given employment to the people of Mohimapore and the neighbourhood, by opening extensive works on a garden which he has lately purchased there He is also, I am informed, selling rice at the rate of 13 seers per rupee to the poorer classes.

The City Moorshedabad Municipality is employing extra coolies, and about 15 in number have been engaged daily on an average. Tanks excavations and road repairs are also going on in several parts of the sub-division, giving employment to a large number of people.

The total amount collected up to date in this sub-division is Rs. 5,131-11-6, and the total expenditure Rs. 3,580-10-4, leaving a balance of Rs. 1,551-1-2 at credit of the Sub-Divisional Relief Fund at the end of the fortnight under report.

Particulars of the expenditure under heading (*d*) cannot be given in this narrative as regards the whole district, for it has been the practice to make allotments of sums to the various Sub-Committees, to be expended in the various modes of relief, without any specification as to the amounts devoted to each. Particulars have, however, been called for from the Sub-Committees, and I trust to be able to give information on this subject in my next narrative.

Statement showing the Storage and Consumption of Government Grain in the District of Moorshedabad for the fortnight ending 30th May 1874.

1.—Name of Circle, Moorshedabad district.

2.—Date from which figures are given, the 30th May 1874.

3.—Total allotment of Government grain, 7,500 maunds.

4.—Total quantity of grain stored, inclusive of grain transferred to other districts, 1,517 maunds.

Total quantity of grain consumed up to date.

5.—Estimated grain receipts of the ensuing fortnight, 10,000 maunds.

6.—Estimated grain expenditure of the ensuing fortnight, 2,500 maunds.

7.—*Remarks.*—The grain has reached Berhampore almost at the close of the week, and there are no data on which I can form an accurate conjecture as to the expenditure of the ensuing fortnight. I have, however, on a consideration of the numbers of laborers and of those on relief works, estimated the consumption at 2,500 maunds.

1	2	3	4	5	6			
Number of committees and sub-committees as yet appointed.	Number of special relief sub-divisions opened and officered.	Number of regular relief circles opened and manned by special officers. W. Wavell,

Offg. Magistrate-Collector of Moorshedabad.

No. 1176—S.R., dated Dinagepore, the 1st June 1874.

From—E. E. Lowis, Esq., Offg. Magistrate of Dinagepore,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

I have the honor to submit the narrative for the fortnight ending 1st June 1874.

A.—State of Country.

The boro dhan has now been nearly all reaped, and has turned out a very good crop; an unusual quantity of this species of rice has been grown this year, every available patch of water having been turned to account. This rice is principally grown in the circles of Porsha and Churamon, and the produce will go far to lessen prices and mitigate distress in those places. In Porsha it may be expected to supply the market to the exclusion of Government grain for the next month. The sale of boro rice will have only a local effect, and the fact of its presence in the market will not affect prices at a distance; for instance, in Bindol circle, where no boro is grown. The bhadoi, I am glad to say, is looking very well indeed, and, unless no rain falls between the present time and the middle or end of June, promises a good return. The absence of rain during the early part of this month raised serious apprehensions in some places, for the plants in some tracts were beginning to flag and look yellow: the good fall of rain, however, which we have enjoyed during the last few days, has put an end to all anxiety, and we may now count, with reasonable confidence, on a good bhadoi crop being cut in the middle of August. A larger breadth than usual of this crop has been sown; in some places as much as one-fourth over the average, and there has been no want of seed or of bullocks to plough the land. The late rain has enabled the villagers to begin ploughing their lands for the winter crop, and within the next fortnight or three

weeks, circle officers will be able to test the genuineness of the outcry regarding want of bullocks, and see whether any land is left untilled because the occupier is unable to procure plough-cattle. The health of the people too has improved since the rain fell. Cholera, as noticed in a former narrative, was at one time prevalent in some places; it has now, however, almost disappeared, and will, I hope, soon die out altogether. As regards the outbreak of cholera in Luskerhat, the circle officer reported as a curious fact that though the disease was raging in many villages, it had not attacked the coolies working in the vicinity, and some of them living in the affected locality. The supply of grain throughout the district is everywhere reported as not equal to the demand, and rice generally is not sold cheaper than 6 or 8 seers per rupee. There are, however, still stocks in the hands of well-to-do ryots and mahajuns, and these reach the market in driblets. The deficiency in Porsha circle has been met by the boro rice coming into the market, and in Patiram, to a certain extent, by the importation of a few hundred maunds of rice from Pubna, which was sold at one or two places for 9 and 10 seers per rupee. The appearance of this rice caused the officer in charge at Patiram to stop sales to the public. I directed him to resume them, however, for our sales of Burmah rice do not compete in the least with the mahajuns' sales of country rice, for every one who can afford it will buy the latter, even though dearer than what is supplied by the Government sellers. It stands to reason also that if it is no competition for us to sell at 12 seers per rupee, when the mahajun sells at 8, it is less interference with his business when he sells at 10. At Tambuli also it is reported that, gaining confidence by the sight of the Government stores, holders of stocks are selling, and the price of rice has fallen to 10 seers per rupee at many of the hâts. I noticed in a former narrative that distress had been found to prevail in thanas Habra and Chintamon on the east side of the district, and it had been found necessary to depute an officer there to undertake charitable relief and sales of rice to the public. The charge is a very heavy one, and almost more than one man could manage. I was glad therefore to hear of the arrival of Mr. Rajkissen Sen, appointed as relief superintendent of this district. I have appointed him to the charge of that circle; the officer originally appointed, Baboo Prosonno Coomar, being directed to assist him, and manage relief operations under his direction. There is yet another circle to be filled up. The major portion of Thakurgaon thana to the north is reported to be in such a state that the appointment of an officer to that quarter has become necessary. I learn that Baboo Joges Chander Mitter is on his way here; I intend to send him there as soon as he arrives. In Thakurgaon, as in parts of Birgunge, and as in thanas Habra and Chintamon, there was a pretty fair crop of rice in many places, quite sufficient, if not parted with, to have kept the people until the next crop came in. The rice however was not kept. Attracted by the high prices and the certainty of a ready sale in the vicinity of relief works, the Thakurgaon villagers sold all, and perhaps more than all they could spare; the consequence is prices have risen, and there is a general outcry that the supply is not equal to the demand. I hear also that exactly the same thing has happened in Julpigoree district, which borders on Thakurgaon, and from which place our supplies for Ranisankoil, Hemtabad, and Bindol were long drawn The want in Thakurgaon and, as I take it, in Julpigoree is not of money but of grain, and this want must be supplied from our Government stores. I have sent instructions to commence golahs at Thakurgaon, Ruhia, and Atwari, and have instructed Mr. Scanlan at Ranisankoil at once to send some rice to Thakurgaon for sale, and also to let it be known that for the present paikars and others who supply the hâts of East Thakurgaon can buy from our Government golahs at rather more favorable rates to cover the greater expense of transport. The golahs at Thakurgaon, Ruhia, and Atwari, are not far from the Julpigoree border, and will, I trust, suffice to supply the wants in that direction, for of course dealers in that district will be allowed to buy what rice they require from our stores. When the rains begin, and the roads become heavy for cart traffic, rice can be sent to Thakurgaon up the Tangon from Tambuli by boat, and from thence, if necessary, by cart to Ruhia and Atwari, both those places being on the high road to Darjeeling. It appears probable that our stores will now have to be moved across, to a large extent, into those parts of the district which we hoped would escape altogether. I expected of course that the surplus stocks of these places would be available for the distressed tracts; but I did not expect that the villagers would part with their rice to such an extent as to need help themselves. During the last fortnight Mr Jones, the circle officer of Durgapore, has had to resign his post. Exposure to the sun and the constant worry and anxiety so impaired his health that, with much reluctance, he was obliged to ask to be allowed to return to the station, and resume his own appointment of Superintendent of Police. Mr. Jones has been in charge of relief works since November, and has shown great energy and zeal in the discharge of his duties, and I regret extremely that ill health has compelled him to give up his post after having borne the burden of the work so long. Mr. Pollen has been transferred from Kahagunge to Durgapore, and Baboo Juggodis Nath Roy has gone to Kaliagunge. Regarding the supply of seed-grain, I am more and more convinced that there is enough, and more than enough for all. A cry was raised when the time for bhadoi sowings came on, and one or two officers wrote very despondingly on the subject, fearing that much of the land would not be cultivated; and yet, though the season for bhadoi can hardly be said to have quite passed away, there is already a certainty of one-eighth, if not one-fourth more than usual of this crop having been sown. The loudest complaints came from Durgapore, and there not only has quantities of bhadoi been sown, but thousands of acres are green with plants of aghani, or early winter rice, which is sown a little sooner than the hemanta, and is only grown in the Durgapore circle. The

fact is, the villagers having had so much done for them, think they can get anything they want by simply asking for it; and as advances for seed-grain answer equally well to defray marriage expenses, and, it was imagined, could be got without interest being payable, demands on that account were at one time plentiful. I am glad Government have come to the resolution to make no more cash advances; there is no great lack of means in the country; the principal want is of grain, and that can be supplied from our stores. Cash advances are always liable to abuse, for it is almost impossible to ascertain that money borrowed is properly laid out, whereas advances of grain are of no avail except for immediate use.

B.—Relief Works.

I subjoin a list showing the works in hand in the various circles, with number of men, women, and children on each, distinguishing, so far as my information goes, between those employed on piece-work and those earning daily wages. It will be observed that in Durgapore circle there are now about 10,000 persons at work, not counting those employed on some works made over a short time ago to the officers of Kaliagunge and Chooramun. This is a great decrease on the number employed at one time on the daily-wage system; but it is a decrease that was to be expected on the introduction of a labor-test, which compelled those to stay away who came simply because they could draw pay for doing nothing. I have every reason to believe that many of the coolies employed by Mr. Jones, just before I insisted on piece-work being introduced, made up small hoards of money that will enable them to live till the bhadoi crop comes in. I have, however, reported separately on this subject, and need not recapitulate: suffice it to say that I am sure the number of coolies on the works at Durgapore will not much exceed the present total before they are all dispersed to their houses. Our number of laborers has now, I think, reached its maximum, and from this time I expect the numbers to decrease, as the people return to look after their cultivation. I do not think that any trouble will be experienced in dispersing our coolies to their homes; nowhere have we any masses of laborers on daily wages, all able-bodied men are doing piece-work, and their attendance will gradually decrease. The women and children will not indeed obtain much employment as agricultural laborers, but there need be no difficulty in dealing with them; the roads will require to be dressed and turfed, temporary bridges will have to be put up, and petty repairs of various sorts executed, which will afford employment; the organisation for charitable relief, moreover, will have been completed, and the officers will be in a position to deal with distress, if it exists. As for the men, I am convinced that Government are doing wisely in limiting their help to grain advances: assistance in this shape however will, I think, be required, and the attention of circle officers was drawn to the subject some time ago. As some confusion and uncertainty appeared to exist, however, in their minds as to the intentions of Government, I have lately issued a circular to them, in which I have described the principles on which they are to work, as well as the action that I expect them to take in the matter. Government, I have told them, are prepared to assist the villagers by providing them with food-grain, and are prepared to do so in two ways. The markets must be kept supplied freely with Government grain, so that any one who wishes to buy may readily supply himself at a comparatively cheap rate. Sales from Government golahs therefore must be made without limit or reserve of any kind; the more wholesale the transactions are the better. Further, besides securing that rice shall be obtainable in the market for those who can buy, Government are prepared to advance grain to those who are in present want of funds, and cannot buy for their daily consumption; to meet this want, advances may be made to villages. In making such advances individual dealings should be avoided; otherwise the two or three men of substance in a village will obtain their own supplies separately, leaving the mass of the advance to be made on the unsafe security of the poorer ryots. Any village wanting an advance can get it on the understanding that the amount asked for covers all demands for that particular locality. A bond for the repayment of the price of the rice, calculated at the rate at which paikars and dealers are supplied, should be signed, and property pledged as security; the time for repayment has not yet been fixed, but I assume it will not be till after the next winter crop has been gathered. As to security for repayment, I have directed the mundals and other respectable villagers to be first requested to hold themselves jointly and severally responsible for the debt, pledging their property as security; their names only will appear on the bond, they being charged with the proper distribution of the grain, and being entitled to recover the individual amounts from their fellow-villagers. If the respectable inhabitants decline, then the zemindar must be appealed to; if he too refuse, then, if the grain is really wanted, it must be advanced on the security of the ryot's holdings and crops. Cases may arise in which it becomes necessary to provide grain where no security can be given: in such cases grain must be given, not advanced, and treated as charitable relief. As to cash advances, I have all along told my officers that I deprecated any help being given in this shape, and that until distinct instructions to do so were received from Government, advances in cash were not to be made. Advances of grain have been made to some extent, but not in every case, very wisely; for I find that Mr. Tweedie at Porsha has made advances repayable in kind. He has been forbidden to make any more, but of course the agreements entered into must hold good. The advances were made by Mr. Tweedie on his own responsibility, and without reporting the action he intended to take; and it was only on visiting his circle during his late tour that the district grain officer discovered what had been done. Mr. Tweedie was on the eve of making large advances in this way, for the ryots were not slow to perceive the advantages of borrowing rice when it is selling in the market at 12 seers per rupee, and repaying in kind when it is very likely to be down to 27 or 28

seers per rupee: further action in this direction however has been stopped. I have suggested to my circle officers to inquire whether the villagers would be willing to repay the advance in labor instead of cash, *i.e.*, whether, instead of paying the amount entered in the bond, they would consent to keep a certain length of road in repair, or afford a contingent of laborers to work free of charge. The proposition, I am told, finds much favor, and seems to me to afford a very feasible plan for keeping in repair these miles of road which we have constructed at no little expense. If Government sanction my proposal, I intend to take a bond for the amount of grain advanced to any village, and if convenient, enter a stipulation to the effect that instead of paying so many rupees, the villagers undertake to do certain work, failure to perform the stipulated work rendering them liable to be sued for the amount of the bond. If advances are generally made on the security of the poorer ryots, I anticipate some difficulty in recovering the amount, for, in such cases the zemindar has a lien for rent, the mahajun probably has another for an old debt, and amongst these conflicting claims, I fear the price of grain advanced will often be irrecoverable; even in the case of mandals and respectable villagers, obstacles will often be thrown in the way of Government realising their dues. To facilitate the realisation of these advances, I consider a short Act should be passed declaring the Government lien to be prior to any other lien of a similar nature, and enacting some short and summary procedure for the occasion. Of the alternative modes of payment in grain, it was at first determined to adopt payment through moodies stationed at the roadside, and all the circle officers reported that they had carried out the orders of Government. Mr. Fasson, at Bindol, has done so most thoroughly, for his sales to coolies average a seer per head per diem for men, women, and children: others again have not been so successful. I have therefore directed all payments for the future to be made in grain, the duffadar of each gang receiving the total amount due for his men, and distributing the rice as each person has to receive it. Baboo Harimohon Chand alone introduced the system of payment in grain instead of through moodies; and his having begun to do so was alluded to in the last narrative by the district relief officer, and seems to have given rise to some misapprehension as to the action taken by me: the system has been introduced by Baboo Harimohon with perfect success.

C.—Transport.

A little rice still remains to be brought into Ghoraghat, Tambuli, and Kaliagunge, but more than the total allotment has already been stored in the district, some of the golahs having received more than was originally intended.

D.—Storage.

I append a list showing the golahs in each circle, with the amount of grain stored in each. Sales from our golahs have been ordered throughout the district without limit or reserve, and officers report that grain is so sold. I am not, however, quite satisfied that some restrictions on sales are not placed at some places; otherwise I cannot account for the large sales at some places, as compared with the small sales at others, the supply being now, I expect, pretty well equalised over the distressed tracts: a glance at the table will show this. I am the more puzzled at this, looking to the large sales effected from our golahs at Dinagepore. The Sudder circle I never considered a specially bad tract, rather the contrary; and yet here our sales now average nearly 1,000 maunds a day. Much is of course due to the fact of this being the head-quarters, and much is also due to the activity and intelligence of the grain officer, Baboo Harimohon Sen; but still taking everything into consideration, I do not understand why some of the other circles do not more nearly approach our standard of sales. At Patiram and Putnitolla the sales are said to have reached their maximum. I do not see how this can be however, unless rice is imported to a much larger extent than it has been: a few hundred maunds is a mere drop in the requirements of those two circles. Elsewhere I expect the sales, if properly arranged for, will increase up to the end of August, when, if there is a good bhadoi crop, the demand will diminish; the extent to which it will fall off depending a good deal on how far we have by that time got rid of our Burmah rice. If by August we are selling country rice, some of the better classes who do not eat bhadoi, as being coarse and new, will turn to the Government stores for their supplies. The next fortnight should show an increase in the sales at Birgunge, for lately the circle officer there, under some mistaken idea of increasing the profits, has been selling Burmah rice at 10 seers per rupee, instead of at the price fixed by Government, at which rate of course people declined to purchase an unpalatable grain. He has been instructed to use his discretion more wisely for the future. I hope also, during the next week or so, to have sales of Government rice effected all over Thakurgaon, and arrangements made whereby dealers in Julpigoree district can be supplied if they wish it.

E.—Advance.

The subject of advances to villagers has already been touched upon. Several zemindars have lately come forward applying for advances; they have been given to understand that advances in cash are no longer to be given except for purchase of seed-grain. One zemindar has agreed to take grain; whether the others will do so or not I cannot say.

F.—Charitable Relief.

The annexed table shows that there has been an increase in the number of persons receiving charitable relief. The letter calling for a return of funds expended under heads *b*, *c*, and *d*, of the rules framed by Central Relief Committee, was not received in time to permit of the figures being supplied in this narrative; they will be ready during the next fortnight. The amount of rice expended in charity has been shown in the grain return, and

besides this the only other form of relief is employing women in husking rice, spinning cotton, making gunny bags, &c. The group system has not been fairly introduced here. The Minute by Sir George Campbell, and the letters on the subject, have been duly circulated, but the officers find great difficulty in obtaining the services of men of sufficient standing and education, or with sufficient leisure to act as group superintendent. A mandal will often willingly enough look after the poor of his own village, and distribute rice, but will object entirely to go beyond his own village; and I consider the system which is generally adopted here the best suited to the requirements of the district, viz. to divide the circles into divisions, putting each division under charge of a paid inspector, who is not a local inhabitant. Every village again is managed and looked after by its own mandal; or, if the village is a large one, by two or three respectable inhabitants; the inspector's duty being to go round and inspect the village lists, see that charity is not afforded to improper objects, and generally to arrange for charitable relief through the agency of the local authorities. I have authorized the circle officers making small payments of three or four rupees a month to these village mandals as a remuneration for their trouble. It is remarkable, however, how many of them are giving their services willingly and asking for no remuneration whatever. The class of men to make efficient group superintendents is not to be found as a rule amongst our villagers, and I consider the above plan better suited to the people we have to work with. It sometimes happens that an intelligent man, ready and capable of acting as group superintendent, is found; such men are made assistant inspectors, which is virtually group superintendents. We may expect an increase to our numbers receiving relief when the road-work is stopped, and the women and children are turned off. The circle officers however report that they are prepared to deal with this increase; and, as I have pointed out, minor works on the roads will give employment to some.

E. E. Lowis,
Offg. Magistrate.

No. 987, dated Beauleah, the 2nd June 1874.

From—W. H. D'Oyly, Esq., Collector of Rajshahye,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department

I have the honor to submit my narrative for the fortnight ending on the 31st May.

A.—State of the Country.

The heavy rain which fell on the 24th, 25th, 26th and 28th of May has done an immense deal of good. The *aous* dhan, which had germinated, was much benefited. On the 27th there was no rain, and on the morning of the 28th, while on my way to Tannore, I saw cultivators busy preparing and sowing their lands; but by 9 o'clock A M, a storm swept over the country accompanied by very heavy rain which stopped both the sowing and the preparation of the lands. The ryots who before were praying for rain now prayed that they might have no more for a time at least, fearing that it would destroy the seed freshly sown, and there is no doubt that the heavy fall on the 28th did so to a certain extent; for it was so heavy that a stream, which before the rain was barely up to my horse's knees, was so swollen the next day that it was scarcely fordable. There have been since then some fine clear days, which following the rain have given precisely the weather best suited both for finishing the ploughing and preparation of land, and to bring forward the young rice plants. Only two applications for seed were made to me while I was in the interior, regarding which I directed Mr. Manisty, the sub-divisional officer, to make enquiries; he will provide seed if necessary. I observed, however, before the rain, that there were baskets of seeds in many of the fields which were being prepared. The *boro dhan* has been harvested; the yield has been fair, but the introduction of this grain into the markets has not, I regret to say, improved the price of common rice. *Kaun* has been harvested in the North Bhurind sub-division, and has yielded a good return. The worst feature of the fortnight has been the sudden rise in prices in almost all parts of the district; this occurred in the early part of the fortnight. It was hoped that timely rain would improve the prospects of the coming crops, and at the same time the price of food. The rain has, however, come in quite sufficient quantities to secure the first

result, without effecting the last, except in Nattore, and part of the North Bhurind sub-division. Importations have been very slack. The time of year is not favorable to transport, and dealers do not care to run the risk of losing their cargoes in the present unsettled state of the weather. The condition of the people has not yet much changed for the worse in spite of the high prices that have prevailed. There have been no cases of starvation, and nowhere have I seen or heard of such privation as would make its presence visible in the emaciated forms of its victims. There is no doubt whatever that the opening of poor-houses and the distribution of food both in return for labor and gratuitously, has averted such a result. In the north of Pootea prices are high and relief is most sought for. Mr. Walton, who is in charge of a silk filature in that thana, tells me that the people have been eating largely the seeds of water lilies, but this is only in addition to other food. I have opened an additional poor-house in this part, and intend to visit it immediately. Cheena is selling at 19 seers 8 chittacks per rupee in some of the Pootea markets, and mash-kullai at 22 seers 8 chittacks per rupee. The District Superintendent of Police reports that "cases of crime against property show no increase disproportionate to the difference in circumstances of the three years compared. There are only fifteen cases more reported in May of 1874 than in May of 1872, which was a year of plenty. There have been eight small thefts of food-articles during the fortnight, a number which is probably not at all in excess of the proportion of ordinary years."

B.—Relief Works.

The number of persons employed on roads, &c., has decreased owing probably to the rain which has, to a certain extent, stopped work, and has also attracted away many to their fields. The numbers employed under the District Engineer and certain planters during the fortnight are as follow:—

	Total.	Daily average.
1st week	6,764	966⅔
2nd week	5,839	834⅛

The number employed by relief officers is given in the chapter on charitable relief.

C.—Transport of Grain.

See Statement.

D.—Storage of Government Grain.

	Maunds.	Seers.
Out of the total allotment of	1,00,000	0
We have already stored	93,518	37¼
Balance ..	6,481	2¾
Out of the balance we have to receive at Nowgong ..	3,707	5
At Runbagha	2,268	10
	5,975	15
Short receipts at several golahs	505	27¾
	6,481	2¾

E.—Advances to Private Parties.

The Government orders to advance grain and not money have only just been received and will be carried out.

Advances in money have been as follows:—

	Rs.	A.	P.
Up to date of last narrative	1,09,332	12	0
Advanced during the fortnight..	14,400	0	0
Total ..	1,23,732	12	0

F.—Charitable Relief.

Baulcah Sub-Division.

The daily average number of persons fed gratuitously at seven poor-houses was 1,870. The number employed in husking rice, spinning cotton and jute, collecting kunker, weaving, &c., was on an average daily 2,366.

South Bhurind Sub-division.

The number of persons relieved at seven poor-houses during the fortnight was as follows:—

	Daily average.
Working on roads, tanks, weaving, spinning, &c., &c. ...	3,122
Receiving gratuitous relief	965
Total ...	4,087

North Bhurind Sub-division.

The number of persons fed gratuitously was very large and out of all proportion to the number employed on work. This has been brought to the notice of the Sub-divisional Officer.

Daily average number of persons employed on husking rice, jute and cotton spinning, collecting kunker, &c.	613
Receiving gratuitous relief	2,206
Total ...	2,819

Nattore Sub-division.

The returns are full of mistakes, and altogether unreliable. They, however, tend to show that the number of persons relieved was small.

G.—Financial Results.

	Rs.	A.	P.
Total expenditure as shown in the last narrative ...	3,11,599	4	6
Detail of the above—			
Advanced for the conveyance of Government grain ...	1,73,391	6	6
Advanced to Mr. Luff, &c., on cheque	1,06,422	15	10
Advanced for storage of Government grain ...	50	0	0
Grant-in-aid to charitable relief	8,761	13	0
Paid on account of contributions to District Relief Fund	465	0	0
Salary and deputation allowance	6,726	2	6
Advanced for purchase of golah materials	9,453	0	0
Ditto for relief works	1,873	12	0
Expended for ditto	3,005	0	0
Advanced for purchase of seed for free distribution	600	0	0
Tentage and travelling	205	15	8
Contingencies	644	3	0
Expended during the fortnight from the Sudder Treasury.			
Advanced for conveyance of Government grain ...	10,737	8	8
Salary and deputation	363	14	3
Contingencies	11	13	0
Total ...	11,113	3	11
Add total expenditure as shown in the last narrative ...	3,11,599	4	6
Grand Total ...	3,22,712	8	5

RAJSHAHYE,
The 1st June 1874.

W. F. FAGAN, *Lieut.-Col.*,
District Superintendent.

No. 1003, dated Beauleah, the 4th May 1874.

From—W. H. D'OYLY, ESQ., Collector of Rajshahye,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to request you to be good enough to add the following in my fortnightly narrative for the fortnight ending on the 30th May last:—

Under—

"E.—Advances to private parties."

Advanced by the sub-divisional officer Nattore ...	Rs.	2,400	0 0

"G.—Financial results of the Nattore sub-division during the fortnight."

Advanced for storage of Government grain ...	Rs.	100	0 0
Paid to Mr. Luff, &c., on cheque	„	22,694	8 3
Total ...	Rs.	22,794	8 3.

No. 502F, dated Maldah, the 1st June 1874.

From—F. WYER, ESQ., B A., Offg. Magistrate and Collector, Maldah,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative for the period ending with the 30th ultimo.

A.—STATE OF THE COUNTRY.

During the last week there has been a most bountiful rainfall throughout the whole of the district, with the exception of Kalliachuk, where it has not been sufficient. This rain has greatly improved the prospects of the bhadoi crop; in point of fact, that crop will now, in all probability, turn out a very good one A greater extent of land than usual has been sown with it this year, and nothing could be more promising than its appearance throughout the whole of the northern part of the district west of the river Mohananda. I went over all this part of the district last week, and found that bhadoi had been sown on every available spot of land. In ordinary years, a good deal of jute is sown there; this year, instead of jute, the land is sown with rice. Since the rain which fell on the 25th, 26th and 28th, a number of the laborers in the Chanchul sub-division has left relief works to weed their fields; weeding will give permanent employment to many of these men. Mr. Reily had to reduce the wages on some of the works, owing to the agriculturists being unable to obtain laborers for weeding.

In the Barin the boro dhan has been reaped and turned out very well, yielding as much as 17 maunds a beegha; here about half the land for hymanta sowings has been ploughed up, and some of the laborers have left relief works for ploughing The price of rice has fallen considerably during the last week. This is owing to the rain having greatly improved the prospects of the bhadoi crop. The following table will show the latest prices of rice and paddy at the principal markets in the district:—

	Paddy per rupee per seer of 80 tolahs Seers.	Ordinary rice per rupee per seer of 80 tolahs Seers.
English Bazar	15 to 17	12
Nowabgunge	...	10½
Maldah	..	12
Rohimpore	16½	10
Tulseegunge	15¾	10½
Samsi	...	10

The quantity of rain which fell at the sudder station, during the fortnight, was ... ... 2·85

Ditto at Chanchul ... ... 2·22

There have been several cases of cholera in the Barin; 77 deaths have been reported As soon as the outbreak was reported to me, I sent a native doctor to the villages where the disease was said to have shown itself. The rain which has so opportunely fallen will probably put a stop to it.

Condition of special Tracts.

During the past fortnight the number of people gratuitously relieved in the Chanchul sub-division has increased from 18,356 to 28,461. The whole of the north-east portion of this sub-division has been divided into 39 village groups. The number of villages in each group varies from 7 to 12; at the centre of each group a mundul, on Rs. 10 a month, and weighman on Rs 4, has been appointed. In the Sudder Circle, it was found necessary to form only three of these groups. In Gomastapore circle four such groups were formed. In Shibgunge, none; in Gomastapore, 4; Total 43.

In the Maldah Circle it does not seem necessary to form any of these groups. A small centre was opened at Kedipoor.

There were two deaths from starvation reported during the fortnight, both in the Chanchul sub-division. One of the persons who died was a *tanti*, who was on his way, with three others, from Kudbah thana in Purneah to English Bazar; he fell ill near Multipore, and was left by his companions, who returned to their home. He was found in a dying state and fed in Multipore relief centre, but died soon after his having been admitted. There seems to be no doubt but that the death of this man was owing to his not having had enough to eat. The second case was a man who crossed over from the Sonthal Pergunnahs at Futtehpore. This man had been ill for the previous six months, so his death can hardly be attributed to starvation.

B.—RELIEF WORKS.

The number of persons employed on relief works is given in the annexed table. Those employed in the Chanchul sub-division are not given in detail. They worked on 13 roads and 16 tanks; the daily average during the fortnight in that sub-division was 1,548 against 1,784 last fortnight. There was a great falling-off during the last week of the fortnight.

In the Sudder sub-division the daily average was 6,773, having increased from 4,463. Thus the daily average working in the whole district has increased from 6,247 to 8,321. The

daily average sent in direct to Government is wrong. Before the receipt of Government orders on the subject, I sent out orders to pay all the laborers employed on relief works ¾ of their wages in kind and ¼ in cash. Since receiving the orders I have changed the proportion to ⅞ and ⅛. The coolies do not like receiving so little cash. On one road near Gomastapore they left work in a body but returned after one day's absence.

I allow the laborers uncleaned Burmah rice at 14 seers for the rupee. In the Department Public Works cash is paid to the laborers and grain sold to them through *modies*. The total amount of rice sold to laborers under the Department Public Works and civil officer during the fortnight was 2,359 maunds 21 seers 1¼ chittacks, and the number of laborers employed was 116,397.

Annexed is the statement called for by circular No. 3369—S.R. :—

C.—Transport of Food.

The following table shows the total amount of grain received into the district and despatched to Purneah and Maldah—

	Mds.	S.
Total quantity received	967,802	0
Despatched to Dinagepore and Purneah ...	775,798	8
Stored in the district	135,635	0

1,20,070 maunds were sent by boat to Purneah. Of this 54,009 maunds were sent by Mr. Livesay direct to Dengra Ghaut, and a good deal of this has reached its destination. 66,061 maunds were sent in larger boats to Dumrail, to be sent on from there to Dengra in smaller boats. Most of these larger boats stuck fast between Maldah and Dumrail, so that only 2,500 maunds had reached Dumrail when I was there last Thursday. The river has risen six inches since then, and Lieutenant Green has removed the snags and other impediments in the river between Maldah and Dumrail, so that by lighting the big boats and sending on the grain in smaller boats, there is every probability of all the rice reaching Dumrail by the end of the week. The whole allotment for the Dinagepore district has been forwarded. Mr. Livesay is now, by order of the Relief Commissioner, forwarding the Dinagepore reserve, and will continue doing this as long as the road remains in fair order. The daily average sent off by boats from 17th to the 29th, on which date the boat service was closed, was 2,713 maunds.

The quantity transported by land carriage averaged 1,360 maunds per diem.

D.—Storage of Government Grain.

The following quantities of grain has been stored in the several golahs of this district, viz.—

	Maunds.
At English Bazar	4,462
„ Old Maldah	27,195
„ Gazole	9,995
„ Chanchul Sub-division	44,608
„ Nowabgunge	8,750
„ Jhelim	1,000
„ Seebgunge	1,500
„ Gomastapore	1,125
„ Parbuttypore	1,000
Total ...	135,635

Of rice entered as stored at English Bazar 9,985 maunds are in transit.

Of the rice sent to Chanchul the whole has been stored in the chief golahs, and Mr. Reily is now engaged in filling the subsidiary golahs in each group; he is placing from ½ to ¾ of the rice in 30-seer bags to facilitate carriage.

The following table will show the quantity of grain sent out to subsidiary golahs from the sudder during the fortnight:—

	Maunds.
To Amirtee	100
„ Bulbul Chandi	400
„ Moheedipore	300
„ Kaliachuk	200
„ Arahpore	100
„ different persons in English bazar	99
Total ...	1,199

Baboo Sitakant Mookerjee, grain officer, has given the details of the system followed, in a letter of which I annex an extract, showing the centre golahs from which the subsidiary golahs are supplied:—

1.	English Bazar, including the reserve golahs at Fulbari	1. Bholahaut. 2. Bulbul Chandi. 3. Kaliachuk. 4. Moheedipore. 5. Arahpore. 6. Amirtee.
2.	Old Town Maldah, including reserve golahs at Chanchul	Maldah.
3.	Gazole	1. Bamungollah. 2. Myna. 3. Bargateah. 4. Moheshrampore.
4.	Gomastapore	1. Parbuttypore. 2. Rohunpore. 3. Sirsi. 4. Alsapore.
5.	Nawabgunge	1. Jhelim. 2. Nawabgunge. 3. Seebgunge.
6.	Chanchul Circle ...	1. Dumrail. 2. Shompgunge. 3. Shekhsatun. 4. Multipore. 5. Gokulpore. 6. Chanchul. 7. Tulsigunge. 8. Shamsi. 9. Debeepore. 10. Bhadu. 11. Kusidah. 12. Futteahpore.

E.—Advances to Private Parties and their Results.

During the fortnight Rs. 400, which sum had been sanctioned by Mr. Alexander, was advanced to the naib of the Tahirpore Court of Wards for excavating two tanks; 395

maunds of rice were advanced to the ryots in the Sudder sub-division during the fortnight, and 1,226 maunds in the Chanchul sub-division; besides this, Mr. Reily advanced to his own ryots 2,892 maunds from Court of Wards' fund.

F.—Charitable Relief.

The following table will show the number of people who were relieved during the fortnight. The number has greatly increased, the daily average for the preceding fortnight being 6,340, that for the present fortnight 8,979, besides those at Seebgunge, from which figures have not been received, and omitting those of the Gazole centre, which are obviously wrong.

During the fortnight seven assistants came into the district, and have been stationed at the following centres:—

Gazole.	Chanchul.
Kaliachuk.	The Sudder.
Seebgunge.	Gomastapore.
Nawabgunge.	

Statement showing the number of people charitably relieved in the Maldah District for the fortnight ending 30th May 1874.

F. Wyer,
Offg. Magte. and Collector.

No. 14, dated Rungpore, the 1st May 1874.

Memo. by—E. G. Glazier, Esq., Magistrate and Collector of Rungpore.

Forwarded to the Secretary to the Government of Bengal, Scarcity and Relief Department.

Fortnightly Narrative of Scarcity and Relief of the Rungpore District, ending the 30th May 1874.

A.—State of the Country.

Market rates have been maintained, with a tendency to rise, more especially all along the northern part of the district, which has hitherto escaped much distress. Some alarming reports were received from Forunbaree thana across the Teesta to the north of distress consequent on the rise of prices, and arrangements have been made to sell rice to the public at Tooshbhandar. The supply will be drawn from Kulaghat in the Borobaree division, where there will be a surplus. The District Superintendent of Police is making a careful inspection of the condition of the thana. Some reports of starvation sent in by the moonsif have been proved to be myth. The early rice will be reaped at the end of June, and the sales now about to be commenced will be sufficient to meet the necessity of the case. I went in the course of the week to Kishoregunge and Durwani. Everywhere the supply of rice has fallen off, owing partly to the continued drain on the northern thanas and Julpigoree, and partly, I understand, to a forcible stand of the inhabitants of the Dooars against fresh exportation. At Durwani the sales have already amounted to 2,600 maunds for 11 days, and on one day amounted to 439 maunds. The people came from a distance of 20 miles to buy the rice. I have now made arrangements to open sales at Kishoregunge, 19 miles to the north-west of this, on the Julpigoree road, and have appointed an officer there to grant passes to traders to buy rice at Chillakhal and sell in the other markets of the Juldhaka thana. Kishoregunge

sales will be supplied from Chillakhal; Durwani sales from the railway stores. I met at Durwani the Commissioner of Cooch Behar, and he agreed to take the 10,000 maunds he requires for Boda mainly from the northern golahs, so as to leave me free to draw on the southern ones to recoup my sales. At the head-quarter markets the supplies have only been half the usual quantity, and from Dinagepore 160 maunds only have come in during the fortnight. The prices are 7½ seers the rupee.

In Molung the opening of the public granaries at Meetapukar and Talimgunge has done much to relieve distress; 1,400 maunds have been sold in 14 days. The prices fell in the local markets, and the traders have now begun to take passes to bring rice from Kallygunge, where they can draw their supplies cheaper than elsewhere. In Pirgunge the system of passes has been very successful from the first. It coincided with the almost total failure of the Dinagepore supply, and was most opportune. The relief officer reports that the rice thus brought in on passes only supplemented the deficiency of supply from other sources. A total of 1,764 maunds was thus brought into the markets. In Govindgunge the traders have hitherto drawn their supplies from the south, but are now turning their attention towards Kallygunge.

But while the western markets have thus failed us, the supply from the south has much increased, and the Teesta trade is very active, as is also that up the Dhurlah, and the eastern thanas are now well supplied with grain at cheap rates, so that a speedy close of relief works there is anticipated in consequence of the orders for paying laborers in grain which are being now carried out.

My importation returns show a total of 62,000 maunds, besides 14,000 local supplies, of which 34,000 come from Serajgunge and the south, and 20,000 from the north and north-east (including Dhurlah trade).

Sales have been continued at Santamari and Chillakhal at the usual rate of about 300 maunds a day at each place, and sales have been commenced at Alaikuree in the Mahigunge division, but at present only 47 maunds have been sold there. My total sales to the public will be shown under heading C.

Market quotations are as follow:—

				s.	ch.

Borabaree	,,	...	10 to	13	5	ditto.

We have had a copious rainfall during the fortnight (7 inches) the whole of which has fallen within eight days. On the night of the 23rd we had a severe thunder-storm. The lightning struck at the foot of a tâl tree on the race course, dug a zig-zag trench along the ground for 15 yards, and then branched into two forks—one of which contained the trench 11 yards further. At the commencement the state of the crops was very critical; they were withering in every direction, but now in most parts the early rice is safe. In the south Govindgunge and Pirgunge more rain is wanted. About one-fourth of the jhally rice has been lost, but the late rain will go far to save the aous proper in these thanas. In Pirgunge the Mahomedans celebrated a second Mohurrum in their joy at the rain. Govindgunge is still in a critical state. The relief officer is looking forward to the next fortnight with great anxiety, and should not heavy rain fall he anticipates a prolongation of distress for two months, and may need more rice. This division probably, however, participated in the heavy down-pour which accompanied the storm of the 27th. I was at Durwani, where it was very severe. It was equally felt here and down the whole length south to Bogra, as far as I have heard at present * In Alipore, Borabaree, and elsewhere some of the rice has been cut. In some places unripe rice has been brought to market, so eager were the people to secure the proceeds; and towards the east in Mahigunge and Alipore the rumour got abroad that the Government intended to take a considerable portion of the crop to recoup the expenses of the famine, and fears were entertained that the people would take to a wholesale cutting of the unripe crop. Every effort was made by Government officers and zemindars to dissipate these fears, and the minds of the people have now been again reassured.

* I have just heard that there has been a good fall of rain in Govindgunge.

The condition of the people is not worse, which is as much as can be said at this the most trying season of the scarcity. Many cases of distress still come to light, and distress is spreading widely in Govindgunge, Pirgunge and Molung, the only three thanas which are seriously affected by the famine. Mr. Damant reports: "A man, his wife and child came to me at Kamdya for relief; they were so emaciated and weakened by starvation that they could hardly walk, but they are now doing well; they came from Panch Bibi thana in Bogra. The people who have been long employed on relief work are in fair condition, but some of the new arrivals have a starved look." So the Molung officer writes: "The distress is intense on all sides, and in many places the reduced appearance of the ryots too plainly shows that their struggle for life is very hard, and that the iron grip of famine has at last been laid upon the land"; and he instances a professional fakir, who lived on income received from his disciples,

and who in April last, though he applied for relief but refused to go to the roads, or take cotton-spinning for his family, now came to get the latter relief, adding that though for generations no one of his family had to spin cotton for bread, none of them had ever before felt the pinch of famine. The group system is being set on foot in the three circles above-mentioned, Govindgung, Peergunge, and Molung, not throughout, but in those parts only where the aous is not extensively grown, and the people will have to depend in a great degree on the amun crop. On the Kamdya side, Mr. Damant has personally introduced the system, and drafted all the women and children into their own villages where they are working on village paths, cutting jungle, &c. Two hundred women are employed at the golahs in rice-husking. It is also about to be introduced into the south-east of the thana and in parts of Pirgunge. Contract work has been introduced on all the roads. A number of the coolies left for a day or two, but all are coming back again. In Pirgunge the system of piece-work is completely carried out. In Molung the relief officer has most successfully carried out my instructions regarding the removing of the women and children to the villages. He has working 6,991 men against 317 women and 467 children, while 558 have been drafted to village roads. This material reduction has been made in the number of those employed, and work is extracted in every case. The work done in the villages is to a great extent real work and useful to the public. In Govindgunge the rates for subsistence have been raised by the relief officer, in consultation with the Commissioner, from ½ seer rice and one pice per adult, and ¼ seer and half pice per child to ¾ seer rice and one and a half pice per adult and ½ seer rice and one pice children. I cannot but think that these rates are unnecessarily high, especially in the matter of the cash payment for condiments, and the allowance of rice for children. My former rates are still in use at Molung and seem sufficient.

The question of advances is in progress of settlement. From Govindgunge I have no detailed reports; but the laborers on the road will be given leave and advances for about a month to plough and plant their amun crops, on the same system that has been adopted with success in the case of the aous cultivation; and as in the bad parts all the population have come out to work this plan seems one best calculated to work well. In Pirgunge and Molung lists are well advanced. Lists in 74 villages have been made in the former thana and 46 of the latter; but in these two thanas the question depends very much on the prospect of the aous crop. If it does not fail extensive advances will not be needed. The lists are being rapidly completed, and some advances have been already made in Molung. In one case, 280 maunds have been advanced to 100 persons on the joint security of the village.

In Govindgunge there will be need to advance money for seed-grain. I expressed my opinion to this effect in a previous report, and the Commissioner has, in his visit to the circle, reported especially on this subject, and made an application for sanction to advance the money. There is sufficient need to be had for money, and the Government rice is wanted for consumption, and cannot be advantageously exchanged for it. The Molung officer is making arrangements to effect exchange of rice for seed-grain. It will be necessary to advance for this purpose to ryots in the west of the thana in those cases where zemindars have not provided for their ryots, and all arrangements are being made for the purpose. In Pirgunge as yet no exchange has been made, but it is anticipated that seed-grain will be obtainable in the markets.

In Sundergunge, Sadullapore, and Mahigunge circles distress continues, but supplies are good. There are still a number of children on the roads here, but measures are in hand to remove them. The number under relief in these circles is comparatively small.

In Kumargunge and Durwani distress is comparatively light, and in Borabaree I anticipate that operations will soon be in a position to be wound up.

B.—Relief Works.

The number of relief works is as under:

Divisions.	Mean number of Coolies employed daily.			
	Men.	Women.	Children.	Total.
A. Govindgunge	20,738	4,159	6,083	30,980
B. Pirgunge	3,785	546	627	4,958
C. Sadullapore	2,593	1,013	2,132	5,738
D. Sundergunge	250	606	1,162	2,018
E. Molung	6,991	317	467	7,775
F. Mahigunge	1,104	198	929	2,231
G. Kumargunge division	1,155	3	10	1,168
H. Borabaree	412	47	68	527
I. Durwani	850	.....	82	932
Executive Engineer's	493	.....	17	490
Total ...	38,351	6,869	11,577	56,797

Govindgunge still shows an increase, while Molung and Pirgunge have a decrease. Measures are everywhere in progress for paying the laborers in grain instead of in money. This has been done practically all along, as the people were sold grain at cheap rates which they eagerly bought.

C.—Transport of Food.

The Kallygunge transport has now been completed, and the carts and pack-bullocks have been discharged. During the fortnight 37,000 maunds were despatched, including nearly 16,000 maunds sent to Dinagepore out of the excess quantity sent us. Only 5,000 maunds out of the 10,000 allotted for Mymensingh have yet been taken away. The work at Kallygunge consists now of sales from the reserve there on passes to traders, and further supplies sent up to Chillakhal out of the same reserve to maintain the heavy sales we are now making at our different northern sale depôts. Some slight amount of transport work is still remaining at Panialghât in filling up Molung division, and in despatching rice to Kishoregunge in order to keep a supply for the sales about to be commenced there.

D.—Storage of Government Grain.

F.—Charitable Relief.

(Prepared by the District Relief Officer.)

During the past fortnight the applicants for charitable relief have increased, and their wants have everywhere been supplied. From Govindgunge, however, where additional numbers were expected, it is reported there has been no increase as yet.

A most sensible change for the better is apparent among the people from the seasonableness of the weather, and the beginning of the new harvest; still there is no sign yet of the expected diminution of numbers among those requiring charitable relief. They are temporarily on the increase in the parts where scarcity and dearness are at present most felt.

It is noticeable that there has been a falling off of attendance at the cooked food relief centres. For the fortnight ending May 2nd there were 3,987 recipients of cooked food in the Mahigunge division; the numbers at present are 1,325. One new private relief centre has been opened at Boratee in the Kumargunge circle.

Eight maunds of the spun thread have also been given out in that circle for weaving into dories and satringies (mats and carpets). Any of the thread not disposed of in this way will be taken at the jail for manufactures.

The numbers employed in light work cannot now be shown with any completeness, as the transfer from the roads is being gradually proceeded with, and the necessary returns have not been sent in by the relief officers. Endeavours are being made to get the returns as accurate and complete as possible.

Advances to poor people with cotton or thread, or other materials, for charitable relief with employment, are now being made partly in grain and partly in money.

The returns hitherto submitted have, from their incompleteness, understated the numbers charitably relieved. From the reports, obtained too late for incorporation in the district return, more accurate information of the past and present progress of charitable relief will be prepared for submission hereafter.

F.—Mean Charitable Relief.

E. G. Glazier,
Offg. Magistrate and Collector.

No. 509—S.R., dated Bogra, the 1st June 1874.

From—E. J. BARTON, Esq., Offg Magistrate-Collector of Bogra,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative of scarcity and relief in this district which is now due.

2. On the 13th May 1874 I arrived in this station, and began my duties as district officer. On the 26th May 1874 I assumed charge of the office of Magistrate and Collector of the district from Mr. Kelly on his being appointed Officiating Judge of Rungpore. I have therefore been directly connected with relief operations here during the entire fortnight.

3. Mr. Robinson, the Relief Commissioner, was in the district for a good part of the fortnight.

4. *Condition of the country and people.*—I have travelled a good deal in the interior during the fortnight, and from ocular observation I am in a position to say that in no place which I visited was the condition of the country or the people such as to cause very great anxiety, although undoubtedly the great price of food must have inflicted hardship and some hunger on the very poor. The price of food everywhere is high, as will be seen from the quotations noted in the margin, which represent almost accurately the bazar rates down to this day. Notwithstanding this great dearness, which must cause pinching to very many, I cannot say that I anywhere observed upon the persons of the people signs of hunger or of deficient sustenance. Men, women, and children, have an appearance of being sufficiently nourished. Every where the village bazars were adequately supplied with food, although at very high rates. The hâts are great institutions in Eastern Bengal, and on hât days one may see almost the whole of the population of the neighbouring villages congregated either for business or pleasure. Wherever I have been, I have found the people, with few exceptions, in their usual state, although it is universally said that if Government had given no help there would have been great distress. Nowhere have I observed any general depression. The hâts are very fairly supplied with rice and other food-grains. There is certainly no difficulty in getting food for any one who has money to buy it. The very poor must be straitened, but measures for their relief are in full operation, and they have not been slow to take advantage of them, as will be seen further on in this narrative.

Name of place.	Number of pucca seers per rupee at which rice was selling during the last fortnight
Bogra town	9½ to 10½ seers
Dupchanchia	10½ seers.
Panchbibi ...	9 „
Khetlal	10½ „
Sherpore	7½ „
Shibgunge	9 to 10½ seers.

5. The state of the country has been further ameliorated by a most propitious rainfall of a total of about 4½ inches, which extended over three days of last week, and seems to have been very general throughout the district. The young plants of the aous crop, both in the khiar and pali lands, were beginning to look a little parched from the long drought which had prevailed before, and undoubtedly the crop would have been very considerably damaged had this drought lasted for five days longer. But the bounteous and ample rainfall has removed all danger, and there is every probability of the people securing a bumper aous harvest in the month of August next. This will vastly improve the condition of large tracts of the district, and will increase the food-supply of the whole. In those portions of the district where there is no aous (and they too are extensive), it is to be feared that high prices will continue to prevail.

6. The minor crops are also doing well. Jute, mulberry, sugarcane, and sesamum, are promising very well. The bora rice and the pulse called mug-kalai have been cut, and have yielded upon the whole an average weight of grain.

7. *Relief works under the Executive Engineer.*—The works under the Executive Engineer number forty and consist of 18 roads and 22 tanks, and I find that during the fortnight ending 16th May 1874 laborers were engaged on every one of them. The total daily average of these laborers for the fortnight ending the 16th of May is as noted in the margin.

Men	9,455
Women	13,513
Children	14,179
Total ...	37,147

8. On the 16th of May work had ceased on 18 out of these 40 roads and tanks. I much fear that the recent heavy rain, and the near approach of the rainy season, will compel us to stop our tank-works before any of them are finished.

9. One of the great features in these relief-works is the small number of able-bodied laborers whom one sees upon them, and the crowds of women (generally old) and children who meet one everywhere. The piece system is applied to the able-bodied men, but not to the women and children who may be found squatted in thousands along the roads, and engaged (when they are doing anything) in gently tapping the surface of them with *bamboo* sticks. The little work they do is useful, for it smooths the tops of the embankments which the able-bodied have thrown up. Although we cannot apply the piece-work system to women and children, it seems very desirable that we should make them work a little more than they have hitherto done. They will be divided into

convenient gangs. Each gang will have a certain length of road (well within their strength) daily measured off to smooth by the operation of tapping, and will be required to do that daily task. It is however a work of great difficulty to organise these swarms of women and children. I am not at all sure that the best thing we could do with them is to turn them off, giving each a supply of grain. However, if we could get work out of them, the stronger of them will be very useful in smoothing the surfaces of the *cutcha* roads An endeavour will be made to get some work out of them, but I am not at all sanguine of success. I have given orders that, in introducing the daily task, no great pressure or compulsion has to be used.

10. Mr. Clay, c.s., has been engaged in turning the feeblest of the old women off the works, and the result of his labor is noted in the margin. Each old woman got 20 seers of rice, and was sent with it off the roads into her village. This form of weeding will be continued.

Number of old women turned off.	Total grain given to them.
	Mds.
2,802	1,401

11. All those who are turned off the works are entered in the village registers of the relief officers, and they will not be lost sight of.

12. On joining here I took steps to carry into effect the orders of Government to pay the laborers on relief works in grain. On the 16th May 1874 I addressed all the circle officers on this subject, directed the measure to be at once taken in hand, and sent them a set of simple rules which I had drawn up. At first, fearing the effect of the sudden introduction of this novel form of payment everywhere, I ordered the grain payments to be made on six only of the most important works; but on receiving more stringent orders from Government, I ordered the system to be extended to every work in the district. There was necessarily some little delay in getting so important a measure into working order; grain mohurrirs had to be appointed, subsidiary golahs had to be established where necessary, grain had to be carted off to many of the works. I can say that no time was lost Mr. Clay and the relief officers have been specially entrusted with the duty, so as to secure its being successfully carried out with the least possible inconvenience to our laborers I am now able to report that it is in full op ration already on several roads and tanks, and in the course of a few days this will be the case for every work in the district.

13. I anticipate that one effect of the introduction of grain payments will be to greatly diminish the number of laborers on our works, certainly of the able-bodied. I hear that when grain payments were introduced, the able-bodied left who were working on certain portions of the Dinagepore road.

14. Henceforth, by special orders of the Relief Commissioner, payments of laborers, whether in grain or money, will be in the hands of the relief superintendents of circles and under their general superintendence. Being nearer the works, they will be better able to look after the supervisors than the Executive Engineer. This and grain payments together will prevent or lessen those abuses which have to some extent been going on. During the time of my predecessor four supervisors were sent to jail. At present I have inquiries into the conduct of three of them going on. Abuses were and are inevitable when work has to be done through the agency of men of this stamp.

15. *Storage of Government grain.*—The completion of the storage of grain in the remote interior golahs was a matter of pressing importance, inasmuch as the rains are near, which will make inland transport over our district roads almost impossible. To this therefore every attention was paid. Fortunately the exertions of my predecessor had succeeded in gathering a considerable number of carts, which greatly facilitated the operation. The Deputy Collector, Baboo Madhuv Chundra Maitra, and the ministerial officers rendered valuable assistance. The result is that I am able to report that the transport of Government grain *from Bograh* and its storage in the interior are nearly finished. In the margin I append figures which give a short compendium of what has been done. These figures do not of course include the amounts stored at the central golahs of Bograh, Shariakandi, and Chandanbasia. They shew the storage in the remote interior in minor golahs. The balance of the rice (10,000 maunds) at Chandanbasia for Bograh will be transported in boats.

Number of interior golahs to be filled from Bogra.	Amount stored in them last fortnight	Amount stored in them this fortnight.
	Mds.	Mds.
23 golahs	55,072	93,061

16. I have said that the work of storing all golas which are to be filled from Bogra is as good as finished. There still remain the marginally noted golas into which are to be put 20,000 maunds rice lying at Nowgong in addition to the grain now in them. Captain Conolly was entrusted with this duty and sent to Nowgong. Unfortunately he could not get carts, and was able to send away only about 1,000 maunds, when he received orders transferring him to anoth r duty connected with the inspection of golas. The Relief Commissioner is giving all possible aid in the transport of this Nowgong rice, and I have no doubt that we shall manage it. I only on

Name of gola	Amount of rice now in the golas.
	Mds.
Hilee	5,630
Adamdighi	2,582
Panchbibi	12,207
Badalgachi	1,094
Somamookhi	2,179
Total	24,301

the 29th May learned from Captain Conolly what difficulties he had in getting carts. I have already sent away more than three hundred carts from this place, and hope to have a good many more off in a few days. Lieutenant Hanki is at Nowgong doing Captain Conolly's work, and I think there is every prospect that it will be done. Many of the above golas are approachable only by carts.

17. Arrangements have been made to send by boat a balance of 10,000 maunds still due to the central gola at Bogra from Chandanbasia. The rivers are already open for small boats, and one convoy has left Chandanbasia for this place. The boat transport will cost about one-third of what the transport by cart costs us.

18. In order to provide against the chances of fire, I have had another gola (able to hold 13,000 maunds) built at Bogra at some distance from the former golas. The new gola is already finished and ready for the reception of grain. I intend to fill it with the rice which is coming in boats from Chandanbasia.

19. *Advances.*—I give below a statement shewing the advances of all kinds which have been given up to date for purposes connected with relief.

	Up to the last fortnight.	This fortnight.
	Rs. A. P.	Rs. A. P.
(*a*) Advances to traders and others for the purchase of grain (paragraph 4, Circular No. 80)	500 0 0	0 0 0
(*b*) Advances to zemindars for improving water-supply of a village (paragraph 21, Circular No. 80) ..	3,150 0 0	0 0 0
(*c*) Advances to zemindars to help their ryots. (*See* Government letter No. 403—S.R. of the 3rd February 1874)	42,900 0 0	7,970 0 0
Total ..	46,550 0 0	7,970 0 0

20. *Sales of Government grain to the public.*—I submitted a scheme for the sale of Government grain to the public to the Relief Commissioner while he was here, and he has sanctioned it in all its details. It is much the same as that which has been sanctioned by Government, and which has been followed in previous famines. The extent of our stocks compels us to put certain restrictions upon these sales, which, while they will, I hope, prevent the exhaustion of our golas, will not rob the measure of its value as a means of relief. The cheapest rate at which we shall sell to the public is 12 seers for clean and 14 seers for mixed rice. At present we are selling a little cheaper than the local bazars, at from 10 to 11 *pucka* seers per rupee according to quality. The system of sales (which I need not minutely describe here) is simple, and has proved itself to be practicable so far as it has gone. We shall have sales at the golas, and sales by bunneahs in the villages. Already we have engaged several bunneahs, although we are but beginning. These sales will be carried on in all the six relief circles and over all the district under the immediate control of the superintendents and their assistants. I give in the margin the latest returns, which are the operations of only three days, merely to shew that we have made a beginning. This is one of the best forms of relief, and there are symptoms that, when our starting sales become thoroughly known everywhere, large numbers will come to buy from us, probably more than we can safely supply.

Name of circle.	Quantity in maunds sold to public.
	Mds. S. C.
Bogra	145 0 0
Panchbibi	311 0 0
Adamdighi	Figures not given. Sales begun.
Sherpur	109 22 0
Shibgunge	Figures not given. Sales begun
Khetlal	9 32 0
Total ...	575 14 0

21. We are much impeded by the want of weights and scales. Six sets sent here from Calcutta have been lying at Serajgunge for the last two months. I wrote to the Magistrate there a fortnight ago to send them up, but I have not received them yet.* In addition to these we urgently require six sets more, for which Mr. Commissioner Robinson has made an application. I beg that they may be sent from Calcutta without delay.

* The six sets have arrived to-day and have all been despatched into the interior. E. J. B.

22. *Loans of grain to ryots.*—This form of relief has been freely administered during the fortnight. I append in the margin a synopsis of what has been done under this head in each relief circle.

Name of circle	Quantity of grain given away in loans to ryots.
	Mds. S C.
Bogra ...	8,268 0 0
Shibgunge	2,096 0 0

Panchbibi and Badalgachi ..	826 27 11
Total	13,473 11 7

23. Shortly after my arrival here I found that in some places, notably in the relief circle of Bogra, these loans were given, notwithstanding very clear orders by my predecessor on the subject, with a profusion and a recklessness which would probably end in demoralizing the people, and in other abuses. I endeavoured to check this, and

pointed out to each circle officer what were the orders of Government as to the way in which these loans should be managed. In most places this had the desired effect, and the loans are now administered with more discrimination and care.

Name of circle	Name of Superintendents.	Number of Assistant Superintendents

24. *Charitable relief.*—As already reported by my predecessor, all the necessary machinery for this is in full working order. The circles are manned as noted in the margin. The bungalows of some of the Superintendents are ready, and those of others are approaching readiness.

25. The group system, village visitation, and village registration, are introduced only in the worst parts of the district. A synopsis of the work of the relief officers in this direction is given in the margin; village registers of those to be relieved in many of the worst tracts have already been opened.

Name of relief circle	No of villages visited during the fortnight by the Superintendent and his Assistants.
Bogra	98
Panchbibi	33
Adamdighi	45

Shibgunge	41
Khetlal	66

26. Every form of relief is being administered, and every exertion is being made to discover and succour the distressed. Donations of rice and money (the latter are nearly stopped) have been given. Loans of grain have been freely made. Light labour gangs have been formed. The spinning of thread, the weaving of cloth, rope-making and gunnybag-making and other descriptions of work, are being carried out in each relief circle I append to this report a table (Appendix A) which will shew the Government what has been the work of the relief officers in all these directions during the fortnight.

27. Relief centres and poor-houses will be opened at the marginally noted places as a precautionary measure against the sudden appearance of severe distress during the rains, and as a means of relief to those who are homeless and sick and utterly disabled.

REMARKS.—In column 4 does not appear the balance of grain which is lying at Chandanbasia, the place of receipt. I beg to state here that I do not guarantee the accuracy of these figures. They are as accurate as I have been able to make them. Certain calculations made by the Relief Commissioner and myself make me fear that there is an error in the grain accounts.

NOTE.—Besides this some of the minor golas have been stored with rice.

E. J. BARTON,
Offg. Magte.-Collr. of Bogra.

No. 903, dated Pubna, the 1st June 1874.

Memo. by—W. V. G. TAYLER, Esq., Magistrate of Pubna.

SUBMITTED to the Officiating Secretary to the Government of Bengal, Scarcity and Relief Department, for information.

Fortnightly Narrative of the Pubna Sudder Division ending the 30th of May 1874.

A.—STATE OF THE COUNTRY.

THE state of the country is somewhat worse than at the date of last report. Prices have risen, and the pressure from more high prices, is no doubt more generally and severely felt. The prospects of the future are, however, much brighter. We have had heavy rain during the past week, which has done much good to the *aous* crop. Though distress is general, it cannot be said that there is anything approaching to famine in any place That stocks of rice are now falling low, may be assumed from the considerabe rise in prices, and the diminution of imports. As such distress is likely to increase until the harvesting of the *aous* crop

commences, the relief committee have applied for 10,000 maunds of Government rice for distribution through the sub-committees. Money is now in the hands of all the sub-committees, for the purchase of grain in small quantities, to meet any cases of urgent destitution that may arise. No cases of actual emaciation have been reported, and the little sickness now prevailing shows conclusively that the distress felt up to the present, has not been severe enough to affect the general health of the district This is one of the most reassuring facts in connection with the present scarcity and high prices.

B.—Relief Works.

The numbers employed in Chatmohar and Sujanagar roads are 438. Malanchi road has been just finished, and a new road from Radhanagar to Munshedpore *via* Maligacha has been opened lately. The numbers employed on that road are 37.

C.—Transport of food.

None.

D.—Storage of Grain.

Government grain has been written for, but has not yet arrived. The sub-committees have been authorised to purchase and store in small quantities in order to meet emergent cases of distress, and this has been done in some places.

E.—Advances to Private Parties.

Sanction has just been received for advances to zemindars, but no advances have yet been made.

Charitable Relief.—Rice and dâl are being given by the sub-committees to the indigent, old, and sick persons who are totally unfit for relief work. The number cannot now be ascertained from the sub-committee reports. No Annachattras have been established as yet

Financial results.—The private subscriptions, Rs. 7,860-8 have been promised up to date, of which only Rs. 4,544 have been realised ; measures are now being taken to realise them shortly.

Expenditure as detailed below :—

	Rs.
Sent to Sujanagur sub-committee for road works	900
„ to Broja Lall Babu for Malanchi „	100
„ to Chatmore sub-committee for „	1,100
„ to Foridpore „ „	500
„ to Supervisor of Maligacha „	100
„ to Sudder sub-committee for charitable relief	400
Cost of repairing a cart track from Mochanpore to Radhanogur ..	50
Sent to Mofussil sub-committtees for charitable relief ..	1,900
Total ..	5,050

Ninth Fortnightly Narrative from 16th to 28th May 1874.

(A.)—State of the Country.

In my last narrative I stated that the gradual exhaustion of stores had produced an increased demand for rice, and that a series of storms had almost stopped the supply by boat, the result being a scarcity of rice in the bazars. Two other causes contributed to prolong this dearth, a rise of prices in the marts outside this sub-division, and a general belief among traders that the current rates were only temporary, and would be followed by a fall, to the injury of all who ventured to import. This state of things continued during the early part of the present fortnight ; during the last few days imports have been large, probably about 2,000 maunds a day. Rice may now be had in considerable quantities at all the principal river side hâts, but it is selling at famine rates as the following table will show—

Name of market	No of seers per rupee in last return	No of seers per rupee in this return
	Seers	Seers
Serajgunge	Nil	10
Raigunge	12¼	7½
Pangasi	12	9
Taras	10½	10½
Ullapara	12¼	9
Subgacha	Nil	8½
Chowali	Nil	8½

These figures show the retail prices. Wholesale purchases have been made at Rs 4 per imperial maund in Serajgunge, and Rs. 4-4 at Ullapara. The very high rate at Raigunge has attracted a good deal of rice to that mart, where it is generally scarce, and no doubt prices will fall there to 9 seers per rupee. At one time during the fortnight as much as a rupee was given for six pukka seers.

I believe that the stocks of two-thirds of the people are now quite exhausted, and that they will have to live by buying in, or what grain they gather until the aous is threshed. There are no accumulations in the hands of traders. The sub-division is therefore dependent on its imports, and any check to these, such as a week of storms, or a cyclone, would be disastrous.

The rainfall during the fortnight has been 2·58 inches. It has done much good. The crops are backward about Koijure, but may be said, generally speaking, to promise well. There are however some lamentable exceptions. Hail has destrayed the flowers of the til in many places, and seriously injured the young jute plants. The sudden rise in the river Jamoona has swamped much low land, not only on churs, but also in the country. I know of about 300 biggahs of fine crops thus destroyed at Jamerta, and 500 at Goitel, on the road from Ullapara to Taras. Along the rivers more extensive damage has been done. These accidents would not occasion serious anxiety in ordinary years, but the case is different when, as at present, the population has already been reduced to poverty and rice is at famine rates.

I have met very many men in an emaciated condition; some of them cultivators working in the fields. Most of those who receive charitable relief may be classed as known cases of misery, which, but for our assistance, would have led to starvation. The most painful occurrence reported during the fortnight, was that of a woman who gave birth to a child unassisted, in a field near Jamtoil. I found her at the annochatra when I happened to visit it next morning, and she said her husband had deserted her, and that she was coming in from Ullapara to me for assistance when overtaken by labor on the road Of course she received a relief ticket, which will enable her to get food at her own house during the famine.

The people generally are passing through a very critical period. The majority of the cultivators in the two distressed thanas are living on insufficient food, but are comforted by the belief that the sufferings will now be short, as the kaon, til, jute, and aous crops will all be partly, or wholly cut in two months. All the indigent classes in these thanas are on our hands. In the other two thanas, the paupers, that is the beggars other than active fakeers, the women who live by husking rice, the old and sick poor, are in great straits, as we have not introduced the village relief system in these parts. The distress of the cultivators is less, but still it is everywhere felt. At present the sale of mowha gives them the means of subsistence. These thanas where the amun crop was tolerable, have suffered the most from flood and from hail.

(B.)—Relief Works.

Hitherto the ryots of Shazadpore and Serajgunge altogether refused to accept earth-work; those of Kaigunge and Ullapara had taken to it very sparingly, only when it was brought to their doors and they were reduced to extremities. They argued that it was better for one of the family to die than for the whole to be reduced to poverty by abandoning their cultivation, and moreover a cultivator in these parts loses social position by working on the roads. During the present fortnight some cultivators have asked for work near their homes. The season is too advanced for much good being done in that way, but I have nevertheless commenced to open three village tracts, that from Jhoul to Ullapara, that from Kalgunge to Berahkolah, and that from Shazadpore along the khall to the Orasagur. The latter is part of the postal track between Serajgunge and Pubna I have also engaged to cut some noxious jungle at Jhoul. We have no return as yet of the number of coolies engaged on these roads.

The numbers engaged on the roads previously opened are—

Hurrial tract	71
Goiloe ditto	71
Bhodragha ditto	10

The returns for the Chandaokona road have not been sent to me lately, probably they have gone to the Public Works Department. My account of it showed 179 laborers I wish the Hurrial and Goiloe coolies would come into Chandaokona where really good work is being done under competent supervision. The two tracts mentioned are in the remotest part of the sub division and much of the ability and honesty of the work depends on the mohurir in charge. Hitherto coolies have been paid in coin. When the Government rice arrives this system will be changed.

(D).—Storage of Government Grain at Relief Works.

A good deal of rice is consumed at our relief works, but it is rice bought by the local committee, and its cost will, I presume, be defrayed from the charitable relief fund, although a part of it has been advanced by Government. The committee at its first meeting asked for Government grain, but this request was not complied with. Thrown on our own resources, we at first bought locally, either at the relief hats which are themselves rice marts, or at Serajgunge. We found by experience that these markets, though they had been well supplied during the first month of the famine were liable to be exhausted; and having for some days found great difficulty in meeting our tickets (a stoppage in the payment of which would be bankruptcy in its worst form), we issued orders for considerable purchases which, when completed, would give an adequate stock, making us independent and secure. From Messrs Wilson and Company a firm with extensive commerce with eastern districts, we bought 1,500 maunds at Rs. 3-13 a maund, bags and packing included, and we ordered 3,000 maunds on commission. Mr. Alexander agreed to supply 7,000 maunds from Calcutta at Rs. 3-14, and two thousand maunds of this order has already arrived at Serajgunge; the remaining 5,000

will be delivered in the course of the week at Ullapara and Raigunge. After these arrangements had been made, I received information that Government intends to send us 4,000 maunds. We have therefore in hand, or immediately expect, 15,500 maunds of rice. The Government supply I propose to use only for annachatras, advance to zemindars, and payment of coolies. I will store at Serajgunge, where I have hired a godown capable of holding 15,000 maunds. Two thousand maunds of rice, locally purchased, will also be kept in the same place I mean to send 2,000 maunds to Taras, if the road continues open long enough to despatch it; if not I will send as much as I can to that place. The balance is being stored at Raigunge and Ullapara. Adequate arrangements for storage have been made at Raigunge and Ullapara. I requested the superintendent of the circle to see to the storage at Taras sometime ago, but have not as yet been informed as to whether these orders have been executed. I will go there myself next week and see that all arrangements are properly made. Carts have been engaged for despatch of rice.

The golah at Serajgunge will be a Government one, and a clerk is required. I will appoint one on Rs. 20 a month. Weighmen will also be necessary.

With regard to the sufficiency of the stocks, I am unable to express a confident opinion until I see how the system of issuing grain, instead of cash to zemindar's, works. It has not as yet been introduced, as the Government rice has not arrived. I, however, expect that the Government 4,000 maunds will be taken off our hands in this way during the month of June, provided it comes to hand soon. The remaining 11,500 maunds will, I hope, last us during June and July. We have at present about 9,000 persons on our relief lists, and may expect an average of 14,000 during these months. The allowance is 12 seers a month for an adult and 6 for a child. Assuming that half the ticket-holders are adults, this gives a monthly consumption of 4,650 maunds. We have to allow something less than 1,000 maunds for annachatras Serajgunge is within easy access from Calcutta, and I may confidently say that we can always obtain rice in time, if our present supply proves inadequate.

(E.)—Advances to Private Parties and their Results.

The landholders of Serajgunge have made a good use of this opportunity of lending money given by Government. Up to date Rs. 43,067 has been disbursed to them on loan for assisting ryots. To-day I received applications for loans aggregating Rs. 11,610. The sum of Rs. 4,562 has been sanctioned, but not drawn from the treasury.

Two questions will naturally be asked as to these advances; do the ryots get the benefit of them, and will Government realise the amount? The first I can answer in the affirmative. Wherever ryots have complained that they did not get the money advanced, I found on inquiry that no real abuse existed. Either the ryots wanted more than the zemindar thought could be safely lent to them, or they objected to the terms of the bond, or they found that only the favorites received. In no instance did I see occasion to believe that the money had not been lent to ryots. The realisation of the money will no doubt give us much difficulty if we have to proceed as ordinary creditors. All those who have taken loans are in possession of land, but the title deeds they produce, such as revenue receipts, would by no means satisfy a conveyancer. Some of those who borrowed are embarrassed, and will make every effort to procure delay, but I understand that Government is willing to take some risk in the matter, and to undergo some trouble hereafter. The change in system will be made when Government rice arrives, and may probably lead to a contraction in the rate of issue of loans. I have, however, to-day received an application for 100 maunds from the manager of the Tagore estates, and I sent an order for the amount on the relief store, to be repaid from the Government stock when it arrives.

(F).—Charitable Relief.

The committee is engaged in giving relief on the village system. There are two superintendents of circles and six assistant superintendents engaged in visiting each village in the distressed tract. All the villages are reported to have been once visited; those in much distress to have been inspected several times. On each visit tickets are given to any persons found to be in actual distress and incapable of road work. If the ticket-holder, though unfit for rough labor, can spin, weave or twist jute, a clause is inserted in the tickets that the relief will be conditional on the performance of an allotted task proportionate to the applicants supposed powers. The number of these tickets issued is about 9,000. Those who take them are generally diseased, aged, or women having no immediate relatives to support them. When the relief system was introduced, these classes were in the distressed tract suffering so much from hunger and improper food, that after inspecting some villages I was in serious apprehension of a number of deaths from famine. I found many of them living on pumpkins, and any uncooked food they could get without regular meals. The monthly allowance on a ticket is now 12 seers of rice and 3 seers of dál, given fortnightly. Half tickets are given for children.

In addition to this relief given in uncooked food after local inquiry, cooked food is now supplied at fifteen places, under the supervision of local committees, to emaciated persons. The number relieved under this head is not large; the average number fed, according to the returns received, being 182 at an annachatra. An annachatra is also kept by Raj Lookee Dabbya, a Brahmin lady living near Taras, which is much crowded, the food there being good and plentiful. A zemindar at Katanga contributes 25 per cent. of the cost of the annachatra there.

(G).—Financial Results.

Serajgunge,
The 28th May 1874.

P. Nolan,
Assistant Magistrate.

Remarks by Magistrate.

I observe that whereas the average number of distressed people who are now obtaining gratuitous relief at Serajgunge are 182 at an annachattra, those on relief works amount only to the inconsiderable number of 331. In the Sudder sub-division our experience is very different; we are employing on relief works 475, while we are not at present giving gratuitous relief to 100 people. Mr. Nolan's attention has been called to this. It is satisfactory to observe that imports have increased in Serajgunge since last report, and there would seem to be no likelihood of deficiency of stores.

Pubna,
The 1st June 1874.

W. V. G. Tayler,
Magistrate.

No. 1146, dated Dinagepore, the 8th June 1874.

From—W. Leff. Robinson, Esq., Relief Commissioner of the Rajshahye Division,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to submit the following narrative for the past fortnight.

A.—State of the Country.

2. This has certainly improved everywhere since my last report, as the late heavy falls of rain have done much good; in fact the rain during the last fortnight may be said to have saved the aous crop in this part of the country, i.e, Bogra, Rungpore and Dinagepore.

3. I have travelled during the fortnight from Bogra to Rungpore, and on to Dinagepore, and everywhere the crop is very fair, though in some places it is of course better than in others, but almost everywhere the ryots say they expect to reap a 16-anna crop now, and in Rungpore, where this crop is very early, they will very soon begin cutting it.

4. The rainfall in Bogra and Rungpore was particularly heavy, 2¼ to 3½ inches of rain falling at a time; but in Dinagepore the rainfall has been much less, though still sufficient to save the crops. The change in the appearance of Dinagepore is very marked since I left it over two months ago. Then everything was burnt-up, and withered, and now all is fresh and green again, and even the bamboos which were dead or dying before, appear to have taken a fresh lease of life, and certainly the country round has not looked as fresh and green as it does now for upwards of a year.

5. The markets are still tolerably supplied with rice but at a very high price, and at Dinagepore itself Government grain finds a ready sale. At one time as much as 2,000 maunds a day were being sold at the Dinagepore golah alone, but for the last few days sales have fallen off in consequence of some one having started a story that in three or four days Government would sell at the rate of 16 or 17 seers for the rupee. This story, or one similar to it, seems to have been very industriously and extensively circulated, many circle officers having been told that rice was being sold at that rate in some neighbouring circle, when there was really no foundation for the statement.

6. Mr. Lowis also was out last week near the Purneah border, and the ryots there all declared they heard Government was selling rice in Purneah at 17 seers, and wanted to know when he was going to do the same. The total sales from the Dinagepore golah up to 7th June, amount to 30,000 maunds, but I have no returns yet from district officers as to the total amount of their sales, a mistake which I hope to get corrected this week. A fresh circle is about to be opened at Thakoorgaon in the north of Dinagepore, and grain is already being pushed on there with a view of meeting the wishes of the Cooch Behar authorities, but I have no fear myself of there being anything like famine in that part of the country, though the high prices of course create distress among the poorest class. I have at this moment received a telegram from the Commissioner of Cooch Behar, saying that things have much improved at Julpigoree, and that the rice sent for him is to remain at Kallygunge.

B.—Relief-Works.

7. These are being gradually contracted, as laborers are being drafted off for cultivation or under the group-system, and in a great many places the system of payment in grain will I think still further reduce the number of laborers. I have a note from Mr. Damant this morning, in which he states that the group-system and payments in grain are both working successfully in his circle, and he does not anticipate any large decrease in the number of laborers on account of payment in grain whereas in the north-east of Rungpore across the Teesta, the laborers at once left on payment in grain being adopted, and, indeed, in that part of the country there is very little distress.

C.—Transport of Food.

8. This may be considered as over, practically, except perhaps in part of Bogra, and such alterations in the distribution of stocks from main golahs as circumstances render necessary. The transport officers, Captains Conolly and Ker, are now travelling about inspecting golahs. The balance of the supply for Purneah is, however, still being forwarded by the Mahanuddee route.

D.—Storage of Government Grain.

9. This may also be said to have come to an end, subject to the changes above alluded to. Reserved stores have been, and are being, pushed forward towards the Julpigoree border to meet the wishes of the Cooch Behar Commissioner.

E.—Advances.

10. None have been made by me.

F.—Charitable Relief.

11. This is being carried out everywhere. The group system has been introduced in thanas Gobindgunge, Pirgunge and Molong in Rungpore, and Panchbibi, Khetlal, Bogra, part of Adumdigee, (i.e., around Doobchucheen), and Sherepore in Bogra, and in all the bad parts in Maldah. In Dinagepore the group-system has not been introduced strictly according to the Government orders, that is to say, 10 or 12 villages have not been put in one group, with a man on Rs. 30 to Rs. 50 a month to look after them; but the Magistrate has preferred to put each mundal in charge of his own village, and to put the supervision of a certain number of these villages, 30, 40, or 50 under an inspector, who, again, is looked after by the circle officer. I have not as yet had time to go thoroughly into the arrangements he has made, but I will do so as soon as possible; and if proper supervision is really exercised over each individual mundal, I do not propose to interfere with the Magistrate's arrangements, but it is necessary that the supervision should be real and not merely nominal.

G.—Financial Results.

12. Are given by the district officers.

No. 1473—S.R., dated Berhampore, the 7th June 1874.

From—E. W. Molony, Esq., Commissioner of the Rajshahye Division,
To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I have the honor to forward the usual fortnightly narrative of relief operations to the 6th instant.

2. There has been no material change to report since the period of the last district reports which have been before Government. I am happy to say that the weather has been all that could be desired for the growing crop of early rice, and for the sowing and cultivation of the main crop. No change in the state of the people has been reported. I append a statement comparing the year 1866 with the present one, and with the average of five intermediate years; from this it will be seen that in the districts of Dinagepore, Rungpore, and Bogra, prices range very much higher this year than in 1866, while in the other four districts they may be said to correspond very fairly; also that while food was procurable in May of 1866 in all the districts except Dinagepore and Rungpore at about double the ordinary price and in

those two districts on better terms, it is now procurable in Dinagepore, Rungpore, and Bogra only at three times the ordinary price, which must be considered quite a famine rate. The statement also shows that the time of highest range of prices has yet to come, and no very considerable relief can be expected before November.

Relief Works.

3. I am not able to report the result of the introduction of the rice-payment system. It has been introduced into Rajshahye, where there was Government grain stored, and is being introduced into Moorshedabad and Pubna.* Until the returns of a week or two after its introduction are received, its effect in thinning the number of laborers cannot be reviewed.

Transport and Storage.

4. There is nothing to report on this head, except that rice is arriving for Moorshedabad, and that I have authorized the Magistrate of Pubna to intercept, if he can, a part of the 10,000 maunds of rice ordered for Serajgunj, for use in the sudder sub-division of his district. It is quite desirable that he should do this, as I see by Mr. Nolan's last narrative that his local purchases have been more extensive than I thought. The Central Committee have made a grant of Rs. 50,000 to the Pubna district, a large portion of which was asked for to pay for the grain purchased locally. There is rice going forward for the Cooch Behar division from Goalundo, which is to be landed at Kaligunge. The small steamer *Frank and Ada* is available at Kaligunge for the Teesta navigation, but I have just heard of a fall of the rivers, and that she cannot get beyond Pannial Ghat on the Teesta. The rivers must, however, soon rise now, and perhaps it would be expedient to send on the Cooch Behar rice in steamers without landing it at Kaligunge. This, however, is a question which must be decided locally.

Advances.

5. There is nothing to report under this head.

Charitable Relief.

6. There has been no sudden accession of numbers that I have heard of. Doubtless, an increase must be expected in the present and two following months. The Calcutta Committee have signified their wish that assistance should be liberally given to the more respectable classes, as well as the destitute, leaving the method of distribution to the discretion of the local officers and committees, according to the varying circumstances of cases. This desire of the Committee will be made known to all the officers concerned.

Comparative Statement showing the average monthly prices for coarse rice ruling in 1866 *and in* 1874, *compared with the average of five intermediate years, from* 1868 *to* 1872.

E. W. MOLONY,
Commissioner of Division.

No. 89—S.R., dated Burdwan, the 3rd June 1874.

From—C. T. BUCKLAND, Esq., Commissioner of the Burdwan Division,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

1. I HAVE the honor to submit herewith in original the district fortnightly narratives for the fortnight ending 1st June, and request that I and District Officers may be furnished with printed copies of them.

2 *Hooghly*—This report calls for few remarks. There has been heavy rain from the 24th to 30th ultimo in Hooghly, amounting to 3·74 inches, but it seems that in the interior the rainfall has been less. The crops are flourishing, and ploughing and sowing are going on briskly. It is reported that double the usual quantity of land will be sown in Serampore with early rice-crops. Wherever one goes, it is evident that high lands, which are only productive in very rainy seasons, have been prepared for a crop. Mr. Pellew observes that in some villages which were severely visited by the epidemic fever in former years, there are necessarily individual cases requiring relief; but he believes that the rain will remove all cause for anxiety in regard to the agriculturists who are able to work.

3. The comparative number of persons employed on relief works in the previous and current fortnight, as given in the Collector's report, are entered in the margin. There was a misprint in my last narative of 5887 for 4887. The number employed on works executed from tuccavee advances has risen from 1532 to 1822.

Current fortnight	4972
Previous fortnight ...	4887

4. Large quantities of rice are being exported from the Hooghly, Chundernagore, and Mugra Railway stations. The importations of Government rice had not commenced in Hooghly until the last working day of the fortnight under report.

5. The daily number of persons receiving charitable relief was as follows :—

	Present fortnight.	Previous fortnight.
Men	626	452
Women	1878	1290
Children	1180	641
Total ..	3884	2383

6. I have little to add to Mr. Pellew's remarks with reference to the Government Circular order No. 3246—S R. There are a number of helpless persons, the relics of families which were almost annihilated by the Bengal epidemic fever (now known under the misnomer of the Burdwan fever), which laid waste some of the finest villages in Hooghly during the last ten years. According to the late census statement 6, class 7, the beggars and paupers in Hooghly and Howrah were 5,750 males and 4,269 females in number, so that charitable relief is still within very moderate bounds in comparison with these figures.

7. *Beerbhoom*.—The report of the Collector is more cheerful. The rain has produced most beneficial results, and the Collector thinks that distress has reached its climax; and there has been a lull in the outbreak of robbery and dacoity, which have been the subject of my special report to Government. There has been also a downward tendency in the price of grain.

8 The average daily number of persons employed on relief works was 10,374 during the current fortnight against 7,717 in the previous fortnight. The Collector states that the numbers have been somewhat reduced since the change of weather, but the statement shows that the actual number of persons employed on the last day of the fortnight was 11,003.

9. The exports of grain by Railway amounted to 7,024½ maunds. 1,000 maunds of Government grain were expected to arrive at the Bulpore station on 29th ultimo.

10 The total number of persons in receipt of daily charitable relief on 23rd May was 9,803 during the fortnight under report against 5475 of the previous fortnight. A classified statement is given in the Collector's Appendix Return V with reference to Government Circular Order No. 3216—S R. According to the census returns the beggars and paupers in Beerbhoom numbered 4,310 males and 2,188 females, total 6,498, so that the total 8,098 of the recipients of daily gratuitous relief in rice is in excess of those figures.

11. *Bankoorah*.—In this district also there has been a good rainfall, and the Collector remarks that, whereas during the preceding week things looked very gloomy, there is now a change for the better, and the people seem more hopeful for the future.

12. It is to be regretted that the talookdars and others are so reluctant to come forward to take advances for their ryots. It is very clear that if advances are made direct to ryots the Government chances of payment are very small, as the local creditors of the ryot will doubtless attach the crops before the agency that Government can employ can reach them. The only chance which Government has of recouping itself will be by the introduction of some procedure similar to that provided by sections 10 and 23 of Act X of 1871, the Road-Cess Act, as I have already suggested demi-officially.

13. The daily number of labourers employed during the fortnight was 3,188 against 2,947 in the previous fortnight. The Collector states that he is procuring returns of the number of labourers employed on private works, by which I presume that he refers to the works carried on by tuccavee advances.

14. Government grain to the amount of 1000 maunds has been received during the fortnight, and is being judiciously utilized by the Collector and the Executive Engineer. The Collector has very properly sent on a second consignment of 1,000 maunds to the relief of those parts of Manbhoom which are more accessible from Bankoorah than from Purulia, and he has indented for further supplies for the Bankoorah district.

15. The total number of persons receiving daily charitable relief appears to be 9,047 against 8,073 in the previous fortnight. The Collector has endeavoured to supply the information required by the Government Circular order No. 3216—S. R., but it cannot be given with much accuracy at present. According to the census, the beggars and paupers in Bankoorah numbered 2,444 males and 624 females, so that there are a large number of persons outside of this class receiving charitable relief.

16. *Burdwan.*—The Collector has, as usual, submitted an abstract of the sub-divisional reports, with a few brief remarks of his own. The rainfall seems to have been general throughout the district, although less rain had fallen in the Jehanabad sub-division than in other parts of the district. The Collector has offered a tolerably confident opinion on the state and prospects of the district in the final part of the 2nd paragraph of his report; but I think it will be safer to await the results of another fortnight before attempting to arrive at any definite conclusions.

17. The statement of the daily number of persons employed on relief works shows a total of 14,178 for the fortnight under report against 8,985 of the previous fortnight. The Collector will be requested to give some explanation of this large increase.

18. The export of food-grains from the district amounted to 27,887 maunds during the fortnight. The import of 50 000 maunds of Government rice destined for Manbhoom does not really concern Burdwan. Three thousand maunds of Government rice have been received for the use of the Burdwan district, of which 800 maunds have been despatched to Cutwa for storage.

19. In the district of Burdwan also, the talookdars appear to be averse to make use of concession G, for obtaining advances for their ryots; and the Collector's account of the disinclination of the ryots to combine collectively for this purpose is instructive. I would also invite attention to the statement that an application for an advance was made with a view to apply the money to the worship of an idol! The offer of the Government grain is apparently having a wholesome deterrent effect on applicants who are not really in absolute need of advances. To those to whom advances are really necessary, I would apply the same protection for the interests of Government as has been suggested in Bankoorah.

20. *Charitable Relief.*—The Collector has made no attempt to give the information required by Government Circular Order No. 3216—S.R The Statement No. 5 shows a daily total of 14,551 persons relieved against 14,169 of the previous fortnight, of these persons 3,200 are fed at the cost of His Highness the Maharajah of Burdwan. The census returns show the beggars and paupers of Burdwan as numbering 14,033 males and 4,997 females, so that the number relieved is well within the limits of the ordinary pauperdom and mendicity of the district.

21. The narratives for Howrah and Midnapare will be forwarded as soon as they are received.

No. 112, dated Hooghly, the 1st June 1874.

From—T. H. PELLEW, Esq., Offg. Collector of Hooghly,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending 30th May 1874.

A.—STATE OF THE COUNTRY.

2. There is no scarcity of grain in the bazars, although the hâts and bazars in thana Kristonuggur have to get their supply from Ampta.

Boidyabatty	18	18	17½	17½	8 0	8 0	12½ 0	13½ 0	13 0	14 0
Bhudreesur	18	18	10½	17	.....	.....	12 12½	11½ 12½	14½ 0	14½ 0

From this it is clear that the price of common rice has risen one seer in the rupee in the

southern portion of the district. I find also from police reports that in thana Kristonuggur, coarse rice is selling 11 seers in the rupee.

4. *Information as to the kind and price of rice in the hands of zemindars and traders, &c.*—Same as in previous reports.

5. *Rainfall if any.*—At the sudder station and at Dhunyakhally, 22 miles to the westward, it rained on the dates as per margin. The storm of the 30th at Hooghly was a very sudden and heavy one, 2·80 inches fell at the sudder station in less than three-quarters of an hour. It rained more or less during the fortnight in all the thanas of this district except in Huripal, where there was no rain. Generally, it may be said that the fall in the east was greater than in the west of the district.

	Hooghly.	*Dhunyakhally.*
24th	·16	Nil
26th	·48	·21
27th	·26	·52
29th	05	·42
30th	2 80	·0
Total ...	3 74	1 15

6. *State of the crops.*—Aous, or early paddy, and the seed-beds of amun, or late paddy, have been and are being sown in a few places in all the thanas of this district. The late rains have done it good. It is reported that in thana Serampore, about double the quantity of land which is usually sown with early *dhan* will this year be sown with it. But rain is much wanted to keep it alive. In thana Bullaghur, *jola dhan*, sown on the bank of the Hooghly, has been harvested; sugarcane, *til, patal, uchchhay, kankur, jhinga*, water-melon, pumpkins, &c., which were dying for want of rain, have been refreshed by the late rains. The ginger, onion, *huldi*, which have been sown, have mostly failed to germinate for want of rain. Lands are everywhere being ploughed for the cultivation of early and late rice.

7. *Condition of the people.*—I yesterday examined the country extending in a straight line for 22 miles west of Hooghly. Over a large part heavy rain had fallen, and ploughing and sowing both early rice and the seed-beds of late rice was going on. In some fields the rice was visible above the ground. The mango, jack, and plantain trees on either side were covered with fruit ripe or nearly ripe.

8. From the large quantities of caster-oil cake manure being transported in carts from the banks of the Hooghly to the interior, and the large quantities being spread over the ground, it is clear that the condition of the peasantry generally is by no means desperate. Potatoes, mangoes, and mustard were being transported from the interior towards the towns on the Hooghly, and the mass of the peasantry doubtless subsist on the profits of such trade and that in vegetables, plantains, jack-fruits, &c. The road was lined with people going to and from the Hooghly and Chandernagore Sunday-market. Beyond 12 or 14 miles this traffic naturally diminishes but does not cease.

9. In some villages, specially those in which fever has been severe, there are individual cases requiring relief amongst people formerly supported by the charity of distant relatives or rich natives, but who, hearing that organized measures of relief have been taken, have ceased to assist them.

10. In certain villages also, where the zemindars are poor, a certain amount of assistance to the ryots may eventually prove necessary, specially if a full supply of rain be denied; but I believe rain will remove all cause for anxiety in regard to the agricultural population who are able to work.

11. *Grain theft.*—Five cases of grain theft have been reported—two from Serampore and three from Hooghly. Of the two reported from Serampore, one is pronounced false by the Police, and the other, in which a burglar made his entrance by cutting a hole in the wall, and stole away Rs. 5 worth of grain, is still pending with the Police. In one of the three reported from Hooghly, paddy of the value of Rs. 16 has been stolen from a granary; in another, eight annas worth of rice has been stolen from a shop; and in the third five annas worth of rice has been stolen from a kitchen. The thieves have not been traced.

12. *Condition of Special tracts.*—There are no tracts which can as yet be said to be in a specially distressed condition.

13. B.—Relief Works.

Name of road.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	Remarks.

D—Storage of Grain at Government Relief Works.

20. *Petty stores at serais at present.*—Government grain has arrived only on Saturday, 30th May.

E.—Advances to Private Parties.

		Rs.
21.	Advances for grain as already reported	18,000
	Advances to Municipalities.	Nil
	Advances under the Tuccavee Act up to date of last narrative ..	35,286

* Returns for four roads not received from Sub-divisional officer.

During the fortnight—

Rahim Bakhsh and others	200
Prem Narain Sirkar	600
Ramchunder Banerjee	475
Total ..	36,561

F.—Charitable Relief.

22. Number of committees as yet appointed—

District Committee	1
Sub-divisional Committee	1
Sub-Committees	151
Total ..	153

23. *Number of work-houses or centres for distribution of food and charitable relief.*—Seven.*

24. Number of persons relieved—

Men	626
Women	1,878
Children	1,180
	3,684

25. These figures include relief under heads B., C., and D., *i.e.*, the numbers getting relief by light labour as well as people of respectable classes, for which I regret to state I have not been able to procure separate figures as yet.

G.—Financial Results.

26. The disbursements to Executive Engineer and others during the fortnight were as follow :—

	Rs.	A.	P.
To Executive Engineer	2,000	0	0
To Zemindars, Road Cess Commissioners, and others ..	1,790	0	0
	3,790	0	0
For tuccavee advances	1,275	0	0
The local subscription to the Relief Committee realized up to the date of last narrative	6,495	15	0
During the fortnight	530	0	0
Total	7,025	15	0

27. No Government contribution was received during the fortnight.

28. The following sums have been received from the Central Committee :—

Previous to fortnight	6,000
During the fortnight	....
Total	6,000

29. The disbursements are as follow :—

	Rs.	A.	P.
Up to date of last narrative	7,617	6	0
In the fortnight	2,690	8	9
Total ..	10,307	14	9

30. *Separate chapter under Circular No. 3216—SR, of the 19th May.*—The orders of Government were received too late to enable me to obtain separate figures for relief under heads B., C., and D., from the voluntary unpaid sub-committees whose agency is alone employed in this district. Moreover, no Government grain has been received during the fortnight, and all relief has been in money.

31. What has been done is as follows :—Over every ten to fifteen villages in the district a voluntary unpaid sub-committee has been entrusted with the task of

* These are small serais for the relief of travellers.

searching out distress in any form and reporting to the District Committee. These Committees generally proceeded to visit each village and draw up lists, in concert with respectable residents, of all by whatever cause or in whatever position who were unable to maintain themselves.

32. According to their reports, funds were supplied to the local Committees for relief. Weekly reports and accounts were demanded and have been received with fair regularity from most of the Committees.

33. Endeavours have from time to time been made to induce the Sub-Committees to substitute relief under head C. for that under head B. Some Sub-Committees have responded to these endeavours, but others allege their inability to do so. Considerable trouble is involved in giving labour, and hence there is a difficulty.

34. Until the 20th May it was not understood that it would ever be necessary to give separate figures under heads B., C., and D. I have now, however, ordered the distinction to be made in future, but it will take some time before the Sub-Committees, who are not, as a rule, accustomed to drawing up statements, will thoroughly understand the meaning of the orders.

35. There is, however, little doubt that at least half of the men relieved and three-fourths of the women and children come under head D. as explained in paragraph 3 of the Government circular, viz., "women, children, weakly people of high castes, Brahmins and others, who from mishap or social usages are unable to come upon the Government relief works." In this district, as has before been explained, a large number of persons—old widows, young boys, fever and spleen-striken persons of both sexes and all ages—are to be found, the only surviving members of what were once large families of fairly prosperous agriculturists, traders, and others, which have been broken up and ruined by the ravages of the Hooghly epidemic fever. In certain villages half the population are more or less in this condition. They are unable to work properly, they have given up their lands or trades, and drag out a miserable existence by gradually selling off their family goods. The funds of the Committee are freely spent upon such persons.

36. It is, however, somewhat difficult to distinguish the more forlorn of these from the class of professional beggars, crippled and helpless poor of the lower orders, in which class many of them have long ago become mingled.

37. The following remarks of the inspecting relief officer on the condition of the village of Mandra will illustrate what I have stated above:—

"The recipients of relief here have, with few exceptions, *if any*, been suffering from malarious fever. It must be a matter of satisfaction to the District Relief Committee to learn that the measures of relief work which they have organized have kept alive upwards of 100 people who, without such aid, would ere long have perished * * Nowhere, I believe, are so many deserted houses as in Mandra * * Many a young man and woman are gratuitously relieved here, and I did not insist upon the Sub-Committee to make them work which have hardly time and ability to do on account of fever."

38. It must be remembered that in this district it has been found necessary for several years past to supplement private charity by organized relief in the shape of the distribution of money, food, clothes, and stimulants. The effect of high prices was still further to diminish private benevolence and has thrown these sufferers on the Committee's hands.

No. 207, dated Soory, the 1st June 1874.

From—R. D. Hime, Esq., Offg. Collector of Beerbhoom,

To—The Commissioner of Revenue, Burdwan Division,

I have the honor to submit my district narrative for the fortnight ending 30th May.

A.—State of the Country.

Matters seem to have reached their climax, and with the favorable change in the weather last week, there appear signs of a change for the better, indicated by a slight fall in prices, a more hopeful tone of public feeling, a lull in the outbreak of robbery and dacoity, which characterised the first ten days of the fortnight, and the re-appearance of a chowkeydar, returning, like the first swallow of summer, to his chakran lands. Pauperism has seriously increased during the fortnight, and I fear cannot be expected to decrease till the beginning of September, when, if the crops promise well, a heavy fall in prices may be looked for as holders will be anxious to dispose of their stocks before the new rice comes into the market. I do not, however, expect any serious increase of pauperism during the intermediate months, distress having now, I think, about reached its worst, and the renewal of agricultural operations promising a turn for the better. Rice is readily procurable at the current market rates in the principal bazars (*vide* appendix 1), though still scarce or unprocurable in many villages, and, where procurable, generally sold one seer dearer than in the bazars. Four grain-robberies have occurred, but no death from starvation has been brought to light, and the relief agency continues to cope successfully with distress. Cholera and small-pox still prevail, causing a lamentable mortality, but show some abatement in virulence during the last few days.

B.—Relief Works.

Two new relief works have been commenced during the fortnight, viz., the construction of the Mullarpore—Andee road (No. 21), and kunker-cutting for the Bulpore—Surool

road (No. 22); the number of laborers on district works of all kinds is given in form C. Since the change in the weather last week, the numbers have been somewhat reduced.

C.—Transport of Grain.

Exportation continues, 7,024½ maunds having been exported during the fortnight under review against 8,062½ maunds of the preceding fortnight. Simultaneously some importation of rice from Moorshedabad into the eastern part of this district is reported.

D.—Storage of Grain.

One thousand maunds of Government rice were expected at Bulpore on the 29th ultimo, and the necessary arrangements for storage were complete; 500 maunds of this rice will be at once purchased on account of the charitable committees, and the remainder distributed in advances to zemindars under concession G. (*vide* Appendix Return II.)

E.—Advances to Private Parties.

Are shewn in appendix return III.

F.—Charitable Relief.

Vide appendix returns IV and V. Since last report four new relief-houses have been opened at Ryepore, Shahjapore, Srinidhipur, and Ramnugger. The expenditure up to date amounts to Rs. 20,576-4-10½.

G.—Financial Results.

Up to date Rs. 59,725 have been drawn from the Treasury on certificates granted under Act XXVI of 1871. Rs. 41,972, have been placed to credit of the Executive Engineer for relief works; Rs. 4,000 have been advanced to Messrs. Farquharson and Campbell of Ilambazar; Rs. 2,000 to Mr. Jones of Gonatea; Rs. 750 to Baboo Kishuree Mohun Roy of Naguree, and Rs. 75 to the Munduls of Kuliara for the construction of roads chargeable to relief; Rs. 1,114-6-6 have been expended on the excavation of the Rajah's tank, and Rs. 4,615-8 placed to credit of the charitable relief fund on account of the Government subscription.

C.

Abstract Statement of Men, Women, and Children employed on Public Works in the District of Beerbhoom during the 14 *days ending Saturday, the* 23*rd May* 1874.

Serial No. of work.	Name of Work.	Length of road, &c.	Total number of persons employed during the 14 days.				Mean daily number of persons employed during the 14 days.				Number of persons employed on the last of the 14 days.				How long work is likely to give employment.	Remarks.
			Men.	Women.	Children.	Total.	Men.	Women.	Children.	Total.	Men.	Women.	Children.	Total.		
1	Soory to Nagore	14	253	151	.....	404	18	10	.....	28	16	12	.....	28	½ month.	All are tasked, receiving the ordinary wages of the district, and doing the ordinary amount of work for those wages, with the exception of about 600 on road No. 18, of whom an accurate return has not been received from the planter in charge of the work, who receive a daily wage of one anna each man, ditto each woman, and half an anna each child. This return does not include the laborers on the Nasuri and Kulliara village, roads who may be estimated at about 20; the laborers are principally of the laboring classes, including under this term cultivators: the number employed on tanks by private parties to whom advances have been made under Act XXVI of 1871, may be estimated at about 4,000.
2	Soory to Cynthia	11	387	114	.....	501	27	8	.....	35	26	6	.....	32	½ ditto.	
3	Soory to River Adjai	21	312	.....	.....	312	23	.....	.....	23	20	.....	.....	20	½ ditto.

APPENDIX RETURN II.

Statement showing the storage and consumption of Government Grain in the District of Beerbhoom for the fortnight, ending 30th May 1874.

1.—Name of circle, Beerbhoom.
2.—Date for which figures are given, commencing 30th May, the date on which the first invoice of Government grain was received.
3.—Total allotment of Government grain, 1,000 maunds, and 1,000 maunds per week till further orders.
4.—Total quantity of grain stored, exclusive of grain transferred to other districts, 1,000 maunds, less loss in transit.

Total quantity of grain consumed up to date.

5.—By sale to the public or to laborers, none.
6.—By gratuitous distribution in any shape, none.
7.—By advances to ryots, none.
8.—By payments in kind to laborers, none.
9.—Total, none.
10.—Estimated grain receipts of the ensuing fortnight, 2,000 maunds.
11.—Estimated grain expenditure of the ensuing fortnight, 2,000 maunds in charitable relief, and advances to zemindars under concession G.

APPENDIX TABLE III.

Statement showing the Number of Applications under the Land Improvement Act XXVI of 1871, up to 30th May 1874.

		Amount. Rs.
Number of applications registered	682	2,82,523
Ditto ditto disposed of	671	2,79,223
Ditto ditto granted	231	72,580
Ditto ditto refused	440	2,06,643
Ditto ditto pending	11	3,300
Ditto of certificates drawn	172	59,725

APPENDIX, STATEMENT IV.

Statement showing the progress of Charitable Relief in the District of Beerbhoom, for the fortnight ending 30th May 1874.

Number of committees and sub-committees as yet appointed ...	9
Number of special relief sub-divisions opened and officered ...	19
Number of regular relief circles opened and manned by special officers	12
Number of relief circles opened and manned by planters, zemindars, and other residents	10
Number of work-houses or centres for the distribution of food and gratuitous relief	20
Number of men, women and children (with total) in receipt of gratuitous relief in any shape, through the charitable relief organisation, daily	9,801

REMARKS.—Of the total number of recipients of charitable relief, 542 are weavers, and 1,151 women, the former receiving advances of money and thread, the latter of money and cotton, which they spin into thread supplied to the former.

APPENDIX RETURN V.

Statement shewing the number of persons relieved up to 23rd May 1874, submitted with reference to Government No. 3216—S.R. of the 19th May 1874, paragraph 5.

B

		Rs. A. P.
Total number of meals given up to 23rd May 1874, *i.e.*, persons fed for one day	1,77,142	
Total number of persons receiving gratuitous relief in rice at present	8,098	
Total cost to date		9,492 15 7½

C

Total number of weavers and spinners supplied with thread and cotton and advance	1,693		
Total cost to date		6,812	3 9

D

Total number of families under heading *d* ..	12		
„ cost to date		34	12 6
„ number of persons in receipt of relief on 23rd May	9,803		
„ of all cost up to date under all heads ..		16,339	15 10½

REMARKS.—The persons relieved under heading *b* are of the lower class, beggars, day-laborers and the like principally, including many persons disabled by sickness or infirmity; those relieved under heading *c* are of a better class, professional weavers thrown out of employment by the stagnation of trade, and distressed women, many of them widows of the cultivating and other lower middle classes to whom advances of thread and cotton for weaving and spinning are made; these are on task work, and paid according to their work. Twelve respectable distressed families receive gratuitous monthly allowances of food or money under heading *d*; no action has been taken under heading *a*.

R. W. HIME,
Officiating Collector.

No. 358, dated Bankoora, the 1st May 1874.

From—W. R. LARMINIE, Esq., Officiating Collector of Bankoora,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my report for the fortnight ending 1st June 1874.

STATE OF THE COUNTRY.

2. Prices have remained nearly stationary since my last report, and are as follows:—

Prices in different places.

	Wheat.	Barley.	Rice, best sort.	Rice, common.	Gram.
	M. S. C.	M. S. C.	M. S. C.	M. S. C.	M. S. C.
Bancoora ..	0 13 0	0 21 0	0 10 10	0 12 8	0 14 4
Bishenpore ...	0 13 0	0 20 0	0 11 0	Coarse. { 0 13 12 / 0 13 8 }	0 13 0
Chatua ...	0 13 8	0 18 0	0 12 8	0 13 0	0 13 8
Andah ...	0 13 0	0 22 0	0 11 0	0 13 0	0 14 0
Gungajulghatty ...	0 13 0	0 18 0	0 12 0	0 12 8	0 14 0
Burjorah ...	0 15 0	.....	0 13 8	0 14 8	0 16 0

3. I had hoped that the rain would have cheapened the food-grains, but there has been no change in consequence. The supply is sufficient in the greater part of the district. There was a temporary scarcity in the west of Chatua, near the borders of Manbhoom, but I was able to meet the want by sending for sale about 40 maunds of rice which had been husked by the women receiving relief and which was over and above what we required for gratuitous distribution.

4. I have been making special inquiries as to the supply of seed-grain. As far as I have been able to ascertain there is sufficient in the district to meet the requirements of the year, but there are many ryots who have got little or none, and it may become necessary in giving advances of grain to cultivators to buy seed-grain from those who have more than they require. As a general rule, ryots keep their own seed-grain, and seldom trust to mahajuns for its supply.

5. There has been rain all over the district during the last week, more than 2½ inches at head-quarters. Ploughs are to be seen everywhere at work, and in some places the aous seedlings are above ground. During the preceding week things looked very gloomy, but there is now a change for the better, and the people seem more hopeful of the future.

6. The mahajuns and others are now making advances more generally, but only to those who have paid up their debts. Most of them decline even to take advances from Government to supply defaulters, so that if we relieve those who really need it by advancing grain, our chance of repayment becomes very small; for the local creditors would doubtless attack the crops before we could, and thus leave the ryot without the means of refunding what he borrowed from Government. I have granted some applications from talookdars, but the general feeling seems to be that there is no use in throwing good money after bad.

7. I am doing all I can to influence the talookdars in favour of their ryots, but in the end, I fear, we must advance directly to many. The western portion of thanna Chatua is in this respect as bad as Moheshra. Sonthals, who are notoriously improvident, being very numerous in that quarter of the district.

8. The granting of advances will, however, be the cheapest method of giving relief. If the poorer ryots cannot cultivate their lands, we must support them for an indefinite period; and even though a large percentage of the grain lent be lost, it is better to place them in a position which will enable them permanently to support themselves than to continue feeding them from day to day.

9. All apprehensions of a water famine have now ceased.

10. Distress is showing itself more distinctly amongst the manufacturing classes, and the higher castes are demanding relief in somewhat larger numbers. I have no doubt that it is now well-known throughout the district that relief can be had wherever required, and there are very few, I think, who hesitate to make their wants known in some way or other.

11. During the fortnight under report 127 coolies with 78 dependents have been registered as emigrants for the tea districts.

12. One grain dacoity has been reported from Bishenpore thanna. It appears to be a true case, but is of a trifling character, only Rs. 12 worth of property having been stolen.

13. No cases of starvation have been brought to light.

14. The labour report shows a slight increase in the number employed on relief works. This is due chiefly to the transfer of labourers to new roads, mentioned in my last report, having been completed.

15. I have taken steps to procure the information called for regarding the number of labourers employed on private works. Eight tanks have been reported as complete.

Transport of Food.

16. Importation both of cleaned and unhusked rice continues. Exportation is said to have become rather slack.

Storage of Government Grain.

17. Delivery was taken during the last week of the first instalment of Government grain, *viz.*, 1,000 maunds. I have selected four places for storage of large quantities, *viz.*, at Mejia, Sattora, Gungajulghatty, and Bankoora. The various relief centres will be supplied from these. The grain received seems to be all partially unhusked. We will therefore be able to supply those employed in husking with work in cleaning it. The cleaned rice will then be used either for gratuitous distribution, or will be sold to the labourers on relief works. Most of our roads are being made by contractors, who are bound under certain conditions as to minimum rates, &c. The Executive Engineer reports that he has made arrangements with these contractors to distribute to the labourers, at the rates specified, the necessary amount of grain. As the works are constantly inspected, any attempt at raising the price would be at once brought to light, and the labourers have in many places expressed their wish to have rice brought nearer to their work. We will of course erect golahs and deliver the grain at our own expense.

18. The second instalment of 1,000 maunds is being delivered at Raneegunge today. In consequence of the urgent representations of the Deputy Commissioner of Manbhoom, I will send the whole consignment to Raipore. I have already asked you to indent for a further supply, which will, I hope, reach me before what I have received is exhausted.

19. Next report will give a regular statement as required, showing storage and consumption.

Advances to Private Parties.

20. No further inquiries have been made into applications for tuccavee advances. The total sum actually drawn is Rs. 49,064, and a further sum of about Rs. 3,500 will probably be expended. As inquiries have been most carefully made throughout both, as to the security offered and the benefits likely to arise from each work, the act may be considered, I think, to have worked very satisfactorily.

21. Advances of grain have been sanctioned to the amount of about Rs. 2,000, and inquiries are being continued.

Charitable Relief.

22. The numbers of persons receiving gratuitous relief shows a further increase, which would have been still greater had not a very close supervision been exercised over some of the sub-committees. Besides these, there are 1,153 engaged in work for which they are paid by the sub-committees. Nearly 900 weavers, &c., have received advances up to date.

23. *Special section showing total amount of relief given, and its nature.*—It is not possible without examining every register of every sub-committee to state accurately the total number of persons who have received gratuitous relief, but an approximation sufficiently near the mark has been obtained by adding together the maximum number relieved on any one day at each centre. The total thus calculated is 14,119, whereas the daily number now relieved is 9,047. The difference is partly due to the fact that nearly all the sub-committees, at one time or other admitted to gratuitous relief persons capable of doing some works such persons being subsequently profitably employed. Sub-committees also, in many instances, relieved persons whom the inspecting relief officers afterwards struck off from the lists. Advances have been made to 880 persons for weaving, spinning, &c.; 518 person have been employed in husking paddy; and 217 persons are employed in light works. One hundred persons relieved under heading D.

24. The total cost up to date is Rs. 14,804-9-10, being Rs. 8,051-9-10 under heading *b*, Rs. 6,703 under heading *c*, and Rs. 50 under heading *d*.

25. *Statement of Charitable Relief.*

1. One Central Committee.
2. Twenty-one Sub-committees.
3. Twenty-one.
4. None.
5. Twenty-six.
6. Statement showing average daily number relieved during the fortnight.

W. R. Larminie,
Offg. Collector.

Bankoora Collectorate,
The 1st June 1874.

4. Except in the Manbhoom district, where cholera has appeared, causing a serious panic amongst the cartmen, the health of the people has otherwise been fair, though the mortuary returns of three districts, Manbhoom, Lohardugga and Singbhoom, give 192 deaths last month to 166 during the same month in 1873.

5. *Hazareebagh.*—Since my last half-monthly narrative despatched from Govindpore on the 14th instant, I have visited the stations on the Grand Trunk Road up to Hazareebagh, and remained there four days in consultation with Mr. Beadon.

6. The contemplated storage of grain at the chuttis was nearly completed, but there were no indications of distress amongst the people. A road had been commenced as a relief work from Buggodur, northwards, but Mr. Macarthy informed me that the people evinced very little inclination to work on it. No distress has appeared in and about the station of Hazareebagh. The jungle-produce is still contributing largely to the stock of food now being consumed, but it is reported from some quarters that this has caused diarrhœa amongst the poorer classes.

7. I am satisfied with the arrangements made by Mr. Beadon for obtaining prompt and accurate information regarding the condition of the people. Weekly reports are received from the police of all parts of the district, and these are supplemented by the reports of four sub-divisional committees, embodying the information of 30 sub-committees. The portions of the district most affected by scarcity are the northern parts of Khurrukdeah, including parts of the Dhunwar estate. The arrangements made to give relief were noticed in my last report, but Mr. Peppé, the manager of Dhunwar, who joined me again at Hazareebagh, was enabled to inform me that the change in the system of work ordered by me was being rapidly carried out.

8. Whilst at Hazareebagh the following questions were discussed:—Loans of rice to cultivators and others for food. The rules for these advances now promulgated in Hazareebagh are briefly as follows:—

Government rice may be given as a loan to substantial ryots to provide a stock of food for their family and farm laborers, to be paid for on or before the 31st March, at the rate of one rupee for 12 seers of clean rice. Quantity to be given not ordinarily to exceed 3 maunds, but if the farm is extensive, and the number of hands employed above the average, up to 6 maunds may be given.

The zemindar or his agent, or the thiccadar, to certify to the validity of the security.

A larger quantity of rice can be issued to a body of substantial ryots who agree to be jointly responsible.

Loans of rice may, in the same manner, be made to other persons who are sufficiently substantial to give fair hope of repayment. Money advances direct to ryots for food or other purposes not to be given, but they may be made to zemindars under Government orders No. 1799 of 25th March last.

9. Some seed-dhan is in store in the bhandars belonging to the Government estates and estates under Court of Wards. The distribution of this at the usual rate of one maund for one and a half maunds to be repaid to the bhandar at the close of the harvest, has been authorised. This is done to keep up stock in bhandars, and to avoid discouraging the usual dealers. When the seed is all distributed, it was determined that money advances might be made in such estates at 12 per cent.

10. The rules issued for labor provided for the strict enforcement of piece-work for the able-bodied, and Government rice was to be sold to the work-people at 11 seers for the rupee, this now being, and having been since January last, the prevailing rate. Considering the large stock in the hands of mahajuns, and the large sums advanced to such persons to stimulate importation, we did not rule that the work-people should be paid in rice; but under orders of Government now received, this will be carried out in all places at which the Government grain can be made available.

11. The roads in progress—22 in all—will give employment for some months to come but as minor works are wanted to employ people living too far from road-works, we propose to take up tanks likely to give good drinking-water if restored, and make wells where required by the public, to be paid for from the Government grant and donations of parties interested, if we can obtain any. A project of a large tank on the encamping ground at Chowparun has been approved. I propose to allot to it Rs. 1,000 of Government money. The zemindar, Baboo Namnarain Singh, has promised Rs. 500, and the Deputy Commissioner will obtain more subscriptions if possible. The estimate is Rs. 2,500.

12. Relief centres for distribution of food, cooked to some, uncooked to others, have been opened, but the numbers fed in each are quite insignificant. In the Pachumba sub-division, there are seven such places, and the aggregate of the persons fed amounted to 86 only, all beggars. At Koderma, 14 people are fed gratuitously, and the same number are employed on light labor.

13. Mr. Beadon was of opinion that the 40,000 maunds of rice, to which quantity the Government have at my recommendation consented to raise the Hazareebagh supply, would be sufficient. He says, in a letter dated 23rd instant just received—"I find I would require Rs. 50,000 to complete the roads already undertaken; if the coolies are all to be paid in rice at 12 seers for the rupee, I think we should require 15,300 maunds for the coolies." According to this calculation the quantity sanctioned should suffice.

14. On the whole, I conclude that we are fairly ahead of distress in Hazareebagh, and the arrangements made should, if nothing untoward occur, enable us to keep so.

15. *Lohardúggáh.*—Of the sudder sub-division of the Lohardúggah district, I have nothing whatever to remark.

16. For Palamow, the narrative* by the Officiating Assistant Commissioner for the fortnight ending the 16th instant, received only yesterday, is appended. It will be seen from this that the number of persons employed on relief works have increased by 6,788 over the number exhibited in the previous fortnightly report; and has now reached 24,000. This involves a heavy expenditure; and from all that has been reported during the last month from Palamow, I cannot think it is necessary that such an unlimited number should be employed. Feeling this, I, on the 18th instant, sent orders to Palamow to lower the rates all round by one pice a head, and to enforce piece-work rigorously. The Assistant Commissioner, it will be seen, had already directed the reduction in the case of women, who flocked to the works in Lieutenant Grey's circle out of all due proportion to the men; but as I found the cultivating season had actually commenced, and that the farmers would soon require the work-people, I thought it best to direct a general reduction throughout Palamow. From Mr. Forbes's report it does not appear that the reduction has driven one woman away from the work. It is probable that the piece-work, which I fear has been little tried in Palamow, will have a more potent effect. We have been hearing for some time that the laborers, living on such cheap food as mohwa and jungle-produce, were saving up their wages. Farmers and zemindars complain that they are not hard enough worked for the pay they get; and as we do not wish to enter into a competition prejudical to the interests of the employers, we must find the point at which the laborers will only resort to us as a *pis aller*.

No. 381, dated 23rd May 1874.

17. When in January last arranging for the probable requirements of Palamow, my first thought was, with reference to the isolated position of the sub-division, to stimulate in every possible way the importation of food-grain. With this view the assistance of the most influential zemindars was invited, and the mahajuns encouraged to import to the utmost extent, and even the ordinary cultivators were moved to import on their own account with their own cattle. It is on this account that we have now a large stock of rice in the country, and as represented in my letter No. 182T, of the 18th instant, I was unwilling to enter into competition with the traders by paying the work people in rice; but I find from letters since received, especially a demi-official from Mr. Bernard, that this has been determined on as a necessary policy, and I am sending out orders to Palamow to use up the Government stores for payment of coolies without reserve, including the additional 10,000 maunds available at Dehri.

18. The Palamow Charitable Relief Committee has a large fund at its disposal—about Rs. 10,000 available. They have only spent Rs. 392 against Rs. 462 of the previous fortnight, and the persons served are for the most part ordinary beggars. If all goes well, another month will probably see us nearly clear of relief operations in Palamow.

19. *Manbhoom.*—I have not yet received a copy of the half-monthly report of the Deputy Commissioner for the fortnight ending 16th instant.

20. I understand from his letter to Government, No. 1074 of the 21st instant, and a demi-official communication, that he proposes to post the officers recently appointed, and arrange for circles as follows:—

Govindpore.—Relief officer Mr. H. W. Mackenzie, Extra Assistant Commissioner.
Assistants, Mr. W. H. Mackenzie, and Mr. Rebello.

Rughoonathpore, East.—Relief officer, Captain W. L. Samuells.
Assistant, Mr. Peade, Opium Department.

Rughoonathpore, West.—Mr. B. L. Gupta, C.S., Relief Officer.
Assistant, Baboo Raichurn Ghose, sub-deputy Collector.

Purulia.—Mr. R. D. Hare, Relief Officer.
Assistants, Baboos Jodoonath Chowdry and Pertap Digwar.

Manbazar Circle.—Mr. D. DeDombel, Relief Officer.
Assistants, Mr. S. N. Banerjea, and Moonshi Neamut Oollah.
The posting of Mr. Wingrove is not yet fixed.

I approve of these arrangements. The division of Rughoonathpore into two circles had been determined on before I left Manbhoom.

21. Since my last report, the District Superintendent of Police has visited Burrabhoom, and though that large pergunnah has enjoyed harvests since last famine, and is said to have yielded a 14-anna crop this year, and is known to have exported an immense quantity of grain, he reports that about 251 villages will require assistance, and grain is actually now being distributed as loans. Rice was selling in Burrah-bhoom after the harvest* at 21 seers for the rupee, and at the present time the quotations are 16 seers. The villages in need of assistance are in the hills towards the south bordering on Singhbhoom. The only relief asked for is a loan of rice to help them through the next month, or till the rains, when it is expected that the mahajuns now holding back will resume the usual advances.

* January 1871

22. During the period now under review, the circumstances of the Khaspel pergunnah have been carefully probed and tested by the District Superintendent, and he found that a considerable number of the cultivating classes were near the end of their resources and wished for loans of rice; two feeding depôts had been established in Khaspel, and road-works were going on, which provided for the laboring classes and paupers, but additional relief was required for some very poor Brahmins and Kaists who would not work. All this

has been arranged by the Purulia committee and sub-committees, and the details will, I doubt not, be found in Colonel Rowlatt's last narrative which I have not yet received.

23. Loans of rice continue to be given out rapidly. I do not know what quantity is shown as having been so disposed of in Colonel Rowlatt's report for the fortnight ending 16th instant. In my previous narrative I estimated that it would probably have reached 42,000 maunds by that date. *Since* that date, or during the week ending 23rd instant, the issues in loans have been—

	Mds.
Govindpore	5,603
Rughoonathpore...	8,327
Purulia	3,912
Total ..	17,842

Besides, rice has been sent for distribution to Burrahbhoom, Bagda and Khaspel.

24. In the two Rughoonathpore circles, the 10 depôts were, at the close of last week, giving cooked food to 1,601 men, women and children, and uncooked food to 1,777 persons, and supporting 191 by means of in-door work.

25. The chowkeedars throughout the district are having a hard time of it. They are ordinarily paid in grain or cash by the villagers, but this year it is found most difficult to realise their dues, and we cannot expect them to work for nothing. I have therefore sanctioned a proposal of Colonel Rowlatt's to give to each chowkeedar in the distressed tracts one maund of Government rice.

26. For chowkeedars of Khaspel, the Manbhoom rural selected area for vital statistics, we have done a little more. I have sanctioned a payment from the Ghatwali fund of four annas to each chowkeedar as he comes to make his weekly report, till the price of rice falls, or the sanction of Government be obtained to another proposal for their remuneration.

27. The outbreak of cholera, reported to Government in my letter No. 1490 of the 23rd instant, has added greatly to the difficulties of transport. Colonel Rowlatt, under date the 26th instant, writes that the cartmen were refusing to proceed to Rughoonathpore where the disease is still bad. It is "less at Burrakur," and not increasing in Purulia. Every effort being made to settle with the cartmen, and I trust the panic will soon subside, or that the fears may yield to some extra remuneration. In such an emergency the Deputy Commissioner must exercise his influence and authority both.

28. A fair start has been made in providing employment for the people on village tanks. In the Govindpore circle, sites of eight such works have been selected, and others have been started in other circles, of which I have no details.

29. I learn from Colonel Rowlatt's note of yesterday that refreshing rain has fallen in Purulia, and it is expected that this will greatly benefit and accelerate the sowings.

30. No grain-robberies are reported to have taken place in Manbhoom. The grain carts are escorted by men of the rural, *i.e.*, Digwaree, or Ghatwalli police, who are paid Government rice for this extra duty. There have been a few cases of incendiarism of granaries, in consequence, it is supposed, of the owners refusing to advance or sell, and a report has reached me that one of the wealthiest merchants of Manbhoom has, for the same reason, been brutally murdered. It is said he had 30,000 maunds of dhan.

31. The latest information received of the number of laborers employed on local public works in Manbhoom was on the 9th instant—

Males	8,906
Females	3,144
Children	919
Total ...	12,969

32. *Singhbhoom.*—I have had no letters from Captain Garbett during the fortnight and no changes have been reported from Singhbhoom. Captain Garbett has, I believe, gone to visit the southern Pirs again.

No. 381, dated Daltongunge, the 23rd May 1874.

From—L. R. Forbes, Esq., Offg. Assistant Commissioner of Palamow,
To—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore.

I have the honor to submit herewith my 7th narrative of scarcity and relief in Palamow sub-district for the fortnight ending Saturday, the 16th May 1874.

Seventh Narrative of Scarcity and Relief in the Palamow sub-district for the Fortnight ending Saturday, the 16th May 1874, submitted in accordance with orders contained in Government Circular No. 80, of the 17th November 1873.

A.

Abundance or scarcity of supply in the Bazars.—As reported in my last narrative markets continue to be fully supplied. The agricultural importers of the sub-district

now closed their operations, to allow their bullocks rest before the ploughing season commences, but supplies are being kept up by the local traders and outside importers. The amount of rice imported during the last six or seven months by the local traders is enormous; they have all got their golahs full. I have been again assured by trustworthy persons that in Garwa alone there is upwards of a lakh of maunds in store. None of the local traders have as yet offered any of their stocks for sale, nor will they, it is said, until they have satisfied themselves as to the prospect of the coming harvest, that is, when the rice has been transplanted in August. In the meantime, outside traders are proving equal to the occasion. These will continue to import until the end of June, and by that time agricultural operations will be in full work, and the people will be in a measure independent of the markets. The amount of mowha in the country is very large. This crop, as I have said before, has been the saving of the country. It is now selling in the bazars at something less than a maund and quarter per rupee. During the fortnight considerable exportations of mowha have taken place to Shahabad, and rice also has been sent there. For Belounjah and Japla, too, I have now no longer the fears I once had, and if the rains fall propitiously, the people there will have no reason to complain. To give an example of the amount of grain now in the sub-district, I may state that I have been assured by several mahajuns that even in ordinary years their assamees, *i. e.*, those who take loans of grain, &c., from them usually commence applying at this time of the year, but that up to date they have not received a single application. This they attribute partly to the fact of the people having imported largely on their own account, and partly to the mowha crop. The fact is, that the note of alarm that was sounded throughout the country in December and January last has been productive of immense good. Rumours reached the people of a general famine throughout Bengal, and each man strove to the utmost of his power to secure for himself a stock of food while he could. Both food and seed-grains have been largely imported, and I feel confident that when the time comes there will be no lack of either. The people seeking relief on the roads belong to the poorest classes, possessing no plough-cattle of their own, but who have a small area of homestead land, and subsist by field-labor. To these of course importation on their own account was impossible.

Kind and prices of grain selling at one or more specified principal marts.—The following table exhibits the kind and prices of grain selling at five of the principal marts. Prices have an upward tendency; but I am assured that the price of rice is not likely to rise much above ten seers per rupee. In my last narrative I stated that prices would most probably rise as importations decline and the season advances. They will probably reach their highest about the middle of July, by which time the local traders, beginning to see their way, will commence to offer their stocks in the market, and prices will gradually go down.

Names of Marts.	Quantities per rupee by the seer of 80 tolahs.						
	Wheat.	Barley.	Rice.		Mowha.	Indian-corn.	Gram.
			Wholesale.	Retail.			
Daltongunge	13 50	19 68	12·94	11 62	40·50	14 94	15·75
Garwah	12·94	18 50	12 36	11 36	47·25	16 87	15 75
Hussenabad	11·94	18	11 50	10 50	42		14·75
Satberwah	13 50	18 56	12 36	11 36	45	14·87	15 18
Manka	12 36	18 56	12 36	11 25	60·75	12·36	15·18

Information regarding the amount and kind of grain believed to be in stock, &c.—I have no precise information on this head as I have already stated. From information I have been able to obtain, I gather that the amount of grain in the country is now very large, and that even a large proportion of the agricultural classes have a larger stock of rice in hand than they usually have.

Rainfall.—There has been no rain during the fortnight, but clouds still continue to hang about. The days are hot, and the west winds have been blowing with considerable force, but the nights are extraordinarily cool,—towards morning quite cold, in fact.

State of the Crops.—The sugarcane, the only growing crop, is doing well; cucumbers, melons, and such like fruits, are plentiful. The people are beginning to employ themselves on their homestead and high class lands, laying down manure, and hedging, &c., and cotton-growers are busy burning their dahu lands, and in a few cases dhan-seed has already been scattered on the land in order to take advantage of the very first showers.

Condition of the People.—I have nothing to add under this head beyond what I stated in my last narrative. I believe I may confidently assert that the condition of the people everywhere throughout the sub-district is at present excellent, and that if all goes well within the next two or three months, they will hardly be sensible of the crisis through which they have passed. The mowha and the relief-works have come to their aid so smoothly and easily that they have not had an opportunity of experiencing the pressure of want.

Actual facts as to any known cases of misery and starvation.—No such cases have been reported.

Grain-thefts and robberies.—I have nothing to report under this head.

Condition of any special tract.—There is no tract now the condition of which calls for special mention.

B.—Relief Works.

The relief works now in progress, and the number of laborers on each according to latest information, are as follow:—

1.	Daltongunge S. road	200
2.	Chandwa road	1,922
3.	Behar „	2,927
4.	Maharajgunge road	2,287
5.	Garwah „	1,351
6.	Untari „	4,677
7.	Manjhiawan „	1,754
8.	Japla road	1,983
9.	Irrigation works in Government villages	485
10.	Baloomath road	5,336
11.	Naggar and Benares road	1,090
12.	Naggar and Shahabad	....
	Grand Total ..	24,012

The above shows an increase of 6,788 over the number exhibited last fortnight. These people all belong to the same classes as those who have been on the works all along. The numbers of women are very large in proportion to the men, but this is easily accounted for. The men are either engaged on beopari work, or are hired servants, and some are engaged in their own business. In ordinary times the women-folk, helped out with what little the man can spare from his scanty wages and the produce of the homestead land, can earn a decent living by doing all kinds of household work for their betters, and sometimes by field and harvest work. There cannot be a doubt that these people are obliged to frequent the relief works from necessity. They cultivate no lands and do not earn sufficient to enable them to lay by a stock of food sufficient, at the best of times, to last them more than a month at the very outside. As a rule, probably three to four days' food is the most they ever have in the house.

Supply of food thereat.—The whole of the relief works continue to be amply supplied with food-grains of various kinds.

Condition of the laborers.—The laborers everywhere continue to be reported to be in the same good condition as described in my last narrative.

Mode of payment.—No change has as yet been introduced, but payment by piece-work is about to be introduced.

Rates of wages.—It was brought to my notice by Lieutenant Grey, that the number of women on certain roads in his circle (relief works Nos. 6 and 11) was so great in proportion to male adults, that the quantity of work done was very small in consequence, and he was of opinion that if the wages of the women were reduced, a large number of them would leave the works. After due consideration I sanctioned a reduction of one pice in all wages, from 5 pice downwards. The results have, however, not fulfilled Lieutenant Grey's expectation, for the women still stick to the works notwithstanding the reduction. I however see no reason for rescinding my order; on the contrary, with mowha as cheap as it is, I think the reduction may be extended to all roads with advantage.

Arrangements for tools.—The whole of the tools indented for have now been received.

C.—Transport of Food.

Approximate amount of private food-supplies.—As I have before stated, importation by agriculturists has now ceased; but the trade continue their operations with vigour. I have no precise data to go upon, but I am assured that the supply of food now in the country is quite equal to what it is in ordinary years,—some even say it is greater.

Sufficiency or otherwise of the means of transport.—The transport agency is quite equal to the demand.

D.—Storage of Grain at Relief Works.

The accompanying Statement I, Appendix A, exhibits all information under this head. With reference to the 10,000 maunds of rice indented for by the Commissioner of the division in his No. 1097, dated 13th April, for storage in Jupla, and sanctioned by Government letter No. 2626—S.R., dated 24th idem, I have already reported demi-officially to Mr. Bernard that I have no need of this rice. From further enquiries I have made, I am confident that there will be no dearth of food in this tract, such, at any rate, as will necessitate the storing of a large supply of rice on the part of Government. I have, or rather shall have shortly, 2,000 maunds in the capital town of the pergunnah, and I have some 3,000 or 4,000 maunds within a day's journey of any part of it, none of which I am inclined to think I shall be

compelled to sell or distribute for the alleviation of distress. I am confident that the trade, notwithstanding the fears I was once led to entertain, will prove fully equal to the occasion.

Condition of storage-houses.—These are all in good order.

E.—Advances to private Parties and their Results.

The results of advances to native gentlemen for the purchase of rice on the part of Government will be found embodied in Statement I, Appendix A.

Advances to Municipalities.—There are no municipalities in the sub-district.

Advances to private parties for land improvements, &c.—Statement II, Appendix B, exhibits all requisite information under this head.

F.—Charitable Relief.

The following is an account of the amounts subscribed and realised :—

Subscribed.	Rs.	As.	P.	Realised.	Rs.	As.	P.
Amount realised up to preceding fortnight ..	6,631	0	0	Up to preceding fortnight ..	4,888	0	0
During the fortnight ..	400	8	0	During the fortnight ..	735	12	0
Total ..	7,031	8	0	Total ..	5,623	12	0

There has been a decrease during the fortnight in the number of persons receiving charitable relief, the number, according to latest information, being 392 against 462 exhibited in last narrative. The decrease is owing partly to the departure to their homes of a number of destitute persons whose homes were in other districts, and partly to some inveterate beggars preferring to follow their profession, no matter how precarious it may be, to receiving regular doles of food. The Husainabad relief committee still continues to work well, and the accounts of the industry of the Moslem ladies is most encouraging. I have not yet received any reply from Mr. Davies respecting the history of these families, and I have again addressed him on the subject.

G.—Financial Results of the Fortnight.

ASSISTANT COMMISSIONER'S OFFICE;

PALAMOW,

The 23rd May 1874.

L. R. FORBES,

Offg. Assistant Commissioner.

No. 1561, dated Chota Nagpore, the 28th May 1874.

From—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore,

To—The Offg. Secretary to the Government of Bengal, with His Honor the Lieutenant-Governor, Monghyr.

As an appendix to my half-monthly narrative despatched yesterday, I have the honor to submit copy of a communication* from Captain Garbett, Officiating Deputy Commissioner, Singhbhoom, which supplies the information regarding the relief operations in that district wanting to complete my report.

* No. 218 of the 23rd May 1874.

2. As I had anticipated, Captain Garbett writes from the Kolhan, thirty miles due south of Chybassa, and proposes some additional works which it is necessary to undertake, to help the people on to the early harvest.

3. Amongst these the clearing out of a tank proposed for the town of Chybassa at a cost of Rs. 1,000 has already been sanctioned in Government orders No. 3327—S.R., of the 25th instant. This, he says, will give employment to the poor of some of the most doubtful tracts in the Kolhan, and he proposes to pay those who work at it in grain, which will of course be approved.

4. I have approved of his commencing the following works in the interim in anticipation of Government sanction :—

	Rs.
A reservoir in Gamaria, a market village	100
Ditto ditto at Joypore	150
Clearing two tanks in Jugernathpore	600
Additional required to complete the Kochra reservoir.. ..	200
Ditto ditto to do. Karigooria do.	100
Total ..	1,150

5. The Officiating Deputy Commissioner finds that a considerable number of the Kolhan ryots are in want of seed-dhan, but they are averse to borrowing it from Government, fearing that something might happen which would render them unable to repay it when due, and they dread giving bonds. They have already shewn their honesty in working out the advances they received, and for which not even a receipt was taken, and I have agreed to Captain Garbett's proposal to trust to their honor.

6. The Deputy Commissioner has stored in different places, paddy sufficient to meet these requirements, and hopes to have rice sufficient to pay the work-people. This stock was secured early in the season, and wisely reserved till near its close. It now comes into use most opportunely.

No. 218, dated Jagernathpore, the 23rd May 1874.

From—Captain C. Garbett, Officiating Deputy Commissioner, Singbhoom,

To—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore.

Your letter No. 181T, dated 18th instant, has this moment reached me, and I lose not a moment in replying. The letter was received at head-quarters on the 21st.

2. Up to the end of last month (April), the price of rice all over the district ranged from 20 to 24 seers for the rupee. Remembering that the rainy season was fast approaching, when all exportation from the district would absolutely cease, I began to hope that we were about to escape more fortunately than I had dared even to dream. It is only since the beginning of this month that prices have risen, and with a very sudden bound. As rice is now selling at just half what it does in ordinary years, and since the people for the most part are very poor, the present high prices are necessarily causing a good deal of pressure to the lower classes; but still I do not consider that there are any grounds for fearing that in this district we shall have any thing like famine in its dreadful signification, destitution, misery, starvation, death. My own idea is, that up to about the middle of June the price of rice will fluctuate between 14 and 16 seers for the rupee, and that after that it will settle at 16 seers till the next crops are ready.

3. With reference to paragraph 2 of your letter under reply, before leaving Chybassa I wrote to you soliciting sanction to expend Rs. 1,000 in clearing out the Chybassa lake or big tank. Around Chybassa lie two or three of the most doubtful tracts in the Kolhan, and the work I wish to undertake will give employment to such as need it. I am actually expending on it what money I can out of the town funds, but the amount will not exceed Rs. 200. When this is finished, and pending reply to my application, or in case such application is refused, I have made arrangements to spend Rs. 500 out of private funds. I can give any amount of employment at Chybassa if necessary, and you may rest assured that work will not be allowed to come to a stand-still for want of money pending sanction from proper authority.

4. I have been out on tour in the Kolhan for the last week or 10 days, inspecting the works, and making personal enquiries into the present condition of the people. I am of

opinion that some further assistance is necessary, and have accordingly made arrangements to set agoing at once the following fresh works :—

(*a*).—A small reservoir at Gamaria to cost about Rs. 100. Gamaria is a market village, and a tank in the village is much required. There are a great number of poor villages round about and the work will give employment to those who require it.

(*b*).—A small reservior at Joypore, in a very advantageous site, to cost Rs. 150. This work is also much required to give employment to surrounding villages.

(*c*).—Clearing out two old tanks at Juggernathpore. This Juggernathpore is a large market village; it has several large tanks which have all silted up, and are in a very filthy condition. Around and in the neighbourhood of Juggernathpore are some of the tracts which suffered most severely from deficient rainfall, and the clearing out of these tanks will give ample employment for miles around. I beg to be allowed to spend Rs. 600 on the works.

(*d*).—About five miles north of Juggernathpore I have a reservoir in progress (at Kol Kochra). This work, if thoroughly done, would cost, I estimate, Rs. 400; I have only allowed Rs. 200 for it, but as I find further assistance is much required in these parts, I propose spending up to the full amount required to complete the work. I have made arrangements accordingly.

(*e*).—There is a small reservoir being constructed at Karigooria. Bor Pir (Kaira Manki). The work will cost Rs. 150 to 200. I have raised the Government contribution to Rs. 100.

5. The above works are all situated in tracts which suffered most last season. They will, I think, meet present requirements. If not, there are a number of old tanks and new sites on which I can set work agoing on the shortest possible notice. So far as I can judge, I do not think it will be necessary to give further assistance in any other quarter in South Kolhan, but I have intelligent and reliable men out, and if the necessity does arise, there will be no delay in rendering the requisite assistance. To-morrow I start for Kotegurh and Jamdah, and if I find it necessary, I will set fresh works agoing in those parts of the Kolhan. After which I send back my camp to head-quarters, and proceed myself as light as possible through Saranda Pir to Dhipa, and thence *vid* Parahat to Chybassa.

6. With reference to the latter portion of paragraph 2 of your letter under reply, I have the honor to inform you that I have already made arrangements to advance 313 maunds of seed-grain to ryots in this portion of the Kolhan. This grain I am advancing out of Government stores. As the matter was immediate I have ventured to act on my own responsibility, but feeling certain at the same time that you would at once accord sanction on report. I have experienced the greatest difficulties in the matter of these seed-grain advances. The Hos, simple people, and in these parts half wild, cannot understand the offer to supply them with what they require, and their minds are filled with the strongest suspicions. One of these is that, in offering them these grain advances, Government have the after-intention to take their children to distant countries. Then, also, they are very fearful lest by any mischance they should be unable to repay what they borrow, and have the greatest horror at the possibility of their cattle being sold up to satisfy the claim against them. With these thoughts and these suspicions they obstinately refused to have anything to do with the advances offered, and yet I can assert with the utmost positiveness, a positiveness arising from the circumstance that I personally made a house-to-house inquiry in some 20 villages, and caused similar enquiries to be made in a large number of other villages by good and reliable men, that seed-grain was absolutely needed by a large number of the ryots. I have been reduced to all manner of expedients to gain over the people, to dismiss their idle suspicions, and to make them believe that nothing was intended beyond their own benefit. Finally, before I could induce them to take what they in all truth had absolutely needed, I had to promise them that I would be personally responsible if, by any mischance, they should be unable to repay next season. The ice thus broken, I trust the people will freely come forward for what they require. But I solicit instructions with reference to future advances. On what terms and conditions am I to make such advances? On what security, if any? Within what time must repayment be made? Whilst soliciting instructions I trust I shall be pardoned venturing the opinion that these advances should be made without any conditions whatever on mere receipts. The Hos are so peculiar, so delicate to deal with, that I feel quite certain if we venture any formalities with reference to these advances, and annex any condition, however simple, we shall be defeating our object. The Government must trust to their honor; advance them what is necessary without security; and recover when and how we can, or else leave them to struggle through as best they can. The Moondas are for the most part nearly as poor as their ryots, and if we attempt to make the Mankies securities, the people will hold back from making their wants known.

7. I have the following rice in store :—Rs. 1,000 worth at Jyutgurh and Juggernathpore; 2,000 maunds paddy at Gamaria; 1,502 maunds paddy at Chybassa; 200 maunds at Sarjamhata (Koldiha Pir); 1,750 maunds at Dhipa. If necessary, rice can be purchased at Jyutgurh from Keonjur, which will be cheaper than getting it from Manbhoom. But I don't anticipate it will be necessary to buy any more rice for Government. I am expending a portion of the Dhipa rice in wages on the Dhipa reservoir. I also solicit sanction to do likewise on the works in these parts. From late resolutions Government appears to desire it. In anticipation of your sanction, I have made arrangements to pay wages in grain. In fact, this must be done in these tracts. Of the Kolhan; the people w'ont work for pice. Whilst on the subject,

I also beg being allowed, if my application regarding the digging out the Chybassa lake be sanctioned, to pay wages at Chybassa also in grain. At head-quarters, people are of course ready and willing enough to work for pice, but if we pay in grain we shall be certain to get only those to work who really require assistance.

8. The circuit-house bungalow will be ready for occupation by the beginning of July.

No. , dated Purulia, the June 1874.

From—Colonel E. A. Rowlatt, Deputy Commissioner of Manbhoom,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

With reference to paragraph 3 of Government Circular No. 154—S. R. dated 16th January last, I have the honor to submit my fortnightly narrative ending the 30th ultimo.

A.—State of the Country.

I am happy to say that I am still able to report a continued change for the better in the general state of the country since the date of my last narrative. The only drawback to this improvement is, I regret to state, a rather severe outbreak of cholera, which, spreading from Burrakar, has now made its appearance more or less over the whole of the north and eastern part of the district, between Burrakar and Raghunathpore, where at one time it threatened to put a stop altogether to the transport of the Government rice. It has fortunately abated, and the cartmen who had deserted have again returned to work. In other places, however, where it has made its appearance later, it is still causing a large number of deaths, which altogether up to the present date are reported by the police to amount to 193.

Small-pox, which not long ago was very prevalent, has, I am glad to say, almost disappeared, and in every other respect the health of the people is very satisfactory. The showers of rain which have fallen lately, will, I trust, soon restore the district to its usual healthiness.

From Govindpore the relief officer, Mr. H. W. Mackenzie, reports:—"Since the submission of my last narrative there is decidedly a change for the better in the general state of the country. This has, in my opinion, been in a great measure brought about by the loaning out of the Government grain to cultivators, as the large cultivators, who have obtained a good supply, are able to help their poor friends and relatives. Besides this, the traders and others who had closed their shops to the public, with the view of making their own terms, finding themselves frustrated, owing to the distribution of the Government rice, have again opened out their stores, and are selling at what in these times of scarcity may be considered moderate prices."

From Rughunathpore Captain Samuells writes:—"The condition of the people is satisfactory, and it is a pleasure now to go from village to village, and find the people contented and happy. It is admitted on all sides that the system of relief by advances of Government grain to ryots has saved many and many a household from starvation and death; and I am myself satisfied that it has done more good, and in a less objectionable form as to its demoralizing effects on the people, than any other form of relief which has been adopted."

In the Purulia circle the state of the people is not quite so satisfactory, as the distribution of Government grain commenced there later than at Govindpore and Rughunathpore; owing to the unfortunate outbreak of cholera, the arrival of grain at Purulia was for some days suspended, but it is now coming in again pretty freely, and loaning out is proceeding rapidly, so that large numbers of those requiring rice will soon be supplied; in fact, the wants of those villages which have suffered the most have already been nearly met. The relief officer, Mr. Hare, reports that "during the last fortnight the system having been adopted of first distributing to the most distressed villages, an immense amount of help has by this means been rendered, and this form of relief has extended beyond the actual ryots, for, I have ascertained, the regular laborers dependent on the cultivators are in many places being supported by them with the borrowed grain."

The reports from the Manbazar circle are also reassuring, but, from the extreme difficulty of transporting grain to that part of the district from Rughunathpore, unavoidable delay must take place before sufficient grain can reach those parts. Distribution has, however, commenced at Kenda and Bagda, and a small quantity of rice has reached Manbazar. Great efforts are being made to supply that part of the district with what is required, and now that Mr. T. D. DeDombol, the relief officer, has joined, everything will be done that can be accomplished, but the difficulties are great.

The distress reported in Burrabhoom has been relieved by the despatch there of rice from Purulia, and more is being forwarded. Work has been started on the Burrabhoom and Purulia road, close to Burrabazar, which will be the means of relieving those in want of work.

The tendency to spread, however, still goes on, and distress is even now reported from Patkum and Jhalda, where the crops were excellent. It is confined, I am happy to say, to very small numbers, and will be met by giving labor on tanks in those villages where the distress is greatest. The distress is entirely due to over-exportation and the refusal of the mahajans to make the usual advances.

All the relief officers report that the stocks of grain in the hands of the mahajans are far less this year than ordinarily, and that at present they all refuse to make advances; so that for the present all those cultivators who have not got a reserve of food of their own

will look to the Government stores for the means of subsistence until the rains fairly set in, when it is believed the mahajans will again make advances.

Rain has fallen nearly all over the district, and in some places copiously, whilst in others there has not been enough to enable the people to sow the early crops of rice, millet, and Indian-corn. More rain is earnestly looked for, if it does not fall soon, the early crops will be late and distress consequently prolonged.

The fruit on the sál trees is now ripening, and will add something to the stock of food in the hands of the poorer classes, by whom it is chiefly consumed; it is eaten mixed with mohwa, and if in addition to this the people can but obtain one meal a day of rice, this will be quite sufficient to keep them from starving or falling much out of condition.

The supply of grain in the bazars still continues to be sufficient for all those who have the means of purchasing it, but trade is not active, as the purchasing power of the people is at a very low ebb.

No grain-robberies have been reported during the fortnight under report, but a dreadful case of murder has occurred in Manbhoom, where one of the largest merchants was found murdered not very far from his house; it is supposed to have been committed by persons to whom he had refused to advance grain, but as yet no clue has been obtained to the guilty parties.

The price of rice and pulses according to the reports of the police, made up to the 30th instant, and those of the previous fortnight, are given below:—

Name of Bazar.	Coarse Rice.		Fine Rice.		Pulses.	
	Last report.	Present report.	Last report.	Present report.	Last report.	Present report.
	Srs.	Srs	Srs.	Srs.	Srs.	Srs.
Raipore	16	16	15	15	14	14
Manbazar	14½	14	12	12	12	12
Burrabazar	14½	15	12	12	12	12
Echagurh	18	17	16	16	12	13
Jhalda	13½	13	12	12	12	12
Purulia	14	14	10	12	13	13
Govindpore	13	12½	12	12	11	11
Raghunathpore	13	13	11	12	12	12
Nirsha	12½	12½	12	12	11	11
Gaurandih	13	12	12	11	11	11

From the above it will be seen that prices of the chief articles of food have fluctuated slightly, but that not much change has taken place in the rates prevailing in the above places.

B.—Relief Works.

Work is now progressing on all the lines of road under construction as relief works. On twelve the contract system is still in force, and could not be changed without a large addition being made to our working staff of overseers and agents for carrying them on; of the remaining five roads, four are being carried on entirely by superintendents and overseers without the intervention of contractors, and one is being constructed partly by contract and partly without. On all, the task or piece-work plan is in operation, and there are also five light labor gangs, to which the weakly and aged of those who can work are drafted.

The two overseers lately posted to this district having now joined, the works going on, which are now very extensive, will be better looked after than before, but the executive staff is still very weak, and it is with the greatest difficulty that the works can be carried on efficiently and without waste of money. The Executive Engineer, Baboo Khetro Mohun Bose, is a most able and hard-working officer, who spares neither himself nor his assistants, and it is entirely through their persevering exertions that the works are being carried on successfully.

The number of village tanks which have been taken in hand by the relief officers now amount to 18. The names of the officers who have undertaken them, and the numbers, are entered in the margin. Great care has been taken to select sites where works was not otherwise obtainable, and it is only in villages where the distress is great that this form of relief is being afforded. Many more will be started during the ensuing fortnight, Mr Hare has been very successful in inducing the people themselves to contribute something towards the expense of excavating these tanks.

Govindpore, Mr. Mackenzie, 8.
Raghunathpore, Capt. Samuells, 1.
Purulia, Mr. Hare, 9

Government minor relief works.

The number of people employed on tanks in the Govindpore sub-division up to the 29th May was	135
In the Raghunathpore circle	307
„ Purulia „	381
Total	823

Returns from four tanks had not been received.

Roads.—The average numbers employed on the roads up to the 23rd May, up to which date only are the returns correct, was 14,202, being an increase of 1,233 over that reported in the last narrative. Where the fall of rain has been sufficient, some of the laborers are leaving the works on the roads, which is good sign, showing that work will be forthcoming as soon as the rains properly set in. The total employed by Government on relief works was therefore 15,025. A list of all the Government relief works called for in the letter of Officiating Secretary to the Government of Bengal, No. 144—T. F., dated the 5th May, is annexed.

C.—Transport of Government Grain.

Up to the 29th ultimo the quantity of Government rice received at Burrakar amounted to 1,41,944 maunds, of which the following quantities had been despatched to the places mentioned below:—

	Mds.
Raghunathpore	43,813
Inganpore	11,125
Govindpore	33,909
Nirsha	14,180
Pandra	1,000
Hijli, south bank, Damoodur	34,522
Desarguon, north	1,874
Total	1,40,423

leaving only 1,521 at Burrakar on that date. The above account is not quite correct, as the grain is not received or despatched by weight, but it cannot be far wrong.

From Govindpore grain is again transported to Jheria, Tundih, Katras, and Nowagurh by means of carts sent in to Govindpore from those places. The store at Inganpore is kept there to loan out rice to the people of Northern Chaurasi pergunnah, and is not removed elsewhere. From Raghunathpore grain has to be sent out to 7 other loaning stations in that circle, and also to Puruha, Ludhurka, Kenda, Bagda, Manbazar, and Khatra, all which is managed by carts being sent from those places to fetch it. From Purulia again, grain is forwarded to Arta, in Khaspaid and Burrabazar, where also loaning out to the cultivators has been going on during the last fortnight. It is now also being forwarded out to all the group or sub-circle centres from the main golahs in each circle

As yet, not much difficulty has been met with in procuring the requisite amount of carriage required to distribute the grain to all these various places, but the outbreak of cholera, which took place at the beginning of the fortnight, threatened at one time to put a stop to all our carting operations; for some days the cartmen refused to move, and a general panic was imminent. But most fortunately the disease abated, and confidence was gradually restored, so that altogether not more than a week's cartage was lost. In consequence of the above state of affairs, the grain at Burrakar, instead of being carted to Raghunathpore, has been stored in large quantities on the bank of the Damoodur river, and for some time difficulties were raised to its being carted on to Ragunathpore by Captain Samuells, the relief officer there, who undertook to do it, as this, it was stated, would interfere with the contract which had been made by Captain Grant at Burrakar. The difficulty has, however, I am glad to say, been got over, and I have no doubt that the energy and tact displayed by Captain Samuells will soon enable him to cart in all that now lies exposed on the banks of the river. The delay that this difficulty caused is much to be regretted, as it added further to the obstruction in the moving of the grain that had been caused by the outbreak of cholera.

D.—Storage of Government Grain.

The preparations for the storage of Government grain have now been completed at all the main golah stations, and minor golahs are now being built wherever required, and will soon be got ready; wherever suitable buildings are procurable, these have been made use of, and as they will only be required for a short time, the expense of constructing more than could not be done without has been avoided. At but few of the golahs is there any quantity of grain in store, as it is taken up by the cultivators as fast as it is received, in fact the receipts have hardly kept pace with the demands, which was of course to be expected, as every man wanted to be served first; by distributing the rice at a large number of places simultaneously, overcrowding has, however, been prevented, and not many have been detained away from their villages more than a day or two.

E.—Advances to Private Persons and their Results.

Up to the 30th ultimo advances have been made to the following extent.—

		Rs.
(1)	Advances to zemindars and others for purchase of grain, without interest	10,000
(2)	To traders and others of a safe and respectable character, with interest	11,567
(3)	To zemindars and talookdars to assist their ryots ..	9,950
(4)	Landholders for land improvements	68,590
(5)	To Puruha municipality	4,000

Applications for tuccavee advances have now almost ceased, and, under the orders of Government conveyed in the letter of the Officiating Secretary to the Government of Bengal, No. 3369 of the 26th ultimo, to the address of the Deputy Commissioner of Manbhoom, all further advances under heading No. 3 will cease also. Some small sums, due to persons who agreed to take their advances for land improvements by instalments, have yet to be paid, and one sum of Rs. 2,000, granted to the zemindar of Bhelaidiha pergunnah to assist his tenants, has not yet been drawn, but will be paid on presentation of the necessary power of attorney.

The distribution of Government rice on loan to the cultivators and others on security has proceeded fairly well during the fortnight, and would have been greater, had it not been for the unfortunate causes of delay which have been adverted to in Chapter C. The total quantity loaned out, as shown by the returns received up to the 30th ultimo, now amounts to 71,794 maunds, 28 seers, against 33,618 maunds, 21 seers, as entered in my last report. The number of persons to whom these loans have been made amounts to 25,760. They are still coming forward in large numbers in the Raghunathpore, Purulia, and Manbazar circles, but in Govindpore Mr. Mackenzie reports that "instead of coming by hundreds, as they used to, they now come by tens," showing that the greater portion of those requiring grain have had their wants supplied. In the Govindpore sub-division, however, the people mostly took the grain by instalments, and, as the first instalment must by this be pretty well expended, a fresh influx of applications will probably soon set in.

To save the entry of too much detail, I will merely give the quantities of grain that have been loaned out to cultivators in each of the main circles up to date:—

	Mds.	Srs.
Govindpore	30,986	0
Raghunathpore	30,614	28
Purulia	8,194	0
Manbazar	2,000	0
Total ...	71,794	28

of which 38,176-7 maunds have been loaned out during the past fortnight to cultivators, and to non-cultivators on security, 404.

To non-cultivators the quantities loaned out have been at—

Govindpore	.....	
Raghunathpore	328	0
Purulia	76	0
Manbazar	.....	
To chowkeedars, under sanction conveyed in Commissioner's letter No. 151—F, of the 13th May 1874—		
In Raghunathpore circle, to 36 men	36	0
In Purulia ,, 35 ,, ...	35	0
24 Tobidars (subordinate rural police officers) have also been supplied with 2 seers of rice per diem, while employed on duty in Purulia, and in guarding Government grain in transit ...	12	24
Total ...	72,282	12

F. (*a*)—Charitable Relief by Government.

Not much has yet been done in the way of distributing Government rice gratuitously, as the circle and group arrangements have not yet been completed. All the relief officers appointed to the district have joined during the fortnight, and the work of grouping out the circles has been rapidly proceeded with and will shortly be completed. Until the group officers are ready to take over the care of those who have hitherto been receiving uncooked rice, I have directed that the distribution by the sub-committees must continue; as soon, however, as the group officers are ready to take charge from the relief committees, the latter will cease giving out uncooked rice, and confine their operations of relief to giving cooked food at the poor-houses. By this arrangement no break in the distribution of uncooked rice will take place, and the feeding at the poor-houses will go on as before. The change will be gradually made by the group officers taking the place of the sub-committees as soon as they are appointed, and rice has been stored in the group centres.

The division of the Raghunathpore circle into two has been completed, and the final posting of the relief officers has now been settled and is as follows:—

Gobindpore Circle.

Mr. H. W. Mackenzie, Relief Officer.
,, W. H. Mackenzie, Assistant Relief Officer.
,, P. T. Rebello, ditto ditto.

Raghunathpore Western Circle.

Captain W. L. Samuell, Relief Officer.
Mr. W. B. Pead, Assistant Relief Officer.
,, W. G. Wingrove, Assistant Relief Officer.

Rughunathpore Eastern Circle.

Mr. B. L. Gupta, C.S., Relief Officer.
„ S. N. Banerji, Assistant Relief Officer.

Purulia Circle.

„ R. D. Hare, Relief Officer,
Baboo Jadoonath Choudhri, Assistant Relief Officer.
„ Jagat Chandra Das, ditto ditto.

Manbazar Circle.

Mr. T. D. DeDombol, Relief Officer.
Munshi Niamatulla, Assistant Relief Officer.
Baboo Rai Charan Ghose, Assistant Relief Officer.

Mr. Wingrove is principally employed in looking after the transport arrangements between Hijli and Rughunathpore, and in arranging the storage of the grain.

All have joined their respective circles except Baboo Rai Charan Ghose, who is temporarily detained in the Rughunathpore western circle, where he has hitherto been attending to the distribution of the rice at Mahal; he has been directed to proceed to Manbazar as soon as possible.

The above is, I consider, the best arrangement it is possible to make, and will, I have not the least doubt, work well.

In Govindpore the grouping of that circle has all been finished, except in pergunnah Tundih and a part of pergunnah Nowagurh, which will be finished very shortly. The other 6 pergunnahs, and part of Nowagurh pergunnah, have been divided into 54 groups, and officers appointed. The persons selected all either live in the circle or near at hand.

The division of the whole of the Rughunathpore circle was nearly completed before it was divided into two; it has been divided into 44 groups, of which 22 will be in the western and 22 in the eastern circle. All the group officers have been appointed.

In the Purulia circle all the distressed pergunnahs, consisting of those noted in the margin, have been divided into groups or sub-circles, and officers appointed in all, except in pergunnah Khaspol; this, however, will now be done in a few days, as Baboo Jodu Nath Chaudhuri, who only reached this station from Beerbhoom on the 31st ultimo, has now gone there with directions to appoint the group officers at once. It was considered better this should be done by an officer on the spot than from a distance, and Mr. Hare and his other assistants were busily engaged in attending to other pressing matters. Most of the groups in this circle have been supplied with a small store of grain, and the sub-committees relieved from distributing uncooked food. The work has been rapidly and well done. The persons selected as group officers are mostly residents within the group, but as many of them cannot read and write, it has been found necessary to give them a mohurrir on Rs. 6 a month to keep the accounts, and in some few cases men have had to be sent out from Purulia on Rs. 10 a month, as no one fit for the office could be found on the spot.

Khaspel.
Lagda.
Charra.
Ladhurka.
Rakali

The sub-division of the Manbazar circle into groups has not yet been commenced. Mr. Dombol, the relief officer, only reached Purulia on the 27th ultimo, and Manbazar on the 30th idem, but no time will be lost in carrying out this arrangement, where required. Full instructions were given by me to Mr. Dombol before leaving, and I have no doubt all the grouping will be finished very shortly. In the meantime, relief is being administered with the ample funds at their disposal by the sub-divisional and sub-committees.

The orders to substitute payment in grain on Government relief works instead of in cash are now in the hands of all the relief officers, and I have no doubt but that in my next narrative I shall be able to report that a commencement has been made in paying the laborers in this way wherever Government grain is available.

F. (*b*)—Charitable Relief by Relief Committees.

This chapter is now added under orders contained in the letter of the Officiating Secretary to the Government of Bengal, No. 3216—S. R., dated the 19th ultimo, paragraph 5.

The charitable relief in this district is administered by the district relief committee, three sub-divisional committees, and thirty-four sub-committees, to which four are about to be added; three have, however, been lately abolished, and the few frequenting them provided for elsewhere.

These have all been arranged gradually as required and extended over the whole of those parts of the district where distress has shown itself. The form of relief offered has been (1) cooked food consisting of rice, dâl with condiments and salt, besides which oil is occasionally given to those requiring it to anoint the body, without which the health of the natives of this country would suffer; (2) the distribution of uncooked rice to persons of respectability, who object, from one reason or another, to partake of cooked food; and (3) the providing of employment by assisting the meaner class by advances of money, of cotton given out to women to spin, and giving light labor in excavating tanks, sweeping up the depôts, providing leaves and bringing firewood to the depôts, all of which is paid for in food, either cooked or uncooked, according to circumstances.

The persons who have chiefly resorted to the poor houses have been the beggars, consisting of the lame, halt, blind, and lepers, who unfortunately abound in this district,

and who, in seasons of plenty, manage to pick up a precarious livelihood in the towns and villages, but who, on account of the scarcity and high price of food, have this year been unable to procure enough to keep body and soul together; large numbers of these unfortunates would inevitably have died off, had food not been supplied them at the relief centres.

Those who have been supported on uncooked food are mostly poor widows and children and destitute persons, whose caste usages and feelings precluded their attending and taking cooked food at the poor-houses.

The silk weavers in several villages have been assisted by loans of money, and cotton is given out to the poorer class of women, who are willing to spin it into thread, for which they are paid in rice. A large number have also been employed in light labour gangs in cleaning out tanks, and in various other ways.

Classified as directed in the orders of Government and the notification of the Central Relief Committee, dated the 14th March last, the sums spent in providing relief under these forms have up to the 30th ultimo been, in the Raghunathpore relief circle, as follows :—

	Rs.	As.	P.
(*b.*)	3,056	11	3
(*c.*)	1,112	8	0
(*d.*)	1,600	6	9

The returns from the other circles have, I regret to say, not been received, though called for at the same time; but this information will, it is hoped, be given complete in the next narrative.

The numbers receiving relief in the above forms up to the close of the last fortnight were—

Cooked food	3,677
Uncooked food	4,161
In various other ways	741
Total ..	8,569

against 5,451 by last return.

The test of obliging persons desirous of relief to partake of cooked food has never been rigorously exacted in this district, and, under the late orders of Government on this subject, the system hitherto in force will be continued. It is found necessary to adapt the system of relief to the locality in which it is given, in some places cooked food will not be touched, even by the lowest of the low, whilst in others again it is preferred to the offer of raw rice. It is stated by the relief officer of the Purulia circle that he had to close the kitchen at Ghonga, in Charra, as no one would partake of the cooked food, whilst at Mudali in Kassaipar, not more than 15 miles distant, he has been applied to to have cooked food distributed instead of uncooked, as was being done, as the people would prefer having their rice cooked for them, and so save the expense of fuel and platters. He also relates that he established a cooking place for the Bhumijis living among the jungles in pergunnah Rakab, and appointed their Pator, or priest, to cook for them; he says :—"They were apparently highly delighted with the idea, and I went away under the impression that the Bhumij hotel, as the institution was immediately dubbed, conveniently and centrally situated as it was, would certainly be a great success. The next report I received from my assistant, however, informed me that the whole thing was an utter failure, and that not a single Bhumij would go for cooked food," which is the more extraordinary as these people were evidently in great distress, and no one but Bhumijis were to be allowed to go to the hotel. They have now been supplied with rice uncooked.

Under the several relief committees there are also 10 minor relief works now under construction. These consist of tanks intended to supply good wholesome drinking water to the villagers where they are being constructed. The sums expended up to date in carrying on these works amount to Rs. 38,401.

Total expenditure from the district and sub-divisional treasuries as shown in the last narrative, 1,19,451-5-2.

Expenditure during the week up to the 23rd May.

Purulia,
The 3rd June 1874.

E. A. Rowlatt, *Colonel*,
Deputy Commissioner.

No. 947, dated Hazareebagh, the 5th June 1874.

Memo. by—H. S. Beadon, Esq., Offg. Deputy Commissioner of Hazareebagh.

Copy of the following letter, with enclosures, forwarded for the information of the Secretary to the Government of Bengal, Scarcity and Relief Department.

No. 674, dated Hazareebagh, the 5th June 1874.

From—H. S. Beadon, Esq., Offg. Deputy Commissioner of Hazareebagh,

To—The Commissioner of Chota Nagpore.

I have the honor to forward to you the accompanying copies of, and extracts from reports which I have received from various sources, together with certain statements called for by Government which show the condition and prospects of the crops and people in this district on the 31st May, and to add the following few remarks.

Ninth and tenth narratives of the scarcity in the district from the District Superintendent of Police.
Memorandum No. , dated 13th May 1874, from Mr. McArthy.
Letter No. 16 of the 25th May 1874, from the Manager of Gawan Estate.
Letter No. 134 of the 30th May 1874, from the Extra Assistant Commissioner, Chattra.
Extract from letter No. 139 of the 31st May 1874, from the Extra Assistant Commissioner, Pachumba.
Extract from letter No. 17, dated the 2nd June 1874, from the Vice-Chairman, sub-relief committee, Hazareebagh.
Letter from Mr. Tobin, Assistant Commissioner, dated the 31st May 1874.
Extract from letter No. 29, dated 1st June 1874, from Mr. McArthy.

2. Rain has been general and copious, so much so that I cannot help thinking that the monsoon has broken, though Mr. Liebert, a gentleman of great experience in this district, thinks we shall have a fortnight's more fine weather before the regular rains set in. However, this may be, the whole country is being sown with every description of crop (dhan, makai, marua, goondlee, &c.) and more lands are being ploughed for cultivation.

3. Mr. Campbell, who has favored me with a long report, the plums of which I have extracted, states that people in his sub-division have awoke to the advantage of taking advances under the Land Improvement Act, and I hope this may be so, for outside the Rajghur Estate alone can this process go on, for the reasons I have given before. But I am inclined to fear that these applications for *money* are made with the desire of getting money rather than of improving land. Money has at present such a power for him that hath to lend, that many will apply for loans, but I am not sure that they will be so ready, when they find that the works they engage to make will be insisted on, unless indeed here, too, they can effect a saving, and utilise the money at a high rate of interest.

Mr. Campbell does not give an encouraging report of the condition in which he found the people of Kurgalee when he went amongst them, but he has judiciously and fully relieved them, and with their reservoirs repaired by advance-money from the Government Improvement Funds, they are now placed in a position to cultivate their lands with every probability (humanly speaking) of good crops at the next harvest. At the time Mr. Campbell was at Dhunwar, there were some 7,000 relief laborers working there far and near, and it speaks well

for the condition of the people that Mr. Campbell could come across only "one case of real emaciation," a lad from Khesmee who was crawling into the bazar as he left it. Khesmee is being well-looked after by Mr. Tobin, and I have no fears of any deaths in that quarter. It will be seen that all reports speak of the improvement in the condition and prospects of the people.

From the south there are no evil reports at all; Mr. Davis, as vice-chairman of the head-quarters sub-committee, receives reports from his twelve local sub-committees, and keeps me fully informed both by his weekly police reports, and by his committee summary of the reports it receives. The total amount hitherto expended in charitable relief in this sub-division is Rs. 190.

From Chattra, and the west, I learn that the last cold-weather harvest was better than was expected; the early rice on the 30th May was being sown. The fall of rain in this "Nichatter" as the fortnight extending from the 23rd May to the 6th June is looked upon as extremely fortunate. Practical experience teaches the people that rain now, followed by a fortnight's sun before the regular rains break, leads to the best results hereafter, and is a good sign of there being sufficient rain at the time it is most required. I shall look forward with interest to the development of this theory, and trust Mr. Liebert's forecast of the weather may prove true. The rain that has fallen has improved every thing from sugarcane to grazing grass, and the fruit crops, except the mangoe, are very good. I have no lists of the people employed on the relief works conducted by the Extra Assistant Commissioner, but I submit a statement elsewhere of the road work population, supplied by Mr. Pereira. No severe distress is to be found any where. Pressure exists in pergunnahs Chai and Kendi, but proper arrangements have been made by the relief committee to meet distress in all its forms. Rice ranges from 10 seers to 12 seers to the rupee. While importation from the south is going on, exportation to Gya has ceased. The relief committee can purchase rice more cheaply at Chattra than at the Government store at Champarun which is 30 miles off. Several zemindars however have taken money advances of seed-grain, on condition of helping their ryots, at favorable terms. The funds at the disposal of the relief committees are Rs. 1,338; up to the 15th May Rs. 93-12 had been expended. The form in which relief is given is shown in Baboo Hurrihur Churn's letter which forms an enclosure to this report.

From the Burhee and Grand Trunk Road I have the following information, through Mr. McArthy, relief superintendent. He writes on the 30th May: "Cultivators are steadily employed in their fields where rain has fallen, but west of Bursote where there has been little, if any rain, employment is naturally less full and general. The poorer classes are, perhaps, becoming more pinched for food, but not to any serious extent; a relief work to be started in this neighbourhood will attract and provide for all the really indigent.

"Cattle, though somewhat thinner than usual, are looking fairly well on the whole, and there has been no scarcity of cattle-food.

"The recipients of gratuitous relief are slightly on the increase. Light labor is exacted at Koderma, Boggodhur and Burhee, but the relieved (at Burhee especially), are fit only for a very small amount of labor."

The price of rice on the Grand Trunk Road, he states, varies from 12½ seers per rupee at Doomree, to 11 at Burhee; on the whole he considers that some improvement is visible during the past fortnight.

From Koderma, Mr. Tobin reports favorably. People there speak of the provision made by Government, and say that had the roads not been made many would have died, and this is especially true when we remember that in times of scarcity the great mortality occurs afterwards, when disease breaks out among enfeebled frames. But there is no occasion to undertake any detailed search such as the search prescribed by Government letter No. 3216—S.R. "The roads in course of construction have," writes Mr. Tobin, "been quite sufficient to relieve all distress which was found to exist earlier in the year."

Advances of food-grain are being given to the ryots in that part, at the rate of 12 seers per rupee, to be repaid by March 31st, the ryots being in most cases security for each other.

Piece-work has now entirely superseded daily labor on the Joynugger road, and the result is, that whereas there were at one time 2,000 laborers on the road, there are now only a few hundreds. No payments in cash have been made on this road since May 23rd, the Government instructions on this point having been at once carried out on receipt.

Some days ago, the natural supply of rice in the Koderma Bazar failed; the bunniahs were at once supplied with rice from the Government store at 12 seers per rupee, bonds being taken from them to sell it to the public at 11 seers.

About Koderma, sowing is being rapidly prosecuted; there is evidently no lack of seed-grain in the district, and the mahujuns supply it on their usual terms. Some of the marua is already above ground, and it, as well at the makai, is looking exceedingly well. Government rice is being transported from the Graud Trunk Road, to be stored at Murkutcho and Joynugger, for payment to the coolies who will be employed on the road that will shortly be commenced between those two places; as well as for advances to those ryots for whom it may be necessary. The average numbers employed each day amounted to 1,513 up to the 31st ultimo.

From the statement supplied by the district committee's Engineer, it will be seen that on the road cess works that are in his hands, there has been a daily average of 12,474 laborers, and the column of remarks shows what progress is being made. Payments in grain have not been altogether introduced, but an attempt is being made to do so. Mr. Campbell at Pachumba has engaged to arrange for payments in grain entirely from 1st of this month.

From the Executive Engineer I have received no reports. Nor from Dhunwar. The numbers of the latter work have greatly decreased owing to a revised procedure, and the exaction of more work than was demanded at first. I anticipate that returns would show a daily average of some 5,000 laborers on the Dhunwar embankment, and the pilgrim and other roads in the hand of Messrs Parkinson and Peppé. This would, in round numbers, make a daily average of about 21,000 person deriving support in a time of exceptional pressure from the works provided by Government and Court of Wards.'

Returns cannot be got from the charitable relief committee. Mr. Campbell thinks that in Khurukdiha there are nearly 1,000 recipients of charitable relief, but he can give no exact figures. Figures for five places give 645 recipients. He considers the interest taken by independent gentlemen is flagging, and that they are careless, and this is not surprising considering the comparatively slight pressure that is on the land.

Altogether I consider that scarcity and danger for this year are passed, and it will now be my endeavour to push on the works taken in hand to completion, and to dispose of the rice on the works, rather than the money which has been sanctioned.

Ninth narrative of the scarcity and distress in Hazareebagh for the week ending 23rd May 1874.

Sub-inspector, Khooswakt Roy, in charge of Hazareebagh police station, writes on the 23rd May: The state of affairs has remained unchanged; the mhowa crop is quite over. The mowha *fruit* and *kuthal* look very promising; they will be ripe in a few days. The poor people eat the jungle-productions and exchange them for grain. There is no palpable increase in the number of beggars. Beggars are being fed from the State; the rural police have been ordered to bring into the station the incapable poor who should be supported by Government. The price of grain has remained unchanged. Rain is expected very soon.

Head constable, Guru Proshad Lal, in charge of Goomia police station, writes on the 23rd May: No reports have reached the station stating that there were any deaths from starvation, nor is there any palpable change in the physical condition of the people. No crop is due now. The poor are now subsisting greatly upon mowha. The grain market is intact. The mangoe will give little or no help this year, as it is expected to yield a very poor crop.

Head constable, Ramaunugra Proshad, in charge of Ramghur police station, writes on the 23rd May: No deaths from starvation during the week under review. The poor people are subsisting largely on the jungle fruits and the mowha. This provision will be exhausted in another few days. The number of beggars has of late increased; the sub-committee for the relief at Ramghur has made arrangements to feed them. Rice sells at 12 seers pucca for the rupee.

Sub-inspector, Sook Nundo Singh, in charge of Kasmar station, writes on the 23rd May: The people have begun to suffer owing to the mowha being over. The jungle fruits have also been exhausted; should timely rain fall, there is hope of the jungle roots yielding a good harvest, and being of some help to the poor. The Government rice has not yet arrived, and the beggars and helpless people are in consequence suffering. Some eight persons were made over to the relief committee, but they failed in supporting them with grain and issued to each of them half an anna a day, and the beggars have decamped considering the alms too small to support them.

Sub-inspector, Khalic Alum, in charge of Paghar police station, writes on the 23rd May: No palpable change in the physical condition of the people during the week, nor any deaths from starvation. The poor people are subsisting much on the jungle fruits and herbs.

Sub-inspector, Walait Hossein, in charge of Chattra police station, writes on the 23rd May: No deaths from starvation. Cooked food is being issued to the poor at the relief committees at Chattra, Itkhoori, and Kanha Chatti. Those that are capable are being provided with work. Rice sells at 12½ seers per rupee, wheat 11 seers, and mohwa 1 maund 7½ seers. In the corresponding month of the past year it sold at 2 maunds per rupee.

Head constable Fyzullah Khan, in charge of Huntergunge police station, writes on the 23rd May: There is nothing new to be noticed in this report. The people are subsisting much on the jungle-productions. The state of affairs continues favorable; there is no apprehension of deaths from starvation in this jurisdiction. The number of beggars is small; no rain up to the date of report.

Head constable Bhuttan Lall, in charge of Burhee police station, writes on the 23rd May 1874: No reports of deaths from starvation reached the station during the week. The jungle fruits have been wholly reaped. The kuthal and mangoe will yield a poor harvest this year. The price of grain remains unchanged; mohwa has a downward tendency. The sowing has not commenced for want of rain, a very scanty shower fell this afternoon; the weather is cloudy, there is hope of a shower. Rice 11 seers pucca for the rupee.

Sub-inspector Kaem Khan, in charge of Bugodhur station, writes on the 23rd May 1874: The state of affairs is the same as in the past week; no deaths from starvation. Rice sells at 12 seers for the rupee and grain 13 seers; a little shower of rain fell to-day. Cooked food is being issued from the relief committees.

Head constable Nund Kisson Lall, in charge of Koderma police station, writes on the 23rd May 1874: No deaths from starvation during the week. The people are subsisting greatly on mohwa which has yielded a very good harvest, Mangoe is expected to yield well.

The poor are drawing their support from the relief works in progress in the neighbourhood. The incapable beggars are being fed with cooked food from Government. Cheena looks very healthy, and is expected to yield a very good crop, but it is cultivated to a very small extent. Jeytria marwa has been planted by artificial irrigation from the wells. The soil for bhadoi has been made fit for sowing; a little rain fell to-day; should another few similar showers, fall, the cultivation of the bhadoi can be commenced.

Constable Mathura Prosad, in temporary charge of the police station of Pachumba, writes on the 23rd May 1874: Owing to works in the coal mines, the rigour of the scarcity is not much felt here. The poor are somehow or other tiding over the distress. Rice sells here at 11 seers for the rupee. People have commenced sowing the "dhan". The mohwa afforded great relief to the poor; it having now been exhausted they have begun to feel want; cooked food is being issued from the relief committee.

Sub-inspector Nojeel Khan, in charge of Khurukdiha police station, writes on the 23rd May 1874: There is nothing fresh to be recorded. The jungle fruits have ceased to yield. The price of rice has been reduced by 2 pylas from the previous week, viz. from 20 to 18, and has a tendency to become dearer by degrees; as recommended in the previous week, advances of money should be made to that class of people who have caste prejudices, and are not of the lower order, but who are much in want of means to carry on the cultivation of their lands in this year of scarcity.

Head constable Amanut Ali, in charge of the Gawan police station, writes on the 23rd May 1874: The people have suffered in physical strength from want of food. They have commenced planting the marua. No crop is due. The mohwa has ceased altogether. The mangoe crop is very poor this year. The jungle people are living on the jungle-productions. The helpless poor are being fed by the Manager of Gawan. Rice is selling at 18 seers kucha, equal to 10¾ pucca for the rupee. The sub-inspector strongly recommends the opening of some public works, such as road-making or digging tanks, and to afford the laboring people employment and support.

DISTRICT SUPDT'S OFFICE, HAZAREEBAGH,
The 27th May 1874.

W. P. DAVIS,
District Superintendent.

Tenth Narrative of the scarcity and distress in Hazareebagh for the week ending the 30th May 1874.

Sub-inspector, Shaik Imdad Ali, in charge of Gomia police station, writes on the 30th May: No perceptible change in the physical condition of the people during the week. No crop is due now; the people are living mostly on the mohwa they have gathered of late; rice is selling at 13 seers for the rupee as in the previous week; a little rain has fallen and the sowing has been commenced. The mohwa *fruit* is being used by the people, but the produce is small.

Sub-inspector, Imdad Ali Khan, in charge of Ramghur police station, writes on the 30th May 1874: The physical condition of the people generally has continued unchanged during the week; owing to the exports of grain towards the town of Hazareebagh and the district of Gya, rice is selling at 13 seers with an upward tendency. Mohwa is selling at 14 pussarees, or 42 seers pucca; only a two-anna crop of mangoes is expected this year; it has commenced to ripen. The people are collecting shell-lac from the jungle. They exchange it with the bunniahs at the rate of 6 pylas of rice for one of lac, and its ordinary price is Rs. 20 per maund. This will help the poor during the present crisis to a certain extent. Seria (fruit of the sâl tree), and keynd are being very largely used by the people. They also sell these for pice in the bazar, but the support from them is small and will not last long. The sugarcane is thriving well and is expected to yield well; it will not be due till January or February next, a little shower of rain has fallen, and about two-annas of the culturable area has been sown with "dhan" and gondlee.

Sub-inspector, Khalic Alam, in charge of Pughur police station, writes on the 30th May 1874: There have been no deaths from starvation, nor any change in the physical condition of the people. The jungle fruits and leaves have yielded a good harvest, and the poor people are drawing great support from them. There is no change from the previous week to be recorded.

Sub-inspector, Walait Hossein, in charge of Chuttra police station, write on the 30th May: No deaths during the week under review from starvation, nor any change in the physical condition of the people; a little rain has fallen in some places; dhan and gondlee are being sown. The rain has set in in proper time and is highly favorable to agriculture. Rice is selling at 11¾ seers for the ruppee. Nothing else of importance to note. Mohwah is selling at one maund and five seers for the rupee, whereas in the corresponding month of the past year it sold at two maunds.

Sub-inspector, Sooknundon Singh, in charge of Kasmar police station, writes on the 30th May: The poor people have commenced to suffer from want. No rain has fallen as yet, and the cultivation for the ensuing season is in consequence being delayed. The mahajuns have discontinued advancing either cash or grain to the poor, and the latter are therefore under great anxiety. The jungle fruits are over. The poor people will suffer till the rains set in, and they get employed in the fields; a very few isolated fields have been sown

with marua and dhan. The sub-inspector recommends that some arrangement be made to secure for the cultivators, both seed-grain and grain-food, as the mahajuns will not advance the same in this year of scarcity.

Sub-inspector Ameer Hossein, in charge of Huntergunge police station, writes on the 30th May 1874: Rice is selling at 18 seers kucha, or 10, or 10½ seers pucca. The late mohwa crop has afforded great relief, so much so, that if there had been any accident to it, the distress must have been very great. The poor people are tolerably well-off. The sub-inspector does not see any reason for issuing cooked or uncooked food to the poor from the local relief sub-committees at Huntergunge and Koondha. Rs. 22 have been collected at the Huntergunge sub-committee as local subscription for relief, and Rs. 57-8 at Koondha. On Monday preceding there was a heavy fall of rain for half an hour, and sowing has been commenced.

Head constable Ramdihal Ram, in charge of Koderma police station, writes on the 30th May 1874: No deaths from starvation during the week. There is nothing new to report since the previous week. Rain has fallen. Murua and gondlee, will be transplanted with it, and dhan has been commenced to be sown. The prospect for the ensuing year is favorable.

Sub-inspector Kaem Khan, in charge Bugodhur police station, writes on the 30th May 1874: No deaths from starvation have occurred in the jurisdiction of this police station up to the present day; a little shower of rain fell for five or six days. Dhan, gondlee, junar have been sown; mangoe, kuthal, and the mohwa fruits have suffered greatly from a storm which occurred during the week. Rice is selling at 12 seers, and gram at 13 seers for the rupee.

Sub-inspector Khooswakt Roy, in charge of Hazareebagh police station, writes on the 3rd June 1874: The price of rice has remained unchanged; there is no sign of the market rising higher. The poor people are living much upon jungle fruits and mango, and kuthal. Rain has set in; sowing has commenced; a large number of the laboring class have got employment in consequence. The number of beggars seems to have been reduced.

Head constable Torral Narian, in temporary charge of Pachumba police station, writes on the 30th May 1874: There were no deaths from starvation during the week, nor have the people suffered physically. Rice was sold at 12 seers on the last Sunday at the Pachumba market. It is being imported from the east. On the 26th, 27th and 28th, good showers of rain fell. The fields have been much benefited by them; dhan, makia, marua and gondlee are being sown. The poor people have finished their store of mohwa. They are now drawing their support from the coal pits; cooked food is issued to the incapable poor, who are unfit for labor; uncooked rice is given to those who do not accept the former on account of caste prejudices.

Sub-inspector Nojeel Khan, in charge of Kharakdiha police station, writes on the 30th May 1874: No deaths from starvation; a large number of the poor have been employed at the great reservoir at Dhanwar; rain has fallen in several places, and the dhan and other bhadio crops have been sown. Nothing else of importance to note.

Sub-inspector Torab Ali, in charge of Gawan police station, writers on the 30th May: On the 23rd May a dreadful hailstorm took place in two villages which lie towards the south of the outpost Satgawan. The hailstones weighed some 3lb and others 4lb ! ! ! They greatly injured the mangoe and the mohwa fruits. The tiled roofs have been considerably damaged; almost all the tiles on them have been smashed. Owing to insufficient food, the people seem to have suffered in physical strength. No crop is due now. Rain fell on 24th to 26th; in several places in the jurisdiction of the police station the people have commenced sowing seeds of dhan, &c., and transplanting murua. Rice market has remained unchanged. It sells at 16 or 17 seers kutcha, or 9 or 9½ seers pucca for the rupee.

Memorandum of information collected during a tour along the Grand Trunk Road and neighbourhood from Burhee to Doomree and back for the first fortnight of May, 1874.

1. *State of the Country.*—The zemindars towards Doomree assembled at various points consider that the mowha crop will afford sufficient subsistence to the poorer classes for the ensuing month at all events, but they anticipate pressure afterwards. There is none, or very little, however, at present.

2. In the neighbourhood of Bugodhur the villagers stand very much in a similar position; if they are not actually better off, they are certainly more independent. A relief road was opened at Bugodhur (the first portion of the road to Giridhi), but seldom more than 50 persons (men, women, and children,) could be found for employment. They could not be induced to attend before 7 A. M., and seldom commenced work before 8 o'clock. They took from 2½ to 3 hours for dinner and sleep, and on one occasion, when they were told each person would receive one pice less because they did not commence work until near 9 o'clock, they all struck work, and marched off to their houses.

3. Between Bugodhur and Burkutta the zemindars assembled, and at the villages visited all expressed themselves hopeful for the future, and certain that at present there was little beyond the ordinary pressure for food amongst the poorer classes.

4. From Burkutta westward the people are somewhat worse off; grain is scarcer; rice, which at Bugodhur is 12 seers, sells at Burhee and Chowparun for 11, and at Koderma for 10 seers, the rupee.

5. The only portion of the sub-division under me where pressure is at present much felt is in that portion to the north of the Grand Trunk Road, which lies parallel with Bugodhur and Chowparun. One relief road is resorted to freely in that part of the country

(that running from Burhee to Koderma), and another road is projected for the relief of people more to the east.

6. *Grain Trade, west.*—There is a steady flow of mowha from the eastward towards Burhee and Chowparun, and also, though to a lesser extent, of murwa. The want towards Koderma is pretty generally known, as the other day I myself met a couple of hundred bullocks crossing the Grand Trunk Road by a jungle path near Bursote laden with murwa *en route* from Chota Nagpore to Koderma.

7. *Estimate of Food-grains.*—I have directed the officers of the relief depôts along the Grand Trunk Road to make a rough estimate of the food-grains passing daily, taking care at one depôt not to record what has already passed another. From this source towards the end of the month a moderately accurate estimate may be formed of the quantity and direction of trade in food-grains passing along the Grand Trunk Road.

8. *Grain Trade, east.*—There is a steady and considerable flow of oil-seeds towards the east; the return carts bring back salt generally, of which condiment the monsoon supply in is now being sent up for storage.

9. The people throughout are hopeful and helpful; ploughing and manuring is going on steadily; where opracticable, bunds are being repaired and strengthened for the coming rains, for which the people are making the ordinary preparations in fencing in fields, repairs to houses, &c.

10. *Gratuitous Relief.*—The recipients are few, and these were very much reduced by the first attempt to introduce some slight labor test, such as the making of chope-rope, with the usual prejudice against anything new. The people at each depôt, nearly one and all, positively refused to accept relief on these terms (several also object to cooked rice); but a few are coming back, and no doubt this forms a pretty fair test of the people's wants: as where there is most pressure for food, as in the neighbourhood of Koderma, not only do they resort freely for employment on the road, but they made no objection to the very slight labor test exacted.

11. *Summary.*—To sum up: the country lying to the north of the Grand Trunk Road is the only portion of my sub-division which at present shows anything like real want, and is the only portion which so far would seem to require Government assistance for seed-grain. There can be little doubt but that as the zemindars become better acquainted with the liberal terms on which this will be advanced by Government, hundreds will take advantage of Government liberality, who are in no real want whatever of such assistance. Until lately no enquiries were made or anxiety evinced by zemindars concerning seed-grain, where, as lately, it is the first subject introduced, and the last relinquished, owing, doubtless, to the desire to get as much as they can of Government rice on the most favorable terms.

No. 16, dated Gawan, the 25th May, 1874.

From—Baboo Doorga Proshad, Manager of the Gawan Estate,
To—The Deputy Commissioner, Hazareebagh.

In obedience to the directions conveyed in your letter No. 66, dated 17th April, 1874, I have the honor to report that the general condition of the people for the current month is not otherwise than that it has been already stated in my report for the previous month, to be good. The tank works are going on as before. The Mauldah ahar has been completed, and that at Chundari is expected soon to be so. The works of the Chinhootea and Brinay ahars, which were so long delayed for the want of laborers, have been commenced from the middle of the month. Upwards of 400 people are daily employed on these works, and instead of daily wages in cash, rice is given to them at the rate of 11 seers to a rupee, as suggested in your letter No. 565 of the 11th instant.

2. On the bazar day more articles of food are now imported for sale than in the last month. The rates at which the food articles were disposed of on the last bazar day, the 20th instant, are as follows:—

	Articles.	Rates.		
		Srs.	Chs.	
1.	Rice, 1st class, at...	9	9	pucca per rupee.
	„ 2nd „ at...	9	14	„ „
	„ 3rd „ at	10	5	„ „
	„ Gobindpori, at...	12	0	„ „
2.	Jenora, at...	12	0	„ „
3.	„ called causha, at	12	9	„ „
4.	Gram, at...	15	9	„ „
5.	Koorthee, at...	14	6	„ „

3. The Baisakhee mowha fell till the end of the first week of this month, and it is now that the season of the wild products, called candi and saray, has arrived. At some of the villages of this and the Gadee of Satgawan, the jothwa crops, such as maukai, murdwa, cheena, cakree, and sugarcane, have been well cultivated where there are water sources. These crops have been, moreover, favored by a heavy shower of rain which fell here on the day before yesterday.

4. I went myself to Satgawan, and made the necessary arrangements for a bhatghurra at Nasirgunge on the 22nd instant. The head constable of that outpost police station has been made to look to this bhatghurra where some 20 or 22 people, who are altogether incapable of work, are fed with rice once a day, at 12 o'clock. A bhatghurra has also been opened from

the 21st instant at Gawan Khas, where 9 or 10 persons of the like nature are similarly provided. But I regret to state that there is no sufficient work for the poor at Satgawan, and consequently they have to suffer to a certain extent. I am going to report this matter to the Sub-Divisional Officer at Pachumba.

5. I have lately received 999 bags of rice from the Relief Committee at Pachumba, and carefully stored them in a house within the compound of the Estate Office. This rice is purchased by the coolies at the Ward's works, and for the pelpless poor, who are fed at the bhatghurras. The quantity of rice noted to be contained in each of the bags, is two maunds, but none of those bags since opened has given the exact quantity. A detailed statement of the diminution of rice in the bags will be submitted to the Committee at Pachumba.

6. According to the rules prescribed by the Committee, I felt the necessity of sending 4 or 5 persons who have been rendered totally useless, or incapable of work, by their severely painful and dangerous ulcers, to the Pachumba hospital; but they are quite unwilling to go there, although they have been often urged to it. This fact has also been reported to the officer named above.

No. 134, dated Chattra, the 30th May, 1874.

From—Baboo Harihar Charan, Extra Assistant Commissioner, Chattra,
To—The Deputy Commissioner, Hazareebagh.

With reference to your letter No. 641, dated the 28th instant, I have the honor to report that the following five Sub-Committees are established under the Sub-Divisional Committee of Chattra :—

1. Chattra.
2. Kanhachatty.
3. Itkhoree.
4. Khunda.
5. Huntergunge.

2. In 1, 2, and 3 Sub-Committees' districts poor-houses are established, where cooked gratuitous food is distributed to persons who are incapable of working, and a list of villages has been given to each member of the circle of every Sub-Committee, who inspects the villages personally, or through his responsible agents, and they keep a diary and send a copy of those diaries to me every Saturday, from which it appears that members attend to their duties with punctuality and care, and where the trace of pressure has been found, and measures of relief have been promptly adopted according to circumstances. They always enquire into the condition of people and crops and supply of grain, and every particular of the villages.

3. Several sorts of light works have been undertaken to afford labor to persons who are incapable of hard labor. Women of good family, who cannot serve out of doors, have been supplied with cotton and some pecuniary advance to return it in thread; and weak people of good family, whose caste feeling precludes them from applying for cooked food, or who from social usages are unable to come upon the relief work, like Brahmins and other castes, have been supplied with rice and dâl uncooked daily; and those who live at a little distance from relief grain-houses have been supplied with rice and dâl at once for 15 days' consumption; and very old women of good family, who have no male adult, have been supplied with rice and dâl daily through village agency.

4. I shall be able to send you a detailed list of the exact number of persons who have been relieved in the several ways under each head, within a week.

5. From the proceedings of the Sub-Committees of Huntergunge and Khunda it appears that there is no necessity to adopt any measure of relief in those places. As for the professional beggars, ordinary private charity is sufficient to support them. Diaries, which are weekly received from each member, show the favorable circumstances of his circle.

6. Proper arrangement has been made for inspection from village to village, and every endeavor is being made by me to obtain information of all the circumstances of my jurisdiction, and measures are promptly adopted when pressure is reported. No death has been caused by starvation.

7. I herewith attach an account of expenditure from the beginning up to 15th May on charitable relief under each head, and accounts up to a later date shall be forwarded with other details within a week.

Extract from the Pachumba Extra Assistant Commissioner's Letter No. 139, *dated* 31*st May*, 1874.

I started again for Dhunwar and the western portion of the district for a period of ten days, and was perpetually in the saddle moving about from village to village and making the most minute enquiries into the state of the people themselves, as well as into their food and seed stocks. For the first few days my attention was particularly devoted to the Government Estate of Kurgalee. I visited almost every village in the estate, and actually went into the majority of the houses of the ryots, and the result of these enquiries was such as to lead me to the firm conclusion that the people had no stock of food except a few maunds of mowha; that this their stock of seed was barely half the quantity required for cultivating purposes; and that they were then rapidly consuming what seed they had. This led me at once, and without reference to you, to make advances of Government grain to the ryots in quantities of about Rs. 2 in value to each ryot, so as to remove the temptation from the ryots of consuming what little seed they had. In this way I disposed of rather more than 100 maunds

of Government rice. From Kurgalee I proceeded to Gadee Morna, and visiting every village *en route* came round *vid* Bernee and Seeranda to Tara, and then on to the Government estate of Doomah.

2. The result of the enquiry has been to assure me that the stocks of seed in the hands of the ryots is very very deficient, and that beyond a few maunds of mowha they have no stock of food to go on with. I never made so detailed and searching an enquiry into the food-supplies of the ryot class in any other year, but my recollection recalls to me instances in which in other years I have found at least two bands of jonar or murwa, or both, containing, say, three kutcha maunds, or in kâts, in the houses of the most ordinary ryots; while this year, in all the houses I visited, I did not see a single band of either grain in any one house. The most I saw were a few pylas reserved for seed in a gurha with the mouth closed up with mud, or else tied up in folds of sâl leaves. Notwithstanding this general deficiency in the stock of food-grain, the actual present physical condition of the people is surprisingly satisfactory; they are not emaciated, they do not look starved, and the proportion who show signs of weakness from short food is wonderfully small. I only came across one case of real emaciation in a lad from Khesmee, who was crawling into Dhunwar bazar as I left it; and in one out-of-the-way village near Surunda I saw two little children who showed undoubted signs of starvation in their faces and bodies. The village children as a rule are fairly nourished.

3. I cannot but think that at this present moment the prospects of the people have advanced materially for the better during the past week. This is owing mainly to the favorable rainfall which has been general during the last ten days, and to the rules now in force for advances for food. Last Monday, which was the first or second day of the *Rohun Nechaltor*, had, I found, been fixed upon in a large number of villages, as a propitious day for sowing by the Brahmins, and on the Saturday and Sunday previous, and on Monday itself, there was general rain, which was much wanted, and sowings of dhan broadcast have been very general throughout the week. Murwa, too, has been sown for seedings, and also a good deal of goondly; ploughing has been going on so briskly that I have been considerably put about for carts for grain despatches, the call for bullocks for the plough being so urgent. This will have the effect of raising the hopes of the people and keeping up their spirits, and will, I doubt not, tend to make the mahajuns more liberal in giving loans of seed-grain to the ryots. The grain advances, for which in Pachumba alone I have received some 300 applications during the last four days, will give the people a stock of food for immediate use, and to some extent make them independent of the mahajun and his exorbitant demands.

4. Prices have not risen very much during the week; the range has been for rice from 13 seers in Khurukdiha, to 12½, 12, and 11½ in Pachumba and Palgunge, to 10½ and 10¼ in Gawan and Ghoranjee, and for other food-supplies as follows:—

Gram	...	...	...	14½ to 11½ seers per rupee.
Makai	...	...	...	15 to 12 „ „
Mowha	...	...	...	1⅔ to 1½ maunds per rupee.

The railway returns show the importation to have been brisker than usual.

					Mds.
Rice imported	...	...	...	...	2,011
Other food	...	...	...	...	2,115

I am afraid, however, that a considerable quantity of this will not come into the market, as it in the main consists of importations by the Bengal Coal Company and the Railway Company, for disposal to their own colliers; such a distribution will, however, relieve the market a great deal, and there is no doubt that the presence of the grain so near Pachumba will have the tendency to keep down the prices in the market here. It is very common to hear the traders express themselves to the effect that the existence of the stores of Government grain in different parts has had that tendency all along. The bazars still continue to be fairly supplied with food. I noticed in my last report the deficiency of supply in Gawan bazar; the report for the week succeeding my report, however, shows that the supply had nearly attained to its normal amount. The last reports from that thana, I would mention, have not been favorable, and there is a cry for work and to open the rice store there. I am impressing on Mr. Parkinson the necessity of moving on to that part at an early date. I propose starting for Gawan myself early this week, to see matters for myself.

5. The Bengabad road, as you are aware, was originally started by me on the 21st April; I made over charge of the road to the Relief Officer, Captain Preston. At that time there were rather over 200 people employed on the road daily. This number gradually increased as the mowha picking ceased, and during the week ending 7th May, there was a mean daily average of 363·7. This rose for the week ending 14th to 728·5. In the meantime I had sent out 50 bags of rice to Bengabad for sale to the laborers, as prices there were rising to 9 seers; the very next day it so happened that Captain Preston ran short of money, and proposed to the laborers to pay them in grain; at this they demurred, but finding objection useless they agreed to take the grain. On Captain Preston representing this to me, and adding that the coolies said they did not want rice but pice, I at once ordered the daily wages system hitherto in force to be stopped, and piece-work to be given at 3 annas per 100 cubic feet. On the 15th and 16th no laborers came to the works; on the 17th some came, and for the three days, 17th, 18th and 19th, the daily average fell to 36, and these were a light-labor gang on daily wages.

6. The total receipts of grain have, as per the memorandum furnished with my last demi-official, been about 29,250 maunds. Of this rather more than 15,000 has been despatched to the Grand Trunk Road, the balance having been distributed over the sub-division. Means of transport are not very readily available, and it is with difficulty I could procure a daily average of 50 carts. This difficulty will increase as the season advances, and the cattle are wanted for the plough. I am therefore making preparations for additional storage room in Pachumba and Giridhi, so that I may be ready to receive the additional allotment sanctioned. My first endeavour, however, will be to send forward rice to the pilgrim road for issue to the Executive Engineer, and my next to store at least 2,000 maunds in the parts to the west and south of Dhunwar, where I expect large calls for advances. I have selected Nowaghur as the most eligible site for a golah, and steps are being taken for the building. The rice is willingly taken by the ryots at the sanctioned rates; but I have to-day come across some bags which have been utterly ruined by salt water, and consist of a hard conglomerated mass of rice, dhan, and mildew.

7. Advances for land improvement have begun to come on me in a perfect flood. This is a great pity, for the season is far advanced, and the time taken in the necessary inquiries and formalities is so much valuable time wasted. The people did not believe in the intentions of Government in this matter, and it was not until they saw one man on whom I had to press the advance actually get the money that they began to believe the intention was a real one; then every one took it into his head to think that he had, or must have, an ahar to make or repair.

Extract from a letter No. 17, *dated the 2nd June* 1874, *from* W. Parry Davis, Esq., *Vice-Chairman, Head-Quarters Sub-Divisional Committee, Hazareebagh.*

Para. 6. Relief measures have been commenced at four places, viz. Hazareebagh, Eachak, Kandwa and Simeria, and though the sub-committees of Gomea, Jhoomra and Mohoodih have been supplied with both rice and money, nothing has been done there up to date, and no reports have yet been received from Jhoomra and Mahoodih. No regular relief operations have been commenced at Mandoo, Ramgurh, Gola, Peterbur and Kusmar for want of rice.

7. Here it is necessary to add that though no gratuitous relief could be given at the last-mentioned places, the works on the roads from Gola to Peterbar and Bishoongurh to Gomea, which are under my charge, as also the road from Ramgurh to Joynuggur under Mr. Pereira, have afforded ample labor to the working class of those quarters.

8. The accompanying statement will show that on an average 61·5 persons were daily fed up to 23rd ultimo at each of the relief centres where poor-houses have already been opened, at a cost of Rs. 190, the operations being limited to the last month only.

9. In some places the cost, in consideration of the few persons fed, would appear rather immoderate. The reason is that this being the first return of the kind, the cost of carriage of grain from Government depôts to the relief centres and other contingencies have been included therein.

10. With regard to the 2nd paragraph of your letter under reply, I beg to inform you that the duties of the sub-committees are, for the present, confined to the feeding of the poor who are destitute of any means and who resort to the poor-house for relief. Instructions will now be issued for searching out and relieving the special cases mentioned by you, but considering the extensive jurisdiction of each sub-committee, I fear the benevolent intention of Government is not likely to be carried out without paid agency, of which we have none in our circle.

11. The general condition of the people throughout the jurisdiction entrusted to this committee is so good that I do not apprehend that there will be any occasion for some time to come to appoint any paid agency.

Dated Koderma, the 31st May 1874.

From—H. M. Tobin, Esq., Assistant Commissioner of Koderma,
To—H. S. Beadon, Esq., Officiating Deputy Commissioner, Hazareebagh.

I have the honor to report, for your information, the measures that have been taken to guard against distress in that part of the district which is under my care, and also the way in which the Government orders for payment of laborers in grain and for piece-work have been carried out.

The relief stations at Koderma, Joynugger and Musnoodee are resorted to only by the wholly infirm or partly infirm, and most of these pay, in some measure, for their support by making ropes from *chope*, which is bought from the relief committee, for the purpose of making out roads. This occupation is so far successful that at Musnoodee, where relief by light labor alone is given, the expenses in relief for the past four weeks have been Rs. 31-2-0, while the income from the manufacture has been Rs. 30-8-0.

The roads in course of construction between Burhee and Gawan, and Joynugger and Koderma, have been quite sufficient to relieve all distress which was found to be existing earlier in the year. Men have already begun to come in for food advances, and they are being given to the applicants on the terms mentioned in your instructions, chiefly on the principle of mutual security. Some zemindars are coming for money advances in order to supply their ryots with

seed-grain. These I am giving, understanding that their case comes within the exception mentioned in paragraph 4 III of the Government letter No. 3369—S.R. Now that the rain has fallen, the Government ryots are coming in great numbers for seed-grain advances, agreeing at last to the terms directed by you to be offered to them. Piece-work has been now regularly introduced on the Joynuggur and Koderma road, which is under my direct management, and no wages in cash have been paid since the 23rd May, when the orders of Government as to grain payment were received and put into immediate execution. The system on which the road-work is now carried on is as follows. There are three sectional sirdars, thoroughly reliable men, having been tested by service in my sight; these men divide the coolies in the morning into bands of 100 (40 diggers and 60 basket laborers), giving each band into the charge of a mate, and marking out to the mate the amount of work his party must do in the day. The mate then has to divide his party in four sections of 25 men each, and allot to each section one-fourth of the work entrusted to him. At evening pay tickets (of 6 pice and 4 pice) are distributed by the sectional sirdar to the coolies in the parties under him, though he has not to do so till the allotted work has been completed.

From 12 to 2 the next day the laborers are collected in lines, and rice, according to the value of the tickets held by them, is distributed by measure. This system will be also introduced on the Markacho road, which will be begun in a few days, as the Joynugger road, as far as the earthwork is concerned, will be complete in three days.

I regret to have to report that the natural supply of rice has failed at Koderma. I have accordingly given orders for the sale of Government rice to the banias of that place at 12 seers per rupee, ready money, bonds being taken from them to sell it at 11 seers to the public.

I am in urgent need of money for advances in cash to the zemindars, and trust that Rs. 2,000 may be at once sent out. A large amount of rice should be stored at Koderma before the rains set in, as much is required for the payment of laborers, food advances, and sale to banias.

I shall be glad to receive the metal tokens which are being constructed in the jail, as some trouble is caused by the use of authenticated paper tickets.

Extract from letter No. 29, dated 1st June 1874, from DARCY MCARTHY, ESQ., *Relief Superintendent.*

3. With regard to paragraph 5 of the Government letter and paragraph 3 of your letter under acknowledgment in my last fortnightly report, dated 30th ultimo, the numbers receiving gratuitous relief are given in paragraph 5 for the three principal relief stations in this sub-division, which I here beg to supplement with fuller details. I would here premise, however, that fortunately distress hitherto has been neither widespread nor biting, consequently the total number relieved is comparatively insignificant.

4. Orders have been issued for the formation of sub-circle committees at Danoon, Charparan, Burhee, Sukroij Beerkotha, Luckeebagh, Bugodhur, Bugrow, Gamo, and Doomree, but nothing worth record has hitherto been elicited. As there is little distress, so there is little to report; and though there may occasionally be found people here and there who are somewhat pinched for food, there is nothing like widespread general distress.

5. The relieving stations already established are Chowparun, Burhee, Koderma, Joynuggur, Musnodee, Burkatta, Bugodhur, and Doomree. Sub-relief stations have also more or less recently been established at Dhanoon, Seekroij and Luckeebagh; these are precautionary measures, intended to provide against the requirements of extended relief, should such become necessary at any future period.

6. The following figures are given from the reports received up to the latest date, but in order to give a general idea of the total number of men relieved during the month of May, deficiencies of data have been supplemented by taking the daily average of the number received for the full month of 31 days.

7. At Koderma there were relieved in May—

	Persons.
Koderma	775
Burhee	587
Bugodhur	465
Joynuggur	253
Doomree	186
Burkatta	155
Chowparun	30
Total ...	2,451

Besides these, occasional relief was given during the month at Luckeebagh, Dhanoon and Murkacho.

Return of Average Number of Coolies employed daily during the month of May, 1874.

Names of Roads.	Number.	Coolies.	Women.	Boys and Girls.	Total.	Remarks.
Shergotty and Balumat	1	918	1,027	405	2,350	9 miles completed.

Total ...	...	.....	.....	.....	12,474	

MEMORANDUM.

701 maunds and 6 seers of grain have been sold to the coolies on the road.

None to the public.

None in charitable relief.

Up to the present time 1,500 laborers have been employed on task-work, but task-work is now being introduced fast on all the roads. This will have to be done gradually, and will take a little time.

The return for June, it is hoped, will show the greatest part of the laborers as doing task-work only.

E. S. B. Pereira,
Engineer to the District Committee.

The 22nd June, 1874.

Statement showing the Average Number of Coolies daily employed on the Road and other Works in the District of Hazareebagh during the month of May, 1874.

Total quantity of Government Grain consumed up to date.					Estimated grain receipts of the ensuing fortnight.	Estimated grain expenditure of the ensuing fortnight.	Remarks.
				By sales to the public or to laborers.	By gratuitous distribution in any shape.	By advances to ryots.	By payments in kind to laborers.	Total.			
		Mds. Srs. Ch.	Mds. Srs. Ch.	Mds. Srs. Ch.	Mds. Srs. Ch.	Mds. Srs. Ch.	Mds. Srs. Ch.	Mds. Srs. Ch.	Mds.	Mds. Srs. Ch.	
Dhanwar	7th May 1874 ...	2,000 0 0	2,000 0 0	292 19 14	7 18 0	.....	.....	299 37 14	2,000	I can honestly give no reliable estimate of expenditure during the ensuing fortnight. It will entirely depend upon the manner in which people come for advances. The work should take about 2,500 maunds where the payments are made entirely in rice, if the numbers of laborers do not fall off. I place 4,000 maunds as the extreme limit of expenditure throughout the district; actually I expect not more than two thousand.

Hazareebagh,

The 6th June 1874.

H. S. BEADON,

Offg. Deputy Commissioner.

No. 948, dated Hazareebagh, the 6th June 1874.

Memo. by—H. S. BEADON, Esq., Officiating Deputy Commissioner, Hazareebagh.

COPY forwarded for the information of the Secretary to the Government of Bengal, Scarcity and Relief Department.

No. 675, dated Hazareebagh, the 6th June 1874.

From—H. S. BEADON, Esq., Officiating Deputy Commissioner, Hazareebagh,
To—The Commissioner of Chota Nagpore.

I HAVE the honor to forward the following supplemental report regarding the relief of distress in this district through the medium of the charitable relief committee. The information is contained in a scattered form throughout my monthly report for May; but I have put the facts together again for easy reference in your office, and in the Secretariat, in accordance with the orders of Government, conveyed in the 5th paragraph of No. 3216—S.R., dated 19th May 1874.

Report on the action taken for the gratuitous relief of the distressed in the Hazareebagh district, for the fortnight ending 31st May.

THE whole district is now divided into four relief sub-divisions:—

1. Hazareebagh.	3. Burhee.
2. Pachumba.	4. Chattra.

In the Sudder sub-division it has, as yet, been found necessary to institute gratuitous relief at Hazareebagh, Semona, Tandwa, and Echak only. Preparations have, however, been made to have relief ready in case of need at Mahoodih, Jhoomra, Goomea, Mandoo, Gola, Ramgurth, Peturbar and Kusmar. At the four first mentioned stations, the numbers applying for relief have been small, their total daily average not having been more than 615. The cost incurred has amounted to Rs. 190, the chief item being the cost of conveyance of grain to the different stations. The operations of the sub-committees have as yet been confined to assisting the poor and destitute who resort to the poor-house for relief.

At Pachumba, in addition to the relief stations mentioned in my last report, new centres have been organised and started at Gawan and Satgawan, under the supervision of the Manager of the Gawan Estate. At Gawan, the daily average of those relieved has been from 9 to 10, while at Satgawan it has been from 20 to 22. I have received no returns or report from Pachumba as to the action of the original relief sub-committees at the several stations for the past fortnight. Mr. Campbell can get no returns, and says that the members of the local sub-committees are becoming apathetic and careless.

In the Burhee sub-division, the imposition of a light labor-test had the effect of causing an immediate reduction in the number relieved at the stations along the Grand Trunk Road, viz., at Doomree, Buggodhur, Burkutta and Burhee. It has not, however, had this effect at Musnoodee, Joynugger, and Koderma, where it has now been acted upon for some time, and where the numbers of those relieved remain continually at the same average. At Musnoodee no absolutely gratuitous relief has as yet been given at all; it did not appear necessary to the Assistant Commissioner to institute it, as almost all who applied were equal to the task of some light work. These laborers are therefore relieved in grain. Besides these stations, there are in the Burhee sub-division, Gujhundee (where no distribution of relief has been yet necessary), Sukrej and Lucheebagh; at the two latter places sub-relief stations have been opened within the last fortnight, and slight relief given from them. Occasional relief has also been given at Dhunoon and Murkutcho.

At Chattra, sub-divisional relief committees have been instituted at—

Chattra.	Kunda.
Kanha Chattee.	Huntergungo.
Etkhouri.	

At the three former stations the distribution of gratuitous relief has been commenced, while at Kunda and Huntergunge it has not been found necessary. In the case of those whose customs prevent them from coming to the poor-house, food and work is supplied in their houses daily; in some cases a fifteen days' supply of food is given at one time. Owing to the accounts not yet having been sent in by the sub-divisional committees, it is impossible to shew in this report the expenses up to date.

No. 26M.A., dated Calcutta, the 4th June 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,
To—The Secretary to the Govt. of Bengal, Scarcity and Relief Department.

IN continuation of my No. 20M.A, dated 20th May 1874, submitting the fortnightly narrative of the Collector of Nuddea, for the fortnight ending 16th May 1874, I have now the honor to submit the Collector's report for the fortnight ending May 31st 1874.

2. I have nothing special to add to what the Collector says under any heading. Relief works, light labor work, and charitable relief are available as fast as there is any demand or necessity, and the condition of the people is carefully watched by both Government officers and relief committees.

No. 609—S.R, dated Kishnaghur, the 1st June 1874.

From—C. C. STEVENS, Esq., Collector of Nuddea,

To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of scarcity for the fortnight ending 31st May 1874.

1. *Abundance or scarcity in the bazar.*—There is sufficient grain in most of the principal marts of this district to meet adequately all local wants. Rice of common and medium qualities is generally procurable. From this general rule must be excepted thanas Kaligunge and Nakasipara in the Sudder sub-division; Tehatta and part of Karimpore in Meherpore, and thana Jaguli in Ranaghat, where it is reported that local supply is not adequate to meet the requisite demand. In Kaligunge and Tehatta, prices have risen considerably, and far beyond a due proportion to the rest of the district. This evidently shows that the stocks are extremely small, and I doubt whether the local trade is doing enough to keep up the local supply Permission has been obtained from Government for me to lend money, in order to stimulate trade. I have abstained as long as possible from using this power, but I believe I shall find it necessary. The stocks which the well-to-do people, and substantial ryots have been keeping, has not been as yet exhausted. Boro dhan, which yielded a tolerable harvest, has done some good to the ryots, but the quantity grown here is very limited. The rubbee crops which have now come into the market, have helped to keep prices steady

2. The adjoined statement will show the kind and prices of food-grains in the several markets:—

		Common rice.	Medium rice.	Kulai	Mug.	Orhar.
		Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.
Bongong	...	2 12	3 8	.....	.....	.....
Ranaghat	...	2 12	3 0	2 10	3 2	2 8
Santipore	...	3 0	3 8	2 8	3 0	2 8
Chagda	...	2 13	3 8	2 4	3 4	2 8
Meherpore	...	3 14	3 2	....	.....	.....
Kooshtea	...	3 4	3 8	2 0	2 8	2 4
Chooadanga	...	2 12	3 8	.....	.....	.....
Kishnaghur	...	3 0	3 10	2 6	2 8	2 6
Alamdanga	...	2 12	3 8	.....	.. ..	.....
Damooda	...	2 12	3 8	... ..	.....	.....
Kaligunge	...	3 8	.....	.....	.....	.....

It appears, then, that the price of common rice is highest in thana Kaligunge, in some parts of which it has gone up to 4 Rs. per maund The price of rice has risen in sub-division Bongong, while in all other sub-divisions it has remained nearly stationary. It is anticipated that the price will continue to rise steadily till the next *aous* harvest is reaped.

3. No additional information has been received as to the stock of grain in hands of private individuals.

4. *State of the crops.*—Jally dhan, which is expected to yield a fair outturn, is the only standing crop nearly approaching maturity. The late opportune showers have been general, and of great benefit to the agricultural class. Aous dhan, which had been largely cultivated and sown is doing very well. I am told that a little of the land which had been prepared has been left unsown for want of seed, and that it has been found necessary in occasional instances to re-sow, as the seed first sown failed to germinate through the drought. The sowing of amun dhan has also commenced. Sugarcane and indigo are doing very well

5. Rain has been abundant in nearly all parts of the district, with the exception of the southern portion of Ranaghat, of Bongong, and in part of Chooadanga; but still more rain is required. From the unsettled state of the weather it is to be hoped that the rains will soon regularly set in. So far the prospects for next season are promising.

6. No special cases of misery or starvation have yet been reported here. The number of grain-thefts reported by the police during the fortnight is eight, which occurred in the following sub-divisions:—Sudder, three; Meherpore, two; Chooadanga, two; and Bongong one. At Alamdanga a case is said to have occurred on the 29th ultimo, in which grain valued at Rs. 160 was looted by a mob. The Deputy Collector, however, does not mention it in his report. I have asked him to give me the particulars.

7. Generally speaking, abkari revenue has not been as yet materially affected by the rise in the price of food-grains. There has been some decrease of revenue in sub-divisions Ranaghat and Kooshtea. In Bongong, Chooadanga, Sudder, and Meherpore, there has been no great fall in excise revenue.

8. *Condition of the People*—Generally speaking, the condition of the people, with the exception of the inhabitants of those parts which have been recognised as distressed tracts, is not bad. As the greater portion of the agricultural classes subsist on paddy lent by the mahajuns, they do not greatly feel the increase in price of the food-grains where the mahajuns have stocks. It is the middle-class people, whose chief possession is their respectability that have begun to feel the distress most; but even they are said to be better off than they were in 1866 at the time. Professional beggars are daily increasing, and private charity has so far relieved them, except the distressed parts

9. *Condition of any Special Tract.*—Cholera, which lately was very prevalent in the distressed tracts, has now disappeared in certain portions of sub-division Meherpore, where it is still raging. The excavation of many of the Government and tuccavee tanks has been finished, and the people are now better off so far as drinking-water is concerned. No serious difficulty has been met with in procuring seeds for aous sowings, which have nearly been completed. Overseer Babu Radhagobind Roy reports that a few plots of ground in thana Kaligunge have not been sown for want of seed. I regret that I have received intelligence that signs of distress have appeared in certain portions of thana Karimpore, in Meherpore. I have requested the new sub-divisional officer of Meherpore to visit the locality. Unfortunately, owing to recent changes, I have lost the advantage of the late sub-divisional officer's experience. In addition to the relief works already commenced in the shape of digging tanks and in repairing and constructing roads, the sub-committees are gradually extending relief operations in the distressed tracts. Paddy-husking and jute-spinning have been introduced. The number of persons on the Government works in the distressed tracts has increased much. Those who are unable to do enough to be put on piece-work are becoming specially numerous, and I think that the time for giving gratuitous relief has now come. I hope to visit the Nakasipara, Kaligunge and Tehatta thanas before I furnish my next report. The next three months will necessarily be a period of much anxiety, for though hitherto the state of the district has been better than was perhaps expected, it must not be forgotten that till the next crops come in, in August and September, we can get no addition to our food-supply.

10. *Relief works.*—The construction and repair of roads are going on in nearly all the sub-divisions, expecting Sudder, where the construction of kucha roads has been put a stop to. The excavation of Government tanks, and of those undertaken by private individuals who have obtained loans from Government are going on well, as a rule, though the exceptions are more numerous than I like to see. The officers are, however, doing their best to stir up the borrowers, and in one instance of conspicuous failure, I have called on a person to show cause why he should not refund the amount borrowed. The late rains temporarily stopped the work of a few tanks but now work is going on again. As the season is far advanced, no fresh loans are now being given. The number of men employed during the week ending Saturday last, on Government tanks is 3,617, and the total number of laborers employed during the fortnight may be roughly estimated at 8,000.

11. *Transport of food.*—Generally speaking, export and import trades appear to have been carried on much as before. In sub-division Ranaghat, some two thousand maunds of rice, and 850 maunds of paddy are said to have been imported. The export has nearly kept pace with the import, being some 1,800 maunds. The export has been made to Hooghly, Goalundo, and Sahebgunge. Dealers from Moorshedabad have continued to export paddy from Meherpore and Chooadanga sub-divisions. The rice exported from Bongong generally passed through sub-divisions Ranaghat and Sudder, to the localities chiefly on the other side of the Hooghly.

12. *Charitable relief.*—The different modes of relief already reported in my previous reports are all being carried on, of the three sorts of relief, viz., cotton-spinning, jute-spinning and paddy-husking. It has been found that paddy-husking is more remunerative than the other two sorts of relief. The number of recipients of such relief is much greater in Tehatta and Kaligunge thanas than in Nakasipara. To the first two thanas nearly Rs. 3,000 has already been sent to carry on the work, but to the last only Rs. 600 has been sent for this purpose. Besides those who are receiving relief in the above shapes, there are more than 1,600 invalids, who are even really unfit for these works, and are being relieved by tank works and roads, and do nothing, or next to nothing but get daily pay. These persons are properly speaking subjects for gratuitous relief, and I hope after visiting the spot, and seeing that the machinery is sufficient for the purpose, to commence gratuitous relief for them. As the sub-committees reports have not yet come in, I regret that I cannot give more details.

		Rs.	As.	P.

Total up to date on account of tuccavee advances ...		1,30,897	10	8

No. 222, dated Julpigoree, the 6th June 1874.

From—Captain R. C. Monky, Deputy Commissioner of Julpigoree,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to submit herewith my fortnightly narrative up to 30th May 1874.

Julpigoree fortnightly narrative up to 30th May 1874.

A.—State of the Country.

It is now necessary that the whole of the Julpigoree district be classed as distressed, the scarcity in the south being the result of bad crops and export; in the north, of export only.

The condition of the two parts of the district is so distinct that they must be considered separately. I will therefore first allude to the state of the district exclusive of that portion of Boda lying south of the new Mackligunge and Atwari feeders.

This part of the district contains north Boda and Boikantpore, the Western Dooars and Patgram.

The estimated outturn of crop in these tracts I put in January last at—

Western Dooars	...	...	...	...	13 annas.
Boikantpore ...	...	...	...	...	12 „
Patgram ...	...	...	...	...	10 „

This rice crop was not all which the people had to depend on in all these tracts; jute is extensively grown in the Dooars and Patgram; tobacco is a large and valuable crop, and in all, vegetables, such as onions, potatoes, &c., are extensively grown. The people are remarkably well off, and there was every reason to hope that distress would not be felt in these tracts.

A source of danger, however, early developed itself, and an export trade on a scale never before known here sprang up. Easily accessible from Kissengunge in Purneah, from Rungpore, Dinagepore, and Darjeeling, traders from all these places poured into this district. These traders were willing to give what appeared to the people of a district where rice is always very cheap fabulous prices, and there began an eager rush to convert rice into money. Cloth merchants who never before thought of grain trade, left their cloth business and started as rice dealers; even pure agriculturists, bitten with the mania, went about from hât to hât buying where they could cheap, and selling to beparies, who were willing to buy at rates always in advance of the local bazar rates.

There was as much emulation among beparies as amongst the people of the district, and they seemed always to be prepared to bid each other out of the field, and thus ran up prices greatly.

Gradually, and surely, rising prices all over the district reached 12 seers per rupee. At this rate they stood pretty firm for some little time, when about the first week in May they began to rise more rapidly, suddenly, towards the middle of the month, running up to 8 seers, and in some places even 7 or 6 seers per rupee. The rise at the last was general and most sudden, at all parts of the district, Titalya, Selligoree, Julpigoree, in the Dooars, and Patgram 8 seers per rupee was the general quotation, while here and there it was still higher. With this rise came reports of distress, and of small supply of rice in the hâts. Everything seemed to indicate that the golahs of the district must be empty. About this time I first heard, while in South Boda, a rumour of some grain-robberies having occurred in the Rungpore district, and uneasiness was expressed by traders who came from Rungpore into the south of Boda to buy grain there. I next heard some rumours of such cases about Meckligunge, and then on the 14th three cases of grain-dacoity occurred on our border at Chusabhunder. From Chusabhunder these offences seemed to sweep up into the Dooars, 25 cases of grain-robbery or golah looting taking place in the Dooars on the 18th, 19th, and 20th. I speak here of the Dooars north and west of Chusabhundur only. A few cases also occurred in the eastern or Bura sub-division portion of the Dooars.

Just at the same time a few cases also occurred in Boda and Boykuntpore.

Suddenly cropping up, simultaneous with the rise in price of rice in all these tracts, and these offences being committed mainly against exporters, it seemed as if the food of the district was exhausted. I took immediate steps to throw parties of police and sowars in all the disturbed tracts; a detachment of the Cooch Behar regiment which was here I used for the same purpose. The Commissioner telegraphed to Buxa for a detachment of the regiment there. I went myself through all those parts where such offences were then being said to be committed, and I made several arrests myself on strength of complaints made to me. The District Superintendent of Police was at once ordered out to investigate different cases, and I am glad to be able to say that, after the 20th, these offences entirely ceased, and the confidence of the people was restored. It was while this was occurring that I wrote to the Commissioner and asked him to apply to Government for one lakh maunds of rice for the district. This he did.

I found on enquiry that these offences were not committed by starving people. Churabhandar, Saptibary, and Bakali are known in the district as the refuges of bad characters from other places; first on the borders of the Cooch Behar independent State, and close to the wilds of the Dooars, these tracts form a convenient habitat for those who may have to bolt at a moment's notice.

The inhabitants of the Western Dooars are an easily excited people. Under the Bhootia rule they were accustomed to the constant commission of such offences as dacoity, grain-thefts, &c., and I believe that what I have described above, commenced by the agency of budmashes, but gathered strength in the Dooars, owing to the nature of the inhabitants and to their being apt for the moment to forget that they now live under British and not under Bhootia rule. The result of the investigations have been, so far, the challaning of 23 cases with 123 prisoners; of these I have, up to 30th May, disposed of five cases, given various sentences ranging from two to five years, and I would take this opportunity of pointing out the urgent need here of a competent full-powered assistant to help me in judicial work, for which my very many other duties at this time leave me but little leisure.

Since writing this, an assistant has been ordered here.

To give confidence to the people in some of the hâts in the Dooars and on this side, I sent Government rice to them, and sold it in small quantities at 10 seers per rupee. The effect of this and of the other steps taken, was most satisfactory. The confidence of the people was rapidly restored, and prices have fallen and are falling all over the north of the district. At Julpigoree itself, rice is now sold from 10 to 11 seers per rupee, in the Dooars from 12 generally to 16 seers in some places, while at Titalya and Sunnaseekatta, it is now 10 and 11 seers per rupee. I have just returned from a rapid tour through the north of the district and the result is most reassuring; I find that notwithstanding all the export, there is still a fair supply of grain in the country, several large jotedars holding quantities such as 10,000 maunds in their golahs. This is dhan, not rice, the latter never being stored here; still though there is this supply, and though alarmed at what they heard of the looting, jotedars who had locked up their dhan have now taken to advancing it to their ryots. I do not believe we can stand further export, and the export trade is in places starting up as vigorous as ever. Last Monday when at Rajgunge hât, I found some 200 or 300 beparies lining the approaches to the hât buying up all the rice as it was being brought in.

Although the state of the north part of the district is thus found to be so much better than we had feared, it is still distressed; that is, there are people in it who need aid; these are Tantis, Haries, and others who are not agriculturists, and in the Dooars the Meches; at Sunnassikatta there is a large Tanti population. I visited them in their baries; they told me they were hardly pressed owing to the high rate of rice, and that they could not now get more than Rs. 5 for cloth they could formerly sell at Rs. 8, and that with rice at 8 seers per rupee they would starve. The day I was there, owing to the appearance of Government rice in the golah at that place, the price in the bazar had fallen to 10 seers per rupee, and the Tantis said at that rate they could get along.

Some of the Meches on the very border of the district under the Bhootan Hills are suffering from the want of rice; this is owing to traders not having gone up to them this year with rice as usual.

I have directed the Mynagoree Thesildar to send up rice to these people, and told off an elephant for this purpose. The Meches will, I believe, gladly buy the rice, but if necessary advances will be made.

Of the 1,00,000 maunds we have applied for this part of the district, the Commissioner has since telegraphed to say we shall need 50,000 only, and of these 20,000 maunds are to be sent to South Boda.

Regarding the state of South Boda I will make no report; the Commissioner has just returned from those parts, and informs me that as his report is going in at once, it is needless for me to say anything on this head.

B.—Relief Works.

Relief works for north of the district are:—

1. The Railway embankment, north of Julpigoree.
2. The Railway feeder between Julpigoree and Titalya; and
3. Railway feeder from Sunnassikatta to the Shikarpore station.

I am unable to give any return of works, as these are only just being commenced.

Relief works in South Boda are as follows, and the table shows the people working on this at latest date:—

Date.	Name of works.	Number of people employed.			Total.
		Men.	Women.	Children.	
30th May ...	Joggernath hât tank	144	28	83	255
30th „ ...	Maolkadaha and Sonahar road ...	240	4	5	247

D.—Transport.

The rice which was purchased by Mr. Bradbury for Cooch Behar, 14,000 maunds, has all been moved into the golahs prepared for it

We are now transporting the late purchases of rice at Goalundo; this is landed at Ghoramara and carted to Boda from that place.

The Government rice is being sent up to Titalya, and carted very rapidly from there to the different golahs.

We are also transporting 10,000 maunds of rice from the Railway golahs to golahs in Boda. The supply of carts is ample; about 1,000 are at present being employed.

Storage.—The following table shows the golah return for South Boda up to 30th May.

E.—Advances.

The Commissioner has advanced 1,000 maunds of rice from the Government store, Durwani, to traders for sale in the hâts of South Boda, at 12 seers per rupee.

The Chuklajat Manager is advancing rice to the ryots in that estate, but returns are not yet received.

F.—Charitable Relief.

In South Boda this is under the Chuklajat Manager's charge; he has appointed relief committees, but no returns have as yet been sent in.

I have appointed two relief committees in the north of the district—one at Sunnassikatta and one at Titalya; they only began work yesterday.

No. 76—S.R., dated Julpigoree, the 3rd June 1874.

From—Sir W. J. Herschel, Bart., Commissioner of the Cooch Behar Division,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

Continuing my narrative of scarcity of the 17th ultimo, I have the honor to report as follows.—

1. The sudden rise in prices that appeared in the nearest part of the Terai, and in North Julpigoree and the Dwars, showed itself also in the hills at Darjeeling, and, as I learn, in Purneah and Rungpore; one cause of it, as given to me by cultivators, was fear lest the bhadoi crop should turn out a failure. This is generally confirmed to me.

2. The extreme rise to 5½ and 6 seers the rupee in South Boda, which I reported in my telegram dated 19th May, was almost certainly caused by this, as the crops there suffered for want of rain, which has since fallen sufficiently and has been succeeded by easier prices, viz., 7 to 7½ seers.

3. The growing sense of insecurity against plunder had, however, much to do with it. Immediately after my last report bringing the great rise to notice, a wide-spread and sudden increase of grain robberies broke out in the Mynagodee Dwars. Byaparis first, then open hâts, and finally mahajans golas, were plundered, and for three days there was something like terrorism in this Dwar. The people who began this were found to be from one spot, round Bakali, which has always been known for its bad character. They used no weapons, and in the attack two of the rioters were killed and others wounded by the goladar's men. Elsewhere no houses were broken. The effect was sufficiently bad to oblige me to call a detachment of fifty sepoys down from Buxa, who marched through Mynagoree to Julpigoree. The alarm of the people was unquestionable, and though the police, under Captain Money's energetic and excellent dispositions, did in a very few days arrest the supposed ringleaders and a large number of rioters, the tone that the latter and their friends adopted was so hot that nothing less than the presence of the military would have sufficed to restore confidence to the property-holding classes and traders. The Dwar plunders were followed in a day or two by the plunder of two hâts, one near Silligoree and one south of the Titalyah road, and a great increase of dacoities and grain robberies in Boda.

4. The absence of a regiment from Julpigoree, where one has so long been stationed, had no doubt something to do with the outburst in the Dwars. A few sowar orderlies posted at the hâts, and the appearance of an European Inspector and some police from Darjeeling at Silligoree, restored confidence on the west in a certain degree. But coming back three days ago from Boda, I found the people at the hâts I passed through eager to know if the sepoys were really coming. The Byaparis, who supply our own hâts in Boda from the north were plainly diffident of ordinary police protection. Rumours of threatened attacks on the Cooch Behar golas were readily listened to in Boda, and I had to reassure the people by sending the Treasury Guard of Cooch Behar sepoys to show themselves at several hâts there.

5. Captain Money and Mr. Renny from Buxa have been about the Dwars, and have fully satisfied themselves that there are sufficient stocks there for all usual needs. I have been almost across the Mynagoree Dwar myself, and agree with them. Mr. Smith has examined the east end of Cooch Behar for the same purpose and is likewise satisfied. Government rice that was sent to several hâts in the Mynagoree Dwar, which had been closed, sold at the end of the day at rates rather dearer than local rates in the early day; this did much to restore confidence by filling the deficiency of the day's supplies. The hâts are all open now and rates there are almost as easy as they were before the panic. They fluctuate a good deal still, but 10 and 11 seers is not far from the average. Relief works were offered in practical form to the Dwars, but the people wholly declined them, and no further measures are now necessary except perhaps among the Meches, to whom food has been sent; result not yet known. The people in the Dwars are in ordinary good condition.

6. Captain Money has just now returned from inspecting the northern part of Julpigoree up to Silligoree and Titalyah. His fortnightly report now being written will be full. I will only say that he finds stocks to be considerable, though not so good by any means as in the Dwars. There is not as yet any sign of physical distress. The rates are decidedly easier than in the panic, and are showing sustained improvement, and I believe that confidence is very generally and completely restored. I do not think there need be the smallest doubt that this is due in the main to the active measures we have taken. Prompt remittances of rice were made by small local purchases or by moving of stocks in the division or by more considerable importations from Purneah, under the orders of Government, to a great many different places, to the extent of some 8,000 or 9,000 maunds. The whole distressed part of the district of Julpigoree was touched in one way or another, at all important points, by such response as the Government could give, whether by laying down food on the spot or by the exhibition of strength, and I must record my appreciation of the rapid and efficient way in which Captain Money did this. I do not believe that measures of mere repression would have worked such a speedy result.

7. The carriage arrangements for the transport of the 50,000 maunds of Purneah rice have been well carried out by Captain Money, and about 15,000 maunds have been received from Purneah at Titalyah, and despatched thence to the several golas, eight or nine in number, in Bykuntpore and North Boda, including the golas at Sanyasikatta and Silligoree, on the Darjeeling road, besides the golas on the line of the railway extension. The rest is rapidly

coming in; owing, however, to the distress which I found existing in Boda, I have diverted 20,000 maunds to that part of Julpigoree where it is likely to be greatly needed.

8. For relief works in North Julpigoree and North Boda, the following have been decided on:—

1*st*.—The railway and its extension to a point about 14 miles north-west of Julpigoree.

2*nd*.—A feeder from the station of Shikarpore to Ambarri Hât, and thence Sanyasi-katta. Shikarpore is about half way between Julpigoree and Silligoree. To this I request sanction. It is recommended by the Deputy Commissioner, and it seems the best that can be devised. Its length is about twelve miles, and the earth-work alone will probably cost Rs. 8,000.

3*rd*.—The straightening and, where possible, the widening of the Titalyah road. This can be done to some extent without interfering with traffic; Mr. Tyndal is preparing a rough estimate of it. The plans are all ready. In anticipation of sanction, I have authorized him to proceed with the work.

9. The Senoke road (from Julpigoree to the entrance of the Teesta valley into the hills) must be abandoned as a relief work, in order not to compete with the railway extension.

10. With reference to this part of the relief programme, I should mention that some doubt exists whether the hill coolies will not flock down and take the work out of the hands of the plainsmen for whom it is intended. As I have no reason to suppose that distress is imminent in the hills, I have requested Major Lindsay not to employ hill coolies till further orders. He has been along the line and informs me that the people appear ready to work.

11. The really alarming rise of prices in South Boda to 5½ and 6 seers the rupee took me down there on the 26th. I found that rates had generally improved under the growing relief operations, both in Boda, and at Durwanee in Rungpore, where Government rice was selling in 10 seers lots to the extent of 400 maunds a day. This had greatly eased the markets near Boda. I met numbers of common folk who had walked twelve miles to buy their allowance, and I learn that they walk much further than this. Our own sales in Boda are on a much smaller scale. Our golas, now nine in number, are situated within five or six miles of each other, and we have been selling hitherto at seven pice a seer, in two seers only at a time; the object being to confine sales to the locality.

12. When I arrived on the 26th, rates in South Boda were generally about seven seers, but in one place near Gorain Hât it was apparently not more than six seers.

13. The condition of the people in South Boda is decidedly worse than when I last saw it in March. Mr. Bradbury, who has been there for the last fortnight, does not consider that there is any severe distress; but my own observations are that there is severe distress over the Debigunge and Sonahar Tokes and a great part of Mulkadaha. In the rest of Mûlkadaha, of which Gosain Hât may be taken as a centre, I saw, after I left Mr. Bradbury's tent, a great many cases of unmistakeable emaciation among children. This is the worst part of the district. In Debigunge and Sonahar I thought the children generally looking out of condition. The stores of grain are few and small in these parts; Mr. Bradbury cannot see what it is that the people live upon, except that they do live. The supplies at the hâts are extremely small, and of imports there is little or nothing to speak of. The large hâts in Rungpore, to the east of Boda, are fairly well supplied, but precariously so, with imports from the Mynagoree Dwar and Cooch Behar; and the large hâts at Sankwa and Saldanga, near the centre of south Boda, are fairly well supplied from local stocks. This is also the case at Chakla Boda, and at the hât marked Pochagur on the map, and at Chilahati, north of Debi-gunge. But south of Sunkwa there is a much greater dearth of rice, and much less hope of imports than I had thought was the case.

14. The relief given is by numerous relief works, and by sales under the Deputy Commissioner and by charitable committees and advances to jotedars, under Mr. Bradbury. Four charitable committees have been started, and eleven more are being formed. But the progress has been very slow. Mr. Bradbury himself is slow to believe in the presence of famine, and his advances to jotedars have been doled out with too much reluctance. Only about 550 maunds have been issued to 450 tenants up to the 25th ultimo. I have impressed upon him the urgency of the case, and have made him an increased assignment of 17,500 maunds from the 26th March, to be issued to jotedars. One difficulty of making advances in this way, on which we have hitherto relied, is that of late years the class of intermediate tenants between the jotedars and the soil, viz., the chukaneedars, has greatly increased. For these the jotedars are very unwilling to accept responsibility. For their own adhaidars (or bhagi cultivators) the jotedars generally answer, and any aid given to the former helps the latter. But the chukaneedar is in an unhappy position. He has agreed to pay in cash instead of kind, and the jotedar gives him no aid. I found near Gosain Hât that these men formed a large part of the population, and it was essential to relieve them as agriculturists. I accordingly assigned a further quantity of 9,000 maunds to this purpose, and deputed the Naib of Boda to see to the distribution of it among the most needy chukaneedars by way of advance, beginning at Gosain Hât. But the great absence of imports into south Boda shows that a considerable increase in our sales must be made. I have raised the quantity which may be sold to one person to four seers instead of two, and have reduced the price to six pice per seer, *i.e.*, 10⅔ of clean rice per rupee. This is the rate at which rice is sold on the relief works, and by having uniform rules

at the golas and in the works, temptations to personation of coolies is prevented. To avoid misunderstanding, I must mention that some golas adjoin the relief works. Where this is not the case, rice is sold on the works. Sales are now going on at all the golas in south Boda; a maximum of 20 maunds a day, however, being fixed. I have not the exact figures before me, which will appear in the Deputy Commissioner's report; but I estimate the sales on the whole at about 100 maunds a day. I have ordered the opening of a new gola near Gosain Hât. The reduction of price and increase of allowance to each person will, I trust, give great relief.

15. The relief works at present going on are nearly exhausted; but several others are ready, and I have asked the Deputy Commissioner to open immediately one which will run through the length of the worst part round Gosain Hât. Those that I inspected seemed fairly well managed, considering the great want of supervision and the raw material with which the Deputy Commissioner has hitherto had to contend. Fortunately the works are all small and scattered, so that the men have never got into masses. The villagers complained that two seers a day was not enough for many of their families, and as they can earn more than that in wages at our present very reasonable rates of pay, four annas per 100 cubic feet, I have increased it to four seers. I had hoped that the advances to cultivators would have sufficed to meet their needs, and that the relief works might be managed on strict subsistence principles, *i.e.*, without allowing them to become to any class an attraction; and two seers was fixed as the maximum in order to effect this. They are certainly not an attraction, as there has never been any rush at any of them; and as the advances to cultivators are not so forward as I wished, I have made the rule more liberal to the extent above mentioned.

16. All relief work is done on the task system, except dressings and slopings, or where the ground is too broken to measure.

17. The men at work are almost all in normal condition, but they include many who from their physique would not generally be seen at contract work. They are none of them so weak as to call for a separation of classes, and in few cases only did I notice any that looked in worse than ordinary condition, considering their age and their marks of habitual hard livelihood.

18. With the increased sales, increased advances, the extension of charitable relief, and the continuance of the present supply of work, I hope that we shall come through well. I have no doubt on this except as to the Gosain Hât part, where emaciation has commenced.

ENCLOSURE No. TO THE 19TH SPECIAL NARRATIVE.

Return of Men, Women, and Children employed on Relief Works in Districts of Rajshahye, Patna, and Bhagulpore Divisions for fortnight ending 7th June 1874.

Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 13th June 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Division. 1	Burdwan, 15th* June 1874	1·11	Rain has fallen in all the sub-divisions except Cutwa and Jehanabad. The fall at Culna has been 3·32 inches. Sowings of paddy are going on all over the district, and in some places the seedlings are well above ground. Cholera abating. Fever as before.
2	Bankoora, 13th „ „	0·75	Partial showers throughout the district; weather cool. Agricultural operations going on well. Aous or early rice seedlings flourishing. Cholera and small-pox considerably abated.
3	Beerbhoom, 13th „ „	1·48	Cool and showery. Prospects good all round so far. Export of week ending 6th June, 4,806½ maunds, chiefly to the Bhagulpore Division. Prices almost stationary with downward tendency.
4	Midnapore, 13th „ „	0·35	Rain has fallen more copiously in the south of the district; nearly three inches at Contai, and nearly three at Tumlook, but none at Gurbetta, and very little in the north. Weather is however cool. There are very few places now in which the cultivators have not been able to plough, and the aous or early rice is doing pretty well. Prices have risen in ten out of twenty-five thanas, remaining stationary in the rest. The town is still suffering from cholera, with an average of five seizures daily.
5	Hooghly, 13th „ „	1·	Cloudy and sunshine alternately. Rain fell on the 9th, 11th, and 12th June. Wind from south and south-east. In Serampore several showers of rain fell. Showers have fallen at different places all over the district. The sowing of the aous or early, and amun or late, rice seedlings is going on.
	Howrah, 13th „ „	1·44	There was more or less rain throughout the district during the week, except in Jugutbullubpore, where it is reported there was hardly any rain. Weather sultry and at times cloudy; winds generally from the south. The late rain has been of great benefit generally throughout the district. The amun or late paddy seedlings have been sown The aous or early paddy and jute have also been sown, and are doing well. Everywhere the ryots are ploughing land for transplanting the late rice. The young sugarcane plants are reviving. More rain, however, wanted, especially at Jugutbullubpore and a portion of Domjoor, where the rain has not been so plentiful as in other parts of the district.
	Central Districts.		
Presidency Division. 6	24-Pergunnahs, 15th† June 1874.	1·34	Showery; hot in the intervals. The prospects of the early rice crop are good, though more rain is still wanted in places The sowing of the amun or late rice in nurseries has commenced in Diamond Harbour, and in some places the seed has already germinated. Cholera is prevalent in parts of the Sultanpore thana, but has abated in Baduria. Fever in Barripore is reported on the decrease.
7	Nuddea, 13th June 1874	1·43	Occasional rain. Everything is most promising. The rain appears to fall just as it is required. There is a little deficiency in seed for the late rice crops; measures are being taken to supply this through zemindars. Public health good.
8	Jessore, 13th „ „	2·69	Cloudy, with occasional showers mostly about noon. No change since last week. The early rice has been mostly sown, and the crops, though late, promise well. Prices after the rise in the two preceding weeks have since fluctuated a little, but without further material rise or fall.
Rajshahye Division. 9	Moorshedabad, 13th „ „	2·42	A heavy rainfall and thunder-storm on the night of the 11th June; cool for this period of the year. The crops are looking well, and have been much benefited by the rain. Prices show no change since last report, excepting a slight improvement in the Sudder Bazar. Cholera and small-pox decreasing.
10	Dinagepore, 12th „ „	2·58	Rain throughout the district. The weather has been most seasonable and all that could be desired for the bhadoi or early and jute crops. Lands are everywhere being broken up for the winter crop, and seed sown in seed-beds.
11	Maldah, 13th „ „	0·80	Cloudy and rainy. The prospects of the bhadoi or early crops are very good Cultivation for the hymunty or winter crops has begun. The price of rice is 11½ seers per rupee of the coarse sort and 9½ of the best sort.

* Telegram of the 15th June, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 15th June, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)			
	Central Districts—(*Contd.*)		
RAJSHAHYE DIVN.—(*Contd.*) 12	Rajshahye, 13th June 1874.	1·62	All parts of the district except the south-western quarters have had rains during the week. The coming aous or early rice crop is reported to be in excellent order, and to have benefited largely by the recent rain. The amun or late rice, which has been within the last fifteen days sown on high spots, has come up freely, and is growing well. There have been extensive sowings of both the early and late rice since the rain has begun to fall steadily. The teel (oil-seed) is now very nearly all off the ground and has been an abundant crop. Oil is considerably cheaper than it was last year. Jute in the north of the district has failed to a partial extent, and in some places fresh sowings of it are being made. Mangoes are plentiful and cheap, and are of much assistance to the people as a food article. Prices are high, and in some places have risen since last report, especially in those not easily accessible to importation. A very few cases of cholera and small-pox are now reported.
13	Rungpore, 12th June 1874	0·35	More rain has fallen to the east and south; the fall has been very general. All crops have progressed very much. Millets are in the markets in great quantity, and early rice in many parts. The sowing and planting out of the late rice is being vigorously proceeded with.
14	Bogra, 13th „ „	5·56	Seasonable. The aous or early rice crop looks excellent. A good crop of boro rice has just been reaped. The ploughing for the amun or late rice has begun. The rains have set in seasonably.
15	Pubna, 13th „ „	1·10	Weather generally dry. Slight showers of rain every other day, which have been most favorable to the growing crops. The teel (oil-seed) crop is nearly all cut. It is an average crop. Jally paddy has nearly been all cut The early aous is looking very well, and will be cut early in July. The kowni (millet) crop promises well. Harvesting will commence at the end of the month.
16	Darjeeling, 12th „ „	8·94	A good deal of rain throughout the district, which is every way beneficial. The indian-corn and murwa (millets) in the hills promise a good outturn. Bhadoi or early paddy in the plains is doing well. The minor crops too, kowni (millet) and pát (jute) cultivation are progressing favorably.
17	Julpigoree, 12th „ „	4·88	7th and 8th June fine; a good deal of rain during the rest of the week, with bright sun intervening The bhadoi or early crop is promising well. Hymunty or winter crop seed is being sown and looks well. Jute is growing up fast. The prospects of all the crops could not be better than they are.
	Cooch Behar, 11th „ „	4·12	Rain on several days. Favorable. No change since last week
	Eastern Districts.		
18	Dacca, 15th* June 1874	0·41	Weather hot, with occasional showers. State of crops very good. Early aous rice (early) in Bekrampore begun to be cut.
19	Furreedpore, 13th „ „	2·57	Rain every day since last Monday; the quantity which fell each day, not being heavy, has benefited the crops considerably. The prospects of the rice crops are as yet most favorable, and the weather is all that could be desired for the growing paddy. The rivers have fallen considerably. The price of coarse rice has risen only at Gopalgunge owing to a steady decrease in importations. It is stationary at Furreedpore, Goalundo, Bhanga, and Madareepore. The Collector cannot account why it should continue so long steadily at 11 seers at Madareepore when it is 11½ at Bhanga, 12 at Furreedpore and Goalundo, and 13½ at Gopalgunge. Madareepore is on the high road for transit of grain from east to west; and, as a rule, rice is cheaper there than at Furreedpore. Inquiries are being made.
20	Backergunge, 11th June 1874.	2·05	Cool and pleasant; the rains appear to have commenced. The phenomena known as Burrisal guns is of frequent occurrence. The aous or early rice crop will be a poor one, but the crop is not of much importance in this district. Weather favorable for the amun or late rice sowings.
21	Mymensingh, 12th June 1874.	5·95	Rain every day of the week in the Sudder Station, and plentiful rain in the eastern pergunnahs; but in the west of the district the weather has been sultry, with very little rain, only 0·3 being reported from Attia Sub-division, and 0·78 from Jamalpore. The state and propects of the crops are all that could be wished in the centre and east of the district; in the west more rain is wanted. The river has fallen very much. Health of the district good.
22	Sylhet, 9th June 1874	0·29	A fair amount of rain has fallen since the night of the 8th June, which will do much good. The sky is overcast, and more rain may be expected. Nothing of importance since last Saturday. The rain will be very acceptable to the ryots on the high lands.

* Telegram of the 15th June, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)			
	Eastern Districts—(*Contd.*)		
CHITTAGONG DIVN. 23	Chittagong, 11th June 1874.	6·99	Hot, with frequent falls of rain. The weather has been most favorable to the young paddy. Cholera continues to abate. No return from Cox's Bazar.
CHITTAGONG DIVN. 24	Noakholly, 11th June 1874.	1·39	Slight showers during the week. Days warm. Aous or early rice sowing completed, and young plants looking well.
CHITTAGONG DIVN. 25	Tipperah, 12th June 1874	2·53	Weather changeable; some rain and storms alternately, with still hot weather. The prospects of the future rice crops of all sorts are good. Present prices, however, have risen owing to exportation.
CHITTAGONG DIVN. 26	Chittagong Hill Tracts, 6th June 1874.	3·71	Cloudy, with occasional fall of rain. The seeds already sown have germinated. Occasional falls of rain have improved the prospects of the crops on the ground. The flat lands are being ploughed.
CHITTAGONG DIVN.	Hill Tipperah, 6th June 1874.	·13	Very little rain at head-quarters, but plenty all round about. Thunder-storms passed within sight almost every day. Young paddy looking well. Nothing particular to report.
BEHAR.			
PATNA DIVISION. 27	Patna, 15th[a] June 1874	1·76	Weather all that could be desired for agricultural purposes, with slight rain almost every day. Ploughing and sowing going on everywhere. Health of the district good.
PATNA DIVISION. 28	Gya, 13th „ „	2·37	Seasonable. The rains have regularly set in three weeks earlier than usual. Agriculturists are actively engaged in ploughing and sowing bhadoi (early) and paddy crops. No agriculturist at this season is unemployed.
PATNA DIVISION. 29	Shahabad, 13th „ „	0·30	Rain has been general in the district; very heavy at Arrah. Weather unsettled and threatening. During the last six days sowings have not been carried on everywhere owing to a superstitious custom of not sowing during the first eight days of the *Mirigda Nochatra*. Before that in many places, "sawan" (grass-seeds) and "murwa" (millet), paddy and "dhoorya baug" or seed beds were sown during *Ronni Nochatra*. From Monday next, the 15th instant, the bhadoi or early sowings will be carried on everywhere, the late rain being most beneficial for the purpose. Sugarcane and indigo on the ground are promising. Small-pox still in parts of the district.
PATNA DIVISION. 30	Tirhoot, 13th „ „	0·05	Weather close and sultry, east wind prevailing, and cloudy. Mudhoobunnee Sub-division—2·6 inches of rain fell throughout the sub-division. Sowings of paddy and bhadoi or early crops are going on briskly; in some places paddy crop has already germinated, and is doing well; the prospects of indigo are improving owing to the recent showers. No more rain wanted at present. *Durbhunga Sub-division.*—One inch of rain has fallen all over the sub-division, and thunder constantly threatening heavy rain. Great portion of higher lands have been ploughed, and a large quantity of bhadoi or early crop seeds sown. In the eastern parts of the sub-division paddy has been sown and looks well. It is reported that this year lands have been under bhadoi crops that ordinarily produce rice. *Seetamurhee Sub-division.*—0·94 inch of rain fell over the sub-division, and has been most favorable to crops on the ground. It is reported that crops are coming on well, and that the prospects are good. *Hajeepore Sub-division.*—0·27 inch of rain fell; a heavy fall of rain about Sangha which must benefit the crops. No report has been received from Tajpore Sub-division. The rain that fell in the Sudder sub-division has done much good to the early crops which have germinated, and has enabled the cultivators to prepare the high lands for paddy sowing. *Telegram of the 15th.*—Police report 7 inches of rain at Lallgunge on 8th very local; from two to three inches in surrounding country; all tanks and chouls filled. Bhagmutty risen very much. Gunduk rising
PATNA DIVISION. 31	Sarun, 13th „ „	1·12	Cloudy, easterly winds. Rain more or less general throughout the district, and has been of very great benefit to the crops and to agricultural operations. The ryots are engaged in preparing their lands for the next sowings. The bhadoi or early crops and the aghanee or late rice are now being sown. The early sowings are coming on well. Cheena (millet) is being harvested; mango ripening. The cultivating season has opened favorably, and the prospects at present are all that could be desired. Prices of barley, jowar (great millet), and cheena (lesser millet) have slightly fallen.
PATNA DIVISION. 32	Chumparun, 12th „ „	12·80	Seasonable. More rain has fallen (on 8th, 9th, and 10th June). Agricultural operations are going on briskly, and the prospects so far are unusually good.

[a] Telegram of the 15th June, received on the same day, shows rainfall during the seven days immediately preceding

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
Bhagulpore Divn.	33	Monghyr, 13th June 1874	4·07	Cloudy, and frequent rain general all over the district. Rain has fallen plentifully Ploughing and sowing going on vigorously. Season favorable so far.
	34	Bhagulpore, 15th* „ „	2·64	Total rain, since 1st June, 6·63 At Banka, since 7th, 3·40. About 14 inches all over north Soopool, since 1st; 6 inches fell in three hours on 13th; the same quantity fell on same day at Sonebursa in Muddehpoora. The crops are magnificent; prospects could not be better. General health very good.
	35	Purneah, 13th „ „	0·84	Cloudy and showery; rain very partial. More rain is still wanted in the south for the early jully rice and for the bhadoi or early crops. In the north the transplanting of the aghanee or late rice has commenced. The jamira, very early rice, is in ear in Kishengunge, where the jute is coming on well. Prospects generally very good. No more rain is wanted at present in Arrareah.
	36	Sonthal Pergunnahs, 13th June 1874.	·45	Clouds gathering and dispersing Heavy shower of rain on Monday, the 8th instant, reported from Rajmehal. Wind variable still; good showers of rain all over the district. Ploughing and sowing going on everywhere. The prospects of the crops are favorable. Indigo in the Rajmehal dearas promises well. A few cases of cholera reported from Bario; no fresh cases brought to notice.
ORISSA.				
Orissa Division.	37	Cuttack, 15th* June 1874	2·18	Weather favorable to the crops; sowing progressing satisfactorily. Crops which have been sown are coming up well. Public health generally good. Prices of food-grains stationary.
	38	Pooree, 10th „ „	·86	Hot, sultry, and cloudy, with occasional slight rain in some places. Cotton is being gathered with a fair outturn. Mangoes are nearly over. Sowing of paddy is being slowly made generally on low lands. More rain is required and expected. Sugarcane is doing well. Exports of rice continue on a moderate scale, and prices are almost stationary. Public health is good.
	39	Balasore, 12th „ „	·67	Showery and temperate Tolerably copious showers of rain have fallen in most parts of the district, and ploughing, manuring, and sowing are progressing vigorously. The earliest rice crop is above the ground. Cholera apparently reached its maximum during the week under report, and is now on the decline.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 12th June 1874.	2·83	Rain more or less has fallen every day during the past week; still cloudy and warm. Ploughing going on vigorously in all parts of the district. Prices stationary.
	41	Lohardugga, 13th June 1874.	·50	Weather seasonable. The prospects at present are very favorable. Sowing is still going on actively, and the crops which have been sown have germinated well. In Palamow, too, everything promises well, and a very large number of the laborers have deserted the relief works. Jungle fruits and *sagh* vegetables are in great abundance this year Small-pox still prevalent, but the general health is very good. Prices have fallen slightly.
	42	Singbhoom, 12th June 1874.	3·24	Cloudy. Very heavy rain all over the district as much as required for the present The early crops on high lands for the most part sown and sprouted. The young paddy looking well and vigorous.
	43	Manbhoom, 13th June 1874.	2·84	Showery and cool. Rain has continued to fall during the whole week, which has enabled the cultivators to plough up their lands and sow gora paddy, gundili, indian-corn, and also the seed paddy for transplanting later in the season. There are some complaints of want of seed, but they are not numerous, and very little, if any, land will probably be left unsown for want of it. Agricultural prospects are now very good; in fact, could hardly be better. Cholera decreasing.

* Telegram of the 15th June, received on the same day, shows rainfall during the seven days immediately preceding

Published for general information.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUTENANT-GOVERNOR OF BENGAL.

REVENUE AND GENERAL DEPARTMENTS.

No. 1862C.S.

GENERAL.—*The 11th June* 1874.—Baboo Kali Kumar Dhur is appointed to be Relief Superintendent for the relief circle at Serajgunj, in the Pubna district.

The following gentlemen are appointed to be Assistant Relief Superintendents for the relief circle at Serajgunj, in the Pubna district:—

Moonshee Kofilooddin.
Baboo Muthoora Nath Bhuttacharjee.
Baboo Ram Chunder Bhoomic.
,, Kristo Chunder Chuckerbutty.

Mr. Frederick Jones, Senior Superintendent of Survey, and Major J. Sconce, Deputy Superintendent of Revenue Survey, are vested with the powers of an Assistant to the Superintendent of the Cuttack Tributary Mehals, for such time as they may be employed in demarcating the boundary of that portion of the Tributary State of Mohurbhunj which adjoins the southern part of the Midnapore Jungle Mehals.

The 15th June 1874.—Baboo Kali Prossunno Sircar, Deputy Magistrate and Deputy Collector, on special duty in Chumparun, is allowed leave of absence for two months, under Section 3, Supplement F of the Civil Leave Code, with effect from the date on which he availed himself of it.

Baboo Hurry Mohun Chunder, Sub-Deputy Collector, is appointed to be a Special Deputy Collector in Dinagepore, with effect from the 1st January 1874.

The services of Captain Arthur Conolly, of the 5th Punjab Infantry, now employed on relief work in Bhagulpore, are replaced at the disposal of the Government of India in the Military Department.

The 16th June 1874.—Baboo Joy Gopal Banerjee, a Tehsildar from the North-Western Provinces, is posted to the sub-division of Aurungabad, in Gya.

The 17th June 1874.—Baboo Prosonno Kumar Roy is appointed to be Relief Officer of the Halera Circle, in the District of Dinagepore.

The 18th June 1874.—Baboo Gourdass Bysack, Deputy Magistrate and Deputy Collector of Jehanabad, is vested with the powers of a Collector under Act X of 1870, for the purpose of acquiring land required for the site of a Charitable Dispensary in the village of Kristopore, pergunnah and thana Jehanabad.

The 19th June 1874.—The Hon'ble Vernon Hugh Schalch, Member of the Board of Revenue, is allowed leave for three months, under Section 21, Chapter VI of the Civil Leave Code, from the 15th July 1874.

The 23rd June 1874.—During Mr. Schalch's absence, or until further orders, the Hon'ble Henry Lucius Dampier will, with the approval of the Government of India, act as a Member of the Board of Revenue.

Mr. Herbert John Reynolds, B.A., Magistrate and Collector of Mymensingh, is appointed to act as a Secretary to the Government of Bengal during the absence on duty of Mr. H. L. Dampier, or until further orders.

Mr. Roger Henry Pawsey is appointed to act as Magistrate and Collector of Mymensingh during the absence on duty of Mr. Reynolds, or until further orders.

The 19th June 1874.—Lieutenant Lewis Archibald Charles Cook, of the 5th Bengal Cavalry, at present employed on transport duty, is appointed to do famine relief work in the Bhagulpore Division.

The 20th June 1874.—Baboo Heraloll Mookerjee, Deputy Magistrate and Deputy Collector, Purneah, is allowed leave of absence for four months, under Section 3, Supplement F of the Civil Leave Code, with effect from the 11th April 1874.

The 21st June 1874.—Captain R. H. Grant, Assistant Quarter-Master-General, now on transport duty at Barrakur, is transferred to the Rajshahye Division, where he will have command of the reserve flotilla of steamers and boats under the orders of the Commissioner of the division.

The 23rd June 1874.—Mr. Charles Augustus Skipwith Bedford, Extra Assistant Commissioner, reported his departure from India on leave on the 3rd instant.

Mr. Christopher Henry Vowell, Acting Joint-Magistrate and Deputy Collector, Shahabad, is allowed leave for one month, under Section 10 (*a*) of the Civil Leave Code, in extension of the leave granted to him under orders of the 26th May 1874.

Mr. Ernest Montagu Money, Assistant Magistrate and Collector, is appointed to have charge of the sub-division of Jamooee, in Monghyr.

REGISTRATION.—*The 23rd June* 1874.—Mr. Walter Rattray, Special Sub-Registrar of Gya, is allowed leave for two months and ten days, under Section 3, Supplement F of the Civil Leave Code.

EDUCATION.—*The 23rd June* 1874.—The following gentlemen are appointed to be members of the District School Committee of Purneah, viz.—

Captain W. L. N. Knyvett, District Superintendent of Police.
Baboo Bishen Chand, Manager, Roy Luchmiput's Bank.
„ Nanuk Prosaud, Pleader.
„ Har Nundun Sahay, ditto.

MEDICAL.—*The 16th June* 1874.—Apothecary Class Native Doctor Peary Lall Sen, lately attached to the Dispensary at Pandua, in the Manbhoom District, is dismissed from the public service.

The 19th June 1874.—Surgeon William Henry Gregg, M.B., is appointed to have civil medical charge of Burdwan during the absence on special duty of Dr. J. G. French, or until further orders.

The 20th June 1874.—Dr. J. M. Comley is appointed to be a member of the Committee for the management of the Howrah General Hospital.

The 23rd June 1874.—Third Grade Assistant Surgeon Bholanath Pal, in charge of the Charitable Dispensary at Nowkhilla, in Bogra, is allowed leave for three months, under Section 3, Supplement F of the Civil Leave Code.

Third Grade Assistant Surgeon Behary Lal Pal, a Supernumerary at the Presidency, is appointed to have charge of the Charitable Dispensary at Nowkhilla, in Bogra, during Assistant Surgeon Bholanath Pal's absence, or until further orders.

EMIGRATION.—*The 17th June* 1874.—Mr. R. S. Mitchell having been appointed by the Colonial Government to be Emigration Agent for Trinidad, the Lieutenant-Governor is pleased, under Section 4 of Act VII of 1871, to approve of the appointment. Mr. Mitchell reported his arrival at Calcutta on the 6th June 1874.

ROAD CESS.—*The 20th June* 1874.—The following gentlemen are appointed to be members of the District Road Cess Committee of Balasore:—

Baboo Boroda Kant Mozoomdar, Deputy Collector.
Baikunto Nath De, Zemindar.

The 23rd June 1874.—Mr. Henry Pilkington Mulock, c.s., is appointed to be Vice-Chairman of the District Road Cess Committee of Purneah, *vice* Mr. F. Wyer, who has left the district.

LOCAL FUNDS.—*The 22nd June* 1874.—Baboo Ram Prosad Dass, Zemindar is appointed to be a member of the District Road Committee of Monghyr, *vice* Moulvie Shah Hossein Ally, resigned.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

RESOLUTION.

GENERAL DEPARTMENT.

MARINE No. 2061.

Calcutta, the 22nd June 1874.

READ—

Correspondence regarding the reduction of the Pilot Service.

1. The scheme, as originally described, provided for bringing about ten retirements among Service Pilots, and thirty among Licensed Pilots; but in fact so many are not required. The object is to bring the number of Running Pilots down to seventy. For the last year or two the vacancies which have occurred have not been filled up, and when the first retirement on bonus took place, the number of Pilots was in excess of seventy by thirty-one only. Fourteen Pilots have already been permitted to retire on bonus. The same permission is now granted to the following Pilots, who have submitted applications:—

Branch Pilots.

	£	
Mr. C. W. Warden on a bonus of ...	1,400	(including compensation for privileges.)
Mr. Lord	1,000	

Mate.

Mr. R. Hand	1,120	

Licensed Mate.

Mr. Hyndman	600	

2. In addition to the above, the Lieutenant-Governor considers it to be necessary for the public interests that the following Pilots should be required to retire from the service, or to give up their licenses; the bonus to which each is entitled under the scheme will be paid him:—

Service Pilots.

	£
Mr. T. Black	1,200
Mr. H. Halden	1,200

Licensed Pilots.

Mr. J. Thomas	650
Mr. D. F. Mauger	800
Mr. W. Thompson	550

3. The retirements will take effect from the 1st of July 1874, or from any previous date on which the Pilots named may wish to retire.

4. Mr. Jones has applied to retire if the mode of grading service and Licensed Pilots indicated in paragraph 5, clause 6, of this Government Resolution of the 12th February 1874, according to the date of entering service, be carried out. Many memorials on the subject have been received, and the Lieutenant-Governor is pleased to reserve Mr. Jones's application to retire for decision after the question is finally settled.

5. The following list shows the names of the Pilots who have been permitted, or required, to retire under the scheme, with the cost of each retirement.

Names.	Amount of bonus	
Branch Pilots.		
	£	
G. Collins	1,400	
W. J. Stone	1,000	
G. Noaks	1,400	
H. A. Merrett...	1,000	(Equivalent of extra pension which he elected to take instead of bonus)
B. K. Revett	1,000	
W. H. Fielder...	1,400	
G. Lord	1,000	
C. W. Warden...	1,400	
Total ...	9,600	

Names.		Amount of bonus.
	Master Pilots	£.
H. D. Fletcher		1,500
T. Black		1,200
H. Halden		1,200
	Total ...	3,900
	Mate Pilots.	
R. G. Hand		1,040
A. M. Merriott		1,500
A. A. Madden		1,120
	Total ...	3,660
	Licensed Masters.	
F. Hyndman		600
J. Thomas		650
D. F. Mauger		800
W. Thompson...		550
J. Ewert		550
A. S. Ritchie		275
	Total ...	3,425
	Licensed Mates.	
R. Scott		450
A. Templeton		450
C. Williams		400
	Total ...	1,300
	Grand total ...	21,885

6. To this must be added £600, the amount of Mr. Jones's bonus if he should retire, making a total of £22,485. The total expenditure sanctioned by the Government of India was £23,000. The difference, £515, must be kept in hand to meet any additional payments which it may be necessary to make on claims which have been advanced in certain cases by Pilots who have been permitted to take the bonus.

7. With reference to the limit which has been put on the expenditure under the scheme, the Lieutenant-Governor has not been able to accede to the applications of all who applied to retire on bonus.

Mr C. B. Ransom | Mr. R. Long.
„ O. H. Bonaley. | „ R. Scott.

8. The four officers named on the margin wished to retire on the pension and bonus of Branch Pilots, but they were not Branches before retirements under this scheme began, and owe their promotion to the Branch Grade to such retirements only. But no more retirements on Branches' terms can be allowed for financial reasons, which also compel His Honor to decline the offers of Messrs. Sealy, Bowden, Hart, and Bellew.

9. Mr. Curtis has been on leave for the last three years, and is understood to have adopted another profession. The Officiating Master-Attendant is requested to inform Mr. Curtis that no bonus can be given to him, and that no further leave can be allowed. The leave already granted him has been much too long.

10. When these 24 retirements have taken place, the number of Service and Licensed Pilots, respectively, which remain on the list, will be 54 and 23. The reduction to 70 must be made by not filling up vacancies as they occur in ordinary course.

11. The number of Pilots having been thus diminished, the Officiating Master-Attendant should, without delay, submit definite proposals for reducing the number of vessels employed as Pilot Brigs.

Ordered that copy of this Resolution be forwarded to the Accountant-General for information; and to the Master-Attendant for his guidance, and for

communication to the Pilots concerned, and to the body of Pilots. Orders on the points of the scheme, such as the grading of the Pilots and the readjustment of the percentage of fees allowed to Pilots, will be issued as soon as possible.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Dated Calcutta, the 16th June 1874.

READ—

A letter from the Commissioner of Burdwan, No. 83—S R., dated the 2nd June, with enclosure.

The Lieutenant-Governor has read with much satisfaction a report received from the Commissioner of Burdwan, regarding the extensive measures of charitable relief undertaken and maintained by Baboo Ram Runjun Chuckerbutty, zemindar of Hetampore, in the district of Beerbhoom.

C. BERNARD,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Yacht Rhotas, the 16th June 1874.

READ—

A letter, No. 1300—S.R., dated the 22nd May 1874, from the Commissioner of the Rajshahye Division, with its enclosures.

OBSERVATIONS.—The Commissioner of the Rajshahye division has brought to the notice of the Lieutenant-Governor that Rai Dhunput Sing Bahadoor, of Azeemgunge, in the district of Moorshedabad, has distinguished himself by the public spirit with which he has come forward to the relief of the tenantry on his extensive estates. In Dinagepore, besides contributing two-thirds towards the cost of digging two tanks, it is represented that the Rai is having a third tank excavated at his own expense, and that he has also agreed to bear the whole cost of repairing an embankment and cleaning out two tanks in thana Gungarampore. It is also reported that, besides postponing the collection of rent on his own zemindaries, he has entirely remitted the rents of such of his tenantry as are unable to pay. In the district of Rungpore he has also suspended the collection of rents; while in the district of Moorshedabad, in which he usually resides, his measures for the relief of general distress are said to have been undertaken on a very extensive and liberal scale.

The Lieutenant-Governor has read these reports with much satisfaction, and he thinks that the marked public spirit displayed by this zemindar in the present crisis is deserving of commendation.

C. BERNARD,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 19th June 1874.—WITH reference to Rule 2, Section 59 of the Civil Pension Code, regarding the medical examination of candidates for employment in the public service, the Lieutenant-Governor is pleased to notify, for the information of Heads of Departments under the Government of Bengal at the Presidency, that in Calcutta the duty is to be performed by all commissioned Medical Officers who are engaged in private practice. At present they are as follows:—

Surgeon-Major	A. J Payne, M.D.
Ditto	S. B. Partridge.
Ditto	F. N. Macnamara, M.D. (on leave.)
Ditto	J. Ewart, M.D.
Ditto	W. J. Palmer, M.D.
Ditto	N. C. Macnamara, M.D. (on leave.)
Ditto	T E. Charles, M.D.
Ditto	H. Cayley.
Surgeon	K. McLeod, M.D.
Ditto	A. Crombie, M.D.

2. Each candidate should be furnished with a letter showing that he will be appointed to a post in the event of his being declared physically fit for the Government service, and only candidates so authorized will have a claim to be medically examined without payment of fee.

3. With the view of causing an equal distribution of the duty of examination, Heads of Departments are requested to send candidates to the above named Medical Officers in rotation.

4. The names of Medical Officers at the Presidency who may hereafter come under the operation of the rule in paragraph 1 will be notified from time to time.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 18th June 1874.—The following application for a loan by the Municipal Commissioners of Arrah is published in the *Calcutta Gazette* under Rule 5 of the Rules passed by the Governor-General in Council on the 15th October 1873, under Section 4 of the Local Public Works Loan Act, XXIV of 1871.

1. For constructing a proper system of latrines in the town of Arrah and within the local limits of this Municipality. The work is intended for the benefit of the general community dwelling within such limits. The cost of the work is estimated at Rs. 4,600, which will appear from the estimate annexed.

Clause 1, Rule III.

2. The amount of loan applied for is Rs. 2,600, which sum would be in addition to the sum of Rs. 2,000 promised by Government in letter No. 2917, dated 10th November 1873, on condition of the Municipality raising the sum of Rs. 2,600; this latter sum is now sought for as a loan.

Clause 2, Rule III.

Clause 3, Rule III. 3. The loan shall be made on the security of house-tax and other miscellaneous receipts of this Municipality.

Clause 4, Rule III. 4. The said house-tax, &c., are levied under Act III of 1864.

5. The period for which the loan is required is ten years. The loan shall be made in one sum, and at as early a date as possible. It shall be repaid in ten annual instalments of Rs. 260 each, or at any early date if convenient.

Clause 5, Rule III.

Clause 6, Rule III. 6. The proceeds* of house-tax and all other income, and the expenditure incurred in each of the three last preceding years, are shown in a separate statement annexed herewith.

Clause 7, Rule III. 7. Nil.

Clause 8, Rule III. 8. No prior charges exist upon any source of income accruing to the Municipality.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

The 16th June 1874.—In accordance with the powers conferred upon him by Section 50, Act X of 1872, the Lieutenant-Governor of Bengal is pleased to direct that Hadi Hussen Khan, Shah Abdul Hussen, Gunput Singh, Gunshyam Mahworee, and Beni Ram Mahworee, Honorary Magistrates in the district of Monghyr, or any two or more of them sitting together, shall form a Bench, which is hereby vested with the powers of a Magistrate of the Third Class for the trial of such cases arising within the district of Monghyr as may be within its competence to try, and as may be brought before it in accordance with the rules made by the Magistrate of the district under Section 52 of the same Act.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 17th June 1874.—It is hereby notified that the Lieutenant-Governor is pleased to extend the provisions of Section 34 of Act V of 1861 to the towns of Jehanabad, Culna, Sonamookhy, and Bood-bood, in the district of Burdwan, with effect from the 1st July next.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 22nd June 1874.—It is hereby notified for general information that the following villages are transferred from the Tollygunge Police-station to that of Sonapore, in the district of the 24-Pergunnahs:—

No.	Name of Village.	Thakbust No.	Pergunnah.
1.	Tetoolberiah	20	Meydunmull.
2.	Balleah	19	Ditto.
3.	Baharhans Mohamoyapore, Furtabad, Dhaupdara	9	Ditto.
4.	Inshkurpore	15	Khaspoor.
5.	Boorial	221	Magoorah.
6.	Nischinderpore	112	Ditto.
7.	Chuk Booriyah	346	Ditto.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 18th June 1874.—Under Section 5 of the Indian Registration Act, VIII of 1871, the Lieutenant-Governor is pleased to sanction the formation of a new sub-district in the district of Backergunge having its jurisdiction conterminous with thana Sarup Kati.

The sub-registry offices at Chakmore and Gabha, in the same district, will be closed.

Baboo Durga Charan Ghosh, Sub-Registrar of Gabha, is hereby appointed Sub-Registrar of Sarup Kati.

The above changes will take effect from the 1st July next.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 18th June 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. the site of a dispensary in the village of Kristopore, pergunnah and thana Jehanabad, zillah Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 beegha 12 cubits of standard measurement, bounded on the west by the river Dackshore, north by the sub-divisional Cutcherry compound and lock-up, east by the public bazar road, south by a tank and grounds of Kajee Sumsud Joha and others, is required within the aforesaid village of Kristopore.

This Declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 11th June 1874.—Under the powers vested in the Lieutenant-Governor by Section 2 of Act III (B.C.) of 1867 (an Act to provide for the punishment of public gaming and the keeping of gaming houses), His Honor is pleased to authorize the extension, from the 1st July next, of the provisions of Section 11 of the said Act to the town of Pubna. The limits of the town for the purposes of this Act will be the same as those defined for the purposes of Act VI (B.C.) of 1868 in the Notification of 26th January 1869, published in the *Calcutta Gazette* of the 3rd February following.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 5th June 1874.—It has been represented to His Honor the Lieutenant-Governor that the multiplication of Rural Registration Offices, advantageous as it is to the public generally, entails some inconvenience on those proprietors of immovable property who reside, not within the sub-district in which their property is situated, but at the sudder station of the district.

With a view of abating the inconvenience complained of, and facilitating the registration of documents in the District Registry Office, instead of in the Sub-Registry Offices, in which they would ordinarily be registered, the Lieutenant-Governor, with the approval of the Governor-General in Council, is pleased to direct the substitution of the following article for the present article (*k*) of the schedule of fees.

(*k*) For registration by any Registrar (other than the Registrar of Calcutta) of any document under Section 30 (*a*).	An extra fee equal to the ordinary fee, or Rs. 5, whichever is less.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

UNDER SECTION 64 OF ACT V (B.C.) OF 1870.

The 15th June 1874.—The Commissioners for making Improvements in the Port of Calcutta, with the sanction of the Lieutenant-Governor of Bengal, do hereby declare that the wharf on the east bank of the River Hooghly, extending from the northern boundary of Golabaree Ghât Road on the north to the southern boundary of Kassy Mitter's Ghât on the south, is ready for receiving, landing, and shipping goods from and upon vessels not being sea-going vessels, and order that within the limits of that portion of the Port of Calcutta situate between the said Kassy Mitter's Ghât on the south and the northern boundary of Thakoorbarree Ghât on the north, it shall not be lawful to land or ship any goods out of or into vessels of the class above specified except at the aforesaid wharf.

By order of the Commissioners,
W. D. BRUCE, *Vice-Chairman.*

HIGH COURT NOTICE.

MEMO. No. 1689.

THE following Circular Letter, issued by the Registrar of Her Majesty's Privy Council, is published for general information.

By order of the High Court,

HIGH COURT, the 22nd June 1874. H. J. S. COTTON, *Offg. Registrar.*

THE REGISTRAR OF THE PRIVY COUNCIL TO THE SOLICITORS AND AGENTS CONDUCTING APPEALS BEFORE HER MAJESTY IN COUNCIL.

Council Office,
Whitehall, December 22nd, 1873.

Gentlemen,

I AM directed by the Lord President of the Council to state, for your information, that it appears, from a communication made by the Incorporated Law Society to the Lords of the Judicial Committee of the Privy Council, that a practice exists amongst some of the solicitors or agents conducting Appeals from India before the Privy Council, of allowing a payment or commission of 10 or 15 per cent. on the remittances made to defray the expenses in England, to the Vakeel, Mookhtear, or other person in India by whom the appeal is transmitted to this country; and in one instance their Lordships are informed that a direct solicitation of business accompanied an offer of these terms.

Their Lordships have taken these statements into their most serious consideration. It appears to their Lordships that the deduction of a commission from remittances made for the expenses of an Appeal cannot justly be assimilated to the division of profits which prevails in this country under the name of agency; it is immaterial to a suitor in what manner the lawful costs he has to pay are divided between a town and country solicitor, but he has a right to require that remittances made for the expenses of an Appeal to England should be exclusively applied without deduction to that purpose. The payment to the native Vakeel, or other adviser of the client in India, of a commission upon the remittances, not only tends to increase the expense of Appeals, but gives to such persons direct personal interest in advising frivolous Appeals, and in making them as expensive as possible. Their Lordships are therefore of opinion that, if such a practice exists in India or elsewhere, it is wrong, and open to grave abuse, which might, if continued, call for the direct interposition of their Lordships' authority to check it.

But their Lordships prefer to address themselves to the sense of professional duty and propriety which exists amongst the gentlemen carrying on the business of Appeals before Her Majesty in Council, to put an end to this system; and their Lordships trust that after this intimation of their opinion measures will be taken by the members of the profession practising in the Privy Council to prevent the continuance of any such practice, which has doubtless only prevailed in some exceptional cases and should now be entirely abandoned.

I have the honour to be,
Your obedient Servant,
HENRY REEVE,
Reg. P. C.

Sheriff's Office, the 2nd June 1874.

NOTICE is hereby given that the Sixth Criminal Sessions of the year 1874 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William and the places subordinate thereto, will be holden at the Court-House, in the Town of Calcutta, on Tuesday, the thirtieth day of June instant, at 11 o'clock in the forenoon, and so on from day to day until the said Session be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Session be then and there to prosecute.

M. RUSTOMJEE, *Sheriff.*

COMMR.'S OFFICE, PRESIDENCY DIVN., CALCUTTA, the 4th June 1874.

EDUCATIONAL NOTICES.

Presidency College, Civil Engineering Department.

THE SESSION 1874-75 of the Engineering Department will open on Monday, the 15th June.

Candidates for admission are requested to present themselves at the College at 10 A.M. on that date, and no applications for admission will be received after the 30th June.

PRESIDENCY COLLEGE, the 4th June 1874. J. SUTCLIFFE, *Principal.*

IT is hereby notified that, under the orders of the Government of Bengal contained in the Resolution dated the 5th of October 1872, promulgating the Junior Scholarship Rules, five junior scholarships of the second grade and ten of the third grade were allotted to the Presidency Division. They will be distributed among the several districts of the division in the following manner at the ensuing December examination :—

24-Pergunnahs	...	...	...	...	7
Nuddea	...	...	...	...	5
Jessore	...	...	...	...	3

The grade of the scholarship will be determined by the marks obtained by the successful candidate in the divisional list.

It is also notified, in accordance with paragraph 11 of the Rules, that not less than one half of the scholarships will be awarded to students who have qualified in drawing, surveying, and physical geography.

The examination in these subjects will be held in the Kishnaghur College, Jessore Zillah School, and the Senate House, on the 8th and 9th October 1874. For further information candidates can apply to the Inspector of Schools, Presidency Circle, No. 22, Chowringhee Road, Calcutta.

The 12th June 1874. H. ULICK BROWNE, *Commissioner.*

OPIUM NOTIFICATION.

No. 578B.

NOTICE is hereby given that the Seventh Sale of Opium, the provision of 1872-73, will be held at the Government Opium Sale-Room, No. 2, Bankshall Street, on Monday, the 6th July 1874, at 11 A.M., and will comprise 3,750 chests, viz.—

		Chests.
Behar Opium	...	2,185
Benares „	...	1,565
Total	...	3,750

2. The general conditions of the sale now advertised will be the same as usual; they may be ascertained by reference to the Notification issued on the 8th November 1873, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3. The latest dates for deposit and clearance will be the 11th and 21st July, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room, will be received after 4 P.M. of Saturday, the 11th July 1874, and no Bank of Bengal Receipts in full payment of lots will be accepted after 4 P.M. of Tuesday, the 21st July 1874.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of Behar and Benares opium will be brought to sale in the present year on or about the dates specified below. The Member in charge of the Opium Department, however, reserves to himself the right of altering these dates, should circumstances render it expedient to do so :—

Dates.	Behar, about Chests.	Benares, about Chests	Total, about Chests.
On or about Wednesday, 5th August 1874 ...	2,185	1,565	3,750
On or about Monday, 7th September „ ...	2,185	1,565	3,750
On or about Wednesday, 7th October „ ...	2,185	1,565	3,750
On or about Friday, 6th November „ ...	2,185	1,565	3,750
On or about Thursday, 3rd December „ ...	2,185	1,565	3,750
Total ...	10,925	7,825	18,750

By order of the Member in charge,

W. H. GRIMLEY, *Offg. Secretary.*

BOARD OF REVENUE, L. P., FORT WILLIAM, the 2nd June 1874.

NOTICE.

No. 660 B.

IT is hereby notified that one lot of Behar Opium of the sale held on the 4th instant, for which the Promissory Note deposited was not redeemed within the period prescribed in the 5th clause of the sale conditions, will be resold at the risk of the former purchaser at the Opium Sale-Room, No. 2, Bankshall Street, on Monday, the 6th July 1874, immediately after the conclusion of the sale of 3,750 chests advertised for that day.

2. The conditions of resale will be the same as those of the sale above referred to.

By order of the Member in charge,

W. H. GRIMLEY, *Offg. Secretary.*

BOARD OF REVENUE, FORT WILLIAM, the 23rd June 1874.

NOTICE.

IT is hereby notified for general information that, on and after the 1st of July next, all applications to the Collector of Customs must bear a court fee stamp of one anna, as required by Article I, Schedule II of Act VII of 1870, the use of the one-anna revenue stamps intended for bills and receipts on such applications being irregular.

By order of the Board of Revenue, L. P.,

T. B. LANE, *Offg. Collector of Customs.*

CALCUTTA CUSTOM HOUSE, the 22nd June 1874.

CENTRAL RELIEF FUND.

Proceedings of the Fourteenth Meeting of the Executive Committee of the Central Famine Relief Fund, held on the 30th May 1874.

PRESENT:

The Hon'ble V. H. Schalch, *Chairman.*
The Hon'ble John Inglis.
J. R. Bullen Smith, Esq.

1. The proceedings of the last meeting were read and confirmed.

2. The Chairman read a letter from the Commissioner of Chota Nagpore, asking for Rs. 10,000 for the district of Manbhoom for the month of June.

Resolved, that the application be granted.

3. The Chairman read a letter from the Collector of Nuddea, asking for a gift of Rs. 5,000 from the fund.

Resolved, that the application be granted.

4. The Chairman read a letter from the Commissioner of Burdwan, stating that the application for his division for the month of June amounted to Rs 20,000 for Burdwan, Rs. 14,000 for Bankoora, and Rs. 10,000 for Beerbhoom, Rs. 6,000 for Hooghly, and Rs. 2,000 for Midnapore.

Resolved, that the sums asked for be granted.

5. The Chairman also read a letter from the Relief Commissioner of Rajshahye, stating that Rs. 20,000 would probably be required for Dinagepore during May.

Resolved, that the application be granted.

6. The Chairman read a letter from the Commissioner of Rajshahye, estimating the requisitions from Moorshedabad for June at Rs. 21,100.

Resolved, that the application be granted.

7. The Chairman read a letter from the Collector of Shahabad, asking for an assignment of Rs. 4,000 for June.

Resolved, that the application be granted.

8. The Chairman read a letter from the Commissioner of Burdwan, giving a forecast of the requirements of his districts from date to the end of the famine.

Also, a similar letter from the Commissioner of Rajshahye, concerning the wants of Moorshedabad.

Also, a similar letter from the Commissioner of Patna, concerning Tirhoot and Shahabad.

Resolved, that these letters be abstracted and recorded.

9. The Chairman read the statements of daily average of persons relieved and cash accounts of the following districts:—

Hooghly, from commencement to 15th April 1874, and from 16th April to 30th April 1874.

Bankoora, from 15th April to 30th April 1874.

Midnapore, from 15th April to 30th April 1874.

Beerbhoom, from commencement to 15th April 1874.

Howrah, from commencement to 15th April 1874, and from 16th April to 30th April 1874, and from 1st May to 15th May 1874.

Patna, from 1st May to 15th May 1874.

Resolved, that above statements and accounts be abstracted and recorded.

10. The Chairman read a letter from the Commissioner of Rajshahye, intimating that the Collector of Pubna asked for Rs. 20,000. The Commissioner asked, however, that 50,000 might be allotted to Pubna for June. He explained that in the Serajgunj sub-division bad weather had put a stop to transport and importation temporarily; the sub-divisional officer had therefore been obliged to buy 8,000 maunds of rice from private firms, which would all be used up on charitable relief under headings (*b*), (*c*), and (*d*).

Resolved, that the 50,000 applied for be allotted to Pubna, but the Commissioner be asked to report on the condition of the district, as it would seem not to be internally distressed, but suffering temporarily (and independently of the general scarcity) from an interruption to the communications.

11. The Chairman read a letter from the office of the Bombay Municipal Commissioners, announcing the remittance of Rs. 20,000 through the Accountant-General of Bombay.

Resolved, that the letter be recorded.

12. The Chairman read a letter from the Treasurer of the Manchester Famine Committee, forwarding a copy of two resolutions passed at a meeting held on 30th April 1874.

The resolutions were—"That the funds already raised, or hereafter to be raised, in Manchester ought not to be used as a substitute for those means which Government is bound to employ to meet the crisis in India, but should be devoted to purposes which Government by the general rule of distribution cannot meet. That the Manchester Fund be forwarded to the Central Relief Committee at Calcutta, with a special request that the distribution be regulated by a strict regard to the preceding resolution."

Resolved, that a letter be addressed to the Secretary to the Manchester Fund, stating with reference to the fact that the Committee had undertaken all charitable expenditure under (*b*), (*c*), (*d*), that the Committee think that the views of the Manchester subscribers will be met by the appropriation of the subscriptions to the abovenamed purposes.

Resolved also, that a telegram to the same purport be sent to the same gentleman.

13. The Chairman read a letter from the Chairman of the Glasgow Relief Committee, intimating that the Glasgow meeting of 1st May 1874 had resolved to send a further sum of £5,000 to Calcutta, and mentioning that the money subscribed is intended for the relief of such as Government aid will not reach, and to supplement such Government aid where insufficient.

Resolved, that a reply be sent in terms similar to that despatched to Manchester.

The following is a statement of accounts to 30th May:—

	Rs.	As.	P.
Subscriptions to 30th May 1874	18,46,214	3	11
Government contribution	10,17,197	14	2
	28,63,412	2	1
Drafts on treasuries	8,40,000	0	0
Expenses	1,770	10	4
	8,41,770	10	4
Balance at Bank of Bengal	19,20,598	14	1
Balance with treasurer	2,597	5	8
Outstanding subscriptions	98,445	4	0
Total ...	28,63,412	2	1

DISTRICT RELIEF COMMITTEE.

Burdwan Moharajah's Relief Operations Statement for the fortnight ending 13th June 1874.

BURDWAN.

Relief House.—The numbers applying for relief have increased considerably during the last fortnight, and the daily average of people fed has been 1,151. But this increase is due partly to the numbers of Juggernauth pilgrims daily passing through the town of Burdwan. No cases of acute distress from the adjacent villages have presented themselves. Milk is given to such children as require it, and cloth has been distributed to a few people who were in urgent need of it. 8,000 maunds of rice have been received from Orissa, which will be employed partly for relief purposes and partly for the use of the employés of the Raj. This will relieve the local market to a considerable extent.

CULNA.

At the relief house at Culna 580 are daily fed; in addition to these, advances of rice have been made to about 20 respectable people whose circumstances appeared to require it, and orders have been issued to extend these advances to all such respectable people as may really need it.

Relief Works.—The works on the tanks have been stopped, but road-work has been substituted. It is not expected, however, that there will be many applicants for work on these roads, as the Executive Engineer of the district finds it difficult to go on with Government roads in the Culna sub-division, owing to want of laborers.

BOOD-BOOD.

The number of people daily fed at the Bood-bood annachotra has been 625. Milk has been given to about 40 children, invalid diet is provided for the sick, and advances of rice have been given to 12 respectable people. The former darogah has been removed and a new man appointed. There is a complaint that no attention is paid to the sick at the annachotra by the medical officer of the place, which, considering that cholera is prevalent, is rather a serious matter.

KHADINA.

At Khadina, in Hooghly, the numbers fed at the annachotra have been daily increasing, the average for the last fortnight having been 425. Only one Brahmin woman receives advances of rice, as, though there are many applications for uncooked food, and orders have been issued to supply it in quantities of five days' rations at a time, all the applicants refuse to take it unless it is carried to their houses.

A tabulated statement is annexed, showing the daily average of people relieved at each place.

Statement showing the daily average number of people relieved during the fortnight ending the 13th June 1874.

Number of people who work at different relief works:—

Burdwan ...	Rossam Bagh	...	150
	Tara Bagh	...	50
	Ryan tank	...	325
Kheergram Diggi.—No returns received.			
Culna Somajbari Diggi.—Work stopped, and road-work substituted, no returns of road-work received as yet.			
	Total	...	525

Number of people receiving gratuitous food:—

Burdwan	...	1,151
Bood-bood	...	625
Culna	...	580
Khadina	...	425
Total	...	2,781
Grand total	...	3,306

BURDWAN, the 17th June 1874.

M. C. BURDWAN, *Moharajadheraj.*

The Calcutta Gazette.

WEDNESDAY, JUNE 24, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Thursday, the 16th July 1874, corresponding with 1st Sarabun *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

NUDDEA COLLECTORATE, the 22nd May 1874. C. C. STEVENS, *Collector.*

Notice

Is hereby given that the land specified in the Schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Nowgong, Assam, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Nowgong, Assam.

SCHEDULE.

A lot of waste land, consisting of about 396 acres, situated in mouzah Nizorikhat Hatirgaon, in the district of Nowgong, Assam, and bounded as follows :—

North.—A line drawn from a pillar marked N on the bank of a stream called "Dogajooree" to a pillar O, on the north-east, along the edge of the above stream, distance 100 yards. From pillar O to a pillar P, on the north-west, along the edge of the above stream, distance 260 yards. From pillar P to a pillar Q, on the north-west, along the edge of the said stream, distance 360 yards. From pillar Q to a pillar R, on the south-west, along the edge of the above stream, distance 200 yards. From pillar R to a pillar S, on the north-west, along the edge of the above stream, distance 350 yards. From pillar S to a pillar T, on the south-west, along the edge of the above stream, distance 233⅓ yards. From pillar T to a pillar U, on the north-west, along the edge of the above stream, distance 140 yards. From pillar U to a pillar V, on the south-west, along the edge of the above stream, distance 233⅓ yards. From pillar V to a pillar A, on the south-west, along the edge of the said stream, distance 166⅔ yards.

South.—A line drawn from a pillar marked F, on the west, at the foot of the hill called "Matiapahar," to a pillar G, on the north-east, along the foot of the above hill, distance 233⅓ yards. From pillar G to a pillar H, on the south-east, along the foot of the above hill, distance 180 yards. From pillar H to a pillar I, on the south-east, distance 150 yards.

West.—A line drawn from a pillar marked A, on the bank of the stream called "Dogajooree" to a pillar B, on the south-east, distance 129 yards. From pillar B to a pillar C, on the south-east, distance 200 yards. From pillar C to a pillar D, on the south-west, distance 233⅓ yards. From pillar D to a pillar E, on the south-west, distance 625 yards. From pillar E to a pillar F, on the south-east, at the foot of the hill called "Matiapahar," distance 500 yards.

East.—A line drawn from a pillar marked I, on the south-west, to a pillar J, on the north-east, distance 250 yards. From pillar J to a pillar K, on the north-east, distance 233⅓ yards. From pillar K to a pillar L, on the north-east, distance 700 yards. From pillar L to a pillar M, on the north-east, distance 550 yards. From pillar M to a pillar N, on the north-east, distance 140 yards.

The pillars are marked A to V in the map filed in the office of the Deputy Commissioner, Nowgong, Assam.

NOWGONG, ASSAM, the 19th May 1874. J. SHERER, *Dy. Commr.*

[Second Publication.]

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Deputy Commissioner office at Debrooghur, will be sold by public auction at the said Deputy Commissioner's office at 12 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner.

SCHEDULE.

A lot of waste land consisting of about 741 acres, situated in mouzah Kodomoni, in the district of Luckhimpore, and bounded as follows :—

North.—By a straight line through the forest from a pillar, 1, bearing 242°, past an intermediate pillar, 2, to pillar 3, measuring 2,282 yards.

West.—By a straight line from pillar 3, through tree forest, bearing 176° and measuring 1,040 yards, to a pillar, 4; and thence by a straight line through tree forest, bearing 151° and measuring 660 yards, to a pillar, 5, on the Tettelia bheel.

South.—From pillar 5, along the northerly edge of the Tettelia bheel and the course of the Lohitkota river, to a pillar, 6, measuring, as the crow flies, 1,650 yards.

East.—By a straight line from pillar 6, on the Lohitkota river, through tree forest, bearing 20° and measuring 825 yards, to a pillar, 7; and thence by a straight line through tree forest, bearing 355° and measuring 1,045 yards, to pillar 1.

The pillars are marked from 1 to 7 on the map filed in the Deputy Commissioner's office.

DEBROOGHUR, ASSAM, the 17th April 1874. W. S. CLARKE, *Dy. Commissioner.*

Notice

Is hereby given that the land specified in the Schedule hereto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the office of the said Deputy Commissioner at 11 o'clock on the 2nd September 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause. For the conditions of sale, see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of 1,087 acres 1 rood 20 perches, situated in Pergunnah Berkhola, Mouzah Abong, in the district of Cachar, and bounded as follows :—

East.—The Abong river from pillar No. 1, at confluence of the Abong and Cacharee Cherra with the Dooloo river, to pillar No. 2, on the banks of the Abong and at the foot of the Casee Teelah to the north; thence, to pillar No. 3, on the top of the same teelah, and No. 4 pillar at the northern foot.

North.—From pillar No. 4, as above, to pillar No. 5 on the banks of the Mewah Cherra.

West.—From pillar No. 5 along pillars Nos. 6, 7, 8, 9, and 10, at the edge of the jungle on high teelahs to the west, and along No. 11 on the banks of the Cacharee Cherra.

South.—The Cacharee Cherra, between pillars No. 11 and No. 1.

The pillars are numbered from 1 to 11 on the map filed in the office of the Deputy Commissioner of Cachar.

SILCHAR, the 27th April 1874. O. G. R. MCWILLIAM, *Offg. Deputy Commissioner.*

CALCUTTA, the 20th June 1874. (246—1) G. H. SIMONS, *Offg. Vice-Chairman.*

Custom House.

NOTICE.

ALL persons having business with the Calcutta Custom House are hereby reminded that the existing rules for the payment of money into the Custom House must be invariably observed, and that no sum tendered contrary to these rules will be received.

The Custom House Treasury is open daily from 10-30 A.M. to 3 P.M., save on Saturdays, when it closes at 1 P.M.

As a rule, cheques which have not been accepted by the bank on which they are drawn are not received; this rule is, however, subject to special exceptions, with the approval of the Collector.

At 2-45 P.M. (Saturday excepted) the last remittance of the day is made to the Bank of Bengal, and after that hour no cheques which have not been accepted are received.

After 3 P.M., on Saturday after 1 P.M., no payments are received on any account.

Masters and Agents of ships having to pay marine dues are specially warned that they must do so before 3 P.M., on Saturday before 1 P.M., otherwise port-clearance cannot be granted until the Custom House opens on the following day.

T. B. LANE, *Offg. Collector of Customs.*

With reference to the above, the Transfer Register of the Company will be closed from the 24th to the 30th instant, both days inclusive.—By order of the Directors.

The 22nd June 1874. (248—1) A. CUMMING, *Secretary.*

Notice.

OUR partnership having expired on April 30th last, and Mr. John Fitz Thomas Rutherfoord having retired, his interest and responsibility in the firm of Hoare, Miller and Company ceased as from that date.

RICHD. HOARE.
E. MILLER,
J. F. RUTHERFOORD.
GEO. MILLER.
ROBERT MILLER.

CALCUTTA, the 19th June 1874. (248—1)

TO LET, in putnee, the divided half share of Prawnkishen Biswas, deceased, of and in pergunnah Annurpore, in Twenty-four-Pergunnahs, on the following conditions:—

1*st.*—The putnee to be given for the whole as one lot, or for separate dhees separately.

2*nd.*—The zemindars will be prepared to give up so much of the profits on each dhee as are placed opposite to each of them on receiving in adequate purchase value of the profits so given up, and will further require as salamee to be given for the balance of the profits, being the rents reserved to the zemindars as may be arranged.

3*rd.*—The offers for purchase, value, and of salamee are to be made on or before the fifteenth day of July next, either to Baboo Denonath Bose, Attorney-at-Law, or to Baboo Cassinath Biswas, at No. 20, Nilmoney Mitter's Street, in Simla, in Calcutta, where the same will be recorded.

4*th.*—The highest offers will be preferred.

5*th.*—Upon the offers being accepted, notice of such acceptance will be given by the said Baboo Denonath Bose to the person whose offers will be so accepted, and service of such notice will be deemed good service thereof upon the same being left at the usual place of abode of the said offerer.

6*th.*—Upon acceptance of the offers the persons whose offers shall have been so accepted should within fifteen days from the date of the said notice pay in the whole amount of their respective offers to such person or persons as may be authorised to receive the same.

7*th.*—That upon payment of all purchase-money the zemindars will, at the costs of the putneedars, execute pattahs in their favor after approval thereof by the zemindar's Attorney. The putneedars may at their own costs get their respective putnee holdings separately registered in the Collectorate.

8*th.*—The putnee lease will contain terms to the effects—(1st) that the rent will be payable by twelve equal monthly payments made on the first day of every month, and that such rent will be paid separately to each of the zemindars according to his interest in the property, to such person or persons as may be nominated by all parties for the purpose of receiving such rents; (2nd) that all taxes now paid or hereafter payable in respect of the said property, either by the zemindar or otherwise, shall be paid by the said putneedars; (3rd) that in default of payment of the said rent or taxes on the due dates thereof, respectively, interest will be charged on the defaulted amount at the rate of 12 per cent. per annum, and the rent and interest will be realised either as soon as default is made or in accordance with the provisions of Regulation 8 of 1819; (4th) that the putneedar will not be allowed to grant any under-tenure of his putnee mehal or any portion thereof for jummas less than what are now payable in respect thereof; (5th) that the putneedar will be fully empowered to make jariff jummabundee of all lands, &c., in his mehal.

9*th.*—The income of the property is detailed below. The putneedars will be at liberty to make a mokabilla thereof with the naib of the zemindars within three months after the deposit of purchase and salamee-money as aforesaid. After the expiry of this time no objections on the grounds of short income will be entertained; the shortcoming of the income will not be a ground to cancel the contract for putnee.

10*th.*—That the putneedars may take upon themselves at their own expenses the collection of all the arrears of rent now due from the mehals, and that a commission of 10 per cent. will be allowed by the zemindars for such collections.

N.B.—This putnee is not to include any khas lands, gardens and tanks, nor any brummuthro, any lakhiraj and debutter, and purchased lands within the zemindary, for which separate arrangement will be made.

Sale of Landed Property.

PURSUANT to an order of the Court for the Relief of Insolvent Debtors at Calcutta, made in the matter of Bernhardt Howard, Robert Carr, and Robert Howard, Insolvents, dated the 14th day of April 1874, A. B. Miller, Esquire, Official Assignee and Assignee to the estate and effects of the said Insolvents, will sell by public auction at his office, No. 3, Old Post Office Street, at noon on Thursday, the sixteenth day of July 1874, with the concurrence of the mortgagee, the following valuable properties:—

Lot No. 1.—All those several pieces or parcels of land purchased and leased by the said firm of Messrs. Howard Brothers, comprising, more or less, 80 beeghas, situate in mousahs Dunghur, Buthoon, and Baroundha, being near and about the railway-station at Mirzapore.

Lot No. 2.—All that pucka brick-built messuage or dwelling-house, with the land or ground attached thereto, containing, more or less, 4 beeghas 5 biswas and 10 dhoors, situate and being in the mouzah Baroundha, in Mirzapore, aforesaid, lying to the north-east of the railway-station yard, and bounded as follows, that is to say: on the north by fields and road leading from the railway to the Civil station; on the south by the road from the city of Mirzapore to Chunnar; on the east by open fields, and on the west by a field and the said road from the railway to the Civil station.

Lot No. 3.—All that brick-built messuage or dwelling-house with detached office, building, godowns, sheds, workshops, and cotton-screw building, with cotton-presses, and the land and ground attached thereto, containing, more or less, 4 acres, situate and being near the city of Jubbulpore, in the Central Provinces, and bounded in manner following, that is to say: on the north by the road leading from the Omtee bridge past the Government Dispensary, to the city of Jubbulpore; on the south by the road leading from the said Omtee bridge to Murha Tal, or lake; on the east by Moonshee Golam Nubbee Khan's bungalow; and on the west by the road leading from the city to the said Murha Tal.

Lot No. 4.—All that messuage or building erected for the purpose of a screw-house with the land attached thereto, containing, more or less, situate in Allahabad, and registered as No. 51 in the old Civil station, and bounded as follows: on the north by a tank; on the south by the River Jumna; on the east by the Government Hospital; and on the west by a portion of Kydgunge Bazar.

For further particulars and conditions of sale, apply to Mr. N. Paliologus, Solicitor, No. 2, Garstin's Place, Calcutta. (238—3)

Notice.

It is hereby enacted as follows :—

I. Preliminary.

1. This Act may be called "The Distress Act, 1874," and it shall come into force at once. Short title. Commencement.

It extends to every place within the local limits of the ordinary original civil jurisdictions of the High Courts of Judicature at Fort William, Madras and Bombay ; Local extent.

But nothing herein contained applies to any rent due to Government.

2. The enactments specified in the second schedule hereto annexed are repealed to the extent mentioned in the third column of the same schedule. Enactments repealed.

All appointments made and securities given under any of the said enactments shall be deemed to be respectively made and given under this Act.

The reference to Act No. VII of 1847 made in Act XXIII of 1850, section three, shall be read as if made to this Act.

3. In this Act, "Court of Small Causes" means the Court of Small Causes held under Act No. IX of 1850 in Calcutta, Madras or Bombay, as the case may be. "Court of Small Causes" defined.

II. Bailiffs and Appraisers.

Appointment of bailiffs.

4. The Judges of the Court of Small Causes may appoint four or more persons to be bailiffs and appraisers for the purpose of this Act, and may from time to time, with the previous sanction of the Local Government, fix such remuneration for the services of such officers as the said Judges think fit, and may suspend or remove them.

Security to be given by appointees.

5. The persons so appointed shall give security to be approved by the said Judges faithfully to discharge the duties of their office, and they shall be deemed to be public servants within the meaning of the Indian Penal Code.

III. Issue of Distress-Warrants.

Application for distress-warrant.

6. Any person claiming to be entitled to arrears of rent of any house or premises to which this Act extends, or his duly constituted attorney, may apply to any Judge of the Court of Small Causes for such warrant as hereinafter mentioned.

The application shall be supported by an affidavit to the effect of the form marked A in the first schedule hereto annexed.

Issue of distress-warrant.

7. The Judge may thereupon issue a warrant under his hand and seal to the effect of the form contained in the same schedule (marked B) addressed to any one of such bailiffs.

The Judge may at his discretion, upon personal examination of the person applying for such warrant, decline to issue the same.

IV. Of the making of Distresses.

Time for distress.

8. Every distress under this Act shall be made after sunrise and before sunset, and not at any other time.

What places bailiff may force open.

9. The bailiff directed to make the distress may force open any stable, outhouse, or other building, and may also enter any dwelling-house, the outer door of which may be open and may break open the door of any room in such dwelling-house for the purpose of seizing property liable to be seized under this Act.

Provided that he shall not enter or break open the door of any room appropriated for the zanáná or residence of women, which by the usage of the country, is considered private.

Property which may be seized.

10. In pursuance of the warrant aforesaid the bailiff shall seize the moveable property found upon the premises mentioned in the warrant and belonging to the person from whom the rent is claimed (hereinafter called the debtor), or such part thereof as may in the bailiff's judgment be sufficient to cover the amount of the said rent, together with the costs of the said distress.

Impounding distress.

11. The bailiff may impound or otherwise secure the property so seized on the premises chargeable with the rent.

Inventory.

12. On seizing any property under section ten, the bailiff shall make an inventory of such property and shall give a notice in writing to the effect of the Form in the first schedule hereto annexed (marked C) to the debtor, or to any other person upon his behalf upon the said premises.

Notice of intended appraisement and sale.

The bailiff shall file in the Court of Small Causes copies of the said inventory and notice:

Copies of inventory and notice to be filed.

13. The debtor may, at any time within five days from such seizure, apply to any Judge of the said Court to discharge or suspend the warrant, and such Judge may discharge or suspend such warrant accordingly,

Application to discharge or suspend warrant.

and any of the said Judges may in his discretion give reasonable time to the debtor to pay the rent due from him.

Upon any such application the costs attending it and attending the issue and execution of the warrant shall be in the discretion of the Judge, and shall be paid as he directs.

V. Appraisement and Sale of Distress.

Appraisement.

14. In default of such application, any two of such bailiffs may at the expiration of five days from such seizure appraise the property so seized, and give notice in writing to the effect of the Form in the first schedule hereto annexed (marked D). The bailiff shall file in the said Court a copy of such notice.

Notice of sale.

Sale.

15. The distrained property shall be sold on the day mentioned in such notice, and the said bailiffs shall on realizing the proceeds pay over the amount thereof to the Chief Clerk of the said Court, and such amount shall be applied first in payment of the costs of the said distress and then in satisfaction of the debt, and the surplus, if any, shall be returned to the debtor,

Application of proceeds.

Provided that the debtor may direct that the sale shall take place in any other manner, first giving security for any extra costs thereby occasioned.

VI. Miscellaneous.

Costs of distresses.

16. No costs shall be taken or demanded or any distress under this Act except those mentioned in the part of the first schedule hereto annexed (marked E).

The Judges of the Court of Small Causes may apply the sum so raised as costs towards the payment of the contingent charges and remuneration of the said bailiffs as appears to the said Judges expedient.

Account of costs and proceeds.

17. The Chief Clerk of the Court of Small Causes shall keep a book in which all sums received as costs upon distresses made under this Act, and all sums paid as remuneration to the said bailiffs, and all contingent charges incurred in respect of such distresses shall be duly entered.

He shall also enter in the said book all sums realized by sale of the property distrained and paid over to landlords under the provisions of this Act.

Bar of distresses except under this Act.

18. No distress shall be levied for arrears of rent, except under the provisions of this Act;

Penalty for making illegal distresses.

and any person, except a bailiff appointed under section four, levying or attempting to levy any such distress shall, on conviction before a Magistrate of Police, be liable to be punished by fine not exceeding *five hundred* rupees and imprisonment for a term not exceeding *three* months in addition to any other liability he may have incurred by his proceedings.

Number and Year.	Subject.	Extent of repeal.
VII of 1847 ...	Distresses for small rents in Calcutta ...	The whole.
IX of 1850 ...	Extension of Act VII of 1847 ...	Section eighty-nine.
XXVI of 1864 ...	Extending jurisdiction of Presidency Small Cause Courts.	Section four.

STATEMENT OF OBJECTS AND REASONS.

In Calcutta, Madras and Bombay distresses for arrears of rent not exceeding a thousand rupees are provided for by the Small Cause Courts Acts, VII of 1847, IX of 1850, section 89, and XXVI of 1864, section 4. But for the law regulating distresses for arrears exceeding that sum, we must look to the Common Law and to the series of antiquated Statutes on this subject, eleven in number, which, from the foundation of the Mayors' Courts in 1726, have been deemed in force in the Presidency Towns.

This is obviously inconvenient, and the primary object of the present Bill is to extend the present law as to distresses for arrears not exceeding a thousand rupees to arrears exceeding that sum, and thus to render it possible to repeal expressly the Statutes above referred to. It will be found that so much of the law as is now useful and in active operation has been embodied in the present Bill.

The opportunity has been taken to amend the arrangement and wording of the present law relating to distress for arrears not exceeding a thousand rupees and to define the powers of bailiffs to force open places.

CALCUTTA,
The 1st June 1874.

A. HOBHOUSE.

SCHEDULE.

I.—Statutes.
II.—Acts.
III.—Charters.

A Bill to consolidate the law relating to the Sheriffs and to the execution of the decrees of the High Courts in the exercise of their Original Civil Jurisdiction.

Preamble.

WHEREAS it is expedient to consolidate the law relating to the Sheriffs of Calcutta, Madras and Bombay, and to the execution of the decrees of the High Courts of Judicature at Fort William, Madras and Bombay, in the exercise of their Original Civil Jurisdiction ; It is hereby enacted as follows :—

I.—Preliminary.

Short title.

1. This Act may be called "The Sheriffs' Act, 1874 :"

Extent.

It extends to the whole of British India ;

Commencement.

And it shall come into force at once.

Repeal of enactments.

2. The enactments specified in the first and second parts of the schedule hereto annexed shall be wholly repealed.

And the Charters mentioned in the third part of the same schedule shall be repealed to the extent shewn in the second column thereof.

But all Sheriffs and Deputy Sheriffs appointed, fees prescribed and writs issued, under any such enactment or Charter shall be deemed to be respectively appointed, prescribed and issued under this Act.

II.—Appointment of Sheriffs and Deputy Sheriffs.

Appointment of Sheriffs.

3. The Local Government shall, yearly, on the first Tuesday in December or as soon after as may be, appoint a Sheriff for the year ensuing, to be computed from the twentieth day of December next after such appointment.

Proviso.

Provided that, in the case of the Local Government of Bengal, the person so appointed shall be one of three persons resident in or near the town of Calcutta, to be nominated yearly to the

Local Government by the Chief Justice of the High Court at least three days before the said first Tuesday.

The persons so appointed shall be called respectively the Sheriff of Calcutta, the Sheriff of Madras and the Sheriff of Bombay.

Tenure of office.

4. Every such Sheriff shall continue in office during such year, and until another is duly appointed into the said office.

Appointment to fill vacancy.

5. If the Sheriff die in his office, or depart from the Lower Provinces of Bengal, the Presidency of Fort St. George, or the Presidency of Bombay (as the case may be), another person shall, as soon as conveniently may be after such death or departure, be in like manner nominated and appointed, and shall continue in his office for the remainder of the year, or until another Sheriff is duly appointed into the said office.

Appointment of Deputy Sheriff.

6. Every Sheriff shall, by writing under his hand, appoint a Deputy Sheriff, and shall during his continuance in office be responsible for such Deputy.

III—Duties of Sheriff.

Duties of Sheriff and his Deputy.

7. The Sheriff and Deputy Sheriff are authorized—

(*a*) to execute all the writs, summonses, rules, orders, warrants, commands and process of the High Court;

(*b*) to make return of the same, together with the execution thereof, to the High Court;

(*c*) to receive and detain in prison such persons as are committed to the Sheriff for that purpose by the High Court and by the Chief Justice and Judges, respectively.

Execution of process against Sheriff.

8. Whenever the High Court directs or awards any process against the Sheriff himself,

or awards any process, which, on account of his being related to the parties, or for any other reason, it is inexpedient to require him to execute,

the High Court shall appoint some other fit person to execute and return the same;

and for that purpose the said process shall be directed to the person so appointed;

and the cause of such special proceeding shall be entered on the record.

Execution of process in Mofussil.

9. The Sheriff shall not be compelled or compellable to go in person or by his officers or deputies beyond the local limits of the ordinary original civil jurisdiction of the High Court for the execution of any of its processes.

But whenever the process of the said Court has to be executed beyond the said limits, the Court shall, by order or upon motion, direct by what person and in what manner such process shall be executed and the terms which the party issuing the same shall enter into.

And the Sheriff shall grant his special warrant or deputation to such person as the Court may direct for the execution of such process.

And in that case the Sheriff, his executors or administrators, shall not be responsible for any act done in or respecting the execution of such process under or by virtue of such special warrant.

And any persons aggrieved under or by pretence of such warrant may seek their remedy under any security which may have been directed to have been taken on the occasion, and which the said Court is authorized to direct to be taken.

IV.—The Sheriffs' Fees.

Sheriff's fees.

10. The High Court shall have power from time to time to settle tables of fees to be allowed to the Sheriff on account of the execution of process, whether issued by the High Court, or by a Court, Judge or Magistrate beyond the local limits of its ordinary original civil jurisdiction, and of the sums to be allowed for costs of advertisements or other notifications of sales of property;

Such tables, when, in the case of the High Court of Judicature at Fort William, they have received the sanction of the Governor General in Council, and in the case of the High Courts of Judicature at Madras and Bombay they have received the sanction of the Local Government, shall have the force of law.

Payment for execution of process issuing from Mofussil.

11. No Court, Judge or Magistrate beyond the local limits of the ordinary original civil jurisdiction of the said High Courts, shall issue any process to be executed by the Sheriff unless upon payment by the party applying therefor of the fees and sums payable under the said tables.

Mofussil Courts to keep account of fees paid to them under this Act.

12. Every such Court, Judge and Magistrate, issuing process as aforesaid, shall cause a separate account to be kept of the amount of all fees and sums so paid, and shall from time to time, as directed by Government, cause the amount thereof to be paid into the local treasury.

Local Government to pay over fees to Sheriff.

13. The Local Government shall, twice in each year, account for and pay over to the Sheriff for the time being, the amount of fees and sums so paid, after deducting all necessary expenses of receiving and keeping account thereof, and remitting the nett proceeds thereof to Calcutta, Madras, or Bombay, as the case may be; or, where the amount has accrued in the shrievalty of more than one Sheriff, shall apportion the sum paid accordingly between the Sheriff for the time being and the then late Sheriff.

Composition with Sheriff.

14. The Local Government may compound with the Sheriff for a monthly payment to be made to him instead of such fees and sums, and during such composition may appropriate the said fees and sums to the purposes of Government.

Sheriff's percentage on sales.

15. Over and above such fees and sums, or any such monthly payment received instead of such fees and sums, the Sheriff shall be entitled to a fee after the rate of two rupees eight annas for each hundred rupees of the value of any goods or property taken and sold by him in execution of any process issued by any Court, Judge, or Magistrate beyond the local limits of the ordinary original civil jurisdiction of the High Court, which fee shall be taken to cover all expenses connected with the seizure and sale, except the expense of advertisements.

16. No fee, estimated upon the amount of the sum for which any person is taken in execution, shall be payable to the Sheriff, or any of his bailiffs, for taking the body of any person in execution on any process issued by any Court, Judge or Magistrate out of the local limits of the ordinary original civil jurisdiction of the High Court; but instead thereof, such fees shall be payable to the Sheriff for taking the body of any person in execution of any such process as shall be settled from time to time by the High Court as aforesaid.

Sheriff's fee for arrests.

17. If any person taken in execution on any such process escapes out of the legal custody of the Sheriff, the Sheriff shall be liable only to a suit for damages in consequence of such escape, sustained by the person at whose suit the prisoner was taken.

Sheriff's responsibility for escapes.

The damages in such a suit and in any other suit against the Sheriff for breach of his official duty shall not exceed the amount of the loss which the breach has really occasioned.

V.—Execution of Decrees.

18. Under any writ of attachment issued out of the High Court, may be seized and sold any lands, houses, or other immoveable property of the party against whose effects such writ issues, whether his estate or interest therein be legal or equitable.

Sheriff's power under writ of attachment to seize and sell immoveable property.

19. The Sheriff under any such writ may put the purchaser in possession of such of the lands, houses, or other immoveable property sold under such writ, of which the judgment-debtor is in the actual possession, and of which an actual delivery can be made.

Procedure when property is in possession of judgment-debtor.

20. If the immoveable property liable to be sold under such writ be in the possession of any person other than the judgment-debtor, the Sheriff shall not seize such property, but shall sell and convey all the right, title, and interest of the debtor; and such conveyance shall pass the same interest to the purchaser as if the same had been executed by the debtor.

Procedure when property is not in possession of judgment-debtor.

Effect of conveyance.

21. In such last-mentioned case, if the property be situate beyond the local limits of the ordinary original civil jurisdiction of the High Court, the Sheriff shall notify such sale to the Judge of the District, who shall cause notice of the same to be officially proclaimed in like manner as if the sale had been effected under a decree of his own Court.

Notification of sale to District Judge.

Proclamation of sale.

22. In any case of intended sale of immoveable property beyond the said local limits, the Sheriff shall cause a notice specifying the time and place of the intended sale to be stuck up in some conspicuous place in the office of the Collector of the District within which such property is situate and also on some conspicuous part of the property to be sold.

Publication of notice of sale.

The number of days between the publication of such notice and the sale shall not be less than fourteen days, if the property be not distant more than one hundred miles from the High Court; if the distance shall exceed one hundred miles, the number of days shall be increased by an additional day for every fifty miles of such excess of distance.

Length of time for publication of notice.

The want of such notice or any irregularity in respect thereof, shall not vitiate the sale in the hands of a *bonâ fide* purchaser.

23. If any lands, houses, or other immoveable property be seized or liable to be sold under any such writ, the Court may, on application to it on behalf of the execution-debtor or of any one of several execution-debtors, if the Court be satisfied that there is reasonable ground to believe that the amount of the judgment may be raised by mortgage of the estate, postpone the sale for a term not exceeding one month to enable the defendant to raise the amount, and direct that the money ordered to be levied by such execution shall be raised by mortgage instead of sale of such lands, houses, or other immoveable property, upon such terms as to the payment of interest upon the judgment or otherwise as the Court thinks fit, and in such case it may give all necessary directions for the execution of such mortgage.

When judgment debt may be raised by mortgage instead of sale.

24. Under any such writ of attachment may also be seized money, bank-notes, cheques, bills of exchange, promissory notes, hundís, Government securities, bonds, or other securities for money, and also debts belonging to the said person;

Sheriff empowered to seize money, bank-notes, &c.;

and the Sheriff or other officer having the execution of the writ may pay or deliver over to the party suing out such execution, any money or bank-notes so seized, or a sufficient part thereof,

and to pay execution-creditor;

and shall, with the order of the Court, endorse over or transfer, and without such order, shall hold any such cheques, bills of exchange, promissory notes, hundís, bonds, or other securities for money as a security for the amount by such writ directed to be levied, or so much thereof as have not been otherwise levied and raised,

with order of Court to endorse over, and without such order to hold, cheques, bills of exchange, &c.;

and may, where he retains the same, sue in his own name as such Sheriff or officer for the recovery of the sum or sums secured thereby, or for any debt seized as aforesaid, when the time of payment thereof has arrived.

and to sue in his own name for amount secured by bills of exchange, &c.;

or for debts.

The payment to such Sheriff or other officer, or to the party entitled under such endorsement or transfer, by the party liable, with or without suit, or the recovery and levying execution against the party so liable, shall discharge him to the extent of such payment or of such recovery and levy in execution, as the case may be, from his liability on any such cheque, bill of exchange, promissory note, hundí, bond, security, and debt;

and such Sheriff or other officer shall pay over to the party suing out such writ, the money so to be recovered, or such part thereof as may be sufficient to discharge the amount by such writ directed to be levied;

and if, after satisfaction of the amount so to be levied, together with Sheriff's poundage and all lawful charges and expenses, any surplus remain in the hands of such Sheriff or other officer, the same shall be paid to the party against whom such writ

shall be so issued, unless the same is duly attached in the hands of such Sheriff or other officer.

Indemnity for Sheriff.

Provided that no Sheriff or other officer shall be bound to sue any party liable upon any such cheque, bill of exchange, promissory note, hundí, bond, security or debt, unless the party suing out such execution gives security to the Sheriff for indemnifying him from all costs and expenses to be incurred in the prosecution of such suit, or to which he may become liable in consequence thereof; the nature and amount of such security to be determined, in case they cannot agree, by the proper officer of the Court in which such suit is brought, or, if the Court so order, by some other person appointed by the Court for such purpose.

The expense of preparing and executing such security shall be deducted out of any money recovered in such suit, and the nett proceeds only in this and other cases provided for by this Act shall be considered as received in satisfaction of the debt due to the execution-creditor.

Sheriff empowered to receive interest on Government security seized by him;

25. If the Sheriff or other officer under any writ of attachment seize any Government security standing in the name of, or belonging to, the party against whose property such writ is issued, he may receive the interest due on such Government security, whether specially endorsed or otherwise, and sign a receipt for the same;

and to sell and endorse such security.

and may also sell and dispose of such Government security through a broker at the market-rate of the day;

and if the endorsement of such party is required to transfer such Government security, the Sheriff or other public officer shall endorse the same thus, "*A. B.* by *C. D.*, Sheriff;"

and such endorsement shall be as effectual to pass the said Government security and to give a good title to the holder thereof as if the same had been endorsed by the party himself or his duly constituted attorney.

No debt to be sold by Sheriff.

26. No debt shall be sold by the Sheriff under the process of the High Court, but the same shall be realized in the mode hereinbefore directed.

Shares in public Company may be charged in execution.

27. If any person against whom any writ of execution has issued, has any interest in any stock or shares in any public Company, whether incorporated or not, carrying on business in India and within the reach of the process of the Court out of which such writ of execution has issued, the High Court or any Judge thereof, on the application of the party who has sued out such writ of execution, may make an order *ex parte* that such interest in such stock or shares, or such of them or such part thereof respectively as the said Court or Judge thinks fit, shall stand charged with the payment of the amount due in respect of such writ of execution.

Such order shall have the like effect and entitle the person in whose favour the same is made to the same remedies and priorities as a charge executed in favour of such person by the person against whom execution shall have been issued;

Service or notice of such order upon or to the Company whose stock or shares is or are the subject of such order, or upon or to any person claiming an interest in such stock or shares, shall have the like effect, and shall entitle the person in whose favour such order is made to the same remedies against such Company or such last-mentioned person as notice of a charge executed of even date with such order by the person against whom execution has been issued in favour of the person at whose suit the same has been issued.

Proviso.

Nothing herein contained shall prevent the person against whom such order has been made or any other person affected thereby, from applying to the Court or Judge by whom such order has been made for its discharge on such grounds as may be just.

Property standing in name of any officer of Court.

28. If such debtor has any interest in any property standing in the name of the Accountant-General or any other officer of the High Court, or in the dividends, interest, or annual produce thereof, the Court or a Judge thereof may make an order that the interest of the defendant in such property shall be applied in payment of such debt, and the Court or Judge may from time to time make such other orders as may be necessary to give full effect to the above provision.

Party arrested under writ when entitled to discharge.

29. A plaintiff or defendant arrested under any writ issued upon any judgment, order, decree, or sentence of any of the said Courts whereby money is ordered to be paid to any party, shall be entitled to his discharge from such arrest on payment or tender to such party or his attorney in the cause, or to the Sheriff or Gaoler in whose custody such person may be under such writ, of the amount directed to be levied by such writ.

Order of attorney issuing writ when sufficient for discharge of party.

30. A written order under the hand of the attorney in the cause by whom any such writ has been issued, shall justify the Sheriff, Gaoler, or person in whose custody the party may be under such writ in discharging such party, unless the party for whom such attorney professes to act has given written notice to the contrary to such Sheriff, Gaoler, or person in whose custody the opposite party may be.

Attorney not to give order for discharge without client's consent

Such discharge shall not be a satisfaction of the debt, unless made by the authority of the creditor; and nothing herein contained shall justify any attorney in giving such order for discharge without the consent of his client.

Time for which unexecuted writ remains in force.

31. A writ of execution, if unexecuted, shall not remain in force for more than one year from the date of such writ, unless renewed in the manner hereinafter provided;

Renewal of writ.

but it may, at any time before its expiration, be renewed by the party issuing it for one year from the date of such renewal, and so on from time to time during the continuance of the renewed writ by being marked with the seal of the High Court and with a memorandum, signed by the officer, of the date of the day, month, and year of such renewal, or by such party giving a written notice of renewal to the Sheriff signed by the party or his attorney and bearing the like seal of the Court and memorandum signed by the officer as aforesaid;

and a writ of execution so renewed shall have effect and be entitled to the same priority as the original writ would have had.

Renewed writ entitled to same priority as its original.

Provided, however, that no writ of possession shall be renewed without the special leave of the High Court or a Judge thereof.

Proviso as to writ of possession.

32. The production of a writ of execution or of the notice renewing the same, purporting to be marked with such seal and signed as aforesaid, showing the same to have been renewed according to this Act, shall be sufficient evidence of its having been so renewed.

Evidence of renewal.

33. All property of every kind that may be seized under a writ issued from the High Court, may be seized also under a writ of sequestration duly issued from the same, and the seizure must in all cases be made in the mode directed by this Act as to seizures under writs,

Seizure under writ of sequestration.

and any sum ordered by the Court to be realized by a sequestration, shall be realized in the same mode, and not otherwise, as if directed to be levied under a writ of attachment.

Sum ordered to be realized may be levied as under writ.

SCHEDULE.

(see section 2.)

I.—Statutes.

Year, reign and chapter.	Subject.
53 Hen. 3, c. 21	Replevin by Sheriff.
13 Edw. 1, c. 39	Delivery of writs to Sheriff.
28 Edw. 1, c. 16	False returns.
c. 19	Restoration of issues of land seized without cause.
Statutes of the Exchequer.	Wrongful distresses by Sheriff.
23 Hen. 6, c. 9	Sheriff not to let his county to ferm.
23 Hen. 6, c. 9	Sheriff's fees; Sheriff to let to bail, &c.
1 Mary, Stat. 2, c. 8	Sheriff not to be a Justice of the Peace.
29 Eliz., c. 4	Sheriff's fees.
3 Geo. 1, c. 15, s. 8	Power of Under Sheriff in case of death of Sheriff.

II.—Acts.

Number and year.	Title.
VIII of 1852 ...	An Act for remunerating the Sheriffs of Calcutta, Madras and Bombay for the execution of Mofussil process under Act XXIII of 1841.
VI of 1855 ...	An Act to extend the operation of, and regulate the mode of executing writs of execution in Her Majesty's Supreme Courts of Judicature.

SCHEDULE—*continued*

III.—Charters.

Charter establishing the Supreme Court of Judicature at Fort William, dated 26th March 1774.	Clause IX.
Charter establishing the Supreme Court of Judicature at Madras, dated 26th December 1800.	Clauses XV, XVI, XVII.
Charter establishing the Supreme Court of Judicature at Bombay, dated 8th December 1823.	Clauses XX, XXI, XXII, XXIII.

STATEMENT OF OBJECTS AND REASONS.

This Bill is the second of the series of measures which have been prepared in order to diminish the bulk of the English Statute-law in force, or supposed to be in force, in the Presidency Towns. It repeals some ten Statutes relating to the office of Sheriff, and it consolidates, with such amendments as are required by present circumstances, the clauses of the Charters under which the Sheriffs are appointed, and the two Indian Acts which relate, respectively, to their fees for executing Mofussil process and to their functions in executing decrees made by the High Courts in the exercise of original civil jurisdiction.

CALCUTTA; *June* 1874.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Second Publication.]

The following Bill, and Statement of Objects and Reasons accompanying it, are published for general information, by order of his Excellency the Governor-General, under the 22nd of the Rules for the Conduct of the legislative Business of the Council of the Governor-General:—

No. 12 OF 1874.

A Bill to declare the Statutes in force in the Presidency Towns.

WHEREAS doubts exist as to what Acts of Parliament are in force in the Towns of Calcutta, Madras and Bombay, and it is expedient to remove such doubts; It is hereby enacted as follows:—

Preamble.

1. The enactments specified in the schedule hereto annexed (being Statutes or parts of Statutes passed before the year 1727), shall be deemed to apply, so far as local and personal circumstances admit, to all places and persons within the local limits of the ordinary original civil jurisdiction of the High Courts of Judicature at Fort William, Madras and Bombay.

Statutes declared to apply to the Presidency Towns.

2. All other Statutes passed before the said year 1727 are hereby repealed so far as they affect British India.

Repeal of other Statutes passed before 1727.

Provided that the repeal by this Act of any enactment shall not affect any Statute, Act or Regulation in which such enactment has been applied, incorporated or referred to:

Nothing in this Act shall—

(*a*) affect the validity or invalidity of any thing already done or suffered, or any indemnity already granted, or any right or title already acquired or accrued, or any remedy or proceeding in respect thereof, or the proof of any past act or thing;

(*b*) affect any principle or rule of law, or established jurisdiction, form or course of pleading, practice or procedure, or existing usage, custom, privilege, restriction, exemption, office or appointment, notwithstanding that the same respectively may have been in any manner affirmed, recognised or derived, by, in, or from any enactment hereby repealed;

(*c*) give validity to any transaction which, if it had occurred before the passing of this Act, would have been held invalid on the ground of its breeding litigation or of being otherwise unrighteous, unconscientious, or against public policy;

(*d*) provide or restore any jurisdiction, office, custom, privilege, restriction, exemption, usage or practice not now existing or in force;

(*e*) operate as an implied repeal of any enactment,

(*f*) affect the laws of inheritance, partition, succession and contract as administered to Hindús, Muhammadans, Buddhists, Sikhs and Jainas, or

(*g*) affect the laws of marriage as administered to persons not being Christians.

3. No Statute passed in or after the said year 1727 shall be deemed to apply to any part of British India, unless it expressly or by necessary implication extends thereto; and no Statute shall be deemed to extend by necessary implication to any part of British India merely because it repeals, amends or modifies the whole or any part of a Statute mentioned in the said Schedule.

When Statutes passed in or after 1727 apply.

SCHEDULE.

(See Section 1.)

13 Edw. 1, c. 1	Statute *De Donis*.
c. 22	Waste between joint-tenants and tenants in common.
18 Edw. 1, cc. 1, 2	Statute of *Quia Emptores*.
25 Edw. 1, *Magna Carta*, c. 1	Confirmation of liberties.
c. 29	Civil and Criminal Justice.
Confirmatio Cartarum ...	Confirmation of charters.
5 Edw. 3, c. 9	Unlawful attachment.
25 Edw. 3, Stat. 1	Status of children born abroad of English parents.
28 Edw. 3, c. 3	Civil and Criminal Justice.
27 Hen. 8, c. 10, ss. 1, 2 and 3... ...	Uses.
28 Hen. 8, c. 15, ss. 1, 2 and 4... ...	Offences committed at sea.
31 Hen. 8, c. 1	Partition by joint-tenants.
32 Hen. 8, c. 32	Partitions by tenants for life.
c. 34, ss. 1 and 2	Grantees of reversions.
c. 37, s. 4	Recovery of rent after death of *cestui que vie*.
c. 38, (except as concerning pre-contracts)	Degrees of consanguinity.
13 Eliz., c. 5, ss. 1, 2, 3 and 5	Fraudulent conveyances.
27 Eliz., c. 4, ss. 1, 2, 3 and 4	Fraudulent conveyances.
3 Char. 1, c. 1	Wrongful imprisonment.
18 & 19 Char. 2, c. 11, ss. 1, 2 and 4 ...	Evidence of death of *cestui que vie*.
29 Char. 2, c. 3, ss. 7—11	Trusts.
31 Char. 2, c. 2, except s. 14	Habeas Corpus Act.
1 Will. & Mar., c. 6	Coronation Oath.
1 Will. & Mar., Sess. 2, c. 2	Bill of Rights.
2 Will. & Mar., c. 1	Confirmation of late Parliament.
4 Will. & Mar., c. 16	Frauds by clandestine mortgages.
9 Will. 3, c. 17	Inland Bills of Exchange.
10 Will. 3, c. 22, down to and including the words "in any wise notwithstanding"	Inheritance of posthumous children.
11 Will. 3, c. 7	Piracy.
c. 12	Punishment of Governors of plantations.
12 & 13 Will. 3, c. 2, except so far as it has been repealed by 4 & 5 Anne, c. 20, ss. 27, 28, 1 Geo. 1, Stat. 2, c. 51, and 7 & 8 Vic., c. 66	Act of Settlement.
1 Ann., c. 2, ss. 4 and 5	Demise of Crown. Abatement.
3 & 4 Ann., c. 8, ss. 1 to 11 (inclusive) ...	Promissory Notes.
4 & 5 Ann., c. 3, ss. 9, 10, 21 & 27 ...	Attornment. Payment of rent. Warranties. Actions of account.
c. 16	Naturalization of Princess Sophia.
6 Ann., c. 41, s. 8	Privy Council.
c. 72	Discovery of deaths of tenants for life.
7 Ann., c. 5, s. 3	Naturalization.
8 Geo. 1, c. 24	Piracy.

NOTE.—The references in this schedule are made to the Statutes as printed in the Revised Edition, London, 1870.

STATEMENT OF OBJECTS AND REASONS.

1. It is generally held that, on the establishment of Mayors' Courts in Calcutta, Madras and Bombay, under the charter of 13 Geo. I, the Statute-law in force in England in the year 1726 was introduced into the Presidencies so far as it was applicable to local circumstances.

2. Under the qualification contained in the last part of this proposition, large classes of Statutes are obviously excluded. The Statutes, for instance, dealing with the subjects of Advowsons, Bankruptcy, Bastardy, Clergy, Commons, Dilapidations, Elections, Excise, Forests, Police, Poor-relief, Sewers, Tithes, and the qualification of Sheriffs were clearly framed with reference to the special conditions of England, and have never been deemed applicable to any part of India. Other Statutes, such as those relating to Coroners, Crimes, Executors, Jurors, Justices of the Peace, Lotteries, Oaths, Pleading and Riotous Assemblies, have been rendered by recent Indian legislation unnecessary and therefore inapplicable. Others again, which form the basis of the English law of real property—such as the Statutes of Entails, of Subinfeudations and of Uses—are clearly applicable to the property of Englishmen, though not to the property of Hindús or Muhammadans. But there remain some as to which differences of opinion may and do exist. If we inquire, for example, whether the Statutes relating to Maintenance and Champerty are in force in Calcutta, whether a European can be arrested here on a Sunday, or what law regulates distresses for arrears of rent exceeding a thousand rupees, we at once fall into doubt and difficulty. It is true that, in the absence of any declaration by the legislature, the Judges of the late Supreme Courts and those of the present High Courts have exercised the function of declaring what Statutes shall be deemed in force within the local limits of their ordinary original jurisdiction. But, in the first place, the Judges have made such declarations in comparatively few instances; in the second place, their decisions have not always been reported; thirdly, it may be doubted whether their declarations have always laid down the most convenient rule; and fourthly, the rulings of the Judges of one Supreme or High Court are not binding upon or always in accord with those of another.

3. Even in cases where a Statute certainly operates in the Presidency Towns, it is not always clear whether it applies to all the inhabitants or only to Europeans. Thus every one agrees that the Statutes of Elizabeth relating to Fraudulent Conveyances are in force in Calcutta, Madras and Bombay; and in Calcutta, the late Mr. Justice Norman (2 Ind. Jur. O. S. 7) held that they applied to Natives as well as to Europeans. But in Madras, Sir Adam Bittleston seemed to think, in a case reported in 6 Mad. H. C. Rep. 474, that they applied only to British subjects other than Hindús or Muhammadans.

4. The result is a great amount of uncertainty as to the Statute-law in force in the Presidency Towns, and this not merely in rare instances, but in matters of not infrequent occurrence.

5. Two Bills published simultaneously with this, and relating to Distresses and to the Sheriff, will, when passed, remove many doubts as to the law applicable to the subjects with which they respectively deal.

6. There will remain, however, many ancient Statutes as to which it is desirable that the legislature, in consultation with the learned Judges of the Presidency High Courts, should expressly declare either that they are, or that they are not, in force in Calcutta, Madras and Bombay. This, shortly, is the object of the present Bill. It declares that some forty Statutes shall, subject to the tests of applicability which have always prevailed, be deemed to apply to all places and persons in the Presidency Towns. These include Magna Carta; the Statutes *De Donis* and *Quia Emptores*; the Statute of Uses; the Statutes relating to Fraudulent Conveyances; the Habeas Corpus Act; the Bill of Rights and the Act of Settlement. It then expressly repeals all other Statutes passed before 1727.

7. Some of the Statutes inserted in the Schedule have been so inserted for caution's sake, but with considerable doubts as to whether they are of any practical use. Such are the provisions of the Statute of Frauds relating to trusts of land; the Statute 4 & 5 Will. & Mar., cap. 16, relating to frauds by mortgagors effected by concealment of prior charges; the Stat. 10 Will. III, cap. 22, giving the benefit of contingent remainders to posthumous children; and the Stat. 4 & 5 Anne, cap. 3, relating to warranties. There are also three Statutes conferring powers on the Admiralty Court in case of piracy, as to which it is not known whether they are still of any use or are superseded by modern legislation. These are the 28 Hen. VIII, cap. 15; the 11 Will. III, cap. 7, and the 8 Geo. I, cap. 24.

8. Among the repealed Statutes are those which relate to Champerty and Maintenance, eight in number. It is not intended by the repeal to alter the law on this subject, and a cautionary clause [sec. 2, cl. (*c*)] has been inserted accordingly. It is certain that the law applicable to transactions to which the names of Champerty and Maintenance are still applied, has drifted away from the Statutes; that numerous transactions falling within the scope of the Statutes are perfectly lawful, and that the decisions have in modern times been rested more and more on the broad principles of the Common Law, and have turned on the question whether or no the impeached transaction is unrighteous, unconscientious, and against public policy. The law in the Mofussil on this subject appears to be in a very efficient and reasonable state, though unaided by the Statutes; and the same law prevails in the Presidency Towns. See the case of *Grose* v. *Amirtamayi Dasi*, 4 Beng. L. R. Orig. C. J. 1, in which all the foregoing remarks are illustrated.

9. The opportunity has been taken to declare that no Statute passed in or after the year 1727 shall be deemed to apply to any part of British India, unless it expressly or by necessary implication extends thereto; and that no Statute shall be deemed to extend by necessary implication to any part of British India merely because it amends or modifies or repeals the whole or any part of a Statute mentioned in the Schedule.
